CONTENTS

Preface v

SECTION 1. QUANTUM GRAVITY: GENERAL

On some problems of quantum and classical gravitation
M. A. Markov 3

Lattice quantization of the $O(1,2)/O(2) \times \mathbb{Z}_2$ sigma model in 4 dimensions

Third quantization of gravity and the cosmological constant problem
G. Lavrelashvili, V. A. Rubakov and P. G. Tinyakov 27

No time and quantum gravity
W. G. Unruh 44

Quantum metric topology
C. J. Isham, Y. A. Kubyshin and P. Renteln 60

Minisuperspace wavefunctions for cosmology and wormholes
D. N. Page 82

Wave functions constructed from an invariant sum-over-histories satisfy constraints: three derivations of the Wheeler-DeWitt equation
J. J. Halliwell and J. B. Hartle 92

Supersymmetric quantum wormhole states
P. D. D'Eath, H. F. Dowker and D. I. Hughes 124

On the conformal factor problem in quantum gravity
Yu. V. Novozhilov and D. V. Vassilevich 144

$w_\infty$-geometry and $w_\infty$-gravity
K. S. Stelle 154

Uncertainty and equivalence principles in quantum general relativity
H.-H. v. Borzeszkowski 167

Ashtekar variables without hypersurfaces
G. Fodor and Z. Perjés 183
Three dimensional four-fermion (vector) x (vector) model is renormalizable and ultraviolet finite

N. V. Krasnikov and A. B. Kyatkin

Quantum field theory in space with discrete geometry

V. E. Kur'yan

Quantum theory of particles with Planckian masses

A. A. Grib and V. Yu. Dorofeev

Optimal Cavendish-type experiment for the search of restrictions on light particles of quantum gravity

V. M. Mostepanenko and I. Yu. Sokolov

SECTION 2. QUANTUM EFFECTS IN BLACK HOLES AND IN ACCELERATED FRAMES

Quantum string gravity near the Planck scale

G. Veneziano

More on the black hole S-matrix

G. 't Hooft

Physical effects in wormholes and time machine

V. P. Frolov and I. D. Novikov

Vacuum polarization in a locally static multiply-connected spacetime and a time machine problem

V. P. Frolov

Inequalities which constrain negative energy in quantum field theory

L. H. Ford

On a quantum mechanical model of a black hole

V. A. Berezin

Light like surface layers in general relativity

C. Barrabès and W. Israel

Quantum-mechanical scattering of charged black holes

J. Traschen and R. Ferrell

The Dirac sea in accelerated frames or magnetic fields

S. Hacyan
SECTION 3. VERY EARLY UNIVERSE

One-loop quantum cosmology: the general semiclassical solution of the Wheeler-DeWitt equations and its applications

* A. O. Barvinsky and A. Yu. Kamenshchik *

Experimental constraints on dark matter

* J. Ellis *

Environment-induced superselection in cosmology

* W. H. Zurek *

The self-measurement of the Universe and the concept of time in quantum cosmology

* M. B. Mensky *

Mechanical properties and cosmological implications of current carrying cosmic strings

* B. Carter *

Quantum string theory in curved space-times

* N. Sánchez *

Quantum processes in the gravitational field of a cosmic string

* D. D. Harari and V. D. Skarzhinsky *

Equilibrium configurations of superconducting cosmic strings in background fields

* O. Heinrich *

Thermodynamics of the neutral string gas in electromagnetic background

* E. J. Ferrer, E. S. Fradkin and V. de la Incera *

On multi-inflation cosmological models

* H.-J. Schmidt *

O(3)-invariant tunneling at false vacuum decay in general relativity

* V. A. Berezin, V. A. Kuzmin and I. I. Tkachev *
The problem of the wave function of the Universe in the radiation dominated case

M. A. Castagnino, E. Gunzig and P. Nardone

Kaluza-Klein models: from quantum state to observations

Cosmological solutions from supersymmetric Kaluza-Klein theory

R. Kerner, R. Balbinot and J. C. Fabris

Space-time dimension of the Universe

H. Terazawa

On the origin of classical density perturbations in the inflationary universe

R. Brandenberger, R. Laflamme and M. Mijić

Squeezed quantum states in theory of cosmological perturbations

L. P. Grishchuk and Yu. V. Sidorov

Can the anisotropy of microwave background radiation be discovered at present?

V. G. Gurzadyan and A. A. Kocharyan
