STRATEGIES FOR BRIDGING THE GAPS IN MANUFACTURING TECHNOLOGY

Proceedings of the 13th All India Machine Tool Design and Research Conference

Editor
B N Lahiri
Production Engineering Department
Jadavpur University

Organised by:
Production Engineering Department
Jadavpur University, Calcutta
25-27 November, 1988
CONTENTS

Preface iii
Contents iv

KEY NOTE LECTURES

KN/I Development of New Cutting Tools
by Mr R Srinivasan, Chairman, Widia India Ltd, Bangalore

KN/II Automation in Manufacturing – Its Philosophy and Implications
by Prof V Radhakrishnan, IIT, Madras

KN/III CNC Machining Centres
by Mr A K Gangopadhyay, Executive Director (C T, R&D), HMT Ltd, Bangalore

KN/IV Flexible Manufacturing Systems in Indian Scenario
by Prof Amitabha Ghosh, IIT, Kanpur

KN/V Man Power in Manufacturing Systems
by Mr Ib Schongard

KN/VI Development of Cutting Tools and Tooling Systems
by Dr J R Sequeira, Sandvik Asia Ltd, Pune

KN/VII Expert Systems in Machine Tools
by Prof R L Murty, Regional Engineering College, Warangal

KN/VIII Advances in Articulated Robot Systems
by Dr M S Ramakumar, Head, Remote Handling & Robotics, BARC, Trombay

KN/IX Computer Aided Design of Machine Tool Elements
by Prof V Ramamurthy, IIT, Madras

KN/X Computer Aided Manufacturing — Present and Future
by Prof S Somasundaram, IIT, Bombay

GROUP A : MACHINE TOOLS

Analysis of Machine Tool Elements

MT(A)/01 Tribo Characteristics of Filled and Unfilled Plastics used in Machine Tools.
N C F Shah, S Prasad and S K Basu A-01

MT(A)/02 Thermal Analysis of Milling Machine Spindle Bearings.
B Kotiveerachari, A Yadaiah and B G Krishna Reddy A-05

MT(A)/03 A Case Study–Development of Electronic Crown Hobbing Attachment.
Dr S Sampath and P A Tannu A-12

MT(A)/04 Thermal Analysis of Hot Saw Blade.
K M Kundu, N P Mukherjee, D K Pal and S K Basu A-16

MT(A)/05 Design of On-power Refuelling Machine Mechanisms for Pressurised Heavy Water Reactors.
T K Rao, Inder Jit and A Sanaatkumar A-23

MT(A)/06 Statistical Wear Analysis on Glass-Ceramic Coatings on Steel for Machine Tools Applications.
R Sen and S K Basu A-28
Machine Tool Structures

MT(S)/01 Welded Guideways for Machine Tool Structures.
Prakash Atre

MT(S)/02 Investigations on Improvements of Strength, Stiffness and Damping of Machine Tools.
Dr M P Chowdiah

MT(S)/03 Value Engineering Through Design Optimisation Using Cad.
CP Kothandaraman, P Radhakrishnan, SU Prakash and MN Ramesh

TS Kolandhasamy and P Radhakrishnan

Vibration in Machine Tools

MT(V)/01 Natural Frequency of Vibration of Workpieces in Turning Operation.
Amit Srivastava and Anand Shankar

MT(V)/02 Dynamic Characteristics of Hobbing Machine.
RN Banerjee and PK Pal

MT(V)/03 Control of Machine Tool Vibration by Feed-Back Neutralizer.
Dr SK Choudhury

MT(V)/04 Impact Damper Improves Dynamic Stability of Overhung Slides.
VS Vaidya and PK Marathe

Machine Tool Drives and Control

MT(D)/01 Design of Fuelling Machine Bridge Carriage Columns and Associated Systems.
RP Gupta, PG Zende, RK Suri and AS Sanatkumar

MT(D)/02 Development of a Microprocessor Controlled Stepping Motor Drive for a Lathe.
YS Satyanarayana Reddy, GRN Tagore and RL Murty

MT(D)/03 Replacement of a Mechanical Multiple-Cam Logic Sequence by Software Programmable Logic Control (PLC) on an Imported Machine.
AP Purohit and NA Appajappa

