SESSION 1

OPTICAL FIBER BUFFER COATINGS CURED WITH ULTRAVIOLET LIGHT
Kenneth Lawson, Robert Ansel & Joseph Stanton, DeSoto, Inc., Des Plaines, Illinois 3-6

THE SIGNIFICANCE OF GLASS TRANSITION TEMPERATURE ON EPOXY RESINS FOR FIBER OPTICS APPLICATIONS
Thomas W. Tamulevich and Vanessa E. Moore, Epoxy Technology, Inc., Billerica, Massachusetts 7-11

A PRACTICAL FIBER COATING SYSTEM
Frederic Quan and Dr. Merrill Lyn, Corning Glass Works, Corning, New York 12-14

SESSION 2

OPTICAL DEVICES FOR WAVELENGTH MULTIPLEXING AND DEMULTIPLEXING
W.J. Tomlinson, Bell Laboratories, Holmdel, New Jersey 17-20

LIQUID CRYSTAL SWITCHING COMPONENTS
Richard A. Soref, Sperry Research Center, Sudbury, Massachusetts 21-25

DESIGN AND PERFORMANCE OF OPTICAL MULTIPLEXERS AND DEMULTIPLEXERS FOR WDM SYSTEMS
G. Duck and W. Sinclair, Bell-Northern Research, Ottawa, Canada 26

A 4-CHANNEL WAVELENGTH-DIVISION-MULTIPLEXING TRANSMISSION SYSTEM
Ikutaro Kobayashi, Kiyoshi Nosu, Makoto Washio and Tetsuya Miki, Yokosu ECL, NTT, Yokosuka, Japan 27-30

INTEGRATED OPTICAL COMPONENT USING OPTICAL FIBER PIECES
E. Miyauchi, T. Iwama, H. Nakajima, N. Tokoyo and K. Shirai, Fujitsu Laboratories Limited Fujitsu Limited, Kawasaki, Japan 31-33

SESSION 3

PHOTO-INTEGRATED CIRCUITS FOR FIBER OPTIC RECEIVERS
Lawrence A. Murray, E/O Consultant, St. Louis, Missouri 37-39

CONVERSATIONAL OPTICAL LINKS USING THE OPTIMIZED TRANSCIEVER EROS
L. d’Auria and P. Richin, Thomson-CSF, Orsay, France 40-45

A VERSATILE HYBRID FIBER OPTIC RECEIVER
Eric M. Miller, National Semiconductor, Santa Clara, California 46-48

FIBER OPTIC HIGH CURRENT DC SWITCH
V. Patrick O’Neil and Craig Swartz, Motorola Semiconductors, Phoenix, Arizona 49-51

FIBER OPTIC LINE DRIVER MODEL LDT-256
Andrew Kan, Laser Diode Labs Inc., New Brunswick, New Jersey 52

ON THE TRANSMISSION OF LINEAR HIGH SPEED ANALOG DATA OVER FIBER OPTICS
D.B. Medved and J. Keating, Meret, Inc., Santa Monica, California 53-54

SINGLE-MODE CONSTRICTED DOUBLE-HETEROJUNCTION (CDH) DIODE LASERS
R.D. Miller, D. Botez, J.C. Connolly, and S.A. Stormfeltz, Electro Optics Division, RCA Lancaster, Pennsylvania 55-57
## Contents

### SESSION 4

**OPTICAL FIBER TECHNOLOGY IN COMPUTER COMMUNICATION NETWORKS**  
G.F. Bland, Optical Communication Technology, IBM Corp.  
Research Triangle Park, North Carolina  

**AN EXPERIMENTAL WIDE RANGE LIGHTWAVE DATA INTERFACE**  
Stewart S. Austin, Nathan M. Denkin, Robert R. Schulz, Bell Telephone Labs  
Holmdel, New Jersey  

**APPLYING TODAY'S FIBER OPTICS TO A DISTRIBUTED DATA NETWORK**  
Vincent L. Mirtich, Motorola, Inc., Phoenix, Arizona  

### SESSION 5

**PREDICTION OF WORST-CASE TRACKING ERROR IN A SYNCHRONOUS FIBER OPTIC LINK**  
S.S.R. Murty, Page Communications Engineers, Inc., Vienna, Virginia  

