

**A COLLECTION OF
TECHNICAL PAPERS**

Part 1

**29th Intersociety Energy Conversion
Engineering Conference**

August 7-11, 1994/Monterey, CA

**29th INTERSOCIETY ENERGY CONVERSION
ENGINEERING CONFERENCE**

TABLE OF CONTENTS

Paper No.	Paper Title	Page No.
VOLUME I		
Session 62-AP-01	Aircraft Power	
94-4107	The Development of a Highly Reliable PMAD System for Civil Transport Aircraft A. Coleman and I. Hansen	N/A
94-4108	Evaluation of an Extra Long Life, Maintenance-Free Nickel-Cadmium Battery Design for Aircraft and Terrestrial Applications Z. Johnson	N/A
94-4109	Dynamic Modeling of High-Speed Aircraft Generators During Forced Power Transfer Operations A. Arkadan, R. Vander Heiden, and J. Defenbaugh	1
Session 33-AP-02	Aerospace Power Systems—Automation	
94-3957	Using Clips for AXAF's Power Automation Knowledge-Based System A. Bykat	7
94-3958	Engineering Analysis Subsystem Environment (EASE) for Spacecraft Engineering Subsystem Mission Operations K. Bahrami, M. Lei, S. Mikes, and B. Rein	13
94-3959	Towards A Generic Explanation Facility for Clips Expert Systems A. Bykat	19
94-3960	An Intelligent Load Controller N. Dugal-Whitehead, R. Trimble, and G. Moores	25
94-3961	Development of a Solid State Power Switch for the Cassini Spacecraft K. Clark, J. Dalton, and D. Karmon	31
Session 17-AP-03-I	Batteries for Aerospace Power I	
94-3868	Performance Improvement of Astra 1A Ni-H₂ Batteries Using Optimized Battery Charging Schemes and Reconditioning C. Tommasini and R. Pontual	37
94-3869	Air Force Nickel Hydrogen Cell Low Earth Orbit Life Test Update D. Smellie and C. Hill	46
94-3870	Space Station Nickel-Hydrogen Battery ORU Test P. Dalton and F. Cohen	52
94-3871	Qualification and Life Testing of 4.5 Inch Diameter Aerospace Nickel-Hydrogen Batteries A. Powers, R. Oswald, and M. Do	N/A

WD=withdrawn

NA=not available

94-3872	Use of 26% KOH Electrolyte for Long Term Nickel-Hydrogen Geosynchronous Missions S. Stadnick and H. Rogers	58
94-3873	Discharge Model of the Nickel Electrode: Cause for Lower Plateau Discharge A. Zimmerman	63
Session 34-AP-03-II Batteries for Aerospace Power II		
94-3962	History, Test, and Production Status of USAF Ethanol Impregnation Process Used in Production of Aerospace Nickel Oxide Electrodes D. Picket, A. Powers, F. Montague, and G. Zelter	69
94-3963	Current Status of Nickel-Hydrogen Battery Technology Development D. Coates and C. Fox	75
94-3964	An Empirical Nickel-Hydrogen Battery Model H. Rogers, S. Stadnick, and T. Pemberton	81
94-3965	Implementing Hydrogen Gas Pressure for Improved Nickel-Hydrogen Battery Charge. S. Verzwylt	N/A
94-3966	Advanced Separator Study for Nickel-Hydrogen Batteries T. Harvey and G. Nowlin	86
94-3967	Charge Schemes for 40Ah Common Pressure Vessel NiH₂ Cell J. Armantrout and D. Hafen	93
Session 49-AP-03-III Batteries for Aerospace Power III		
94-4037	Update on ESA Nickel-Cadmium Life Test Data J. Verniolle and B. Hendel	99
94-4038	TOPEX/Poseidon NiCd Battery Performance: Comparison of Flight and Ground Test Results F. Deligiannis, R. Sherwood, D. Perrone, and J. DiStefano	105
94-4039	An Improved Theoretical Ni-Cd Battery Performance Model P. Timmerman	112
94-4040	Design and Performance Data for Sealed Fiber Nickel Cadmium (FNC) Cells M. Anderman and S. Di Stefano	N/A
94-4041	An Approach to Reduced Costs for Nickel-Cadmium Batteries V. Cavenell	118
94-4241	The Clementine Nickel Hydrogen Common Pressure Vessel Battery J. Garner, W. Braun, and J. Zagrodnik	124

