## Volume II

### Session A4 & B4: COST 231 Propagation I
Organiser and Chair: Prof. J. Bach Andersen, AUC, Denmark

<table>
<thead>
<tr>
<th>AB4.1</th>
<th>Ray tracing based path loss prediction in two microcellular environments</th>
<th>Karim Rizk, Jean-Frederic Wagen, Fred Gardiol, Switzerland</th>
<th>384</th>
</tr>
</thead>
<tbody>
<tr>
<td>AB4.2</td>
<td>A deterministic model for the planning of microcellular mobile radio communication systems</td>
<td>M.G.J.J. Klaassen, A. Mawira, Netherlands</td>
<td>389</td>
</tr>
<tr>
<td>AB4.3</td>
<td>Investigation on the influence of large buildings on the propagation of radio waves</td>
<td>W.A.T. Kotterman, A. Mawira, G.J.C. Verhoef, Netherlands</td>
<td>396</td>
</tr>
<tr>
<td>AB4.4</td>
<td>Propagation over buildings using the angular spectrum of plane waves</td>
<td>Peter A. Matthews, U.K.</td>
<td>402</td>
</tr>
<tr>
<td>AB4.5</td>
<td>Ray optical wave propagation modeling in urban micro cells</td>
<td>D.J. Cichon, W. Wiesbeck, Germany</td>
<td>407</td>
</tr>
<tr>
<td>AB4.6</td>
<td>Radio coverage of road tunnels at 900 and 1800 MHz by discrete antennas</td>
<td>Thomas Klemenschits, Ernst Bonek, Austria</td>
<td>411</td>
</tr>
</tbody>
</table>

### Session C4: Interference cancellation II
Organiser: Prof. Y. Bar-Ness, NJIT, U.S.A.; Chair: Prof. M. Nakagawa, Keio Univ. Japan

<table>
<thead>
<tr>
<th>C4.1</th>
<th>Adaptive multiuser CDMA detector for asynchronous AWGN channels</th>
<th>Zoran Siveski, Lizhi Zhong, Yeheskel Bar-Ness, U.S.A.</th>
<th>416</th>
</tr>
</thead>
<tbody>
<tr>
<td>C4.2</td>
<td>On the multiuser detection using a Hopfield network in M-ary/SSMA communications</td>
<td>T. Nagaosa, Teruyuki Miyajima, Takaaki Hasegawa, Japan</td>
<td>420</td>
</tr>
<tr>
<td>C4.3</td>
<td>A modified multi-stage co-channel interference cancellation in asynchronous CDMA systems</td>
<td>Essam Sourour, Masao Nakagawa, Japan</td>
<td>425</td>
</tr>
<tr>
<td>C4.4</td>
<td>Blind adaptive deconvolution using higher order statistics over the spread spectrum multipath channel</td>
<td>Massimiliano Martone, Italy</td>
<td>430</td>
</tr>
<tr>
<td>C4.5</td>
<td>Performance of DS signal data detection based on the matched filter and the median filter in the AWGN channel and with continuous tone jamming</td>
<td>Jari Iinatti, Pentti Leppanen, Finland</td>
<td>431</td>
</tr>
<tr>
<td>C4.6</td>
<td>Interference cancellation for DS-CDMA systems over flat fading channels through pre-decorrelating</td>
<td>Zhenyu Tang, Shixin Cheng, China</td>
<td>435</td>
</tr>
</tbody>
</table>

### Session D4: Timing and Synchronization
Organiser: TPC; Chair: Prof. D. van Willigen, TU Delft, Netherlands

| D4.1 | Timing aspects of synchronous CDMA | Richard D.J. van Nee, Netherlands | 439 |
D4.2 An improved acquisition algorithm for the synchronization of CDMA personal wireless systems  
W.A. Krzymien, A. Jalali, P. Mermelstein, Canada  
D4.3 Simulations of the acquisition module for DS-CDMA systems  
A. Gonzales-Ahijado, Belen Ruiz-Mezcua, Spain  
D4.4 Time-window control loop (TWCL) for post-detection RAKE receiver in DS/CDMA radios  
Yasuo Suzuki, Eisuke Kudoh, Japan  
D4.5 Modified coherent PN-code tracking delay-locked loop  
A. Wilde, Germany  
D4.6 Effects of imperfect synchronisation on a direct sequence spread spectrum communication system  
M.J. Stehouwer, Netherlands  

