Proceedings of
The Fourth International Conference on
Signal Processing Applications & Technology

Santa Clara, California, USA
September 28 - October 1, 1993

Volume II

© DSP Associates
• INDUSTRIAL & SPECIALIZED APPLICATIONS

Evaluating Metal Cleanliness Using DSP Technology, Gregory Carayannis and Ziaodong Shi
McGill University Metals Processing Ctr., Department of Metallurgical Engineering, Canada 895

Stand Alone System for Flood and Avalanche Forecasting
Sulabha Sheth and Nimish Shelat, M.S. University, Computer Science Department, India 905

Nuclear Pulse Processors Using Digital Filters
Hemchandra Shertukde and L.F. Godbout, Univ. of Hartford, Electrical Engineering Dept., USA 914

DSP Based Two-Dimensional Bar Code Laser Scanning System
John Barile, Symbol Technologies Inc., Bar Code Scanning Division, USA 919

Focus Estimation for IC Wire-Bond Height Measurement
Han Ooi Lim, Wei Zhang and Liang Mong Koh, Nanyang Technological University, Singapore 926

Fast PC Videoboard for Insect Flight Simulator, J. Balendonck, P.J. Nijenhuis, G.W. Haalboom,

DSP-Based Harmonic Distortion Measurement System, Following IEC 1000-4-7 Standard
Jesús Ruiz, Elisabete Aramendi, Alvaro Ubierna, Alberto Leturiondo, Univ. del Pais Vasco, Dep. Automática,
Electrónica y Telecom., Spain; and Javier Amantegui, Iberdrola S.A., Spain 939

Application of Adaptive Processing to On-Line System Identification and Optimal Control in the
Hydrocarbon Industry, Gary L. Funk, SYSTEMHOUSE, CIM & Control Systems, USA 946
Application of Digital Signal Processing to Highway Bridge Monitoring
Qinghong Cao, Scott A. Ségan, and Weiping Li, Lehigh University, EECS Dept. - Packard Lab., USA
Ben T. Yen, Lehigh University, Civil Engineering Department, USA

Implementation of a Recursive Correlation Algorithm for Real-Time Measurements of a Varying Time Delay, Carl During and Kennet Jansson, Royal Institute of Technology, Dept. of Machine Elements, Sweden

DSP Applications in the Control of Uninterruptable Power Supplies
Terry Zumwalt, International Power Machines, Control Systems Division, USA

DSP-Based Magnetic Bearing Control
Ron Kipp, Kingsbury Inc., Magnetic Bearing Systems Division, USA
Dan Greenwood, STAR Semiconductor, USA

Application of Adaptive Noise Cancellation to Water Shape Measurements
O. Dumas, B. Shafai, H. Lev-Ari, and D.H. Brooks
Northeastern University, Dept. of Electrical & Computer Eng., USA

Using a DSP as an Embedded Emulation Controller
David Ruimy Gonzales, Motorola, DSP Design Section, USA

• INSTRUMENTATION & TESTING

A DSP-Based Data Acquisition System for Propagation Experiments with the Olympus Satellite, Jorge Luis Vieira Rodrigues, Antonio Joaquim da Sila Teixeira, Armando Carlos Domingues da Rocha, and José Carlos S. Neves, Univ. of Aveiro, Dept. of Electronics, Portugal

Real-Time Combustion/Injection Analyzer Using GenlE System
Tien D. Doan, Darryl D. Baldwin, and Geoff M. Turk, Caterpillar Inc., USA

• MULTIMEDIA

Low Cost DSP for Multimedia Applications
Shaul Berger, Yaël Gross, Gideon Wertheizer, and Offer Sharon, DSP Semiconductors Inc., USA

Synthesis and Control of Hundreds of Sinusoidal Partials on a Desktop Computer without Custom Hardware, A. Freed, Univ. of California-Berkeley, Ctr. for New Music & Audio Technologies, USA; X. Rodet and Ph. Depalle, IRCAM, France