WD=withdrawn

NA=not available

Session 63-AP-03-IV Batteries for Aerospace Power IV

94-4110	Air Force Titan IV Centaur Launch Vehicle 250 Ampere-Hour Lithium-Thionyl Chloride Battery Development, Qualification, and Flight Status J. McDermott, G. Olsen, and M. Svaleson	130
94-4111	Development of a 250 Ah Lithium Thionyl Chloride Battery M. Milden, H. Bittner, J. Coggi, K. Lejman, M. Svaleson, T. Conroy D. Blehm, J. Fermin, and J. Semerie	136
94-4112	Potassium Cathode-Carbon Anode Continuously Refuelable Primary Battery M. Schachter	142
94-4113	Battery Definition for the Mars Environmental Survey Mission (MESUR) Pathfinder S. Dawson, D. Perrone, B. Otzinger, and S. Di Stefano	146
94-4114	Aerospace NiH2 Batteries and Cells B. Lacout and P. Denoncourt	N/A

Session 50-AP-04 Computer Modeling of Spacecraft Systems

94-4042	AC Characterization and Computer Modeling of GaAs Arrays D. Baxter and A. Brown	N/A
94-4043	Solar Panel Model for Design and Analysis of Power System Regulation Equipment G. Madden and A. Le	151
94-4044	A Time-Invariant Non-Linear Model of a Fully Cross-Strapped Solar Array Switch Network for a Macroscopic Time Scales J. Chen and J. Lovgren	157
94-4045	A Two-Input Tri-State Converter for Spacecraft Power Conditioning W. Imes and F. Rodriguez	163
94-4046	Simulation of a 3-Phase Permanent Magnet Step Motor Operating in the Half-Step Mode F. Rodriguez	169
94-4047	Computer Simulation of an Electrical Power System Using Solar Array Off-Axis Pointing and Duty Cycle Charge Control E. Freeman	N/A
94-4048	Iridium Constellation Power Simulation J. Carulli, G. Davis, and B. Badke	N/A

Session 64-AP-05 Fuel Cells for Aerospace

94-4115	Electrochemical Dual Use Technology Reinvestment for Tomorrow's Automobile J. McElroy, W. Arkilander, and L. Butler	175
----------------	---	-----

WD=withdrawn

NA=not available

94-4116	Radio-Nuclide Initiated Chemiluminescence Fueled Secondary Battery M. Schachter	180
94-4117	Electric Auxilliary Power Unit (EAPU) Program D. Belanger and M. Le.....	N/A
Session 6-AP-07 Power Electronics I		
94-3807	A Mathematical Approach to Minimize the Total Mass of a Space Based Power System by Using Multivariate Non-Linear Optimization D. Hopkins, M. Sarkar, and R. Cull	185
94-3808	Power Processing Unit Options for High Powered Nuclear Electric Propulsion Using MPD Thrusters S. Krauthamer, R. Das, and R. Frisbee	N/A
94-3810	Development of Induction Motors Drives with Real Time PWM Control and Dynamic Modeling of Drive Performance M. Giesselmann and G. Chowdhury.....	190
94-3811	An Axially Laminated Anisotropic Rotor Design for a High Torque Density Switched Reluctance Motor R. Spyker and E. Ruckstadter	196
Session 18-AP-07-II Power Electronics II		
94-3874	Pulse Position Modulation Patterns with Minimum Harmonics for VVVF Inverters M. El-Bakry	N/A
94-3875	DC-DC Power Conversion Using a Resonant Link S. Yuvarajan, M-S. Chen, J. Weimar and G. Fronista	202
94-3876	Development of Variable-Power-Factor MCT Converters S. Yuvarajan, D. Quek, J. Weimar and G. Fronista	206
94-3877	A Comparison of MCTs and IGBTs as Applied to Motor Controllers T. Podlesak, M. Layton and J. Carter	N/A
94-3878	A Novel Active Ripple Filter for the Solar Array Shunt Switching Unit (SSU) M. Moon, B. Cho, and A. Patil	212
Session 65-AP-08-I Management/Distribution I		
94-4118	An Integrated Approach to Power System Control and Protection for Space Platforms B. Russell and S. Williams	218
94-4119	The Development of an Advanced Modular Power Control System with Automated Fault Diagnostics M. Darty	224
94-4120	Intelligent Remote Power Controller W. Jackson	229

