CERAMICS - CHARTING THE FUTURE

Proceedings of the World Ceramics Congress, part of the 8th CIMTEC-World Ceramics Congress and Forum on New Materials
Florence, Italy June 28-July 4, 1994

PART B

Edited by

P. VINCENZINI
National Research Council, Italy
Phase equilibria in the Si-Al-O-N system and the synthesis of ceramic powders by carbothermic reduction of oxides
A. Jha, C. Davey, S.J. Yoon, A. Chrysanthou and T.S. Tang ............... 623

Influence of precursor chemistry on the formation of K-β-alumina ceramics and phase relations in the system K₂O-MgO-Al₂O₃
A.P. De Kroon, G.W. Schäfer and F. Aldinger .......................... 631

Synthesis of beta silicon carbide by carbothermal reduction - Thermodynamics and kinetics considerations
V. Kevorkijan and A. Krizman ........................................... 639

Preparation and characterisation of CA-W/β-sialon materials
J.W.T. van Rutten, H.T. Hintzen, R.A. Terpstra and R. Metselaar ...... 647

Determination of mineralizing effect of salt addition for boron carbide reaction on boron carbon system
G. Göller, C. Toy, C.K. Gupta and A. Tekin ................................ 655

Solid solutions in the system PbZrO₃ - K₀.₅Bi₀.₅TiO₃ - PbTiO₃
T. Zarembo ................................................................. 663

Effect of oxygen vacancy concentration on metastability of zirconia phases dispersed in alumina matrix
H. Tomaszewski and K. Godwod ........................................... 671

Equilibrium state in BN-Al mixtures: comparison of calculated and experimental data
E. Benko ................................................................. 679

Structural characterization of hexagonal Ba₁₋ₓAl₂₋₂xSi₂₋₄xO₈ phases synthesized from zeolite precursors

Structure and properties of the solid solutions in Sn-Sb-Cu-O system
S. Mihaiu, M. Zaharescu, D. Crisan, N. Dragan and S. Zuca ............. 695

Application of Born-Mayer potential for excess energy calculation in oxide crystals of the NaCl type
B. Revzin and J. Pelleg .................................................... 703
Stress-induced phase transformation of \((R_{1-x}\text{La}_x)\text{Al}_2\text{O}_3\) (\(R=\text{Y, Ho}\))
M. Shimada and H. Takizawa ........................................... 711

Sol-gel materials in \(\text{TiO}_2-\text{Sb}_2\text{O}_3\) system
A. Vasilescu, M. Stan, R. Marchidan and R. Popescu .................. 717

\(\text{Ti}_3\text{SiC}_2\) - A plastic ceramic material
R. Pampuch and J. Lis .................................................... 725

2p X-ray absorption of titanium in mullite/zirconia composites
M.O. Figueiredo, A. Correia dos Santos, M.F. Melo, F. de Groot
and M. Abbate ......................................................... 733

High temperature behaviour of cerium oxide-zirconium oxide system
in air. A previous simulation of chemical and structural features
of plasma sprayed thermal barriers
A. Rouanet, A. Ferriere, L. Lestrade and G. Peraudeau ............... 739

Intrinsic fracture energies and high-temperature crack-growth laws
of highly refractory covalent ceramics
G. Pezzotti, T. Nishida and M. Sakai .................................. 745

A study on the diffusion of cobalt atoms in \(\text{Co}_{0.96}\text{Fe}_{2.04}\text{O}_4\) ferrites
by means of the variation of grain boundary impedance
A.R. Ferreira, C.S. Furtado and J.M. Perdigao .......................... 753

Experimental studies of diffusion and thermodiffusion of silver
and chromium into \(\text{Al}_2\text{O}_3\)
M.J. Buda ................................................................. 761

The mechanism of chemical reactions during the SiC and \(\text{Si}_3\text{N}_4\)
deposition in the CVD process
S. Jonas, W.S. Ptak, W. Sadowski and E. Walasek ........................ 771

High temperature interactions between nickel alloys and single
crystal alumina
J. Cihlar, K. Maca and D. Janova .................................... 779

Precipitation and in-situ-growth of \(\text{WB}_2\) from supersaturated \((\text{Ti, W, Cr})\text{B}_2\)
solid solutions
I. Mitra, D. Buttner, R. Telle, O. Babushkin and T. Lindback ........ 787

Kinetic study and modeling of grain growth in a \(\text{BaTiO}_3\) powder at 850°C
F. Gelebart, M. Pijolat, M. Soustelle and C. Magnier ................ 793
SECTION B2 - MECHANICAL AND THERMAL PROPERTIES

Fatigue, Creep, Plasticity, Toughness, Elasticity, Strength, Thermal Stresses, Thermal Conduction