Programmable Architectures for Real-Time Video Compression
Tom Kopet, Array Microsystems, Director of Systems Engineering, USA

A High Performance Audio Codec for Videoconferencing
Antony Crossman, PictureTel Corporation, USA

DeskMax™: Desktop MultiMedia Conferencing
Eduardo Pérez, VTEL Corporation, USA

• NEURAL NETWORKS

An Improved Algorithm for Principal Component Analysis, Liang-Hwa Chen and Shyang Chang
National Tsing Hua University, Department of Electrical Engineering, Taiwan R.O.C.
Self-Restorable Stochastic Neurocontrol Using Back-Propagation and Forward-Propagation Training Algorithms, Mario Mastriani, Univ. de Buenos Aires, (SECID) - Fac. de Ingenieria, Argentina

A New Neural Network-Based Algorithm for Vector Quantization
Ce Zhu, Jun Wang, Lihua Li, and Zhenya He, Southeast Univ., Dept. of Radio Engineering, P.R.China

Multicriteria Neural Network with Applications to Image Reconstruction from Projections
Yuanmei Wang, University of Arizona, Optical Sciences Center, USA

A Neural Network Approach to Array Processing
Brigitte Colnet, CRIN-INRIA and Imagine Technologies, France
Paul Bertrand, Imagine Technologies, France

* PARALLEL PROCESSING

A General Purpose Processing System Based on Digital Signal Processors
C. Campa, P. D'Alessandro, and E. Rossini, Contraves Italiana S.p.A., SRE Department, Italy

Measurements of Parallelism: Speedup vs. Processors
Yedidiah Solowiejczyk, Neuronex Inc., USA

A Hierarchical Parallel Processor for Digital Signal Processing Applications
D. Douglas Wilmarth, SKY Computers Inc., USA

Parallel I/O Processing, Reuben Yomtov, Unisys Corporation, USA

The Fig Board: A Parallel DSP Solution
Rob Haydt, Clark University, Ctr. for High Performance Computing, USA
Yousif Asfour, Boston University, Center for Adaptive Systems, USA

New Ways in Image Processing with Parallel DSPs
Manfred Helzle, hema Elektronik, Germany

Performance Measurements on a Multi-DSP Architecture with TMS320C40, M. Platzer, Ch. Steger, and R. Weiss, Graz Univ. of Technology, Institute for Technical Informatics, Austria

* PROCESSOR ARCHITECTURES

Embedded Computing with a Comprehensive Reduced Instruction Set Processor
Ravi Rao, Intel, Military and Special Products Division, USA

On-Chip Parallelism in Digital Signal Processing
Ravi Rao, Intel, Military and Special Products Division, USA

Real-Time DSP Architectures: A Case Study
Doug Williams and John Zeiler, Sparton Corporation, Sparton Electronics Technical Ctr., USA

The Carry Increment Adder: A Fast Adder Structure for DSP Applications
Hyunsik Jang, Kuchang Kang, Chuldong Oh, and Kisoo Hwang
Hyundai Electronics Ltd., Semiconductor R & D Laboratory, Korea
**RADAR**

*Time Sidelobe Suppression for Random Binary Phase Codes*
Gu Hong, Liu Guosui, Zhu Xiaohua, and Shen Weixin, East China Inst. of Technology, P.R. China

*ADS System Implementation Study*
Lu Boying, Beijing U. of Aeronautics & Astronautics, Dept. of Electronic Eng., P.R. China

*A DSP-Based Data Processing System for MST Radar*
Martín F. Sarango, Jorge L. Chau, Enrico Ragaini and Edilberto H. Vasquez
Universidad de Piura, Laboratory of Electronics, Peru

