CONTENTS PART I

REVIEW

LADLE METALLURGY AND ASSOCIATED TECHNOLOGIES - IMPORTANT TOOLS IN THE RESTRUCTURING OF THE WORLD STEEL INDUSTRY by O. Nyquist (The Swedish Steel Producers Association, Sweden) 7

SECONDARY STEELMAKING, A MUST FOR MEETING THE STEEL CONSUMER'S DEMANDS by P. Nilles and C. Marique (Centre de Recherches Metallurgiques, Belgium) 15

A STEEL CONSUMER'S VIEW ON LADLE METALLURGY - HIS MATERIAL NEEDS TODAY AND IN THE FUTURE by L.B. Ekbom (FOA - National Defence Research Establishment, Sweden) 53

LADLE METALLURGICAL PRACTICE I

THE USE OF GASES WITHIN METALLURGY by M. Brunner (AGA AB, Sweden) 57

MATHEMATICAL MODELLING OF PHYSICAL AND CHEMICAL INTERACTIONS BETWEEN CARBON DIOXIDE AND LIQUID STEEL IN SECONDARY METALLURGY PROCESSES by J.M. Palacios (Basque Country University, Spain) and J.M. Castresana (ACENOR S.A., Spain) 87

INCLUSION FLOTATION AND FLUID FLOW PATTERN DURING GAS BUBBLING IN THE TUNDISH by F. Weisang and M. Till (L'Air Liquide, France) 99

SECONDARY STEELMAKING AT COCKERILL SAMBRE CHERTAL by S. Gualtieri, V. Furlan and J. Defays (Cockerill Sambre, Belgium) 155

INJECTION METALLURGY

PNEUMATIC TRANSPORT OF EXTREMELY FINE PARTICLES by P.J. Koros, T.H. Bieniosek, J.H. Kaminski and R.G. Petrushka (LTV Steel Company, USA) and T.R. George (T.G. Associates, USA) 183
DEVELOPMENT OF A LADLE SLIDING GATE INJECTION (S.G.I.) PROCESS by D.W. Stamp, S. Henderson (British Steel Technical Teesside Laboratories, Great Britain) and J. Kennedy (British Steel Engineering, Great Britain)

HOT METAL DESULPHURISATION AT KOVERHAR STEEL WORKS by J. Kolsi (Dalsbruk Oy Ab, Finland)

INJECTION STEEL TREATMENT THROUGH SLIDE GATE by M. Lanchava, A. Gabisiani and A. Bakuradze (Georgian SSR, Sovjetunion)

EROSION OF REFRACTORY DURING GAS INJECTION - A CAVITATION BASED MODEL by Q-X. Yang, H. Gustavsson (Luleå University of Technology, Sweden) and E. Burström (MEFOS, Sweden)

THE DEVELOPMENT OF TUNDISH PLASMA HEATER AND ITS APPLICATION FOR IMPROVEMENT OF STEEL QUALITIES by K. Umezawa, Y. Nuri, K. Matumoto and T. Kuwabara (Nippon Steel Co. - Hirohata R&D Lab., Japan)

APPLICATIONS AND OPERATION RESULTS OF THE KRUPP A.C. PLASMA SYSTEMS IN SECONDARY METALLURGY by T. Hoster, H.J. Bebber and M. Breitzmann (Krupp Industrietechnik GmbH, West Germany) and K.H. Schubert (Krupp Stahl AG, West Germany)

OXYGEN INJECTION REHEATING: THE ECONOMICAL ANSWER FOR COLD STEEL HEATS by N.R. Griffing and P.D. Stelts (Bethlehem Steel Corporation - Homer Research Laboratories, USA) and K.J. Fioravanti (Air Products and Chemicals, Inc, USA)

PROCESS CONTROL I

PROCESS MODELLING by J. Szekely (MIT, USA) and T. Lehner (Boliden Mineral AB)

PHYSICAL MODEL STUDIES OF METAL/SLAG MASS TRANSFER IN GAS-STIRRED LADLE PROCESSES by S.H. Kim (Pohang Institute of Science and Technology, Korea), R.J. Fruehan (Carnegie-Mellon University, USA) and R.I.L. Guthrie (McGill University, Canada)

THERMODYNAMIC ACTIVITY INTERACTION COEFFICIENTS OF CALCIUM AND ALLOYING ELEMENTS IN IRON-BASED METLS by I.A. Magidson, A.V. Basov and N.A. Smirnov (Moscow Evening Metallurgical Institute, Sovjetunion)

KNOWLEDGE BASED CONTROL IN MATERIALS PROCESSING (AS APPLIED TO OSPREY TECHNOLOGY) by D. Apelian and A. Meystel (Drexel University, USA)
NEEDS AND SEEDS OF SENSORS FOR STEELMAKING AND LADLE METALLURGY by K.S. Goto and K. Nagata (Tokyo Institute of Technology, Japan)

DETERMINATION OF LADLE LINING HEAT CONTENT WITH RADIATION THERMOMETER by S. Rutqvist, D. Bergman and B. Olika (Luleå University of Technology, Sweden)

APPLICATION OF THERMODYNAMIC COMPUTER PROGRAM TO DEOXIDATION PROCESS by M. Lahtinen and L.E.K. Holappa (Helsinki University of Technology, Finland)

ON LINE MEASUREMENT OF THE HYDROGEN CONTENT WITH THE HYDRIS IMMERSION PROBE SYSTEM by J. Plessers and M. Bijvoet (Electro-Nite International N.V., Belgium)

LADLE FURNACE/VACUUM TREATMENT

LADLE FURNACE OPERATION - METALLURGICAL, TECHNICAL AND ECONOMICAL ASPECTS by T. Yajima (Daido Steel Co. Ltd., Japan)

PRODUCTION OF CLEAN STEEL WITH Si-Mn DEOXIDATION USING CaO FLUX SYSTEM by S. Inoue, T. Usui, Y. Kikuchi, T. Teraoka and H. Mori (NKK - Corporation, Japan)

ADVANCED LADLE REFINING TECHNOLOGY FOR THE PRODUCTION OF HIGH QUALITY STEEL by S. Kawasaki, S. Okushima, M. Yuki and M. Nitta (Kobe Steel Ltd., Japan)

DECARBURIZATION BEHAVIOUR AT LOW CARBON REGION IN RH DEGASSING PROCESS by S. Kouroki, T. Obana, Y. Shirota and M. Tanaka (Sumitomo Metal Industries, Ltd., Japan)

VACUUM METALLURGY - METALLURGICAL AND ECONOMICAL CONSIDERATIONS by E. Burström and G. Carlsson (MEFOS, Sweden)

THE CAS-OB PROCESS IN THE STEELSHOP OF FOS SUR MER CONCEPTION AND FIRST OPERATING RESULTS by S. Audebert (IRSID, France) and P. Gugliermina, JP. Reboul and M. Sauermann (Sollac Fos sur Mer, France)
