Part 2 • Technical Sessions

T1. Chemical Synthesis

Effect of Ultrasound on Precipitation and Ripening of Aluminum Hydroxides | 718 |
| N. Enomoto, M. Katsumoto and Z. Nakagawa                              |      |
| Reaction Synthesis of the SiC-AlN Solid Solutions and Related Composites Using Carbothermal Reduction | 722 |
| J.F. Li, A. Kawasaki and R. Watanabe                                  |      |
New Ferrite Synthesis in the Strongly Alkaline Solutions of Fe(III)-Tartrate
T. Kodama, K. Mimori, T. Yoshida and Y. Tamaura .................................................. 726

T2. Rapid Solidification

Material of Rotating Disk in Centrifugal Atomization Method
T. Satoh, K. Okimoto and S. Nishida .......................................................... 730

Precipitation Hardening and Microstructure of Rapidly Solidified Al-Ti-Si and Al-Cr-Y Alloys
B.S. You and W.W. Park .......................................................... 734

Structures and Mechanical Properties of P/M Materials of Rapidly Solidified Mg-Zn-X Alloys
T. Sato, M. Sugamata and J. Kaneko .................................................. 738

T3. New Powders

Material with Stable Dimensional Change Independent of Internal Density Variations
C. Lindberg, K. Ishii and T. Tsuboi .................................................. 742

Properties of Segless ®
H. Suzuki, M. Murakami, T. Koga and D. Takai .................................................. 747

Powders for High Performance PM-Steels
U. Engström and C. Lindberg .......................................................... 751

Mechanical Properties of Sintered Compact Made of Newly Developed Low Pre-Alloyed Steel Powders

Nickel Coating onto Alumina Powder Surface
S. Ishida and S. Ito .......................................................... 759

Characterization of Ag and Ag-30%Pd Powders Prepared by Wire Explosion
M. Umakoshi, T. Yoshitomi, H. Ito and A. Kato .................................................. 763

The Effect of Particle Diameter and Shape of an Extra Low Chlorine Titanium Powder by HDH Process on Its Characteristics
R. Murayama, E. Fukasawa and W. Kagohashi .................................................. 767

Dielectric Characteristics of Submicron BaTiO₃ Powders Prepared by Conventional Solid-State Reaction Method
M. Katsube, M. Yabuuchi, K. Inoue and M. Hirase .................................................. 771

T4. Ultrafine Powders

Production of Fine Copper Powder by Ti³⁺-Reduction Method
Y. Arami, L.L. Maw, O. Iwatsu and Y. Hashimoto .................................................. 775

Sinco Ultrafine Powder
X. Yang and Y. Wang .......................................................... 779

A Morphological Study of Ultrafine Grain Formation on Reduction and Direct Carburizing Process of Tungsten Oxide
Y. Yamamoto, A. Matsumoto, S. Honkawa and N. Shigaki .................................................. 785

Surface Treatment of Ultra-Fine Nickel Carbonyl Powder
Z. Qu and S. Yin .......................................................... 789

Fabrication of Porous Materials by Consolidating Ultrafine Metal Powders
Y. Sakka, T. Uchikoshi, S. Ohno and H. Okuyama .................................................. 792

The Wetting Property and the Grinding Effects of Zinc Oxide
Y. Sadahiro, H. Honda and M. Koishi .................................................. 796

XXXIII
T5. Hot and Cold Isostatic Pressing

Hot Isostatic Pressing of Plasma Sprayed TiAl Coatings .................................................................................. 800

Hot-Isostatic Pressing and Properties of SiC-AlN Solid Solutions and Composites .............................................. 804
J.F. Li, A. Kawasaki and R. Watanabe

Application of Hot Isostatic Pressing (HIP) for Preparation of Sintered Alloys Steels of Distaloy SA Powder .......................................................................................................................... 808
J. Karwan-Baczewska, S. Stolarz and A. Karamara