*Systolic Arrays for CFAR Detectors Based on Order Statistics*
Dong-Seog Han, Samsung Electronics, AV R&D Center - Adv. TV & Display Lab., Korea
Hwang-Soo Lee, Korea Adv. Inst. of Science & Technology, Dept. of Info. & Comm. Engineering, Korea

*On the Novel Application of Number Theoretic Methods to Radar Detection*
Vaughan Clarkson, Defence Science & Technology Organisation, Electronic Warfare Div., Australia
Jane Perkins, Cooperative Research Center for Robust & Adaptive Systems, Australia
Iven Mareels, Australian National University, Faculty of Engineering & Info. Tech., Australia

*Some Results on AMTD Schemes Based on AR Map Method*
V.P. Haneefa, Insat Master Control Facility, India
A. Saimanohara and K.M.M. Prabhu, Indian Inst. of Technology, Ctr. for Systems & Devices, India

*An Ultra High Speed 1 Megapoint Fast Convolver*
Phillip Roberts, Catalina Research Inc., USA

*Adaptive Fixed Range Radar Receiver*
Lawrence J. Scally, Catalina Research Inc., USA

*An MTI Processor for Ultrawideband Radars*
Fahad Al-Faraj and Hussian Al-Ahmad
University of Bradford, DSP Research Group-Electronic Imaging Unit, UK

*Tracking Performance Measures and Optimisation Conditions for Phased Array Radar*
M. Munu, I. Harrison, and M.S. Woolfson, Univ. of Nottingham, Dept. of Electr. & Electr. Eng., UK

**• RADIO, SATCOM & NAV**

*A Voice Communications Simulator*
Erik Espe, Micro Processor Systems A.S., Norway

*VHF Air-Ground Data Link Message Processing System*
Lu Boying and Zhu Quiling
Beijing University of Aeronautics & Astronautics, Dept. of Electronic Engineering, P.R. China

*A DSP Implemented FSK Detector Generating Side Information in a Frequency-Hopping HF System*

*Wideband HF Receiver with Digital Quadrature Splitting*
Frederik Oscarsson, National Defence Research Establishment, Division of ESM, Sweden
Arne Lindblad, National Defence Research Est., Div. of Radio Systems & Wave Propagation, Sweden

*A GPS Acquisition System Using Acousto-Optics*
O. Bazzi, R. Torguet, C. Bruneel,
J.M. Rouvaen, and J.C. Huignard, Université de Valenciennes, I.E.M.N., Department OAE, France

*DSP Implementation of a Spread Spectrum Receiver Using High Level Code Synthesis*
Matthias Pankert and Oliver Mauss, Aachen University of Technology, Germany
A New Approach to Decode an FM Stereo Signal Using a DSP
Mark E. Utter, Texas Instruments, Semiconductor Division, USA

(π/4) DQPSK Spread Spectrum Performance Analysis in the Frequency-Selective Fading Channel, Manouchehr S. Rafie and Soo Kwan Eo, Comdisco Systems Inc., USA

• ROBOTICS

B. Allotta, M. Di Natale and P. Dario, Scuola Superiore S. Anna, ARTS Lab., Italy

Fuzzy Controlled Robotic Manipulator Using the Motorola MC96002
A.A. Chachad and R.D. Daruwalla, Victoria Jubilee Technical Institute, Electrical Eng. Dept, India

A Fuzzy ASIC Set for Robotic Arm Control, Arif I. Khan, Dhananjay V. Keskar, Kushagra V. Vaid, and Vijayanand A.S.J., University of Bombay - VJTI, Department of Computer Technology, India

3-D Surface Approximation Using Polygons of Fixed Orientation for a Vision System in a Mobile Robot, H. Al-Hamadi, Queensland Univ. of Tech., Sch. of Electr. & Electronic Sys. Eng., Australia
H.T. Tsui, The Chinese University of Hong Kong, Dept. of Electronic Engineering, Hong Kong

Motion Planning and Control with Uncertainty While Sensing the Environment
Claudio Facchinetti, Institute for Microtechnology, Electronics & Pattern Recog. Group, Switzerland

