Transport and Reactive Processes in Aquifers

Edited by
TH. DRACOS & F. STAUFFER
Institut für Hydromechanik und Wasserwirtschaft (IHW), Eidg. Technische Hochschule Zürich

A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 1994
# Table of contents

**Preface**  
XIII

**Organization**  
XIV

**Opening address**  
XV

**Th. Dracos**

## Invited lectures

**Use of models in decision making**  
3

*J. Bear*

**Overview: Processes limiting the occurrence of organic contaminants in moving groundwater**  
11

*P.M. Gschwend, B.A. Holmén, A.A. MacKay, J.N. Ryan, D.A. Backhus & Y.-P. Chin*

**Visualization of flow and transport at the pore level**  
19

*J.L. Wilson*

**Behavior of microbes in aquifers**  
37

*T.N.P. Bosma & A.J.B. Zehnder*

## Laboratory and field experiments

**Simulation of arsenic transport in column experiments: Estimation of sorption kinetics of As(III) and As(V) species in simple aquifer systems**  
45

*M. Isenbeck-Schröter, K. Hamer, F. Reitz, J. Schubert & H.D. Schulz*

**Biodegradation of an organomercurial by a bacterial resistant strain and transport of a micropollutant through an homogeneous porous medium**  
53

*E. Marcandella, C. Bicheron & M.A. Buès*

**Kinetics and mechanisms of abiotic transformations: Surface-catalysed hydrolysis of pesticides in steady-state systems**  
59

*M. Gfeller & G. Furrer*

**Sensing reactive mineral surfaces in natural sediments by nitroaromatic model compounds**  
67

*S.B. Haderlein & R.P. Schwarzenbach*

**The role of aquifer sediment in controlling redox conditions in polluted groundwater**  
73

*G. Heron & T.H. Christensen*
Influence of EDTA on the mobility of trace metals in aquifers: Illustration with column experiments on slightly contaminated solids from an alluvial aquifer
A.C.M. Bourg, C. Crouzet & C. Bertin

Development and application of a fibreoptic fluorimeter for in-situ tracer concentration measurements
G. Schmid & B. Barczewski

Comparison of measuring methods for strontium adsorption parameters
T. Igarashi & Y. Mahara

The Waterloo Drive-Point Profiler – Detailed profiling of VOC plumes in groundwater aquifers
M. M. Broholm, R. A. Ingleton & J. A. Cherry

Speciation of reduced forms of sulfur in aquifer sediments and implications for the attenuation of heavy metals in landfill leachate pollution plumes
C. Crouzet, R. S. Altmann & A. C. M. Bourg

Transport of Cd and Cu in a zone of calcite dissolution: Column experiments and modeling
K. Hamer, R. von Lührte & M. Isenbeck-Schröter

Transport of chromium (VI) in saturated layer of sediment: Column experiments and modelling
E. Tevissen, M. O. Nicolas-Simonnot, M. Sardin, D. Schweich & R. Margrita

Multicomponent transport of major cations in columns
M. Černík, K. Barmettler, M. Borkovec & H. Sticher

The effects of cosolutes and cosolvents on the adsorption of BTEX compounds from groundwater
M. H. Barrett, L. Gikas & D. N. Lerner

Modelling the fate of organic compounds in in situ microcosm experiments
P. L. Bjerg, A. Brun, P. H. Nielsen & T. H. Christensen

Transport and behaviour of soluble hydrocarbon constituents in sandy soils
A. Leuthold, O. Razakarisoa & G. Schäfer

Nonequilibrium transport of PAHs: A comparison of column and batch experiments
Ch. Schüith & P. Grathwohl

Transient transport of colloids in a weakly clayey sand
B. Harmand & M. Sardin

Field investigations and parameter estimation

A comparison of investigation methods for the prediction of flow and transport in highly heterogeneous formations
T. Ptak & G. Teutsch

Integrating different types of information for estimating aquifer transmissivities with the sequential indicator cosimulation method
H. Kupfersberger
The influence of correlation length of highly conductive zones in alluvial media on the transport behaviour
M.-T. Schafmeister & Gde Marsily

Integration of geophysical and sedimentological information in the stochastic description of inhomogeneities in fluvial gravel deposits
P. Huggenberger, M. Rauber & F. Stauffer

Field experiments of radionuclide migration at the Grimsel Test Site (Swiss Alps)
E. Hoehn, T. Fierz, U. Frick & J. Eikenberg

From field measurements to effective hydraulic properties of a fractured aquitard: A case study
S. Löw, D. Guyonnet, J.-M. Lavanchy, O. Voborny & P. Vinard

3d inverse modeling in fractured aquifers
U. Kuhlmann & J. Trösch

Contaminant transport at a waste incinerator residue deposit: Inverse modelling
T. O. Sonnenborg, P. Engesgaard & D. Rosbjerg

Estimating parameters in aquifer with frequency spectrum method of dynamic observation series
Damei Li & Xiangsan Wang

Newer techniques in aquifer parameter estimation from pump test data
S. K. Goyal & N. K. Khullar