MT(D)/04 Fluid Power Control System—A New Approach.
RSivakumar, AS Jain, MMittal, RP Gadgil, Sharanjit Singh and SV Acharekar

MT(D)/05 Economisation of Machining in Lathe by Flexible Adaptive Control.
KC Sen, AB Biswas, JP Basu and AB Chattopadhyay

GROUP B: METAL CUTTING

Design of Cutting Tools

MC(TD)/01 A Study on the Development of Nomograms for Designing Machine Taps.
Sunil SPatil

MC(TD)/02 Design and Development of Tooling for the Desired Type of Contact Patterns in Worm-Gearing.
PAravindan and VA Anantapadmanabha Sarma

MC(TD)/03 Back-Spot Facing Tool for CNC Machining Centre.
MSShunmugam and Capt KN Achappa

MC(TD)/04 Computer Aided Design of Pinion Type Gear Shaping Cutter.
KSankaranarayanasamy and MSShunmugam
| MC(TD)/05 | Common Tooling System for Turning and Machining Centres.  
*B Suresh, Dr A S Choudhury and R Srinivasan* | B-23 |
| MC(TD)/06 | Stress Analysis and Geometrical Modification of Carbide Inserts for Improved Edge-Strength.  
*S V Kumar, B Pradhan and A B Chattopadhyay* | B-29 |
| MC(TD)/07 | Design of Some Modular Toolings and Their Influence on Productivity of CNC Machine Tools.  
*Santokh Singh, T Manwani and J P Saxena* | B-34 |

**Performance of Cutting Tools**

| MC(TP)/01 | Effect of Flank Wear on Stresses in a Brittle Workmaterial During Orthogonal Cutting.  
*K S Shishodia and G S Sekhon* | B-35 |
| MC(TP)/02 | Accuracy and Surface Finish in Reaming.  
*M S Shunmugam and G Somasundaram* | B-41 |
| MC(TP)/03 | Optimising Machining Conditions for Finish Turning Hardened Steel Using Black Ceramics.  
*Jose K John, P K Philip and Paul Thomas* | B-45 |
| MC(TP)/04 | Model Building in Machinability Data Analysis/Bank/System.  
*G Kuppuswamy, P S Subramanya and V Sivasankaran* | B-51 |
| MC(TP)/05 | Machining of Carbon Fibre Reinforced Plastics.  
*G Santhanakrishnan, R Krishnamurthy and S K Malhotra* | B-55 |
| MC(TP)/06 | On Prospects of Using Ultrasonics in Arresting Microbial Growth in Water Soluble Cutting Fluids.  
*P I Desai and P B Desai* | B-61 |
| MC(TP)/07 | Investigations on Carbide Turning Inserts Treated with Alumina Using an Innovative Technique.  
*Dr S Gopalasubramanian and Dr P Aravindan* | B-66 |
| MC(TP)/08 | Study of the Machinability of Quenched and Tempered Alloy Steel.  
*Zhou Jia-Bao, Yu Yun-he and Lu Yun-liang* | B-72 |
| MC(TP)/09 | A New Method of Spiral Bevel Gear Generation Using a Milling Machine.  
*C D Palaniappan and Dr G Ramaiyan* | B-76 |
| MC(TP)/10 | Comparison of Performance of TiN Coated Films on HSS Tools with Various Techniques.  
*V P Gasavi and Dr P P Chikate* | B-82 |
| MC(TP)/11 | Studies on the Dynamics of Internal Broaching.  
*V Sajeev and L Vijayaraghavan* | B-86 |
| MC(TP)/12 | Hole Quality Achieved by Gun Drilling and Gun Boring Process–A Comparative Study.  
*P Madhusudan, D Sarathy and H R Gupta* | B-91 |
| MC(TP)/13 | Performance of Coated Cemented Carbide Tools in Machining Austenitic 18-8 Stainless Steel.  
*B P Sharma and Dr M K Khare* | B-91 |
| MC(TP)/14 | Performance of Si₃N₄ Ceramic as a Cutting Tool.  
*V Sivasankaran and R Krishnamurthy* | B-92 |
| MC(TP)/15 | Study of Machinability Through Constant Thrust Drilling of Metals.  
*O P Garg and Dr C S Sharma* | B-92 |
| MC(TP)/16 | Drilling of Fibre Reinforced Plastics.  
*Arnab Sur, N K Naik and N Ramakrishnan* | B-93 |
Development and Evaluation of New Tool and Work Materials

