1993 AESF Continuous Steel Strip Plating Symposium

May 3-7, 1993
Ritz Carlton Dearborn/Dearborn, MI
Session I

The L-S II Electro-Galvanizing Company ............................................. 1
R. C. Tinsley, H. Nakai, L-S II Electro-Galvanizing Co., Columbus, OH

An Outline of Armco Steel Company’s No. 2 Electrogalvanizing Line .................................................. 11
T.R. Heckard, Armco Research & Technology, Middletown, OH, and
E.A. Williams, Armco Steel Company L.P., Middletown, OH

No. 2 Electrolytic Galvanizing Line at Kashima Steel Works .................................................. 23
Haruhito Onishi, Takashi Shiohara, Tsuyoshi Hattori, Sumitomo Metal Industries, Ltd.,
Ibaraki Prefecture, Japan and Takuya Motoyama, L-S II Electro-Galvanizing Co., Columbus, OH

The New Gravitel Line at I/N Kote .................................................. 31
Mark S. Blaser and Edward T. Nowak, I/N Kote, New Carlisle, IN

Tension Leveling Systems in Electroplating Lines .................................................. 41
Thomas F. Hazen, Herr-Voss Corp., Callery, PA

An Efficient Recovery System for Metal Ions from Electrogalvanizing Effluents .................................................. 51
Katsumi Okutani, Tadashi Nonaka, Hiroshi Ohishi and
Tetsuaki Tsuda, Sumitomo Metals Industries, Ltd.,
Wakayama Steel Works, Wakayama City, Japan

The New Electrogalvanizing Line of Usiminas, Brazil .................................................. 65
R. E. Souza, J. G. de Souza and A. Ignacio, Usiminas, Brazil, and
G. Maresch, Maschinenfabrik Andritz, Ruthner Division, Vienna, Austria

Session II

Development Results on OCC-Systems - Especially with Durasteel at
VOEST-ALPINE Stahl Linz GmbH .................................................. 69
F.M. Androsch, K. Kosters and W. Schiefermoler,
VOEST-ALPINE AG, Linz, Austria

Electrogalvanized Zinc: Crystal Orientation and Corrosion Behavior .................................................. 81
James H. Lindsay and Mark Yergin, General Motors Corporation, Warren, MI, and
C. Ramadeva Shunya, Bethlehem Steel, Bethlehem, PA

Properties of Zn-Co-Cr-Al₂O₃-Composite-Coated Steel Sheet Electroplated in a Sulfate Bath .................................................. 103
Kazuo Mochizuki, Shigeru Kurokawa, Nobuyuki Morito, and
Toshio Ichida, Kawasaki Steel Corporation, Chiba, Japan

Electrodeposition Behavior and Properties of BaCrO₄-dispersed Zn-Ni Alloy Coating .................................................. 111
Makoto Yoshida and Tetsuki Izaki, Yawata R&D Lab,
Technical Development Bureau, Nippon Steel Corporation, Fukuoka, Japan

On-Line Measurement Instrumentation for Quality Assurance and Control .................................................. 123
Michael H. Norbury, Jr., Data Measurement Corporation, Gaithersburg, MD
Detrimental Effects of Lead Contamination in Zinc and Zinc-Nickel Alloy Electroplating ........................................ 131
Bruno Cauwe, Lucien Renard and Alain Weymeersch,
R & D Cockerill Sambre Group, Domaine Universitaire du Sart Tilman, Liege, Belgium

Electrochemical Build-up of Composite Materials at the Surface of Steel Sheets .................................................. 139
Jean Schrynemackers, R & D Cockerill Sambre, Liege, Belgium, and
M. Mertens, C. Calberg, R. Jerome and L. Martinot, University of Liege, Liege, Belgium

Session III
A Study of Strip Plating TFS with Granular Metallic Chromium ................................................................. 143
Hiroki Iwasa, Hideki Nishihara, Toyofumi Watanabe, NKK Corporation, Hiroshima-PRF, Japan

Latest Development in the Area of the High Current Density Tin-Free-Steel Process (HCD-TFS) ................... 151
Martin Develay, Davy McKee Corporation, Pittsburg, PA, and I. J. Kharouf,
USX Engineers and Consultants, Inc., Pittsburgh, PA and John R. Gibson, American Pacific Corp.,
Las Vegas, NV and Daniel Sylvain, UPI TFS Cell, Clecim, S.A. France

Economic Aspects of Reactor Design for Strip Plating Cells ........................................................................... 163
B.K. Paramanathan and G.C. Van Haastrecht, Hoogovens, Ijumuijen, the Netherlands

Some Effects of Plating Bath Variables on the Quality Performance of a Halogen Tinning Line .................. 175
Richard N. Steinbicker, Homer Research Labs, Bethlehem Steel Corporation, Bethlehem, PA

Liquid Back-Flush System—Extending the Life of PSA Through Filtration .................................................... 183
Frank Russo and Michael Palmer, Filtration Engineering, Portland, PA

New Pollution-Clean Tinning Electrolyte ........................................................................................................... 193
V.A. Paramonov, V.P. Vinogradov, Snichermet Steel Works, Moskow, and
V.A. Mirko, Karmetkombinat Steel Works, Karaganda, Russia

Session IV
Influence of Certain Additives on Anomalous Deposition of Zn-Ni and Zn-Co Alloys ........................................... 199
Thomas J. O'Keefe and Hung-Ming Wang, University of Missouri—Rolla, Rolla, MO

Mathematical Analysis of the Relative Velocity in the Up and Down Passes of the
Gravitel Cell As It Relates to Zn-Ni Alloy Plating ......................................................................................... 209
Yung-Herng Yau, Homer Research Laboratories, Bethlehem Steel Corporation, Bethlehem, PA

The Effect of Current Density and Line Speed on the Nickel Content of
Zn/Ni Electroplated Steel Strip Produced on a Gravitel Line ........................................................................... 229
F. H. Guzzetta and D. Nix, Armco Steel Company, Middletown, OH, and
J. A. Heitzenrater, Armco Research & Technology, Middletown, OH

Improved Titanium Anode Technology for High Speed Electroplating Systems ....................................... 239
Kenneth L. Hardee, L. M. Ernes, ELTECH Research Corporation, Fourport Harbor, OH, and
T.E. Moore, PreFinish Metals, Inc., Walbridge, OH

Vapor Deposition as a High Rate Coating Process for Steel-Strip .................................................................. 253
G. Goldschmied and W. Kamer, Maschinenfabrik Andritz, Ruthner Division, Vienna, Austria
Günter Jäsch, Von Ardenne Anlagentechnik, Dresden, Germany

Hydrogen Absorption in Steel During the Preplating Process on an Electrogalvanizing Line ................... 259
J.H. Payer, S.L. Amey and G.M. Michal, Department of Materials Science and Engineering,
Case Western Reserve University, Cleveland, OH

Electrogalvanizing with Insoluble Anodes and a Chloride Electrolyte .......................................................... 265
W. Kamer and G. Maresh, Maschinenfabrik Andritz, Ruthner Division, Vienna, Austria