Session E4: VLSI II  
Organiser: Dr. S. Kato, NTT Res. Labs. Japan; Chair: Prof. E. Bonek, TU Wien, Austria  
E4.1 A low power 13-bit linear feature codec with programmable frontend  
K. Riedmuller, T. Karem, Drago Strle, Anton Pletersk, Austria  
E4.2 n/4-shift QPSK digital modulator LSIC for personal communication terminals  
Tetsu Sakata, Kazuhiko Seki, Shuji Kubota, Shuzo Kato, Japan  
E4.3 A low power demodulator LSIC for personal communications - high performance coherent detection demodulator  
Yoichi Matsumoto, Shuji Kubota, Shuzo Kato, Japan  
E4.4 A very low power consumption ADPCM voice codec LSIC for personal communication systems  
Kiyoshi Enomoto, Akira Dobashi, Masanobu Suzuki, Takeo Hasumi, Kazuhiko Seki, Shuji Kubota, Shuzo Kato, Japan  

Session A5 & B5: COST 231 Propagation II  
Organiser: Prof. J. Bach Andersen, AUC, Denmark; Chair: E. Damosso, CSELT, Italy  
AB5.1 Ray tracing models for indoor environments and their computational complexity  
Thomas Huschka, Germany  
AB5.2 Indoor and outdoor propagation modeling in pico cells  
D.J. Cichon, W. Wiesbeck, Germany  
AB5.3 Channel sounding measurements at 59 GHz in city streets  
Geir Lovnes, Judite Joao Reis, Rune Harald Rackken, Norway  
AB5.4 Wide-band simulations and measurements of mm-wave indoor radio channels  
Peter F.M. Smulders, Jose J.G. Fernandes, Portugal  
AB5.5 Reflection and transmission behaviour of building materials at 60 GHz  
B. Langen, G. Lober, W. Herzig, Germany  
AB5.6 Estimation of materials characteristics from power measurements at 60 GHz  
Luis M. Correia, Paulo O. Frances, Portugal
### Session C5: Interference Cancellation III

Organiser: Prof. Y. Bar-Ness, NJIT, U.S.A.; Chair: Prof. L.B. Milstein, UC San Diego, U.S.A.

**C5.1** Design and experimental results for a spread-spectrum near-far interference-suppression device  
W. Pietsch, Michael Schubert, Germany ........................................... 514

**C5.2** An efficient technique for deriving receiver filters in multiuser asynchronous DS/SSMA  
P.D. Alexander, Lars K. Rasmussen, Australia .................................. 519

**C5.3** New results on the application of antenna diversity and turbo-codes in a JD-CDMA mobile radio system  
Markus Nasshan, Peter Jung, Germany ............................................. 524

**C5.4** On the influence of the channel impulsional response estimation on the performance of a linear interference canceller for a DS/CDMA system  
P. Diaz, R. Agusti, Spain ................................................................. 529

**C5.5** Adaptive multiuser bootstrapped decorrelating CDMA detector in asynchronous unknown channels  
Yeheskel Bar-Ness, David W. Chen, Zoran Siveski, Netherlands ............. 533

**C5.6** Slow FH/16-QAM mobile communication system with an interference immunity decoding method  
Kiyoshi Hamaguchi, Hideichi Sasaoka, Japan ................................... 538

### Session D5: Advanced coding and modulation

Organiser: Prof. A. Svensson, Chalmers UT, Sweden;  
Chair: Prof. A. Svensson/Prof. T. Maseng, Univ. of Lund, Sweden

**D5.1** A generalized concatenated coding scheme for CDMA digital radio communication systems  
P. Kempf, Jamshid Khunjush, Germany ............................................. 543

**D5.2** Block QPSK modulation codes with two levels of error protection  
R.H. Morelos-Zaragoza, S. Lin, Japan .............................................. 548

**D5.3** Trellis coded hybrid frequency and phase modulation with expurgated phase code and asymmetric signal constellation  
Gunawan Wibisono, Iwao Sasase, Japan ............................................ 553