MC(E)/01 Evaluation of Zirconium Nitride Coated Carbide as a New Tool Material.  
*P Madhusudan, K Sadananda and R Srinivasan*  
B-94

MC(E)/02 Comb Cracking in Cemented Carbides.  
*R Krishnamurthy and A S Choudhury*  
B-99

MC(E)/03 Some Preliminary Investigations on Orthogonal Machining of FRP Composites.  
*N Bhatnagar, N K Naik and N Ramakrishnan*  
B-104

MC(E)/04 On Characteristics and Performance of Ceramic Cutting Inserts Being Developed at IIT, Kharagpur.  
*B Mondal, A Virkar, A Paul and A B Chattopadhyay*  
B-109

MC(E)/05 Cyclic Creep with Variable Dwell Period.  
*I K Bhat, M K Muju and A Ghosh*  
B-114

MC(E)/06 Effect of Composition and Layer Design of TiC/Al203/TiN Coating on Performance of Coated Carbide Tools.  
*R V Keskar, S C Mahajan and J P Saxena*  
B-118

MC(E)/07 Influence of Graphites on the Wear of Annealed and Bainitic Spheroidal Graphite (SG) Irons.  
*K G Sudhakar, K Saravanan and Dr M P Chowdiah*  
B-124

GROUP C : ABRASIVE MACHINING

AM(MC)/01 A Study of Laser Dressed Grinding Wheel Profiles.  
*N Ramesh Babu and V Radhakrishnan*  
C-01

AM(MC)/02 Critical Aspects of Grinding Automobile Connecting Rods by Double Disc Grinding Process.  
*Shyam Lal*  
C-07

AM(MC)/03 Comparative Assessment of the Performance of Cutting Fluids in Surface Grinding of En 31 Steel.  
*A C S Kumar, A K Mehta, S P Dubey and U R K Rao*  
C-12

AM(MC)/04 A New Method for the Evaluation of Grinding Wheel Performance.  
*W G Kothandaraman, V P Arunachalam and Bhavani Shankar*  
C-16

AM(MC)/05 Machinability Study on Toughened Zirconia and Alumina Ceramics.  
*B L Anantha Ramu, R Krishnamurthy, M L Arunachalam and C V Gokularathnam*  
C-21

GROUP D : SPECIAL PROCESSING

SP/01 CAD Toolings for Flow Forming Operations.  
*T Ram Mohan and TV L Narasimha Rao*  
D-01

SP/02 Corrosion Resistance of Ball Burnished Components.  
*N L N K Kumar, O V Krishnaiah Chetty, V Radhakrishnan and R Narayan*  
D-06

SP/03 Development of Roller Burnishing Machines for Cylinders.  
*D Soundararaj, P Ramadas and H R Gupta*  
D-11

SP/04 Some Experimental Studies on Oscillatory Burnishing.  
*Dr M Komaraiyah, Dr P Narasimha Reddy, P Niranjan Rao and K Rama Sarma*  
D-17

SP/05 Estimation of Depth of Plastically Deformed Layer in Burnishing.  
*B Kotiveerachari, A Kamasundara Rao and R L Murthy*  
D-24

SP/06 Improving Life of HSS Tools by Ball Burnishing.  
*T Siva Prasad, B Kotiveerachari and V G Narayana Rao*  
D-31
GROUP E : METAL WORKING

Analysis of Metal Forming Processes and Design of Tools and Dies

MW(F)/01 Three Dimensional Upper Bound Solutions for Extrusion of Square Sections Using Curved Dies.  
K P Maity, P K Kar and N S Das  
E-01

MW(F)/02 Finite Element Modelling of Extrusion Forging Problems.  
C M Agarwal, B Pradhan and T P Ghosh  
E-07

MW(F)/03 Flow Study Through Asymmetric Dies in Extrusion.  
R K Sahoo, P K Kar and H S Das  
E-11

MW(F)/04 On the Stress and Strain Distribution in the Rolled Strip.  
N Kapaj  
E-16