Geoelectrics for estimating aquifer transport properties
W. E. Kelly, O. Mazac & S. Mares

Multiple pumping tests in heterogeneous porous aquifers: A method for the determination of spatial variability of effective hydraulic parameters
H. Schad & G. Teutsch

Spectral analysis of tracer tests: A comparison with time domain methods
P. Marschall & G. Schäfer

An integrated description of the organic pollution plume from a landfill (Grindsted, Denmark)

Use of biotracers to study groundwater contamination by septic tank leaching bed systems

Transport of nutrients to small surface water through drainage
G. A. P. H. van den Eertwegh

Definition of protected areas for drinking water wells: A field study
A. Lopez, M. Varro, P. P. Limoni & M. Maggiore

Reactivity of natural sediments in relation to groundwater quality in several hydrogeochemical environments
H. P. Broers & J. Griffioen

Field and numerical study of water flow in fissured aquifers
A. Szymanski & M. Schöninger

Modelling transport and reactive processes
Towards a transport model involving geochemical mechanisms from adsorption to precipitation
J. Lützenkirchen & P. Behra
An integrated modelling system for nitrogen transport
R. J. Lunn & R. Mackay
Effect of nonlinear sorption on contamination/remediation of heterogeneous aquifers
V. Cvetkovic & G. Dagan
Instantaneous injection of a nonlinearly adsorbing solute in a heterogeneous aquifer
W. J. P. Bosma, S. E. A. T. M. van der Zee, A. Bellin & A. Rinaldo
Modelling the adsorption of metals on natural surface oxides
C. Tiffreau, J. Lützenkirchen & Ph. Behra
Field-scale transport of weathering products from mining waste
G. Destouni & N. Eriksson
On equilibrium and the number of degrees of freedom in modeling transport in porous media
J. Bear & J. J. Nitao
Three-dimensional Monte Carlo analysis of spatial spreading during reactive solute transport by groundwater
D. F. Haley, E. A. Sudicky & R. L. Naff
Simulation of multicomponent reactive transport in groundwater
E. O. Frind, D. W. Blowes, J. W. Molson & C. J. Ptacek
A kinetic biofilm concept for groundwater transport modelling
A. Zyset, F. Stauffer & T. Dracos
A coupled microbiology-geochemistry transport model for saturated groundwater flow
A. Brun, P. Engesgaard & E. O. Frind
Simulation of a xylene spill in a sandy aquifer with a 3D transport and biogeochemistry model
W. Schäfer, R. Therrien & A. Voss
Desorption of organic pollutants (PAHs) from contaminated aquifer material
P. Grathwohl, W. Pyka & P. Merkel
Dissolution and mass transfer processes for residual organics in the saturated groundwater zone
N. Guiguer & E. O. Frind
Numerical simulation of the evolution and remediation of NAPL contamination in heterogeneous porous media
A. J. A. Unger, E. A. Sudicky & P. A. Forsyth
Dimensionality effects in simulation of reactive transport in two and three dimensions
P. Engesgaard, H.C. Ammentorp & J.C. Refsgaard

An equilibrium-nonequilibrium groundwater quality model
P. Marzal, A. Seco & J. Ferrer

Contaminant transport at a waste incinerator residue deposit: 2D hydrogeochemical modelling
R. Traberg & P. Engesgaard

The weathering of pyrite in lignite areas – Oxygen supply as a limiting factor of sulphate generation
A. Prein & R. Mull

Multiphase flow

Behavior of two-phase flow in heterogeneous porous media
A. E. Abdin, C. M. Chang, J. J. Kaluarachchi & M. W. Kemblowski

Experimental investigation of the migration of the miscible and immiscible components following a light oil spill
M. B. Butts & K. H. Jensen

Quality assurance of the isolation of a contaminated location: Large scale pilot test
G. J. Mulder, D. Pereboom & J. B. Sellmeijer

Effective large-scale parameters for two-phase flow in heterogeneous porous media
B. H. Kueper & B. Girgrah

Multiphase fluid distributions in a shallow water-table aquifer contaminated by crude oil
W. N. Herkelrath, H. I. Essaid & L. A. Dillard

Diffusive disappearance of immiscible-phase organic liquids in fractured porous media:
Finite matrix blocks and implications for remediation
B. L. Parker & D. B. McWhorter

Column experiments concerning rate limited vapour extraction of volatile organic compounds from wet sands
K. Wehrle & J. Brauns

Aquifer remediation

Solvent flushing dynamics in contaminated soils

Enhanced dissolution of heterogeneously distributed solvents residuals by methanol flushing
A field experiment
K. Broholm & J. A. Cherry

Numerical simulation of rate-limited vapour extraction of volatile organic compounds in wet sands
J. Croisé, J. E. Armstrong & V. Kaleris
Mass transfer from liquid to vapor phase in porous media during soil venting procedures
A. Lange & R. Mull

Spatial variability in redox conditions and groundwater bioremediation
D. L. Marrin
