Contents

Preface V
In memoriam Professor Isamu Kobayashi VII

A Study of Artificial Life as a Model of Automatic Model Building, Invited Presentation, S. Ohsuga and J. Vaario 1
Complete Decompositions of Join Dependencies: Extended Abstract, I. Kobayashi 23
What's in a Concept? Thoughts on Formal Techniques and Usefulness, A. Bijl 34
A Conceptual Model as a Mental Construct: Its Origin, Development, Function and Elicitation, M. Kangassalo 50
Processive Relevance in Conceptual Modelling, E. Marjomaa 62
An Algebraic Logic for Concept Structures, J. Fischer Nilsson 75
Modeling the Requirements Engineering Process, C. Rolland 85
A Framework of Story Understanding in the SD-Form Semantics Model, E. Kawaguchi, M. Wakiyama, G. Shao and M. Lee 119
Towards the Foundations of Concept Theory, J. Palomäki 139
Relationship Lattices for Information Modelling, G. Schmelz Pedersen 155
Imprecise Queries and the Quality of Conceptual Models, A.T. Berztiss 174
A Further Consideration on the Functional Models, K. Kise, M. Ashida, S. Dan and T. Kitahashi 186
Conceptual Modelling as Theory Construction: Some Implications for the Metalevel Treatment, T. Vadén 191
Chunk Grammars for PC Hypertext, J. Henno 202
An Attibute Grammar Modelling of Interactive Figures, T. Tokuda and Y. Watanabe 212
Principles of Object Oriented Database Design, K.-D. Schewe, B. Thalheim 227
F2Concept: A Database System for Managing Classes’ Extensions and Inten-
sions, G. Falquet, M. Léonard and J. Sindayamaze 243
A Formal Notation for Database Conceptual Schema Specifications, D. Castelli and E. Locuratolo 257
Database Design Modifications Based on Conceptual Modelling, P. van Bommel 275
A Metadatabase System for Supporting Semantic Interoperability in Multi-
databases, Y. Kiyoki and T. Kitagawa 287
Experimental Data Modelling by Rapid Prototyping, A. Salminen 299
A Conceptual Schema with Time: Modelling the ISO-case with TEMPORA, B. Wangler 313
Backward Dual Resolution. Direct Proving of Generalization, A. Ligęza 336
Contents

A Discussion of Semantic Abstraction, G. Koch 350
A Logic Database Language with Tree Patterns, I. Shioya 357
Inductive Inference of Prolog Programs with Linear Data Dependency from Positive Data, H. Arimura and T. Shinohara 365
Extraction of Data Dependencies, M. Castellanos and F. Saltor 400
Software Process Modelling with the TAP Approach: Tasks-Agents-Products, T. Kinnula, J. Ljungberg, N. Yonezaki and M. Saeki 421
