THE PROCEEDINGS OF THE 1994 ANNUAL MEETING OF IVHS AMERICA

Moving Toward Deployment

Volume 2

April 17-20, 1994
Atlanta, Georgia
Volume 2

Demand Elasticity Under Time Varying Prices: A Case Study of the Golden Gate Bridge
  Jonathan L. Gifford
  Scott W. Talkington

Transportation and the Implications of New Technologies
  John F. Sanger

Telecommuting: How Much? How Soon?
  John B. Hopkins
  John O'Donnell
  Gary T. Ritter

Evaluation of System Operating Strategies for Ramp Metering and Traffic Signal Coordination
  Farhad J. Pooran
  Henry C. Lieu

SONET Communications Architectures for IVHS Backbones
  Bruce Abernethy
  Barry L. Johnson

Software Architecture Design for Traffic Management Systems
  Matthew Liotine
  Garry D. Bennett

VII
The TRANSCOM TRANSMIT Project: An Alternative Approach for Traffic Surveillance and Incident Detection
K. R. Marshall
Tom Batz

Improving Energy Efficiency and Air Quality By the Use of Routing and Scheduling Optimization Programs
Gary L. Lashaw
William G. Nulty

IVHS and the Environment: New Models for Federal, State and Local Cooperation in the Application of Advanced Transportation Systems for Environmental Improvement in Urban Areas
Lee W. Munnich, Jr.
Candace Campbell
Gary DeCramer
Barbara Rohde
Frank Douma
David Van Hattum

Assessment of Air Quality Impacts - IVHS Implementations in Southampton and Cologne
Paul J. Taylor
Bob McQueen

Goals and Definitions of Automated Highway System Concepts
William B. Stevens

A Functional Architecture for Automated Highway Traffic Planning
H.-S. Jacob Tsao

A Preliminary Assessment of Issues and Risks for the Infrastructure Deployability of Automated Highway Systems
Mark A. Miller
Youngbin (Y.B.) Yim
Paul A. Hellman
Mohammad Sharafsaleh

IVHS Traveller Information Interchange: The State of the Standards
Jackson Wang
Susan Scott

Standard Location Referencing (SLR) System: Road Name ID Scheme
Ramesh Ramakrishnan
Clay Collier
Dave Behr

Finding the Right IVHS Partnership on a Local Level
Michael C. Pietrzyk
Raymond A. Yetta w

The I-95 Corridor Coalition: Advancing Intermodal IVHS In a Complex Institutional Context
Hal Kasoff
Stephen R. Kuciemba
Dealing with IVHS Issues in Urban Areas
   Raman K. Patel

Traveler Information Services Within the Context of the Information Services Industry
   Raymond L. Bolduc
   Kenneth M. Huber
   David R. Morehead

Speech Recognition and In-Vehicle Interfaces Prototype for Intelligent Vehicle-Highway Systems
   Mary T. Mock

Voice Operated Information System (VOIS) for Driver's Information Guidance System
   Prasuna DVG Reddy
   Ryuichi Kitamura
   Paul P. Jovanis

Development of Toyota ATIS In-Vehicle Equipment in VICS Demonstration Test
   Akihiko Nojima
   Hiroshi Morita
   Hiroshi Kondo
   Norio Komoda

Implementation of IVHS Technologies Under Brisbane's Linked Intersection Signal System (BLISS)
   Laurie Petersen

System Design of Advanced Mobile Information System (AMIS)
   Masataka Imaizumi
   Yuji Hasegawa
   Eiji Keitoku

ROMANSE -- A Road Management System for Europe
   David E. Tarrant

A Consensus-Building Process for the Design of a Regional Traffic Information Center
   Amy Polk

Integrating GIS-T and IVHS: Data Sharing for Dynamic Transportation Modeling
   John Sutton

Support Systems for Advanced Traffic Management Systems Control Centers
   César Pérez
   Gardiner Hall
   Barry Grasso
   Michael Ward

The European Approach to Standards for Road Transport and Traffic Telematics
   D.P. van Wijk

The Japanese Approach to IVHS Standards
   Hironao Kawashima
   Yoshitaka Hata
Simulation Study of the Effect of Four Route Guidance Systems on Driver Distraction
Raghavan Srinivasan
Paul P. Jovanis
Chun-Zin Yang
Ryuichi Kitamura
Cheryl Hein
Francine Landau

The Effect of a Collision Avoidance System on Drivers' Braking Responses
R. Graham
S. Hirst

Preliminary Human Factors Guidelines for Crash Warning Devices
Ronald D. Lyons
Neil Lerner
Bari Kotwal