Characteristics of High Vanadium High Speed Steel Roll by Powder Metallurgy .................................................. 812
K. Kusaka, T. Hisada and T. Tomioka

Effect of O2-HIP Treatment on the Properties of Mn-Zn Ferrites ...................................................................... 815
H. Ochiai and O. Kimura

T6. Spray Forming

Spreading of the Spray Cone for Spray Forming Applications .............................................................................. 819
U. Fritsching, V. Uhlenwinkel and K. Bauckhage

Comparison between Calculated and Experimental Data of the Spray Model in Spray Forming ....................... 823
Y. Takano, T. Nakagawa, M. Saito, Y. Namba, H. Takigawa and T. Matsushita

Properties of High-C High-Cr Tool Steel by Spray Forming Process .................................................................... 827
M. Saito, Y. Namba, T. Matsushita and H. Takigawa

In-Situ Spray Casting of Dispersion Strengthened Alloys - I : Thermodynamics and Reaction Rates .................. 831
Y. Unigame, K. Ranganathan, A. Lawley and D. Apelian

In-Situ Spray Casting of Dispersion Strengthened Alloys - II : Experimental Studies ............................................. 836
K. Ranganathan, A. Lawley and D. Apelian

Microstructure and Mechanical Properties of Al-MMCs Synthesized Using Spray Atomization and Co-Deposition .................................................................................................................. 840
Y. Wu and E.J. Lavernia

A Review of the Commercial Status of the Osprey Preform Process .................................................................... 846
A.G. Leatham, L.G. Elias, Y. Kawashima and T. Itami

Latest Status of Applications and Plants of the Osprey Process .......................................................................... 851
K. Kumagai and T. Itami

T7. Powder Extrusion

High Mechanical Strength of Magnesium Base Bulk Alloys Produced by Extrusion of Atomized Amorphous Powders ..................................................................................................................... 855
A. Inoue, A. Kato, H. Hori and T. Masumoto

Effect of Carbide Size on the Properties of P/M High Speed Steel Produced by Hot Extrusion ......................... 859
A. Murase and G. Abe

Metal Powder Consolidation Processes during Hot Extrusion for Superalloy Pipe Products ............................... 863
Y. Ohashi, T. Fukuda, M. Nishiguchi, M. Nakanishi and J. Kikuchi

Effect of SiC Particle Size and Volume Fraction on Properties of an Al-6wt.% Fe Powder Alloy ......................... 867
G. Staniek, F. Lehnert, M. Peters and W.A. Kaysser

T8. Consolidation Processes

High Deformation Consolidation Processes for SiC, Reinforced Al-Li Composites ............................................. 871
F. Boey, K.A. Khor, T. Sano and Y. Murakoshi
T9. Compaction Technologies and Processes

High Quality Titanium Green Compacts by Two-Step Pressing Method ................................................. 875
J. Asami and N. Hirose

Flow Compaction of Iron Powder with Controlled Particle Size Distribution ............................................. 879
S. Takahashi and T. Nakagawa

Centrifugal Compaction of Submicron High Purity Alumina Powder .................................................... 883
S. Tashima and H. Kuroki

A P/M Steel for Highly Stressed Automotive Main Bearing Caps. An Investigation of Critical Defect Size under Fatigue Stress Conditions ................................................................. 887
T. Cadle and T. Campbell

T10. Powder Forging and Superplastic Forming

Multi-Level Powder Forging and Powder Compaction Using Multi-axis Hydraulic Press ............................... 891
T. Kaji, K. Takeuchi and Y. Takeda

Powder Forged Connecting Rod Combined with Fracture Splitting Technology Process, Product and Economics ......................................................... 895
L. Albano-Müller, V. Arnhold, H. Neubert and M. Weber

Powder Forging of Rapidly Solidified Al-Si Alloy .................................................................................... 899
K. Kawase, M. Otsuki, T. Kohno, K. Morimoto and M. Kobayashi

Superplastic Forming – A New Shaping Technique for High Performance P/M Alloys .......................... 903
R. Laag, K. Peichl, E. Heissig and E. Brühlmann