MW(F)/05 Development of Coated Carbide Dies for Metal Forming Application.  
T K Sridharan, M Neelakandan and Dr A S Choudhury  
E-23

MW(F)/06 An Efficient Approach for Extrusion Process Design.  
S Dalela, S C Jain and R Sen Gupta  
E-23

Analysis of Structures for Metal Forming Machines and Processes

MW(PA)/01 A Study on the Structural Parameters of a Heavy Duty Hydraulic Press Through Analysis for Optimum Design.  
V Omprakash and V Ramamurti  
E-24

MW(PA)/02 Shot Peen Forming with Elastic Bending Pre-Stresses  
M C Sharma  
E-29

MW(PA)/03 Predicting the Thickening and Thinning Behaviour of Tubes in Hydrodynamic Tube Sinking.  
R N Nauhria  
E-35

MW(PA)/04 Role of Aspect Ratio in the Heading Process.  
G S Sekhon, K L Arora and K S Shishodia  
E-42

MW(PA)/05 Cavity Formation in Impression Die Forging Under Different Lubricating Conditions.  
B Satapathy, R K Mishra and N Patnaik  
E-47

MW(PA)/06 Deformation Characteristics and Fracturing of Hollow Iron Powder Preform Discs During Cold Forging.  
A K Jha, S Kumar and R K Singh  
E-51

MW(PA)/07 Comparative Analysis of Hydraulic Press Structure.  
S N P Sinha, G L Sinha and S S Dey  
E-59

MW(PA)/08 Deep Drawing of Square Shells Using Rubber Die.  
D K Tripathy and T P Ghosh  
E-59

GROUP F : NON-TRADITIONAL MACHINING

Electro Discharge Machining

NTM(ED)/01 Textural Characteristics of EDM Surfaces.  
V S R Murri and P K Philip  
F-01
NTM(ED)/02 On Some Aspects of Erosion Rate in Wirecut Electro-Discharge Machining.  
SS Hiremath and PK Mishra  
F-07

NTM(ED)/03 Factors Affecting Reproduction Accuracy in Electric Discharge Machining.  
P C Pandey  
F-11

NTM(ED)/04 Study of Machinability Through Constant Thrust Drilling of Metals.  
SA Jesudasan and KS Raju  
F-16

NTM(ED)/05 Physico-Mechanical Effect on Electro-Discharge Machined Surface of High Carbon  
High Chromium Die Steel.  
JS Soni and G Chakraverti  
F-16

Electro Chemical Machining

NTM(EC)/01 Parametric Influence of Polarisation in ECM.  
G Prabhakara Rao, O V Krishnaiah Chetty, G Velayutham and R Narayan  
F-17

NTM(EC)/02 On Pulsed Current Electrochemical Grinding.  
S Banerjee and B N Nandi  
F-21

NTM(EC)/03 Electrochemical Machining with Programme Controlled Composite Tool.  
V Raghuram and Amitabha Ghosh  
F-25

NTM(EC)/04 Microprocessor Based Auto-Tool Feed Drive System for Constant Current  
Electrochemical Machining.  
B Bhattacharyya, Lt Col A K S Chowdhury and Dr S K Sorkhel  
F-29

NTM(EC)/05 Computer Aided Tool Design for Accurate Job Shaping in Electrochemical Machining.  
B Bhattacharyya, A K S Choudhury, A K Dutta and Dr S K Sorkhel  
F-34

NTM(EC)/06 Computer Aided Tool Design for Electrochemical Machining.  
N Vijaya Sai and PK Mishra  
F-40

Ultrasonic Machining

NTM(US)/01 Effect of Electrostatic Field on the Material Removal Rate in Ultrasonic Machining.  
Part-I : Theoretical Study.  
E Vijayan Nair and Amitabha Ghosh  
F-41

NTM(US)/02 Effect of Electrostatic Field on the Material Removal Rate in Ultrasonic Machining.  
Part-II : Experimental Study.  
A Vijayan Nair and Amitabha Ghosh  
F-47

Abrasive Jet Machining

NTM(AJ)/01 Effect of Particle Velocity on Impact Erosion of Glass in Abrasive Jet Machining  
-A Dimensional Analysis Approach.  
DC Roy and PK Mishra  
F-52

Electro Forming

NTM(EF)/01 Electroforming on Round Mandrels.  
MK Nag, A Dutta, SK Mandal and PK Mishra  
F-57

GROUP G : PROGRAMMABLE AUTOMATION

CAD-CAM-CIM

PA(CAD)/01 Computer Assisted Generative Process Planning System for Turned Components.  
NH Palsule and Dr SS Pande  
G-01

Dr R Dayal and A K Chattopadhyay

PA(CAD)/03 A Cam System for Turned Components with Graphic Simulation.