• SPECIAL SESSION

Protecting Your Intellectual Property
Dennis S. Fernandez Esq., Fenwick & West, USA

• SPEECH CODING ALGORITHMS

Extreme Waveform Coding, Frank Ridkosil, DataJet Inc., USA

Singular-Vector-Excited Linear Predictive (SVELP) Speech Coding, Miguel Arjona Ramírez and Normonds Alens, University of São Paulo, Escola Politécnica, Dep. Eng. Eletrônica, Brazil

Improving CELP Voice Quality by Modifying the Excitation
Miguel A. Ferrer-Ballester, Universidad de Las Palmas de Gran Canaria, ETSI Telecom., Spain
Aníbal R. Figueiras-Vidal, UPM, GPSS-DSSR ETSIT Telecom, Spain

Least Squares Multi-Pulse Linear Predictive Analysis
Kadri Hacioglu, Eastern Mediterranean University, Faculty of Engineering, Turkey

Adaptive Least Mean Squares Harmonic Speech Analysis/Synthesis
Tarek I. Haweel, Assiut University, Electrical & Computer Eng. Dept., Egypt

• SPEECH CODING IMPLEMENTATION

Real-Time Implementation of High Quality Wideband Audio LD-CELP at 32 kb/s Using Two-DSP Hardware, Oded Gottesman, OPTIBASE, Israel
Yair Shoham, AT&T Bell Laboratories, Speech Coding Research Department, USA

Dynamic Excitation Model for Linear Predictive 2400 BPS Vocoder
Eugene P. Ponomariev, Signal-ROKS Ltd., Russia
Lattice Filters for Adaptive Postfiltering and CELP Coding
Eugene P. Ponomariev, Signal-ROKS Ltd., Russia

Real-Time Implementation of the Homomorphic Vocoder
Shahram Hoseini, Mohammad R. Nakhai, and Mahmoud Tabiani, Sharif University of Technology, Electronic Research Center, Iran

Real Time Processing of a 5.45 KBits/sec TCELP Coder/Decoder on DSP Motorola 56001
A. Goalic and S. Saoudi, ENST, Dépt. Math. & Systs. de Communications, France

A Mid-Complexity Coder for Voice Mail
J-P. Renard, J-F. Rasaminjanahary, and G. Zanellato, Lernout & Hauspie, Belgium

Speech Downsampling-Coding with High-Frequency Estimation Using Neural Networks
Hideyuki Urita and Kiyoshi Mizui, Kanto Gakuin University, Dept. of EE - Mizui Lab., Japan

Computationally Minimized 6.8 kbps CELP for Real-Time Recorder with a 16-Bit Fixed-Point DSP Core, Jae-Bum Hong, Bang W. Lee, Kyosik Lee, and Youngjin Kim Samsung Electronics Company, Korea

A Low Bit-Rate Speech CODEC Suitable for Cellular Radio Systems, Yoshiaki Asakawa, Hidetoshi Sekine, Makoto Takashima, Hitachi Ltd., Central Research Laboratory, Japan Nobuyoshi Ishikawa, Hitachi Ltd., Semiconductor & Integrated Circuits Div., Japan Toshiyuki Matsuda, Hitachi Ltd., Telecommunications Division, Japan

VoicePump™: Voice-Over-Data Modem Technology Utilizing ASM-CELP Speech Compression at 4800, 7200, and 9600 Bits Per Second, Cole Erskine, Steve Ammon, and David Dickson, Analogical Systems, USA

A Fixed-Point Implementation of CELP Speech Vocoder
J.F. Rasaminjanahary and G. Zanellato, Lernout & Hauspie Speech Products, Belgium

A Flexible Multirate Speech Coder
Terrence G. Champion, Rome Laboratories, Digital Speech Laboratory, USA Joseph B. Evans, University of Kansas, Electrical & Computer Engineering, USA

