

# COLLECTIVE METHODS OF ACCELERATION

Papers presented at the Third International Conference on  
Collective Methods of Acceleration

dedicated to the late Gersh Itskovich (Andre) Budker

University of California, Irvine

May 22-25, 1978

Editors:

**N. Rostoker**

*University of California, Irvine*

**M. Reiser**

*University of Maryland*

TABLE OF CONTENTS

	<u>Page No.</u>
<u>Editors' Introduction</u>	
<i>John P. Blewett and Francis T. Cole</i> . . . . .	xiii
<u>Preface</u> . . . . .	xv
<u>Dedication</u> . . . . .	xvii
<u>Introduction</u>	
<i>M. Reiser and N. Rostoker</i> . . . . .	xxi
<u>Early Papers on Collective Accelerators</u>	
Relativistic Stabilized Electron Beam, <i>G. J. Budker, Cern Symposium 1956</i> . . . . .	1
Collective Linear Acceleration of Ions, <i>V. I. Veksler et al., Dubna Conference 1956</i> . . . . .	23
The Use of Plasma Waveguides as Accelerating Structures in Linear Accelerators, <i>Ia. B. Fainberg, Cern Symposium 1956</i> . . . . .	33
<u>Electron Ring Accelerator</u>	
Trapping and Compression of Electron Rings in the Pustarex Device, <i>C. Andelfinger, W. Herrmann, D. Jacobi, H. B. Schilling, M. Ulrich, Max-Planck-Institut für Plasmaphysik, Garching, Germany</i> . . . . .	49
Longitudinal Coupling Impedance of an Electron Ring in an Anisotropic Conducting Cylinder, <i>Peter Merkel, Max-Planck-Institut für Plasmaphysik, Garching, Germany</i> . . . . .	59
Optical Diagnostics of Electron Rings, <i>Uwe Schumacher, Max-Planck-Institut für Plasmaphysik, Garching, Germany</i> . . . . .	71

TABLE OF CONTENTS

Page No.

Experiments on Nitrogen Ion Acceleration in Prototype of Collective Heavy Ion Accelerator in the Joint Institute for Nuclear Research,  
*G. V. Dolbilov, V. I. Mironov, V. G. Novikov, E. A. Perelshtein, G. K. Radonov, V. P. Sarantsev, A. P. Sumbaev, S. I. Tutunnikov, V. P. Fartushny, A. A. Fateev, A. S. Schuelin, Joint Institute for Nuclear Research, Dubna, USSR.* . . . 83

Magnetostatic System of the Collective Electron Ring Accelerator,  
*V. K. Plotnikov, Institute for Theoretical and Experimental Physics, Moscow, USSR* . . . . . 97

Recent Studies on the University of Maryland Electron Ring Accelerator,  
*C. D. Striffler, R. A. Meger, M. P. Reiser, H. Kim, R. Kulkarni, E. Lindstrom, T. F. Wang, University of Maryland.* . . . . . 103

Beam Trapping in the University of Maryland Electron Ring Accelerator Experiment, *R. A. Meger, C. D. Striffler, and E. Lindstrom, University of Maryland* . . . . . 117

Wave Accelerators

A High Current, Steady State Auto-Resonant Accelerator, *W. E. Drummond, Austin Research Associates, Austin, Texas.* . . . . . 129

Auto-Resonant Acceleration of Ions, *M. L. Sloan, E. P. Cornet, W. W. Rienstra, J. R. Thompson, and H. V. Wong, Austin Research Associates, Austin, Texas.* . . . . . 145