P N Rao, N K Tewari and Amarjit Singh

Biman K Ghosh and Richard A Wysk

PA(CAD)/05 Application of CAD/CAM to Manufacturing in DRDL.

P Rajeswara Rao, D R Yadav and I K Kaul

PA(CAD)/06 Computer Aided Selection of Optimum Elements for a Modular Boring System.

V Srinivas, G Parthipan and Somashekar Rao

PA(CAD)/07 Dynamic Production Planning Under Uncertain Demand.

Arif Suhail and Imitiaz Ali Khan

PA(CAD)/08 Computer Aided Engineering (CAE) System for Design and Manufacture of Multi-Spindle Gear Boxes of Special Purpose Machine Tools.

Dr R Dayal, P Rameshchandra, M S Joshi, A M Joshi, P M Rege and R R Ahir

Computer Numerical Control

PA(CNC)/01 Some Design Considerations of CNC Retrofitted Machine Tools.

C S Kumahalli, K S Raju, R Krishnamurthy and I N Mallikarjuna

PA(CNC)/02 Development of Interpolator to Machine Three Dimensional Profile.

G Ravindra Nath Tagore and R L Murty

PA(CNC)/03 Design and Development of a CAD Interfaced CNC Riveting for Shell Segments.

K Dhananjayan and P Gopakumar

K C B Raju, S V N Anil Sundar and Y Nagarjuna Rao

PA(CNC)/05 An Interactive Programming System for Milling Contours and Pockets.

B Satyanarayana, P N Rao and N K Tewari

PA(CNC)/06 A Knowledge Based Expert System for Selection of Tools in Machine Centers.

S Dilip Sridhar, R Baraneeetharan, B Arun Kumar and Dr P Radhakrishnan

PA(CNC)/07 Development of CNC Notching Press for Electrical Drive Laminations.

P Aravindan and S Boopathy

PA(CNC)/08 Requirements of CNC Systems for Unmanned Machining.

G M Ajit and G N R Swamy

PA(CNC)/09 Software Development for Microprocessor Based Control of an NC Vertical Milling Machine.

C S Vijay Anand, A Saravanan, P K Philip and G Kuppuswamy

P S Shende, K P Chander and P Ramdas

PA(CNC)/11 CNC Retrofitting to a Conventional Center Lathe for High Productivity and Low Cost Modernisation.

Basheer Ahmed and Y Nagarjuna Rao

PA(CNC)/12 Optimal Milling Parameters Selection Through a Newly Developed Computer Software for Machining Centres.

Dr P Aravindan, S A Ravi Shankar and S M Sundar
Flexible Manufacturing Systems

PA(FMS)/01 Development of a Real Time Two-way Communication System for Automated Guided Vehicles (AGV) in Flexible Manufacturing Systems.
*R Dayal and A P Sen* G-69

PA(FMS)/02 Expert System Approach to Design of FMS
*Rambabu Kodali and S S N Murty* G-73

PA(FMS)/03 A Computer Integrated Drilling Workstation for Printed Circuit Boards.
*A Chakraborti, S N Ghosh, S K Sanyal and J Saha* G-78

PA(FMS)/04 Design of FMS Layout Using Graphical Simulation.
*P N Rao, N K Tewari and A Chaudhuri* G-83

PA(FMS)/05 Impact of Computer Communication on Factory Automation.
*G M Ajit and V Ramaswamy* G-87

PA(FMS)/06 Knowledge-Based Justification of FMS.
*Rambabu Kodali and S S N Murty* G-87

GROUP H : ROBOTICS AND SENSORS

RS/01 Design and Analysis of a Novel Overhead Platform Robot Manipulator.
*Vinayak G Hegde and T Nagarajan* H-01

RS/02 Wireframe Modelling of Work Volume of Industrial Robots.
*K R Kumar, T Nagarajan and V Radhakrishnan* H-06