WD=withdrawn

NA=not available

94-4121	Nondestructive Detection of Mechanical Flaws in High Voltage Ceramic Capacitors D. Commare	235
94-4122	A High Frequency Tested for Advanced Power Systems B. Kenny	N/A
Session 76-AP-08-II Power Management and Distribution II		
94-4184	A Trade Study of Centralized Versus Distributed Power Conversion for Pluto Fast Flyby M. Underwood	W/D
94-4185	Peak Power Tracker Space Flight Demonstration T. Bavaro	N/A
94-4186	Hubble Space Telescope First Servicing Mission Power System Design P. Blower	239
94-4187	In-Orbit Performance of the STRV-1 Power Conditioning System V. Thakur, D. Olsson, J. Haines, V. van der Zel, and C. Lovett-Linares	245
Session 35-AP-09-I Space Solar Power		
94-3968	High Efficiency GaInP/GaAs Tandem Solar Cells J. Olson, K. Bertness, S. Kurtz, D. Friedman, A. Kibbler, and C. Kramer	251
94-3969	Teflon Bonding of Solar Cell Assemblies Using Pilkington CMZ and CMG Coverglasses—Now a Production Process K. Mullaney, C. Kitchen, K. Bogus, and A. Dollery	257
94-3970	Future Trends in Space Photovoltaics D. Marvin and K. Gledhill	263
94-4238	Lightweight flexible Photovoltaics for Space: A System View J. Armstrong, R. Gehling, and M. Migra	N/A
Session 51-AP-09-II Space Solar Power II		
94-4049	Achieving the Optimum Solar Array Size for Spacecraft C. Goodbody and R. Kimber	267
94-4050	Inflatable Torus Solar Array Technology R. Boswell.....	W/D
94-4051	Hubble Space Telescope Solar Array Change-Out, Mission Anomalies and Returned Flight Hardware C. Winslow	273
94-4230	On-Orbit Management of Spacecraft Solar Array Output Power A. Salim	279
94-4239	Design & Development of a Line-Focus Refractive Concentrator Array for Space M. Piszczor, M. O'Neill, and L. Fraas	282

WD=withdrawn

NA=not available

94-4240	The Clementine GaAs/Ge Solar Array J. Garner	288
Session 7-AP-10-I Space Power Systems I		
94-3812	New Technology for Satellite Electrical Power Systems P. Chetty and W. Cashman	N/A
94-3813	Evolution of the GPS Block IIR Power System P. Malachesky	294
94-3814	A Solar Heated AMTEC Spacecraft Power System E. Chivington, T. Hershey, and M. Schuller	300
94-3815	TOPEX/Poseidon Solar Array On-Orbit (First 20 Months) Performance P. Chetty and E.N. Costogue	306
94-3816	The Powerstick A. Chmielewski and R. Ewell	311
Session 19-AP-10-II Space Power Systems II		
94-3879	Stirling Space Dynamic Power Concepts with Electrical Output of 2 to 250 Watts B. Ross and T. Ashe	N/A
94-3880	Impact of Energy Storage System Mass on the Performance of Orbit Transfer Vehicles Using Solar Electric Propulsion A. Fitzgerald	316
94-3881	The 500 We Solar Alkali Metal Thermal to Electric Converter (SAMTEC) Small Satellite Power System G. Johnson, R. Harty, W. Otting, and J. Ivanenok III	N/A
94-3882	Orbital Management Considerations for NICD Satellite Power Systems B. Tausch	320
94-3883	Spacecraft Electrical Power System Environmental Control and Protection: A Low Earth Orbit Space Station Example C-Y. Lu and I. Aronoff	326
94-3884	Spacecraft Sun Tracking of Solar Energy Collection Devices R. Hill	N/A
Session 36-AP-10-III Space Power System III		
94-3971	Stability Analysis of a Sampex Spacecraft Derived Power System for the Near Mission U. Carlsson, D. Temkin, J. Jenkins, M. Butler, and G. Dakermanji	332
94-3972	High Efficiency Converters Options for a Small Radioisotope Power Sources For Pluto Fast Flyby M. Underwood and R. Ewell	W/D

