CONTENTS

PREFACE ................................................................. iii

THE UNITED STATES GOVERNMENT'S ROLE IN HIGH-PERFORMANCE
MATERIALS FOR INFRASTRUCTURE
by T.J. Pasko, Jr. and G.J. Frohnsdorff ............................... 1

EFFECTS OF PHYSICAL AND CHEMICAL TREATMENTS OF SILICA FUME ON
THE STRENGTH AND MICROSTRUCTURES OF MORTAR
by S. Nagataki, N. Otsuki, and M. Hisada ............................ 21

PRODUCTION OF HIGH-STRENGTH CONCRETE FOR THE HIBERNIA
OFFSHORE CONCRETE PLATFORM
by G.C. Hoff, R. Walum, R. Elimov, and H.R. Woodhead .............. 37

CONCRETE TECHNOLOGY, THE KEY TO CURRENT CONCRETE PLATFORM CONCEPTS
by A.K. Haug .................................................................. 63

MODIFIED NORMAL DENSITY (MND) CONCRETE FOR THE TROLL GBS PLATFORM
by M. Sandvik, T. Hovda, and S. Smeplass ............................. 81

INFLUENCE OF SILICA FUME AND POLYMER DISPERSIONS IN HIGH-PERFORMANCE
CONCRETE ON THE RESISTANCE TO AGGRESSIVE CHEMICALS
by U. Wiens, C. Alfes, and P. Schiessl .................................. 103

SULFATE RESISTANCE AND CHLORIDE PENETRATION CHARACTERISTICS
OF HIGH-STRENGTH CONCRETE
by W.A. Al-Khaja, W.A. Rasheeduzzafar, M.H. Al-Sayed, and A.A. Al-Khoder ...... 123

HIGH-PERFORMANCE CONCRETE USING BLENDED AND TRIPLE BLENDED BINDERS
by P. Fidjestol and J. Freamson .......................................... 135

ENGINEERING PROPERTIES OF HIGH-PERFORMANCE CONCRETES CONTAINING
BLAST FURNACE SLAG UNDER 'IN SITU' MOISTURE AND TEMPERATURE CONDITIONS
by S.L. Mak and A. Lu ................................................... 159

</table>
SINGLE-SPAN, CONTINUOUS, AND SLENDER DEEP BEAMS MADE OF HIGH-STRENGTH CONCRETE
by F.K. Kong, S. Teng, P.P. Maimba, K.H. Tan, and L.W. Guan .......................... 413

EFFECT OF AXIAL LOAD RATIO AND STIRRUPS VOLUME RATIO ON DUCTILITY OF HIGH-STRENGTH CONCRETE COLUMNS
by Q. Wang, G. Zhao, and L. Lin .......................................................... 433

ROLES OF SILICA FUME, SLAG, AND FLY ASH IN THE DEVELOPMENT OF HIGH-PERFORMANCE CONCRETE MICROSTRUCTURE
by S.L. Sarkar ................................................................. 449

MECHANICAL AND DURABILITY-RELATED PROPERTIES OF HIGH-STRENGTH CONCRETE CONTAINING SILICA FUME
by K. Torii and M. Kawamura .................................................. 461

MOISTURE-INDUCED VOLUME CHANGES IN HIGH-STRENGTH CONCRETE
by R. Sri Ravindrarajah, C.M. Mercer, and J. Toth ......................... 475

FRACTURE MECHANICS PARAMETERS INFLUENCING THE MECHANICAL PROPERTIES OF HIGH-PERFORMANCE CONCRETE
by K.M. Lee and O. Buyukozturk .................................................. 491

DEVELOPMENT LENGTH FOR STRAIGHT DEFORMED BARS IN HIGH-STRENGTH CONCRETE
by F.A. Al-Jahdali, F.F. Wafa, and S.A. Shihata ................................. 507

SHEAR BEHAVIOR OF FIBER-REINFORCED HPC DEEP BEAMS
by I.K. Fang and J.Y. Wu .................................................. 523

FREEZING AND THAWING: COMPARISON BETWEEN NON-AIR-ENTRAINED AND AIR-ENTRAINED HIGH-STRENGTH CONCRETE
by Y. Li, B.W. Langan, and M.A. Ward ........................................ 545

EFFECTS OF SILICA FUME ON CREEP AND SHRINKAGE OF STEEL FIBER-REINFORCED CONCRETE
by J.C. Chern and C.Y. Chang .................................................. 561

ROLE OF EXPANSIVE ADMIXTURES IN HIGH-PERFORMANCE CONCRETE
by C. Enyi and L. Huizhen .................................................. 575

EFFECTS OF TESTING VARIABLES ON THE STRENGTH OF HIGH-STRENGTH (90 MPa) CONCRETE CYLINDERS
by N.J. Carino, W.F. Guthrie, E.S. Lagergren, and G.M. Mullings ........... 589
CONTROLLING THE CONSISTENCY OF HIGH-PERFORMANCE CONCRETE BY MIXING TORQUE IN THE READY-MIXED CONCRETE PLANT
by N. Nishiyama .................................................. 633

ADIABATIC TEMPERATURE RISE IN CONCRETE WITH AND WITHOUT GGBFS
by C.T. Tam, Y.H. Loo, and K.F. Choong ...................... 649

THE DRY-MIX/STEAM-INJECTION METHOD FOR PRODUCING HIGH-STRENGTH CONCRETE IN ONE DAY
by T.D. Lin .......................................................... 665

EFFECT OF CONCRETE STRENGTH ON BOND BEHAVIOR UNDER IMPACT LOADING
by C. Yan and S. Mindess ....................................... 679

INFLUENCE OF AGGREGATE PROPERTIES ON FRACTURE ENERGY OF HIGH-STRENGTH CONCRETE
by S. Nakamura, Y. Kitsutaka, and K. Kamimura ............. 701

EVALUATION OF AGGREGATE PROPERTIES ON TENSION SOFTENING BEHAVIOR OF HIGH-STRENGTH CONCRETE
by Y. Kitsutaka, K. Kamimura, and S. Nakamura ............. 711

EFFECTIVENESS OF SUPPLEMENTARY CEMENTING MATERIALS IN REDUCING EXPANSION DUE TO ALKALI-AGGREGATE REACTION IN HIGH-PERFORMANCE CONCRETE
by B. Fournier and V.M. Malhotra ............................. 729

STRENGTHENING MECHANISMS OF HIGH-PERFORMANCE CONCRETE
by W. Jiang and D.M. Roy ....................................... 753

HIGH-STRENGTH CONCRETE FOR HIGH-RISE TOWERS

OBSERVATIONS ON THE FATIGUE BEHAVIOR OF HIGH-STRENGTH LIGHTWEIGHT CONCRETE
by G.C. Hoff ...................................................... 785

LESSONS LEARNED FROM FIELD TRIALS WITH HIGH-PERFORMANCE CONCRETE
by J.J. Schemmel, M.I. Leming, and M.R. Hansen ............ 823

SI (Metric) TABLES .................................................. 839

INDEX ................................................................. 841