Essential Issues Involved in Radar-Based Collision Warning/Avoidance Systems
Hiroshige Fukuhara
Kunihiko Kurami

JFK Airport Integrated Transportation System
K. K. Saxena
Paul Carris

Traffic Information and Driver Behavior in the Paris Region
Yves Durand-Raucher

Rapid Deployment of Minnesota's Traffic Management Systems
Richard A. Stehr
Glen C. Carlson

The Development of New York City's Regional Traffic Management Center
Robert G. Rausch
Raman K. Patel

Cellular Based Traffic Surveillance -- The Washington, DC Area Operational Test
R. Sumner
R. Smith
J. Kennedy
J. Robinson

A Commercial Product Advancing the State-of-the-Arts: Intelligent Mobile Data Network (IMDNs)
Charles L. Taylor

Electromagnetic Compatibility (EMC) for the IVHS from System Architecture to Component Level
J. L. Norman Violette
P. J. Mondin

X
The Demand for and the Change in Commuting Behavior Attributed to the Use of a Corridor Specific ATIS Pre-Trip Incident Alert System  
W. Patrick Beaton  
Amit Sadana

Impact of Traffic Information on Commuters' Behavior: Empirical Results from Southern California and Their Implications for ATIS  
Mohamed A. Abdel-Aty  
Kenneth M. Vaughn  
Paul P. Jovanis  
Ryuichi Kitamura  
Fred L. Mannering

The Emergence of Smart Traveler Kiosks and the User Interface Requirements for Their Successful Deployment  
J. L. Schroeder  
Jeff Green

Rural IVHS Outreach: Stimulating Local Agency Interest and Involvement  
Barbara McClure Schroeder  
Stephen S. Clinger

Recreational Applications of IVHS in New Jersey  
Jeffrey P. Arch

Rural ATIS: Assessment of User Needs and Technologies  
Mohsen Zarean  
R. Sivanandan  
Davey Warren

Ramp Metering: A System Concept Design Methodology  
Vassilios Alexiadis  
James W. Schmidt

Integrated Real-Time Ramp Metering Control for Non-Recurrent Congestion: Modeling and Strategy Development  
Gang-Len Chang  
Jifeng Wu  
Stephen L. Cohen

An Advanced Traffic Management System for Hampton Roads, Virginia  
David Hill  
Jeffrey Minnix  
Charles Hall

FAST-TRAC Program System Integration Plans  
James C. Barbaresso  
Terry L. Kemp

Benefits of Digital Maps in Advanced Public Safety Systems  
Lawrence E. Sweeney, Jr.
The IVHS Potential of Surface Detection Radar

John W. Andrews
Richard J. Sasiela
Hayden Schultz
Daniel Wyschogrod

The Effects of Variable Message Signs on Traffic Patterns in the Paris Region

Jean-Luc Ygnace
Youngbin Yim

Real-Time Incident-Responsive Corridor Control: A Successive Linear Programming Approach

Gang-Len Chang
Jifeng Wu
Henry Lieu

Toward Comprehensive APTS Evaluations: Results of a National Workshop

Thomas A. Horan
Paul M. A. Baker

Predicting Dynamic Travel Times Under Incidents in Transportation Networks

Bin Ran
Hong K. Lo
Stein Weissenberger
Bruce Hongola

Automating Incident Management with GIS Technology

Nitin Vaidya
Robert H. Siegfried

Development and Field Deployment of a Machine Vision Based Incident Detection System

Panos G. Michalopoulos
Craig A. Anderson
Richard D. Jacobson

Transportation Management Centers for IVHS: Survey of Existing Capabilities

Hong K. Lo
John R. Windover
Randolph W. Hall

ETTM Technology: Current Success and Future Potential

Neil D. Schuster

Design of an Integrated Data Collection Program to Support Modeling of User Response to ATIS Services

Moshe Ben-Akiva
Amalia Polydoropoulou
Isam Kaysi
Haris Koutsopoulos
Paul Whitworth

A Neural Network Based Traffic Delay Prediction Model for Freeway Lane Closure

X. Peter Huang
Radical Innovation or Incremental Improvement? What is IVHS and How Should It Be Organized?

Hans K. Klein
Joseph Sussman

The Successful Deployment of a Multi-User Standard Communications Protocol for Local Controllers

H. Nathan Yagoda
John Graham
Steven G. Bailey
Douglas Mullis

Real-Time Freeway Ramp Control Emulation System

Edmond Chin-Ping Chang
Carroll J. Messer
Tom Urbani II

Development and Field Implementation of Open Architecture Controllers

Hector L. Alicea

CHART: Chesapeake Highway Advisories Routing Traffic

Stephen R. Kuciemba