WD=withdrawn

NA=not available

94-3973	Preliminary Design of a Hydrogen Driven Turbine for Expander Bleed Cycle 12-Ton Cryogenic Rocket Engine S. Sreeyesunath and N. Sugathan	338
94-3974	Modeling and Simulation of Space Station Laboratory Module Secondary Electric Power System K. Karimi and S. Fu	345
94-4235	Source-Load Interactions in Multi-Unit Power Systems H. Venable	351
Session 66-AP-11-I Solar Dynamic Ground Test Demonstrator I		
94-4123	Update of the 2 kW Solar Dynamic Ground Test Demonstration Program R. Shaltens and R. Boyle	359
94-4124	U.S./Russian Solar Dynamic Program G. Perronne	N/A
94-4125	Selection of Solar Simulator for Solar Dynamic Ground Test C. Tolbert	366
94-4126	Hot Loop Testing of the Solar Dynamic Ground Test Demonstration Power Conversion Subsystem P. Amundsen	N/A
Session 77-AP-11-II Solar Dynamics Ground Test Demonstrator II		
94-4189	Fabrication and Testing of the Solar Dynamic Ground Test Demonstrator Heat Receiver H. Strumpf, D. Shah, W. Westelaken, W. Pogue, J. Chin, J. Alvarez, and E. Klucher	372
94-4190	Solar Dynamic Ground Test Demonstration Radiator Design and Test M. Fleming, R. Flores, and R. Sharpe	378
94-4191	System Integration for the Solar Dynamic Ground Test Demonstrator C. Kudija	N/A
Session 8-AP-12-A Space Nuclear Systems—Applications		
94-3817	Integration of the TOPAZ 2 Space Nuclear Reactor with the NEPSTP Spacecraft G. Cameron and E. Reynolds	384
94-3818	An Overview of the Nuclear Electric Propulsion Space Test Program (NEPSTP) Satellite S. Voss and E. Reynolds	394
94-3819	Lunar Surface Fission Power Supplies: Radiation Issues M. Houts and S. Lee	403
94-3820	Simulation of The TOPAZ II Reactor D. Lanning	N/A

WD=withdrawn

NA=not available

94-3821	Space-R 40kWe Thermionic Space Nuclear Power H. Rhee, K. Koester, and J. Wetch.....	N/A
94-3822	High-Power Communication Satellites Power Systems Study A. Josloff and J. Peterson	409
94-3823	Optimal Energy Supply System (ESS) and Parameters Choice for a Transorbital Freight Aircraft N. Artamonov, A. Belik, K. Myagkov, and P. Shukalov	N/A

Session 20-AP-12-B-I Space Nuclear Systems—Reactor Technology Thermionics I

94-3885	Thermionic Reactor Design Studies A. Schock	415
94-3886	Heater Geometry and the Performance of a Thermionic Heat Pipe Module M. Suriano and R. Evans.....	N/A
94-3887	Biphase Inversion System Based on Cesium Key Elements A. Martsinovski, N. Alekseev, V. Kaplan, and S. Electrov	435
94-3888	Tests of Effectiveness of Thermionic Heat Pipe Modules R. Evans, R. LeMire, D. Hidinger, and M. Suriano	442
94-3889	Development of MCTFE: A Computer Modeling Code for Single and Multicell Cylindrical Thermionic Fuel Elements A. Klein and J. Dickinson	446
94-3890	Effects of Non-Uniform Power Densities on Fuel Temperatures of Cylindrical Thermionic Fuel Elements A. Klein, J. Dickinson, and H. Lee	452
94-3891	Monte Carlo Burnup Analysis Code Development and Application to an Incore Thermionic Space Nuclear Power System A. Klein and S. Abdul Hamid	457

Session 37-AP-12-B-II Space Nuclear Systems—Reactor Technology Thermionics II

94-3975	Evaluation of the Thermionic Work Function of the Mandrel Side of Chemically Vapor Deposited and Vacuum Plasma Sprayed Refractory Metals J. Hartenstine, K. Horner-Richardson, D. Bosch, and D. Jacobson	463
94-3976	Fabrication and Testing of Full-Length Single-Cell Externally Fueled Converters for Thermionic Reactors A. Schock	471
94-3977	The Main Results of the IPPE Long Lifetime TFE Verification Program A. Vizgalov, V. Petrovsky, V. Pupko, A. Ryshkov, G. Kuptoz, and A. Belov	N/A
94-3978	Closed Spaced Thermionic Converter With Isothermic Electrodes R. Kucherov and Y. Nikolaev	490