Microstructural mechanisms of cyclic fatigue-crack propagation in grain-bridging ceramics
C.J. Gilbert, R.H. Dauskardt and R.O. Ritchie .......................... 803

Cyclic and static fatigue measurements in Y-TZP materials
J. Chevalier, C. Olagnon, G. Fantozzi and B. Cales ...................... 811

Cyclic and static fatigue of gas pressure sintered silicon nitride at 1000°C
A. Bushby, F. Guiu and M.J. Reece ........................................ 819

Crack-wake shielding and small-scale crack-tip yielding as potential mechanisms for improving the delayed-failure resistance of silicon nitride at elevated temperatures
G. Pezzotti, T. Nishida and M. Sakai .................................... 825

Slow crack growth as a function of relative density for vitreous silica
D. Ashkin, R.A. Haber and J.B. Wachtman ............................... 835

Creep behaviour of SiC-particle-reinforced glass
C.v. Minden, C. Hedemann and H. Hübner ................................ 843

Microstructural and mechanical effects of zirconia amount in a superplastic alumina matrix
O. Flacher and J.J. Blandin .................................................. 851

Thermomechanical properties and creep behaviour of hot pressed aluminium nitride
P. Descamps, D. Libert and F. Cambier ................................. 859

Superplasticity and creep of TZP with glass and platelet additions
C.v. Minden, B. Bergmann, C. Wolf and H. Hübner ....................... 867

Fracture toughness of advanced ceramics as measured by the surface crack in flexure method
G.D. Quinn and C.A. Tracy .................................................... 875

Microstructure and toughness correlation in silicon nitride ceramics
H.-J. Kleebe, S. Unger, E. Meissner and G. Ziegler ....................... 883

Indentation cracking of ceramics surface subjected to atmospheres of H2O, CO2 and NH3 at high temperatures
Z.M. Librant, M. Boniecki and W.M. Recko .............................. 891
XXII

Enhanced performance of Y-TZP materials through compositional zoning on a nano-scale
S. Lawson, G.P. Dransfield, A.G. Jones, P. McColgan and W.M. Rainforth .......................................................... 899

Determination of R-curve in alumina based ceramics by indentation technique
M. Boniecki ........................................................................ 907

High temperature mechanical spectroscopy measurements on silicon nitride materials
A. Lakki, R. Schaller, G. Bernard-Granger and R. Duclos .......................... 915

Mechanical strength of thermally aged and cycled thin zirconia sheets
J. Kübler, R. Primas and B. Güt ............................................. 923

Mechanical behaviour of dense and porous reaction bonded silicon carbide under uniaxial and biaxial loading: Part I - Uniaxial loading
R. Arone, L. Potepun, K. Stiebler and E. Staskewitsch .......................... 929

Mechanical behaviour of dense and porous reaction bonded silicon carbide under uniaxial and biaxial loading: Part II - Biaxial loading
E. Staskewitsch, K. Stiebler and R. Arone ..................................... 937

Dependence of Weibull’s modulus on experimental parameters
J.C. Glandus ..................................................................... 945

Mechanical reliability and properties of sintered portland clinker

Thermal shock behaviour of porous alumina: comparison between theoretical and experimental analyses
F. Mignard, C. Olagnon, M. Saadaoui and G. Fantozzi ...................... 959

Numerical analysis of internal thermal stresses in alumina ceramics
M. Boniecki, T. Niezgoda and W. Szymczyk .................................. 967

Two transient methods for the evaluation of thermal conductivity and thermal diffusivity of building materials
F. Barberis, R. Berti and P. Morabito ..................................... 975

SECTION B3 - EROSION, CORROSION, FRICTION AND WEAR

Corrosion of non-oxide ceramics (Invited Lecture)
K.G. Nickel .......................................................... 985

Oxidation of ZrC single crystals in the temperature range of 500 to 600°C
S.Shimada, M. Nishisako and M. Inagaki .................................... 997
Burner rig hot-salt corrosion of hot pressed Si$_{3}$N$_{4}$-3wt%Al$_{2}$O$_{3}$-8wt%Y$_{2}$O$_{3}$
T. Graziani, D. Baxter and A. Bellosi .................................................. 1003

Degradation behaviour of advanced ceramic powders: (I) Superconducting and tetragonal zirconium oxide
Y. Sakka, T. Uchikoshi and S. Ohno ..................................................... 1011

FTIR and XRD characterization of Si$_{3}$N$_{4}$ oxidation scale
E. Proverbio, F. Carassiti and G. Favuzzi ........................................... 1019

Characterisation of thin films formed on silicon nitride based ceramics in an H$_{2}$S/H$_{2}$O/H$_{2}$ gas mixture at 1350°C

The sliding wear of ceramics (Invited Lecture)
W.M. Rainforth ................................................................. 1035