T11. Liquid Phase Sintering

Grain Growth during Sintering of W-Ni Alloys ......................................................................................... 909
S. Kohara and T. Ohira

Mechanical Properties of 304-L Stainless Steel Sintered in the Presence of a Liquid Phase .................. 913
A. Sharon and D. Itzhak

Effect of Mechanical Grinding on the Liquid Phase Sintering of Cu-Pb Alloys ........................................ 917
T. Ohashi, K. Kusama, K. Itoh and Y. Tanaka

T12. Novel Sintering Technology

On the Sintering Mechanism of Iron-Tin-Copper Compacts Having Low-Temperature Sinterability ................. 921
Y.C. Kim, M. Yamane, Y. Suzuki and T. Watanabe

Application of Vacuum and Overpressure Sintering Process in the Powder Metallurgy ....................... 927
D. Ermel, R. Bauer and W. Diemar

Plasma Activated Sintering (PAS) System ............................................................................................... 931
M. Ishiyama

Spark Plasma Sintering: Controlling Grain Size of SiC-Ln,Al2O3, Composite ............................................ 935
M. Omori, A. Okubo and T. Hirai

Experimental Study of Laser Sintering Process of Ceramics .................................................................. 939
M. Yuki, H. Yamaoka, Y. Nakanishi, A. Kawasaki and R. Watanabe

Novel Sintering Method to Fabricate a Porous Cu-Ni-Al2O3, Alloy ....................................................... 943
K. Hoshino and T. Kohno

Construction of General Equations on Infiltration and the Examinations .............................................. 947
H.N. Huang and T. Watanabe
Gas Flow in Sintering Furnaces – Theoretical and Practical Approach – A Tool for QC of PM Parts
E. Köhler, R. Jeschar, W. Pötke, K. Dalai and W. Huppertz

Collision Consolidation of Metal Powders under the Shock Wave
Z. Xie, J. Qiu and R. Yang

Study on Explosive Consolidation of Amorphous Powders by TEM
R. Yang, Z. Xie and J. Qiu

The Characters of P/M Materials by Spark Sintering
X. Luo, F. Yang, Y. Tan and Y. Gao

T13. New Processes for PM Production

The Pilot-Scale Manufacture of Brass Flake Powders
B.F.Y. Chen, S.Y. Chiu and J.S. Jeng

In-Flight Solidification of Uniform Droplets of Sn-25 wt.% Pb and Sn-40 wt.% Pb Alloys
T. Ando, J.-H. Chun and S. Sahu

Fluidized Bed Processing of Cohesive Fine Powders – Pressure Swing Granulation of Hardmetal Powders –
K. Nishii and M. Horio

Nanophase Materials by Gas Deposition Method
M. Oda, I. Katsu, E. Fuchita, S. Kashu and C. Hayashi

Efficient Sintering and Hardening in the Conveyor Belt Sintering Furnace
D. Warga and C. Lindberg

Copper Infiltrated P/M Steels
E. Klar, D. Berry, P. Samal, J.D. Rigney and J.J. Lewandowski

Improvement of Magnetic Properties of Sintered 410L Stainless Steel
K. Shimada, H. Hirata, M. Yamaguchi and H. Ohta

High Temperature Compression Strength of TiC Particle Dispersion Ni AlloyProcessed on the Ground and Rocket
S. Takahashi

New Type of Fe-Ni-WC Hard Metal
C. Wu, L. Zhang, Y. Lin, Q. Wu, Z. Xing and K. Hou

Investigation of Diffusion Bonding between Hard Metal and Alloy Tool Steel
L. Zhang, S. Mukae, K. Nishio, M. Katoh and C. Wu

T14. Automatic Control

Interactive Design, Intelligent Process Planning, and Automated Control for Powder Metallurgy Components
D.C. Zenger, J.J. Bausch, D.C. Brown, R.D. Sisson and R. Ludwig