RS/03 Fabrication and Testing of a Position Sensing Device Integral with Hydraulic or Pneumatic Cylinders.
*R L Murty, A V R Panthulu and N Anil Kumar* H-11

RS/04 A Generalised FEM Procedure for Determining Input Functions of Machining Robots.
*T Nagarajan, S Ramachandran and N Siva Prasad* H-17

RS/05 Development of Interpolator for Continuous Path Robots for Straight Line Motion.
*G Ravindra Nath Tagore and R L Murty* H-22

RS/06 Computer Recognition of 2D-Views of Objects for Use in Robotics.
*G S Rajasekhar, M G Sameer, P V Mohanram and P Radhakrishnan* H-28

RS/07 Compensation for Positional Inaccuracy Due to Static Deflection in Robot Manipulators.
*M V Manjunath, P V Mohanram and S Krishnamurthy* H-33

RS/08 Generating the Contour Picture of Workpiece by Opto-Electronic Sensors.
*A K Dutta, D Roy, S K Debnath and S R Deb* H-39

*A K Dutta, S K Debnath, S R Deb and A Bhattacharyya* H-45

RS/10 Safety in Robotic Installations.
*Dr S Kant Vajpayee and V Ramchandran* H-50

RS/11 Microprocessor Control for Positioning of Pneumatic Actuators.
*D Babu and Dr T Nagarajan* H-57

GROUP I : PRODUCTION SYSTEMS

System Analysis and Group Technology

PS(GT)/01 An Improved Algorithm for Machine-Component Cell Formation in Group Technology.
*S Murali Krishna and A D Datar* I-01
Simulation Analysis for Evaluating Effectiveness of Cells in a GT Based Manufacturing System.  
A R Hanumante, S Samasundaram and A Subhas Babu  

Optimum Machine Loading and Product Mix in Group Technology Type Manufacturing Environment.  
C S P Singh, P C Pandey and N K Mehta  

Some Aspects of Software Development in Use of Similarity Co-efficient for Cellular Manufacture.  
P B Desai and N L Hiregoudar  

A GT Approach in CNC Machining.  
N K Tewari, P N Rao and D Gupta  

A Case Study in Material Requirements Planning.  
Col B M Sabhlok, P C Pandey and N K Mehta  

Quantitative Management and Decisions  

Product Scheduling in Flexible Manufacturing System.  
N Sambandam and S Ramani  

Communication Network Design for Computerized Manufacturing Systems.  
Biman K Ghosh  

Cost of Surface Finish – A Classical Approach for a Multivariable Unconstrained Optimisation Problem.  
K K Chakrabarti  

A Dynamic Tool Replacement Strategy for Multi-Tool Machining Set-Ups.  
S S Tak and C S Sharma  

Development of Spares Planning and Control System for an Engineering Unit – A Case Study.  
A C Dey and Bikash Bhadury  

Computer Aided and Analog Models for Optimal Decision Making of Constrained Facility Locations in Process Based Manufacturing Units.  
S Das, B Bhattacharyya and Dr S K Sorkhel  

An Expert System for a Class of Scheduling Problems.  
Soman Nair, S G Deshmukh and A Subash Babu  

CASM – An Intelligent System for Shop Floor Monitoring.  
A K Bhargava and Pradeep Kumar  

GROUP J: METROLOGY, MANUFACTURING TOLERANCES AND ERROR ANALYSIS  

Some Investigations on the Accuracy of CNC Machining.  
A V Narasimham, K S Raju, G Srihari and R L Murty  

Effect of Regulating Wheel Errors in Centreless Grinding  
P R Nakkeeran and V Radhakrishnan  

Effect of Burnishing of Shafts on the Performance of Interference Fit Assemblies.  
Dr B Ramamoorthy and Dr V Radhakrishnan  

Analysis of Geometric Form Errors Using Minimum Zone Conception.  
B S Naidu, D Chandra Reddy and S S N Murty  

Development of On-line Inspection and Quality Control System Using Electronic Sensors.  
P Chakraborty, B Bhattacharyya and Dr S K Sorkhel  

Automatic Tolerancing of Parts Using EXDEDM.  
D Janakiram, L V Prasad and U R K Rao