**D5.4** Trellis coded modulation using partially overlapped signal sets of non-equiprobable signaling  
Masayuki Ariyoshi, Iwao Sasase, Japan ............................................. 558

**D5.5** M-ary phase coding for correlated Rayleigh fading channels  
Raymond Knopp, Harry Leib, France .............................................. 563

**D5.6** Combined multi-amplitude and multi-dimensional digital communication systems  
Spase L. Drakul, Italy ................................................................. 568

### Session C6: Satellite Systems

Organiser and Chair: Prof. S.G. Glisic, Univ. Oulu, Finland

**C6.1** Broadband CDMA satellite paging service  
Donald L. Schilling, F.J. Bruno, U.S.A. (invited paper) ...................... 573

**C6.2** Outage probability for the uplink of a DS-CDMA system operating over a LEO mobile satellite channel  
B.R. Vojcic, L.B. Milstein, R.L. Pickholz, U.S.A. ............................ 574
### Session D6: Signal detection
Organiser: TPC; Chair: Prof. T.J. Tjhung, Nat. Univ. Singapore

<table>
<thead>
<tr>
<th>D6.1</th>
<th>BER and outage performance of a dual-signal receiver for narrowband BPSK modulated co-channel signals in a Rician fading channel</th>
</tr>
</thead>
<tbody>
<tr>
<td>G.J.M. Janssen, Netherlands</td>
<td>601</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>D6.2</th>
<th>Error probability for diversity detection of binary signals over Nakagami fading channels</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gennaro Fedele, Italy</td>
<td>607</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>D6.3</th>
<th>Bounds for the error probability of TCM-PSK over the correlated Rayleigh channel with diversity</th>
</tr>
</thead>
<tbody>
<tr>
<td>J. Ventura-Traveset, E. Biglieri, Netherlands</td>
<td>612</td>
</tr>
</tbody>
</table>

<table>

<th>Improved Eb/No estimation with soft quantized detection</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dieter Kreuer, Enno Bierbaum, Germany</td>
<td>620</td>
</tr>
</tbody>
</table>

### Session B6: Handover
Organiser: TPC; Chair: Dr. P.R. Chevillet, IBM Res. Switzerland

<table>
<thead>
<tr>
<th>B6.1</th>
<th>Implications of cell planning on handoff performance in Manhattan environments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Per-Erik Ostling, Sweden</td>
<td>625</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>B6.2</th>
<th>Continuous location of moving GSM mobile stations by pattern recognition techniques</th>
</tr>
</thead>
<tbody>
<tr>
<td>Olrik Kennemann, Germany</td>
<td>630</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>B6.3</th>
<th>Handling of user mobility in a CDMA cellular network</th>
</tr>
</thead>
<tbody>
<tr>
<td>Francesco Delli Priscoli, Fabrizio Sestini, Italy</td>
<td>635</td>

</table>

<table>
<thead>
<tr>
<th>B6.4</th>
<th>A new architecture for mobile radio with macroscopic diversity and overlapping cells</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stefan Zurbes, Wolfgang Papen, Werner Schmidt, Germany</td>
<td>640</td>
</tr>
</tbody>
</table>

### Session D7: Equalisation
Organiser: TPC; Chair: Dr. Kohno, Yokohama Univ., Japan

<table>
<thead>
<tr>
<th>D7.1</th>
<th>An adaptive truncated MLSE receiver for Japan digital cellular</th>
</tr>
</thead>
<tbody>
<tr>
<td>K.A. Hamied, G.L. Stuber, U.S.A.</td>
<td>645</td>
</tr>
</tbody>
</table>

<table>
<thead>

<th>Performance evaluation of decision feedback equalisation using measured indoor radio channels</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.J. Krapels, R. Prasad, J. Wu, A.H. Aghvami, Netherlands</td>
<td>650</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>D7.3</th>
<th>Adaptive equalization scheme in dual diversity reception for digital mobile communication systems</th>
</tr>
</thead>
<tbody>
<tr>
<td>Kohi Ueda, Keishi Murakami, Tadashi Fujino, Japan</td>
<td>655</td>
</tr>
</tbody>
</table>
D7.4 Adaptive channel precoding for slowly fading channels
W. Zhuang, W.A. Krzymien, P.A. Goud, Canada ........................................ 660

Session E5: Air interfaces
Organisers and Chair: Prof. Y. Kinoshita, Shinshu Univ., Japan and Dr. D. McFarlane, BT Res. Labs, U.K.