T15. Testing and Evaluation

Microstructure and Cyclic Deformation Behaviour of Sintered Steels
A. Piotrowski and D. Eifler

Fracture Toughness of Sintered Steel Components
R. Doglione, M. Rosso and G. Ubertalli

Characteristics of Internal Friction and Fatigue for the Iron Sintered Compacts, Infiltrated with Lead

Fatigue Characteristics of Ceramics at High Temperature
M. Nishi and T. Sugita
Cavitation Damage of Ferrous Sintered Steels

Nondestructive Acoustic Evaluation of Visco-Elasticity for Green and Sintered Materials of Metal Powders
T. Watanabe, T. Yamagaki, T. Aizawa and J. Kihara

Statistical Processing of Hardness Readings to Rate the Homogeneity Levels of Various Sintered Steels
G.F. Bocchini, A. Tiziani, F. Bonollo and I. Cristofolini

Relations between Stress Relieving Conditions of Heat Treated P/M Steels, Weibull Moduli and Fractograph Features of Failure Surfaces
G.F. Bocchini, A. Molinari, G. Straffelini and A. Zambon

Corrosion Resistance of Sintered Steel Components
G. Scavino, E. Angelini, M. Rosso and F. Rosalbino

Influence of Chemical Composition and Heat Treatment on the Sliding Behaviour of PM Fe-Mo Alloys
A. Molinari, G. Straffelini and B. Tesi

Load Bearing Capacity of Ferrous Sintered Gears
H. Hirata, S. Kiguchi, M. Wada, S. Oda and T. Koide

About the Development of Sintered Contact Strip and Brake Lining for High Speed Trains
Y. Tomiyama

Microscopic Analysis of a Liquid Phase Sintered Tungsten-Nickel-Iron Heavy Alloy
N. Uenishi, Y. Takeda, M. Sano and Y. Amano

Size Distribution of Non-Spherical Objects from Measurements Made on Random Plane Sections and Projected Shadows
Y. Wanibe, T. Itoh, Y. Terada and T. Ohara

Mechanical Characterization of PVD/CVD Ceramic Coated WC/Co by Acoustic Spectro Microscopy
T. Aizawa and J. Kihara

Instrumented Charpy Testing on PM Fe-Mo Based Alloys with Different Microstructures
G. Straffelini, C. Lindberg, V. Fontanari and A. Molinari

T16. New Equipments

A New System to Achieve Simultaneous Compaction Using Computer Controlled Mechanical Pressing Motions
T. Yokoyama and T. O’Connor

Improvement of Powder Filling by 2-Axis Electric Drive CNC Feeder
H. Tsuru, T. Nakagawa, M. Kawasaki and H. Hiraiwa

Improvement of PM High Speed Steel Purity by Using the IFB Process
S. Fujita, Y. Matsuda, K. Suzuki and K. Matsumoto

New Carbon Control System for Sintering Atmospheres
H. Ishiguro, P. Pourtalet and M. Phillips

Fundamental Studies for Fine Powder Supply Using a Vibrating Spring and Plate
M. Saito

Sintering Process Analyzer – A Device for Measuring the Weight and Dimension of the Sample in the Furnace
E. Nakatsukasa

T17. Machinability

A Machinability Enhancing Additive for High Strength Materials
O. Andersson
Development of Free Machining Sintered Austenitic Stainless Steel (304L Stainless Steel) Including Non-Metallic Materials
K. Yamaguchi and T. Nakamoto

1104

T18. Secondary Operations

Tensile and Fatigue Strengths for Sintered and Case-Hardened Compacts Made from Cr Containing Steel Powder
S. Unami and O. Furukimi

1108

Comparison of Properties of Surface Hardened P/M Steels by Vacuum Carburizing
G. Scavino and M. Rosso

1112

Ion Nitriding and Gas Nitriding of Homogeneous, Low and High Alloy, Mo, Cr and Ni/Cr Sintered Steels
G.F. Bocchini, M.G. Ienco, G. Palombarini, M.R. Pisacno and E. Stagno