• SPEECH RECOGNITION ALGORITHMS

Wavelet Parameterization for Speech Recognition
Richard F. Favero and Robin W. King, University of Sydney, Dept. of Electrical Eng., Australia

A Simple and Efficient Voiced/Unvoiced Classifier
Gao Yang, Faculté Polytechnique de Mons, Lab. T.C.T.S., Belgium H. Leich, Lernout & Hauspie Speech Products n.v., Belgium

The Use of Line Spectral Pair Frequencies in Speaker Recognition
Mohammad Reza Aref and Habib Asghari, Khajeh Nassir Toosi Univ. of Technology, Iran

The Effect of Neighboring on the Learning of Phoneme Recognition Neural Networks
Fikret Gürgen, Bogazici University, Department of Computer Engineering, Turkey

• SPEECH RECOGNITION IMPLEMENTATION

A Novel Algorithm for Word Spotting and Rejection of Non Vocabulary Words
Jianming Song, University of Sydney, Department of Electrical Engineering, Australia
Multi-Speaker Speech Recognition with Neural Networks
Li Li-Mei and Zhang Li-Peng, Beijing Univ. of Posts & Telecom, Dept. of Telecom Engr., P.R. China

A Representation for Recognition of Isolated Words Spoken In the Romanian Language
Corneliu Burileanu, Politechnic University of Bucharest, Romania
Luigi Eduard Bojan, Research Institute for Automation, Romania

Speaker Independent Persian Speech Recognition
F. Fekri, M. Tabiani, and M.R. Nakhai, Sharif University of Technology, Iran

Using a Multi-Layer Perceptron Neural Net for Human Voice Identification
David Dunn, U.S. Air Force Academy, USA

An Experimental System for Automatic Speaker Recognition, Ciro A. Martinez García-Moreno and Hernando Silva-Varela, CICESE Research, Applied Physics Dept., Mexico

Automatic Sampling System for Speaker Recognition Using the the Interspectral Coherence Function, Luis-Manuel Tomás Balibrea, Antonio García Sánchez, José María Fernández Moreno, and José-Luis Ramón García, University of Murcia, Spain

Intercepstral Correlation in Speaker Identification/Verification with Very Short Speech Signals
A. García-Sánchez, F. Martínez, and J.L. Ramón, Universidad de Murcia, Dep. of Radiology and Medical Physics, Spain

Real-Time Continuous Speech Recognition Integrating Extensive Grammars for Spoken Language, David Clementino and Egidio Giachin, Centro Studi e Lab. Telecom., Italy

Development of a Real-Time Endpoint Detection Algorithm, Hang Seop Lee and Minsoo Hahn Electronics & Telecom. Research Inst., Speech Applications Section, Korea

Adaptive Condensed Nearest Neighbour Network with an Interruptable Retraining Mode for Speech Recognition, U. Gaertner and D. Barschdorff University of Paderborn, Electrical Measurement, Germany

Speech Technologies: The Algorithm Software that Lets DSP OEMs Talk to Mass Markets, Bart Verhaeghe, Lernout & Hauspie Speech Products, USA

A Compact and Cost-Effective Speaker-Dependent Isolated Word Recognition System for Consumer Applications, Youngjin Kim, Geun-Rae Cho, Bang W. Lee, Kyosik Lee, and Jae-Bum Hong, Samsung Electronics Company, Korea

Speaker Independent Persian Speech Recognition
F. Fekri, M. Tabiani, and M.R. Nakhai, Sharif University of Technology, Iran

Using a Multi-Layer Perceptron Neural Net for Human Voice Identification
David Dunn, U.S. Air Force Academy, USA

An Experimental System for Automatic Speaker Recognition, Ciro A. Martinez García-Moreno and Hernando Silva-Varela, CICESE Research, Applied Physics Dept., Mexico