**A WINTER OLYMPIC LIGHTWAVE SYSTEM**  
P.H. Krawarik, S.S. Cheng, P.R. Wickliffe, Bell Laboratories, Holmdel, New Jersey  

**EFFECTS OF MICROWAVE MODULATION ON ILD SPECTRAL AND PERFORMANCE CHARACTERISTICS**  
Edward J. Miskovic, Harris Corporation, Melbourne, Florida  

**TEST RESULTS ON T4 FIBER OPTIC CABLE SYSTEM INSTALLATION**  
L. Sheer & W. Zenko, Canstar Communications, Toronto, Ontario, Canada  

### SESSION 6

**COHERENT FIBRE-OPTICS**  
S.A. Kingsley, D.E.N. Davies and B. Culshaw, Department of Electronic and Electrical Engineering, University College London, London, United Kingdom  

**AN APPLICATION OF FIBER OPTICS FOR A PERIPHERAL CONTROLLER TO A HIGH SPEED PRINTER**  
Richard H. Ong, Honeywell Inc., Phoenix, Arizona  

**INTERFEROMETRIC OPTICAL-FIBRE SENSORS AND MULTIMODE HETERODYNING**  
S.A. Kingsley, S. Lange, Department of Electronic and Electrical Engineering  
University College London, London, United Kingdom  

**USE OF LARGE-CORE FIBER OPTICS AS LIGHT SOURCES FOR COMPLEX OPTICAL SYSTEM ALIGNMENT**  
T.W. Sheehan and A. C. Saxman, University of California, Los Alamos, New Mexico  

### SESSION 7

**INDUSTRY STATUS REPORTS AND RECOMMENDATIONS FOR GOVERNMENT ACTION IN FIBER OPTIC COMMUNICATIONS**  
Joseph A. Hull, Institute for Telecommunications Sciences  
National Telecommunications and Information Administration, Boulder, Colorado  

**DEFACTO STANDARDIZATION BETWEEN FIBER OPTIC CABLE AND CONNECTOR MANUFACTURERS**  
Karen L. Kinsman, Siecor Optical Cables, Inc., Hickory, North Carolina
Contents

SESSION 8

FACTORS AFFECTING PERFORMANCE OF OPTICAL FIBER SPLICES AND CONNECTORS
K. Scott Gordon, Thomas & Betts Corporation, Raritan, New Jersey .......................... 103-104

SPlicing AND MEASUREMENTS OF OPTICAL FIBER CABLES IN RECENT GTE FIELD INSTALLATIONS
Ronald T. Miyahira, Hawaiian Telephone Company, Honolulu, Hawaii .................... 105-108

FUSION SPlicing OF SINGLE-MODE OPTICAL FIBERS
M. Ogai, The Furukawa Electric Co., Ltd., Tokyo, Japan
Y. Toda, The Sumitomo Electric Ind. Ltd., Yokohama, Japan
O. Watanabe, The Fujikura Cable Works, Ltd., Tokyo, Japan
Y. Kato, Ibaraki E.C.L of N.T.T., Ibaraki, Japan
H. Tsuchiya, Research and Development Bureau of NTT, Tokyo, Japan ...................... 109-112

PRACTICAL EXPERIENCES IN FIBER OPTIC SPlicing
P.K. Misra, Canstar Communications, Scarborough, Ontario, Canada ...................... 113-117

DEPENDENCE OF FIBER MODAL NOISE ON SOURCE, FIBER AND SPlice PARAMETERS
Eric G. Rawson,* Joseph W. Goodman,** and Robert E. Norton*
* Xerox Palo Alto Research Center, Palo Alto, California
** Department of Electrical Engineering, Stanford University, Stanford, California ......... 118-122

SPlicing AND TESTING MULTI-FIBER RIBBONS IN WESTERN ELECTRIC FIBER OPTIC CABLES UNDER FIELD CONDITIONS
Harry O. Lindstrom, Jr., Western Electric Co., Norcross, Georgia ............................ 123-128

