Table of contents

1 Mine design and planning

Teaching mine design in a technological modern environment
*G.V.R. Landman*

Technological schemes of development with ore transport by blast and mud stream
*E. I. Rogov, S. M. Bekbayev, A. Zh. Kushtayev, A. P. Volkov, V. L. Dyukov & A. I. Borschchagovsky*

Decision support system in planning and design of multiple open-pit mine
*F. Sheng, Q. M. Zhou & Q. X. Yun*

An application of geostatistical modeling and 3-D optimization of the final pit limits for a lignite deposit
*J. Mastoris, E. Topuz, M. Karmis, P. Schilizzi & K. Modis*

Applications of multistage mining in surface mining
*Q. X. Yun, G. Q. Huang & H. I. Guan*

Conception of the sound man-made landscape creature in open cast mining
*V. V. Gailish, V. I. Suprun & I. G. Agaphonov*

2 Mine planning and generation

A preparation of the databases for the computer planning of the surface mine
*B. R. Rakishev, M. B. Sadykov, A. B. Begalinov & S. M. Kikkarin*

The development of the mining plan CAD system for surface coal mines
*Wang Tie, Wei Chunqi & Wang Zhihong*

Development of a workstation based CAD system for the planning of underground and opencast hard rock mines
*F. L. Wilke, L. Szabó & M. Rapp*

Integrated system for geological reserves and deposits evaluation, production programming and surveying with 3-D automatic drawing of graphical outputs
*D. D. Stanescu, A. Dadu, I. Macoviciuc & L. Diaconu-Muresan*

3-D surface modelling with application in the representation of mineral deposits
*I. Macoviciuc & L. Diaconu-Muresan*
3 Mine production planning

The state of long term production planning in open pit mining
H. Sevim & D. D. Lei

The multi-object network decision method for determining the mining plan
Ma Yundong, Sun Baozheng, Gao Hongwei & Song Hualing

Computer aided planning of underground mine exploitations
J.L. Vieira, F. Muge, N. Santos, Q. Rogado & G. Sini

Optimal production scheduling using operations research techniques in a large opencast iron ore mine
S. Maitra, P.V. Rao, D. Sengupta & V.S. Rao

Simulation of mining dynamics for middle- and short-term open pit production planning
S.S. Reznichenko & A. M. Valuev

4 Mine production systems

Three high output and high efficiency models by longwall top coal caving technology
Yu Haiyong, Wu Jian, Li Chongxun & Liu Huaishu

Application of integrational theory of mine production process modelling to optimization of selected parameters of coal panels
R. Magda

Energy requirements in modern stone quarries
R. Ciccu & P. P. Manca

Transportation economics of open-pit mining by 18 m bench
Z. Li

Effective cut-and-fill technologies for thick ore bodies
V.A. Aldambergenov, M.G. Mekteshev, V.S. Muzgina & T.D. Sherbakova

Electric power supply systems for mine machines
A.B. Ivanov

Choice of rational technology to determine boundary between surface and underground mining
N.S. Buktukov

5 Mine design and planning applications

Surface modelling at Serra do Madeira mine in Pitinga, Amazon
E. De Silvio

Geostatistical tin grade modelling at Serra do Madeira mine in Pitinga, Amazon
E. De Silvio

Technological parameter modelling at Serra do Madeira mine in Pitinga, Amazon
E. De Silvio
Optimization method of surface mining depth for inclined and steep multiseam phosphorite deposits in Tunisia
W.Koziol & L. Bouellegui

The selection and design of new No. 2 backfill system in the Longshou nickel mine
Cai Sijing, Liu Tongyou, Ren Hanzhang & Zhu Yuxin

Evaluation of rock mass monitoring during mining of hard coal seam in very difficult mine and geological conditions
V. Petroš & F. Bláha

High productivity longwall mining system in Velenje Coal Mine
M. Kolenc, M. Medved & M. Hudej

The selection of semi-variogram and distribution models for the estimation of recoverable reserve-grade
A. Konuk, G. Yersel & E. Çelebi

6 Innovative mining systems

Gains in Canadian surface mines productivity through innovative schemes
R. K. Singhal, J. L. Collins & K. Fytas