Automatic Sampling System for Speaker Recognition Using the the Interspectral Coherence Function, Luis-Manuel Tomás Balibrea, Antonio García Sánchez, José María Fernández Moreno, and José-Luis Ramón García, University of Murcia, Spain

Intercepstral Correlation in Speaker Identification/Verification with Very Short Speech Signals
A. García-Sánchez, F. Martínez, and J.L. Ramón, Universidad de Murcia, Dep. of Radiology and Medical Physics, Spain

Real-Time Continuous Speech Recognition Integrating Extensive Grammars for Spoken Language, David Clementino and Egidio Giachin, Centro Studi e Lab. Telecom., Italy

Development of a Real-Time Endpoint Detection Algorithm, Hang Seop Lee and Minsoo Hahn Electronics & Telecom. Research Inst., Speech Applications Section, Korea

Adaptive Condensed Nearest Neighbour Network with an Interruptable Retraining Mode for Speech Recognition, U. Gaertner and D. Barschdorff University of Paderborn, Electrical Measurement, Germany

Speech Technologies: The Algorithm Software that Lets DSP OEMs Talk to Mass Markets, Bart Verhaeghe, Lernout & Hauspie Speech Products, USA

A Compact and Cost-Effective Speaker-Dependent Isolated Word Recognition System for Consumer Applications, Youngjin Kim, Geun-Rae Cho, Bang W. Lee, Kyosik Lee, and Jae-Bum Hong, Samsung Electronics Company, Korea

Underwater Systems & Sonar

An Application of DSP Technique in Underwater Target Automatic Tracking
Qihu Li, Institute of Acoustics Academia Sinica, Signal Processing Lab., P.R. China

Robert C. Trider, Defense Research Establishment Atlantic, Canada
James L. Hanlon, Iotek Inc., Canada

Real-Time DSP-Based Underwater Communications
Victor Barroso, Pedro Geada, and João P. Gomes, Instituto Superior Técnico, Portugal
Real-Time Quality Assessment of Seismic Time Series
Peter K. Møller, Technical University of Denmark, Electronics Institute, Denmark

Multi-Resolution Processing in FM Bat Sonar
Zhen-Biao Lin, High Quality International Inc., USA

• VLSI ARCHITECTURES

VLSI Architecture for On-Line Computation of Fast Orthogonal Transforms
Hamid Bessalah, Ctr. de Dev. des Technologies Advancées, Algeria

A Prototype SCalable Array Processor (SCAP), W. Marwood and A.P. Clarke
Defence Science & Technology Organisation, Materials Research Laboratory, Australia

A VLSI Inner Product Processor with Built-In Self-Test for Real-Time DSP Applications
Janusz A. Starzyk and Chiung-Hsing Chen, Ohio University, Dept. of Electrical Engineering, USA

VLSI BAM CHIP, S.M. Rezaul Hasan, University of California - Los Angeles, USA
Ng Kang Siong, Universiti Sains Malaysia, Sch. of Electrical & Electronic Eng., Malaysia

DAC: A Silicon Compiler Framework for the Design of DSP ASICs, J.V. McCanny, Y. Hu, and M. Yan, Queen's University of Belfast, Institute of Advanced Microelectronics, UK

Asynchronous Systolic Realization for One-Step Adaptive Lattice Predictors
Kamran Reihani and Miguel Mayorga, New Mexico State University, Physical Sciences Lab., USA

A Systolic Structure for 2-D Digital Filters
Zhijian Hu, Graham King, and Zhirun Hu, Southampton Institute, Information Systems Division, UK

A Linear Systolic Array Using DSP Microprocessors
R. K. Sharma and A. Mahanta, Indian Institute of Technology, Dept. of Electrical Eng., India

Modular Matrix Multiplication on Systolic Arrays with Bounded I/O Bandwidth
M. Salah Seleim, Nazih El-Derini, and Layla Abou-Hadeed
Alexandria University, Faculty of Engineering, Egypt