1116

Nitrocarburizing of P/M Steels
M. Rosso, G. Scavino and G. Ubertalli

1120

The Influence of Nitrogen Adsorption on the Permeability of Ferrous Parts Sintered in Nitrogen-Based Atmosphere and Steam-Treated
J.B. Yang, N. Kosaka, M. Watarai and H. Nishie

1124

T19. High Temperature Materials (Superalloy, ODS)

Development of a HIP P/M Superalloy

1129

A Study on Sintered Fe-Cr-Al Honeycomb with Good Oxidation Resistance
T. Ohashi, N. Tsuno and T. Harada

1133

Research on "Defect" in the Copper Infiltrated Tungsten Alloy
G.L. Xu and Z.Q. Chen

1136

T20. Intermetallic Compounds

Improved Forgeability and Properties of TiAl Alloys by Prealloyed Powder Metallurgy
D. Eylon, C.F. Yolton and D.U. Furrer

1140

Rapidly Solidified Nb,Al Powders Produced by Plasma-Melt-Gas-Atomization
N. Murahashi, H. Kohmoto and T. Kohno

1144

Solid State Synthesis of Intermetallics via Cold Sintering of Fine Elemental Powders
E.Y. Gutmanas, I. Gotman, L. Farber and E. Paransky

1148

Pressureless Sintering Densification Characteristics of Ni-Al System
K. Tokuda and K. Hayashi

1152

Powder Metallurgy Processing of Intermetallics and Intermetallic Matrix Composites
R.M. German and R.G. Iacocca

1156

Mechanical Properties of Ti,Al,Nb Intermetallics Produced by Blended Elemental and Prealloyed P/M Methods
S. Emura, M. Hagiwara, Y. Kawabe and S. Mori

1160

Development of PM-Silicides for a High Temperature Corrosive Environment
J.H. Ulvens0en, G. Rørvik, T. Kyyvik, K. Pettersen and L. L'Estrade

1164

Processing of TiSi, Intermetallic Compound
K. Vedula and Y.V.S. Kumar

1168

Electrical Properties of Some I-III-VI, Chalcopyrite Semiconductor Grown by the Solid State Growth Method
A. Ashida, N. Yamamoto, T. Ito and Y. Cho

1172
T21. Refractory and Hard Materials

Si Contained WC-Ni-Mo Non-Magnetic Cemented Carbides .................................................. 1176
M. Kuwaoka, T. Furusawa and T. Sakai

Improvement of Adhesion Strength between the Diamond Film and the Cemented Carbide ........ 1180
N. Omori and M. Kobayashi

The Effect of Bonding Metals on the Strength of Synthetic Diamond ................................... 1184
T. Fujimori, Y. Yamamoto and A. Okada

Advanced Technology in PM-Processing and Application of Tungsten, Molybdenum and Alloys .... 1188
R. Eck

Friction and Wear of B$_4$C-TiB$_2$ Composite ................................................................. 1194
K. Nishiyama and K. Taguchi

Surface Hardening of Heavy Alloy ...................................................................................... 1198
T. Kawamura

Wear Characteristics of Mo$_2$FeB$_2$ Boride Base Hard Alloys ............................................. 1201
K. Takagi, M. Komai, H. Okayama and T. Watanabe

On the Fundamental Properties of 3C-19CR Type PM Tool Steel for Cold Working Uses .......... 1205
Y. Matsuda and K. Sudo

The Application of High Speed Steels to Valve Seat Inserts in Diesel Engine ......................... 1209
T. Kobayashi, Y. Ishikawa and M. Otsuki

High Density, High Strength Tool Steels .................................................................................. 1213
G. Greetham

High Density, Strong, Hard Materials by Low Temperature Sintering for Wear Applications .... 1217
G. Greetham