Development of an innovative mining system for hard rock mines using continuous breaking techniques
F. L. Wilke & F. Spachtholz

A drilling approach for the 21st century
B. L. Hodgins

Several strategic problems relating to development of hydraulic coal mining in China
Li Haizhou & Yan Peng

Mining of a thick inclined bauxite deposit by a modified sublevel caving method under marginal conditions of the surrounding rocks’ characteristics

An innovative planning methodology for technological feasibility of underground coal mines
P. K. Banik

7 Mine evaluation, management and mine and equipment information systems

Profitability and the application of activity based working cost analysis in underground gold mining operations
G. L. Smith

A method for a feasibility study of a mining firm
V. Badino & G. L. Michellone

Simulation of exploitation alternatives in marble quarries based upon a recovery index
J. Ribeiro & H. G. Pereira

A mine plan and budgetting system for Turkish Coal Enterprises
N. Çelebi, A. G. Paşamehmetoğlu & T. Hizal
The change in management methods and organizational structures for mining branches of Russian industry
*M.A. Revazov & S.S. Reznichenko* 253

Competitive mine management and economics on polymetallic sulphides
*A.Torres Lopes, R.Alves Pereira & A.M. Rebelo* 257

Setting of planning objectives for mine management in sulphides mines
*F.Real & A.Torres Lopes* 263

The development rules of Mining Management Information System (MMIS)
*Zhang Liqun, Dai Liyan & Luo Shihui* 269

The design and implement of coal mine equipment Management Information System (MIS)
*Zhu Baoyan & Zhang Peijian* 273

8 Simulation, truck dispatching and truck-loader matching

A simulation model for testing a proposed mining operation: Phase 1
*J.R. Sturgul & W.L. Jacobsen* 281

A three-phase simulation model for mine transport analysis
*W.Mutagwaba & S.Durucan* 289

Analysis of shovel-truck operations using STRAPAC
*G.N. Panagiotou & T.N. Michalakopoulos* 295

Equipment selection by simulation modelling of mining machine interactions
*O.V. Tailakov & V.L. Konyukh* 301

System simulation of optimal truck dispatching criteria in open cut mining
*Zhang Youdi, Su Jing, Li Shuguang & Zhang Daxian* 307

Optimizing truck-loader matching
*B. Morgan* 313

9 Equipment selection

Cost effective equipment applications zones
*B. Morgan* 323

Purchasing heavy earth moving equipment: A few considerations
*S.C. Agarwal* 329

Equipment selection based on labor cost saving
*V.L. Konyukh* 335

Training: Development methods
*R. North* 341

Modelling of lignite-waste material mixing during selective mining with BWE
*R. Mevorach, P. Findikakis & G.N. Panagiotou* 347
Optimising the number of Load-Haul-Dump machines in a Swedish mine by using queuing theory – A case study  
Yi Huang & U. Kumar

Using Petri nets to select equipment and schedule complex work operations in underground mining  
V.L. Konyukh, O.V. Tailakov & H.H. Becker

Choice of transport systems for highly efficient longwalls in Polish underground coal mines  
J. Antoniak

The selection and the employment of transport system equipment with the inductive energy transmission for the coal mines  
G.G. Pivnyak

Equipment selection for mechanized longwall panels in thick seam coal mining in Turkey  
T. Ahiska & T. Ünver

Optimisation of the underground mining power feed equipment fleet  
T.M. Urumov & Y.M. Kulayev

Procedure for selection of longwall shearsers and conveyors  
L. Jarno & T. Mazurkiewicz

Selection procedure of coal cutting machine  
T.N. Singh

Practical considerations in selecting boom-type tunnelling machines  
O. Z. Hekimoğlu

Rippibility, cuttibility and machine selection by using geophysical technics in Darca rock quarry, Turkey  
A. Ercan

Methods of planning superproductive excavator railway systems for open-pit mines  

A computer program for the selection of open pit mining equipment and economical evaluation of open pit mining methods  
Y. Çebi, H. Köse & E. Yalçın

10 Equipment performance, measurement, monitoring and maintenance

Damage to conveyor belts by the application of impact bars to loading points  
M. Hardygota & G. Paszkowska

Methods of calculation of belt conveyors  
L. Gladysiewicz, W. Kawalec & M. Hardygota