SESSION 9

OPTICAL MEASURING TECHNIQUE OF WIDE-RANGE ELECTRIC FIELD IN HIGH VOLTAGE POWER SYSTEMS
Yutaka Ohno, Tokyo Electric Power Co., Inc., Tokyo, Japan
Yoichi Fujii, Institute of Industrial Science, University of Tokyo,
Roppongi, Minato-ku, Tokyo .................................................. 131-133

OPTICAL METHOD FOR MEASURING MAGNETIC FIELDS
Toshihiko Yoshino, Institute of Industrial Science, University of Tokyo
Roppongi, Minato-ku, Tokyo
Yutaka Ohno, Tokyo Electric Power Co. Inc., Tokyo, Japan ................................. 134-136

FIBER OPTICS IN GERMAN ELECTRIC UTILITIES
Siegfried Metz, Standard Elektrik Lorenz (SEL) AG, Stuttgart, Germany .................. 137-140

A MAJOR FIBER OPTIC TEST BED FOR THE ELECTRIC UTILITY INDUSTRY
Dr. Roosevelt A. Fernandes, Niagara Mohawk, Syracuse, New York
Alan F. Fairaizl, Siecor Optical Cables, Hickory, North Carolina .......................... 141-146

OPTICAL FIBER SENSOR FOR THE MEASUREMENT OF ELECTRIC FIELD INTENSITY AND VOLTAGE (OPSEF)
* Sumitomo Electric Industries, Ltd., Ofuna, Japan
** Tokyo Electric Power Co. Inc. .................................................. 147-151
SESSION 10

NEW LOW LOSS OPTICAL FIBER CONNECTORS
Andre Jacques, Socapex, Paris, France .................................................. 155-157

ATTENUATION AND BANDWIDTH EVALUATION OF DEUTSCH OPTICAL WAVEGUIDE CONNECTOR SYSTEM
Michael E. Padgett, Optoelectronics Engineer, National Aeroautics and Space Administration, Kennedy Space Center, Florida
Sedki M. Riad, Assistant Professor, Dept. of Electrical Engineering, Virginia Polytechnic Institute and State University, Blacksburg, Virginia ............... 160-162

IMPACT OF COUPLING EFFICIENCY ON FIBER OPTIC SYSTEM PERFORMANCE
Terry Bowen, AMP Incorporated, Harrisburg, Pennsylvania ..................... 158-162

BELL SYSTEM'S LIGHTGUIDE CABLE INTERCONNECTION EQUIPMENT
M.R. Gotthardt, Exploratory Optical Fiber Splicing Group, Bell Laboratories, Norcross, Georgia .................................................. 163

A RUGGED OPTICAL FIBRE CONNECTOR FOR USE IN FIELD ENVIRONMENTS
J.S. Leach, A.B. Harding and P.R. Cooper, Standard Telecommunication Laboratories Limited, Harlow, Essex, England
M.J. Cook, ITT Cannon, Basingstoke, Hampshire, England .................... 164-166

JOINTING AND SPLICING OF A SINGLE MODE OPTICAL FIBRE CABLE FOR SUBMARINE TELECOMMUNICATION SYSTEMS
J.S. Leach, Standard Telecommunication Labs, Harlow, England
R.C. Oldham, Standard Telephone and Cables, Southampton, England ........ 167

SESSION 11

WAVELENGTH DUPLEX COUPLER
George A. Gasparian, ITT EOPD, Roanoke, Virginia ................................ 171

A FAMILY OF KAPTRON FIBER OPTICS COMMUNICATIONS COUPLERS
Narinder S. Kapany, Kaptron, Inc., Palo Alto, California ......................... 172

VARIABLE ATTENUATOR FOR FIBER OPTICS APPLICATIONS
Antonio N. Paolantonio, P.E., Radio and Communications Consultant, Reseda, California .... 173-176

1.3 μm Hg Cd Te PHOTODECTORS FOR FIBER OPTICS APPLICATIONS
T. Nguyen Duy and G. Pichard, Societe Anonyme de Telecommunications, Paris, France
F. Raymond, CNRS — Laboratoire de Physique des Solides, Bellevue, France ........ 177-180