Improvement of Mechanical Properties of W-Ni-Fe Alloys by Control of Microstructure and Interfacial Segregation ................................................................. 1221
S.J.L. Kang, J.W. Noh, H.D. Park, S.H. Hong and D.Y. Yoon

Microstructure and Properties of TiB$_2$-B$_4$C Composites Sintered under High Pressure ........ 1225
H. Itoh, K. Sugiuara and H. Iwashara

Characteristics of New Chromium Base Alloys for Hard Facing ............................................ 1229
K. Hidaka, K. Tanaka and S. Nishimura

Creep Deformation Mechanism of Mo-Ni-B Cermet .............................................................. 1233
K. Hamashima, Y. Shinozaki and N. Horie

Surface Residual Stress of Coated Carbide ............................................................................ 1236
T. Yamamoto

Production and Properties of Tungsten and Molybdenum Single Crystals by Means of Secondary Recrystallization ................................................................. 1240
K. Okamoto, A. Ichida and K. Shimatan

Effects of Attritor Milling Parameters on the Physical Properties and Microstructural Uniformity of WC-Co Alloys ................................................................. 1244
D.R. Moyle

Magnetic Assisted Polishing of WC-Co Alloy .......................................................................... 1248
M. Anzai, H. Otaki, T. Sudo and T. Nakagawa

Thermochemical Synthesis of Nanophase WC/Co ................................................................. 1252
B.K. Kim, H.S. Kim, K.H. Ha and H.S. Chung

Ni-Activated Sintering in a Model System of W-Spheres Array .............................................. 1256
I.H. Moon, D.C. Lee and M.J. Suk

Structural-Selective Wear Characteristics of Powder Hard Metals by Erosion ....................... 1260
L. Valdma and T. Talving

XXXIX
Mechanical Properties and Microstructures of Submicron Cermets
M. Ehira and A. Egami

Properties and Microstructures of WC0B Base Cermets
M. Komai, Y. Isobe, S. Ozaki and K. Takagi

Mechanical Properties of Mo-Ni-Co-B System CERMET
N. Horie, Y. Shinozaki and K. Hamashima

T22. Functionally Gradient Materials

Powder Metallurgical Fabrication of SiC-AlN/Mo Functionally Gradient Material for Thermal Barrier
A. Kawasaki, M. Tanaka, J.F. Li and R. Watanabe

Bonding of SiC to Ni Using Metal Carbides as Intermediate Layers
J. Hojo, T. Kajiya, T. Kuga, K. Kishi and S. Umebayashi

Synthesis of Functionally Gradient Ni-Cr-Al/MgO-ZrO$_2$ Coatings by Plasma Spray Technique
S. Eroglu, N.C. Birla, M. Demirci and T. Baykara

T23. Superconductors

Harmonic Susceptibilities of Ceramic Superconductors
H. Mazaki, H. Yasuoka, M. Kakihana and M. Yoshimura

Synthesis of Copper Oxide Superconductors under High Oxygen Pressure
- Comparison with Electrochemical Oxidation Method -

Effect of Hydrogen Peroxide on Bi-Sr-Ca-Cu-O Superconducting Fine Powder Formed by Spray Pyrolysis
T. Okuda and S. Iwama

Chemical and Mechanical Stability of the High-Tc Phase in the Bi-Pb-Sr-Ca-Cu-O System

Effect of Li Addition to the Low-Tc Phase in the Bi-Sr-Ca-Cu-O System

Epitaxial Growth of (115)Bi$_2$Sr$_2$CuO$_7$, Film on (110)SrTiO$_3$
S. Nagai, H. Tanaka, N. Fujimura and T. Ito

Oxygen Nonstoichiometry and Structure of Vacuum Calcined YBa$_2$(Cu$_{1-x}$Me$_x$)$_3$O$_{y}$ (Me=Fe, Ni)
T. Furukawa, N. Machida, T. Shigematsu and N. Nakanishi

Effects of High Speed Impact Method on the Caltination of Oxide Superconductor YBa$_2$Cu$_3$O$_{7-x}$
Y. Sadahiro, H. Honda and M. Koishi