WD=withdrawn

NA=not available

94-3979	Thermal-Hydraulics and Thermionic Analysis of TOPAZ-2 Thermionic Fuel Element Using HXTOPAZ A. Klein and H. Lee	493
94-3980	Modeling Transient Thermal Hydraulic Behavior of a Thermionic Fuel Element for Nuclear Space Reactors A. Klein and A. Al-Kheliewi	499
Session 52-AP-12-C Space Nuclear Systems Reactor Technology—Thermoelectrics		
94-4052	Experimental Characterization of a High Efficiency AMTEC Cell M. Schuller, R. Le Mire and E. Reiners	505
94-4053	Series and Parallel Electrical Performance Testing of Integrated Heat Pipe/AMTEC Protosystem M. Schuller, R. Le Mire and E. Reiners	N/A
94-4054	Results of Vibration Testing of Proposed Solid Electrolytes R. Evans	N/A
94-4055	Investigation of (110)Mo, (110)W, Monocrystals and Nb Polycrystals, Implanted with Oxygen Ions and Used as TEC Electrodes L. Tsakadze	N/A
Session 53-AP-12-D Space Nuclear Systems—Bimodal Propulsion		
94-4056	Sonic Cesium Supply for Bi-Modal Thermionic Reactors W. Anderson, J. Bland, and K. Homer-Richardson	510
94-4057	Thermionic System Space Radiator Design W. Anderson and J. Rosenfeld	517
94-4058	Performance Investigation of a Liquid Metal Heat Pipe in a Flowing Hydrogen Environment B. Miller and M. Jacox	N/A
94-4059	Shunt Regulator for a 6 KW Spacecraft Thermionic Nuclear Reactor G. Dakermanji, M. Butler, Goliasewski, and Kusnierkiewicz	N/A
94-4060	Americium-241 and -243 as Ion-Engine Propellant M. Schachter	523
Session 67-AP-12-E Space Nuclear Systems—Isotopic Power		
94-4127	Status Report on Performance of Radioisotope Thermoelectric Generators Using Silicon Germanium Thermoelectric Elements G. Bennett, R. Campbell, L. Putnam, and R. Hemler	529
94-4128	Effect of Fuel and Design Options on RTG Performance Versus PFF Power Demand A. Schock and C. Or	535
94-4129	Design Modifications for Increasing the BOM and EOM Power output and Reducing the Size and Mass of RTG for the Pluto Mission A. Schock, C. Or and V. Kumar	541

WD=withdrawn

NA=not available

94-4130	Radioisotope Powered AMTEC Systems J. Ivanenok, III and R. Sievers.....	548
94-4131	Cassini RTGs - Small Scale Module Tests C. Kelly and P. Klee	554
94-4132	A Survey of Current Russian RTG Capabilities A. Chmielewski, R. Lange, and A. Borshchevsky	559
Session 78-AP-12-F Space Nuclear Systems—Thermoelectric Materials		
94-4192	SP-100 Thermoelectric Cell Testing at JPL R. Ewell and A. Zoltan	564
94-4193	Thermopower Investigation of Amorphous Silicon and Germanium Behavior D. Chiu.....	569
94-4194	Development of Improved p-Type Si-20 at. % Ge by Addition of Fullerenes B. Cook and J. Harringa	W/D
94-4195	Promising Thermoelectric Materials for Terrestrial-Space Applications T. Caillat, J. Vandersande, J. Fleurial, and A. Borshchevsky	575
94-4196	Status of p-type SiGe with Nanophase Inclusions N. Scoville, C. Bajgar, J. Rolfe, J. Vandersande, and J. Fleurial	580
94-4197	The Preliminary Design of a 500 Watt Thermoelectric Generator J. Bass, N. Elsner, and F. Leavitt	586

VOLUME II

Session 1-AP-13 Space Power: Requirements and Issues		
94-3783	Air Force Space Power for the Future I. Kuck	N/A
94-3784	Space Power - What's Old is New Again H. Brandhorst Jr.	592
94-3785	NASA's Changing Environment G. Reck and M. Hirschbein.....	N/A
94-3786	Enhancing Access to Space: NASA's Advanced Space Transportation Technology Program G. Bennett	598
94-3787	Space Science Mission Power Requirements and Issues W. Smith	604
94-3788	Space Station Power Requirements and Issues E. Huckins III and P. Ahlf	608

WD=withdrawn

NA=not available