High temperature wear behaviour of silicon nitride
C. Melandri, M. Gee, G. De Portu and S. Guicciardi ................................. 1047

Experimental investigation and fracture mechanical modelling of static and sliding sphere on plate contact in silicon nitride
M. Rombach ...................................................... 1055

Frictional properties of ceramic-ceramic and ceramic-metal contacts
T. Dickerson ................................................................. 1065

Low amplitude oscillatory wear of Y-TZP in various environments
A.W.C. Tse, S. Lawson and C. Gill ................................................. 1075

Surface wear and tribological investigations of silica doped alumina ceramics
M.L. Ovecoglu and S. Kinikoglu ..................................................... 1083

SECTION B4 - TESTING METHODS

Fracture mechanics evaluation of structural ceramics by bend bar specimens with sharp notch
T. Nishida and G. Pezzotti ..................................................... 1093

Development and validation of a tensile creep test equipment for wear components specimens of engineering ceramics
L. Crippa and G. Merckling ..................................................... 1097

Applicability of the diametral compression test for strength measurements of ceramics
G. Bernauer, U. Soltesz and R. Schäfer ........................................... 1105
Fracture behaviour of 2D carbon/carbon composites
V. Kostopoulos, L. Vellios, G.C. Christopoulos, E. Martin,
S. Bouyou and Th. Lorriot .................................................. 1113

Measurement of the residual stresses in alumina/zirconia composites
by piezo-spectroscopy
V. Sergo, D.R. Clarke and W. Pompe .......................................... 1125

A simplified method to determine $K_{IC}$ in brittle materials
G. Diaz, P. Kittl and V. Martinez ................................. 1133

The monitoring and prediction of the ageing-induced phase transformations
occurring in zirconia ceramics using a microwave dielectric loss
tangent technique
S. Lawson, H.C. Gill, G.P. Dransfield, P.A. Smith, T. Button
and N.McN. Alford ............................................................. 1141

Ultrasonic non destructive evaluation: high resolution techniques
for ceramic materials
E. Biagi, A. Fort, M. Labanti, L. Masotti and L. Ponziani ......... 1151

Comparison of the methods for thermal shock and modelization works
G. Bisson ................................................................. 1163

Determination of impurities in silicon nitride materials
M.-F. Barba and P. Ortega ........................................ 1169

PROCESS SCIENCE

SECTION B5 - POWDER SYNTHESIS AND CHARACTERIZATION

Powders of monodispersed simple, composite, and coated particles as
ceramic precursors (Invited Lecture)
E. Matijevic .............................................................. 1177

Soft chemical route to crystalline ferrites
M. Ueda, S. Shimada and M. Inagaki .................................... 1189

Thermal two-stage process for preparation of doped LZT ceramic powder
from heterometallic organocomplex compounds
E. Günther and U. Maciejewski ............................................ 1195

Powder synthesis by a sol-gel emulsion process
J. Campaniello, S. Pickering, D. McGarry and K. Schuster .......... 1203

Zircon formation from amorphous spherical ZrSiO$_4$ particles obtained
by chemical reactions in aerosols
T. Gonzalez-Carreno, P. Tartaj, J. Sanz, C.J. Serna and
M. Ocana ............................................................... 1211
Synthesis of magnetic materials with small particle size
M.V. Cabanas, J.M. Gonzalez-Calbet and M. Vallet-Regi .................. 1221

Preparation of Al2O3, mullite and cordierite precursor powder by
the ultrasonic spray pyrolysis and their crystallization

Optimization of synthesis parameters of PZT powder through
hydrothermal routes
L. Lemoine, A. Leriche, P. Tronc and B. Thierry ...................... 1237

Precipitation of calcium carbonate by carbon dioxide method
J. Peric, M. Vucak and R. Krstulovic ................................. 1245

Low sintering PZT-powders by mixed oxide processing
H.-J. Gesemann and A. Schonecker .................................. 1251

Synthesis of ceramic nanocomposites in a microwave plasma
D. Vollath and D.V. Szabo ........................................... 1261

Microstructural engineering through gas phase synthesized Y-TZP
powders
G.P. Dransfield, P.D. Harmsworth, A.G. Jones and P. McColgan ........ 1269

Production of nanocrystalline Si/C/N powders from the vapour phase
N. Jones and B. Derby ................................................. 1277

Reduction CVD synthesis of titanium diboride ceramic composite
materials for high temperature applications
A. Jha and S.J. Yoon .................................................. 1283

Novel routes for the synthesis of materials in the quaternary system
Si-B-C-N and their characterisation
J. Bill, A. Kienzle, M. Sasaki, R. Riedel and F. Aldinger ............ 1291

Synthesis of nanosized silicon nitride powders in RF plasma reactors
J. Szepvolgyi and I. Mohai-Toth ..................................... 1301