Benchmarking the performance of Western Australian mines  
T.S. Golosinski & J.W. Abernethy

Design of a predictive maintenance module for mining equipment  
D. Kumar, U. Kumar & P-A. Lindqvist
11 Decision support systems

Fuzzy experiential design method for the support of rockbolt and shotcrete

Huang Hongwei & Du Shouji

A model of fuzzy calculation of the construction cost

Shau Liangshan & Fu Hua
Modelling environmental impact using neural networks techniques 551
E. Clarici, S. Durucan & D. Owen

The application of linear octree encoded property modelling to the Çayeli deposit 557
R. Prissang

Rule based cognitive force control for automation of excavators 563
M. Bodur, H. Zontul, A. Ersak & G. Paşamehmetoğlu

An intelligent modelling assistant for preliminary analysis of mining design 571
Yao Jianguo

An expert system to diagnose a layout plan on coal mines under consideration of rock mechanics 577
P. Antweiler, M. Gutmann, P. N. Martens & A. Groten

Interaction matrix concept application in equipment selection 583
M. K. Göokay

Application of quantitative risk assessment techniques to dragline productivity optimisation 589
R. J. Thompson

Development of an expert system for dragline and stripping method selection 595
B. Erdem, N. Çelebi & A. G. Paşamehmetoğlu

An expert system for the fault diagnosis of the hydraulic systems of underground vehicles 603
X. Wei, B. Denby & D. Schofield

Expert system for rational type, structure and working resistance selection of hydraulic powered support 609
Zhao Hangshan, Yao Jianguo, Si Yuanwei & Chang Huiming

A knowledge-based decision support system development for geomechanical applications 615
M. K. Göokay

A prototype expert system for blasting design 619
E. Nasuf & S. Yazıcı

SEVDUR: An expert system for slope stability analysis 625
A. Özgenoğlu & A. Öcal

Expert computing systems for the solution of collieries prospect development problems 629
V. A. Kharchenko & V. M. Eremeev

Drilling and blasting

Selecting explosives systems and monitoring their performance in surface mines 635
T. N. Hagan & A. R. Cameron

Drilling and blasting technology – Past and present trends 643
C. R. Navalkar

Design and optimization of tunneling blasting operations 651
A new practical method to analyze the blastability of rock
F. Fujimura, L. Soares, W. T. Hennis & M. A. Resende Silva

Effect of dominant discontinuity orientation on blasting: A case study
H. A. Bilgin, A. G. Paşamehmetoğlu & H. T. Özkaşran

Analysis of drilling patterns in underground blasting using different hole diameters

Planning of charge location parameters at the bench
B. R. Rakishev, K. I. Esenberlin & M. B. Sadykov

A face shock-absorber for extracting core-collecting pipes – Potentialities and industrial results
N. Nenkov, S. Bednarz & P. Nedyalkov

Cautious blasting with large diameter holes in Aitik open pit mine, in Sweden
M. Z. Sunu

Pre-splitting technique of blasting – An aid to productivity
M. S. Sandhu & K. K. Khadia

Blast-induced ground vibrations as a decision tool in open-pit mine design
D. Mamurekli

The numerical prediction, analysis and modelling of ground vibration induced by blasting
G. J. Johnston & S. Durucan

Evaluation of dynamic effect of industrial explosions on the roof of extraction chamber
T. M. Ermekov, K. K. Tulebaev, T. K. Keneev & S. M. Bekbaev

Blast rock movement and its impact on ore grade control at the Rain Mine, Newmont Gold Company

The application of LM series raise boring machines to coal mine and hydroelectric engineering
Liu Zhiqiang, Liu Rihui, Li Weiyuan & Chen Xiuying

The reliability analysis of the NONEL detonating system in open-pit
Zhang Liqun, Luo Shihui & Chen Wenlin

Use of elementary explosives in underground mines
M. I. Djarkanov, A. M. Beisebaev & D. I. Lipich

13 Geotechnic

Generalised empirical method for predicting surface subsidence
M. Zhang & A. K. Bhattacharyya

Assessment of surface and subsurface ground disturbance due to underground mining
A. Wahab Khair

The use of physical modelling for undersea mining design
N. Biçer