T24. New Materials

Ferrite Powder for Soft Ferrite Composite Materials

Preparation of Electronic Ceramics Using Ultrafine Particles
N. Ichinose

The Effect of Powder Calcining Processings on Mechanical and Piezoelectric Properties of Lead-Zirconate-Titanate Ceramics
T. Ogawa

Synthesis of Thermoelectric Alloy
S. Sugihara and M. Iizuka

Mechanical Properties of Mullite-ZrO$_2$ Composites
T.M. Kyaw, Y. Okamoto, K. Hayashi and T. Nishikawa
Athermal and Isothermal Martensitic Transformation of Pulverized Ceria-Tetragonal Zirconia Polycrystals
M. Hayakawa, T. Okuda and M. Oka

The Relationship between Fracture Behavior and Phase Transformation in Y-PSZ with and without Alumina Addition
H. Tsukakino, K. Sonoda, T. Fujiwara and A. Yamamoto

Observation of a Fracture Source in High Strength Silicon Nitride Based Ceramics
Y. Yanaba, W.S. Cho, M. Itabashi and K. Hayashi

Preparation and Property of Si-Ti-C-O Fibre/Glass-Ceramics Composites
M. Tamura, N. Miyamoto, M. Sato, O. Sakamoto and T. Yamamura

Effect of Uni-Directional Orientation of SiC Whisker on Mechanical Properties of SiC Whisker/Si₃N₄ Composite Ceramics
W.S. Cho and K. Hayashi

Preparation and Properties of Honeycomb Ceramics in the Al₂O₃-SiO₂-K₂O*6TiO₂ System
H. Numoto, Y. Takeuchi, Y. Ono and A. Nishino

Sinterability and Properties of Ceramics Based on Chromium Oxide
T. Oshita, M. Kobayashi and K. Shibuki

Continuous Kneading for Electrically Conductive Composite Materials and Evaluation of Filler Dispersion State
K. Terashita, Y. Mizuno, T. Tanaka and K. Miyano

Preparation and Characterization of Sintered High Density Indium-Tin Oxide(ITO)
T. Machino, T. Sugihara and Y. Ohuchi

Microstructure of Fe₂O₃-γFe₂O₃ Intermediate Thin Films
Y. Yamazaki, T. Namikawa and K. Okuda

Electrochemical Properties of Some Perovskite Type Oxides as Cathode Materials for Solid Oxide Fuel Cells
Y. Takeda, Y. Sakaki, N. Imanishi and O. Yamamoto

Fabrication and Mechanical Properties of ZrO₂ Solid Solution Ceramics in the System ZrO₂-Al₂O₃
K. Hirota, N. Shiokawa, K. Tsuji, S. Inamura, H. Miyamoto and O. Yamaguchi

Preparation of Nickel Oxide Films by Dip-Coating Process
Z. Zhang, L. Wang and Z. Liu

T25. Environmental & Economic Matters, and Others

Reducing Lead-Times in Planning, Costing and Design of PM Components Using Knowledge-Based Expert Systems
S. Tarmey and H. Maleki

The Environmental Impact Linked with Production of P/M Parts or Functionally Equivalent Machined Components
G.F. Bocchini and B.D. Benedetti

Recovery of Palladium from Waste Ceramic Capacitors by Liquid-Liquid Extraction
B. Hu, T. Fujita, M. Mariya and T. Wakamatsu

A New Recycled Material Prepared from Ferrite Sludge and Used Cell
T. Tsuji and N. Sakakibara

Activated Magnete for CO₂ Fixation and Recycling System
Y. Tamaura, T. Togawa and M. Tsuji

P/M Education Priorities: Perspectives of Managers, Consultants, and Academics
C.J. Kasouf, D.C. Zenger, P.U. Gummeson, D. Apelian and M. Ahearne

Engineering of Human Society: Where Are We Going in the 21st Century?
P.H. Shingu