Applications of novel gas phase produced zirconia ceramics
P. McColgan and G.P. Dransfield .................................... 1309

Nanometric silica powder synthesis by laser spray pyrolysis of
tetraethoxysilane
M. Cauchetier, N. Herlin, E. Musset, M. Luce, H. Roulet, G. Dufour,
A. Gheorghiu and C. Senemaud ....................................... 1319

Superfine powder by melt quenching
D. Hülsenberg, O. Knauf and B. Hamann ................................ 1327
Formation of (Ba, Pb)TiO₃ by reaction of BaTiO₃ with molten PbCl₂
Y. Ito, S. Shimada and M. Inagaki ........................................ 1335

High porosity preforms and high aspect ratio particles based on AlN obtained by carbothermal nitridation
J.-P. Disson, L. Motta and R. Bachelard ................................. 1341

Processing of β-sialon from kaolin
F.S. Cinar, J.C.T. van der Heijde, R.A. Terpstra and A. Tekin ...... 1351

Formation of SiC particle and whisker from rice husk
P. Nongluck, N. Makong and L. Chotimongkol .......................... 1359

Synthesis of SiC and Si₃N₄ from rice husk
A. Sayginer, N. Kuskönma, E. Acma, O. Addemir and A. Tekin ...... 1367

Alumina-metal nanocerments by mechanoynthesis
D. Osso, O. Tillement, G. Le Caer, A. Mocellin and P. Matteazzi .... 1375

Mechanochemical effects on vermiculite and its influence on the synthesis of nitrogen ceramics
P.J. Sanchez-Soto, A. Ruiz-Conde, M.A. Aviles, A. Justo and J.L. Perez-Rodriguez .............................................. 1383

Sol-gel synthesis and NMR characterization of ceramics (Invited Lecture)
J. Livage, F. Babonneau, M. Chatry and L. Coury .................... 1391

Al₂O₃-gel structure changes during aging
U. Janosovits, H.-J. Kleebe and G. Ziegler .............................. 1403

Vanadia, niobia and tantala doped zirconia
G. Gritzner, C. Puchner, A. Pissenberger and J. Dusza ............ 1411

Correlation between nanostructure and sintering properties of zirconia powders
G. Cerrato, L. Ferroni, L. Montanaro and C. Morterra ............... 1419

Study of temperature programmed desorption of aluminium nitride powders by means of mass spectrometry
M. Chen and R. Metselaar .................................................. 1427

Morphological characterization of oxide ceramic powders obtained by the polymeric precursors method
C.A. Paskocimas, E.R. Leite, A.C. Antunes, E. Longo and J.A. Varela .......................................................... 1435

Characterization of ceramic nanoparticles and nanocomposites by high resolution electron microscopy
D.V. Szabo and D. Vollath .................................................. 1443
Degradation behaviour of advanced ceramic powders: (II) AlN and TiN ultrafine powders
Y. Sakka, T. Uchikoshi, H. Okuyama and S. Ohno ................................. 1451

Characterization of TiB₂ powders synthesized by carbothermic method
M. Cirakoglu, C. Toy and A. Tekin .................................................. 1459

Characterization of sintered alloys in the system CeO₂-ZrO₂-Y₂O₃
from pyrolytic powders
L. Podda and F. Ricciardiello ......................................................... 1465

Determination of sodium content and particle size distribution in
Turkish Al₂O₃ powders after calcination with AlF₃
S. Sameer, E. Acma, O. Addemir and A. Tekin ................................. 1471

SECTION B6 - POWDER HANDLING AND FORMING PROCESSES

B6.1 - POWDER HANDLING

Synthesis of nanostructured materials by mechanical alloying
(Invited lecture)
P. Matteazzi, G. Le Caer and A. Mocellin ........................................ 1481

Zirconia-yttria granules spray dried from water and ethanol slurries
W. Pyda and M.S.J. Gani .............................................................. 1493

A method of preventing powder packing in a powder supply hopper
using a vibrating coil spring and plate
M. Saito and H. Maki ................................................................. 1501

The processing of diatomite with the view to developing low porosity
silica based monoliths
J. Markgraaff, K.V. Earle and S.W. Worster .................................. 1509

Surface properties of TiO₂ powders
E. Roncari, C. Galassi, A. Piancastelli and P. Pinasco ..................... 1517

Clean room processing of an alumina ceramic
A.P. Bromley, D.A. Hutson, F.L. Riley and L.S. Iovey ...................... 1525

B6.2 - COLLOIDAL PROCESSING

Colloidal processing (Invited Lecture)
Y. Hirata ................................................................. 1533

Powderless processing for the preparation of functional ceramic
fibers and films
D. Sporn, R. Jahn, W. Glaubitt and S. Merklein ............................ 1545