## TABLE OF CONTENTS

	<u>Page No.</u>
The Auto-Resonant Accelerator Experimental Program, <i>J. R. Uglum,</i> <i>H. A. Davis, D. E. Hasti, and</i> <i>T. P. Starke, Austin Research</i> <i>Associates, Austin, Texas.</i> . . . . .	157
Performance Characteristics of the Auto-Resonant Accelerator Electron Beam Generator, <i>D. E. Hasti, J. R.</i> <i>Uglum, Austin Research Associates,</i> <i>Austin, Texas, and Roger White,</i> <i>Maxwell Laboratories, Inc.,</i> <i>San Diego, California.</i> . . . . .	171
Computer Simulation of Linear and Nonlinear Wave Growth Phenomena, <i>G. I. Bourianoff, B. N. Moore, and</i> <i>B. R. Penumalli, Austin Research</i> <i>Associates, Austin, Texas.</i> . . . . .	191
Nonlinear Characteristics of Cyclo- tron Waves in an ARA Configuration, <i>R. J. Faehl, W. R. Shanahan, and</i> <i>B. B. Godfrey, Los Alamos Scien-</i> <i>tific Laboratory, Los Alamos,</i> <i>New Mexico</i> . . . . .	211
Slow Cyclotron Wave Growth by Periodic Inductive Structures, <i>W. R. Shanahan, B. B. Godfrey,</i> <i>and R. J. Faehl, Los Alamos Scien-</i> <i>tific Laboratory, Los Alamos,</i> <i>New Mexico</i> . . . . .	235
Space Charge Waves and Collective Ion Acceleration, <i>R. Adler, G.</i> <i>Gammel, J. A. Nation, G. Providakes,</i> <i>and R. Williams, Laboratory of</i> <i>Plasma Studies and School of Elec-</i> <i>trical Engineering, Cornell Univer-</i> <i>sity, Ithaca, New York</i> . . . . .	249

# TABLE OF CONTENTS

	<u>Page No.</u>
Theoretical Problems of Collective Ion Acceleration by Intense Relativistic Electron Beams, <i>K. V. Khodataev, Radio Technical Institute, Moscow, USSR, and V. N. Tsytovich, Lebedev Institute, Moscow, USSR</i> . . . . .	263
<u>Relativistic Electron Beams -</u>	
<u>Controlled Potential Well</u>	
The Power Balance Limit in Collective Ion Acceleration, <i>C. L. Olson, Sandia Laboratories, Albuquerque, New Mexico</i> . . . . .	291
Experiments and Scaling of the IFA, <i>C. L. Olson, Sandia Laboratories, Albuquerque, New Mexico</i> . . . . .	305
Collective Ion Acceleration in a Gas Gradient, <i>R. Mako, A. Fisher, C. W. Roberson, N. Rostoker, and D. Tzach, University of California at Irvine</i> . .	317
A Multiple Stage Acceleration Concept for REB Powered Collective Ion Acceleration, <i>J. Adamski, Boeing Aerospace Company, Seattle, Washington</i> . . . . .	341
A Theory of Ion Acceleration in a Gas by the Pinching of a High-Current Electron Beam, <i>V. G. Gapanovich, A. A. Kolomensky, and I. I. Logachyov, P. N. Lebedev Physical Institute, Moscow, USSR</i> . . . . .	355
Dielectric Guide Controlled Collective Ion Acceleration, <i>A. Greenwald and R. Little, Spire Corporation, Bedford, Massachusetts</i> . . . . .	371

TABLE OF CONTENTS

Page No.

Collective Ion Acceleration and Intense Electron Beam Propagation Within An Evacuated Dielectric Guide, *J. A. Pasour and R. K. Parker, Naval Research Laboratory; R. L. Gullickson, Air Force Office of Scientific Research; W. O. Doggett and D. Pershing, North Carolina State University* . . . . . 383

Propagation of an Intense Electron Beam and Acceleration of Ions in Vacuum Dielectric Channels, *A. V. Agafonov, A. A. Kolomensky, E. G. Krastelev, A. N. Lebedev, and B. N. Yablokov, Lebedev Physical Institute, Moscow, USSR*. . . . . 395

Ion Diodes, Luce Diodes, Auto-Acceleration, etc.