E5.1 A common air interface for a cellular auxiliary personal communications service
John Avery, Jun Yamada, U.S.A .......................................................... 665
E5.2 Radio access layer service guarantees
Erik Anderlind, Sweden ................................................................. 670
E5.3 An advanced air interface - another point of view
James M. Durante, Kenneth A. Felix, U.S.A ....................................... 675
E5.4 DCP systems specifications: a low-cost flexible CDMA architecture for cordless and PCS applications
Christopher Flores, Saman Behtash, U.S.A ........................................ 680
E5.5 An advanced TDMA mobile access system for UMTS
Alistair Urie, Malcolm Streeton, Christophe Mourot, France .................. 685
E5.6 ATDMA test objectives
K. David, T. Kassing, D. Florack, Germany ....................................... 691

Session C8: RAKE receivers
Organiser: TPC; Chair: Prof. G.L. Stüber, Georgia Inst. of Tech., U.S.A.

C8.1 RAKE receiver CDMA performance
Patrik Nilsson, Torleiv Maseng, Sweden ........................................... 696
C8.2 Broad-band propagation channel analysis for DS and hybrid CDMA system design
C8.3 Improved channel modelling for performance analysis of a DS-CDMA link
Michael A. Couture, Jean-Paul M.G. Linnartz, U.S.A ......................... 705
C8.4 A study on multipath propagation characteristics for RAKE receiving technique
Tetsu Tanaka, Japan ........................................................................... 711
C8.5 Channel modelling for a predictive RAKE receiver system
D.I. Laurencson, G.J.R. Povey, U.K. ................................................. 715
C8.6 CDMA RAKE receiver for cellular mobile radio in Nakagami fading frequency selective channels
Iman M. Salama, Emand K. Al-Hussaini, Egypt .................................... 720

Session D8: Antenna architectures
Organiser and Chair: Prof. E.S. Sousa, Univ. Toronto, Canada

D8.1 Mobile radio environments and adaptive arrays
Ole Norklit, Jorgen Bach Andersen, Denmark .................................... 725
D8.2 A novel algorithm for flexible beam forming for adaptive space division multiple access systems
B.X. Weis, Germany ........................................................................... 729
D8.3 Performance enhancement for microwave and millimetre wave indoor communication systems by quasi-coherent combining of multiple antenna signals
G.J.M. Janssen, W.R. Bredero, R. Prasad, Netherlands ....................... 730
D8.4 Application of space division multiple access to mobile radio
C. Farsakh, J.A. Nossek, Germany .................................................... 736
D8.5 Comparison of several space diversity techniques for MLSE receivers in mobile communications
Rafal Krenz, Krzysztof Wesolowski, Poland ................................................................. 740

D8.6 Influence of the user mobility on the spatial multiplex gain of an adaptive SDMA system
M. Tangemann, Germany ................................................................. 745

Session C9: CDMA techniques
Organiser: TPC; Chair: Prof. D.L. Schilling, City Coll. N.Y., U.S.A.

C9.1 A constructive method to find the cycles of an arbitrary cyclic (n,k)-code over \( F_2 \) relevant to weight distribution and cross-correlation
C. Herrmann, Germany ................................................................. 750

C9.2 Linear equivalence of binary Golay complementary sequences
Kari H.A. Karkkainen, Pentti A. Leppanen, Finland ................................................................. 755

C9.3 Multichannel identification in multiuser spread spectrum communications affected by multipath using third order cumulants
Massimiliano Martone, Italy ................................................................. 760

C9.4 Pe performance of a half chip offset QPSK modulation CDMA scheme for wireless LAN systems
Takotoshi Sugiyama, Masato Mizoguchi, Shuji Kubota, Shuzo Kato, Japan ................................................................. 761

C9.5 DS-CDMA performance evaluation over measured indoor radio propagation channels
Homayoun Nikookar, Ramjee Prasad, Netherlands ................................................................. 766