Progress in the Production of Intense Proton Beams with Magnetically Insulated Diodes, *N. Camarcat, P. L. Dreike, C. B. Eichenberger, S. Glidden, M. Greenspan, D. A. Hammer, S. Humphries, Jr., J. Maenchen, J. Neri, R. N. Sudan, and L. G. Wiley, Laboratory of Plasma Studies, Cornell University, Ithaca, New York* . . . . . 413

Collective Ion Acceleration in the System with Insulated Anode, *V. M. Bistritsky, A. N. Didenko, Ya. E. Krasik, V. S. Lopatin, V. I. Pcdkatov, Institute for Nuclear Physics, Tomsk, USSR* . . . . . 445

Collective Ion Accelerator on the PR1590, *R. F. Hoeberling, Air Force Weapons Laboratory, Kirtland Air Force Base, New Mexico* . . . . . 463

TABLE OF CONTENTS

Page No.

Collective Field Acceleration by the Interaction of a Relativistic E-Beam with an Apertured Solid Dielectric Anode (Luce Geometry), *O. Zucker, J. Wyatt, and H. Sahlin, Lawrence Livermore Laboratory; J. S. Luce, EG&G, Inc., San Ramon, California; B. Freeman, Los Alamos Scientific Laboratory, and R. Gullickson, Air Force Office of Scientific Research.* . . . . . 475

Collective Acceleration and Focusing of Fast Ion Bursts, *J. S. Luce, EG&G, Inc., and W. Bostick and V. Nardi, Stevens Institute of Technology* . . . . . 493

Helix Controlled Collective Ion Acceleration, *W. W. Destler, H. Kim, and G. T. Zorn, University of Maryland, and R. F. Hoerberling, Air Force Weapons Laboratory, Albuquerque, New Mexico* . . . . . 509

Collective Ion Acceleration in Reflecting Electron Systems, *R. A. Mahaffey, J. A. Pasour, J. Golden, and C. A. Kapetanacos, Naval Research Laboratory.* . . . . . 521

Autoacceleration Research at N.R.L., *M. Friedman and T. Lockner, Naval Research Laboratory, Washington, D. C.* . . . . . 535

Autoaccelerator Dynamics and Stability, *John G. Siambis, Naval Research Laboratory.* . . . . . 553

Pulsar Polar Caps as Foil-Less Diodes, *Dean F. Smith, High Altitude Observatory, National Center for Atmospheric Research, Boulder, Colorado.* . . . . . 569

## New Problems and Accelerator Concepts

Collective Acceleration of Heavy Ions - Problems and Prospects, <i>M. Reiser, University of Maryland.</i> . . .	581
High Current Pulsed Linear Ion Accelerators for Inertial Fusion Applications, <i>S. Humphries, Jr., G. Yonas, and J. W. Poukey, Sandia Laboratories, Albuquerque, New Mexico</i> . . . . .	595
The Collective Focussing Ion Accelerator, <i>A. A. Mondelli and N. Rostoker, Maxwell Laboratories, Inc., San Diego, California.</i> . . . . .	611
Investigation of the Radial and Longitudinal Distribution of Electron Clouds Confined in a Magnetic Mirror, <i>S. Eckhouse, A. Fisher, and N. Rostoker, University of California at Irvine.</i> . . . . .	639
Design and Construction of a Toroidal Collective Focussing Experiment, <i>S. Eckhouse, A. Fisher, R. Prohaska, and N. Rostoker, University of California at Irvine</i> . . .	667
Collective - Effect Electron Acceleration, <i>R. B. Miller, Sandia Laboratories, Albuquerque, New Mexico</i> . . .	675
Radiative Collapse of a Relativistic Electron-Positron Plasma to Ultrahigh Densities, <i>F. Winterberg, Desert Research Institute, Reno, Nevada</i> . . . . .	687

TABLE OF CONTENTS

	<u>Page No.</u>
Experiments on the Translation and Compression of Field-Reversing E-Layers and Generation of Superdense MeV-Proton Beams in a Magnetically Insulated Diode, H. H. Fleischmann, D. J. Rej, M. Tuszewski, and S. C. Luckhardt, Cornell University, Ithaca, New York . . . . .	699
<u>List of Participants</u>	712
<u>Author Index</u>	721
<u>Subject Index</u>	723