SESSION 12

A 4-CHANNEL WDM BASEBAND VIDEO OPTICAL FIBER SYSTEM FOR MONITORING ON AN AUTOMATED GUIDEWAY TRANSIT
Masatoshi Kajinot, Keijiro Nishimuratt, Fujio Hayashidatt, Tsuyoshi Otsukatt, Koji Itott, Hiroo Shionott, and Toshio Yamadatt
† Machinery & Engineering Division Kobe Steel, Ltd.
‡ Fiber Optic Communication Development Division, Nippon Electric Co., Ltd. .... 183-186

A 5.1 KM REPEATERLESS MULTI-CHANNEL FIBER OPTIC VIDEO TRUNK
Robert C. Tenten, Manhattan Cable TV, New York, New York
John Kaye, Joe Masterson, General Cable Company, Woodbridge, New Jersey .... 187-193
THREE TYPICAL 1980 FIBER OPTIC CATV INSTALLATIONS
A.C. Deichmiller, CATV Marketing Group, Times Fiber Communications, Inc.
Wallingford, Connecticut .................................................. 194-198

SESSION 13

SIGNAL ENHANCEMENT BY SPECTRAL EQUALIZATION OF HIGH FREQUENCY BROADBAND SIGNALS TRANSMITTED THROUGH OPTICAL FIBERS
James W. Ogle, EG&G, Santa Barbara Operations, Goleta, California
Dr. Peter B. Lyons, Los Alamos Scientific Laboratory, Los Alamos, New Mexico
Dr. Melvyn A. Holzman, Consultant, Boulder, Colorado ................................. 201-204

THE MEASUREMENT OF LONG TERM VARIATIONS IN OPTICAL FIBER ATTENUATION AND NUMERICAL APERTURE
Michael E. Padgett, National Aeronautics and Space Administration
Kennedy Space Center, Florida ............................................... 205-209

OPTICAL FIBER IMPULSE RESPONSE USING FREQUENCY DOMAIN OPTIMAL COMPENSATION DECONVOLUTION
Sedki M. Riad, Virginia Polytechnic Institute and State University, Blacksburg, Virginia 210-213

OPTICAL FIBER DISPERSION CHARACTERIZATION STUDY AT KENNEDY SPACE CENTER: PART II
Alan Geeslin, Harris Corporation, Melbourne, Florida
Aicha A.R. Riad, Dept. of Electrical Engineering, Virginia Polytechnical Institute and State University, Blacksburg, Virginia
Mike E. Padgett, National Aeronautics and Space Administration, Kennedy Space Center, Florida
Sedki M. Riad, Dept. of Electrical Engineering, Virginia Polytechnical Institute and State University, Blacksburg, Virginia 214-217

TESTING AND MAINTAINING DS-3 FIBER OPTIC SYSTEMS
S.J. Papp, General Transmission Engineering Dept., British Columbia Telephone Company, Burnaby, British Columbia ........................................ 218-224

SESSION 14

LIGHTGUIDE CABLE INSTALLATION IN UNDERGROUND PLANT

SIGNAL TRANSFER CHARACTERISTICS OF FIBER OPTIC CABLE
James L. McNaughton and Ronald L. Ohlhaber, Belden Corporation, Fiber Optics Dept.

FIBER OPTIC CABLE FOR COMPUTER BASED APPLICATION

PROBLEMS OF CONTACT EXTRUSION ON OPTICAL FIBERS AND ITS RELATIONSHIP TO ITS ABILITY TO SURVIVE IN SEVERE ENVIRONMENTS
Michael J. DiMauro, Galite Inc., Wallingford, Connecticut .............................. 239

EXTENDED SPECTRAL RESPONSE FIBER CABLES FOR WAVELENGTH MULTIPLEXING AND SYSTEM UPGRADING FROM 800 TO 1300nm
W.B. Bielawski, Siecor Optical Cables, Inc., Hickory, North Carolina .................. 240-244

NEW EFFICIENT METHOD FOR THE PRODUCTION OF HIGH QUALITY STEP INDEX FIBERS
Pierre Aldebert, Quartz & Silice, Paris, France ............................................. 245
Contents

BANDWIDTH OF PCS FIBERS VERSUS LENGTH, 
CORE SIZE AND LAUNCHING N.A. 
Pierre Aldebert, Quartz & Silice, Paris, France .......................................................... 246

SESSION 15

RADC FIBER OPTIC SYSTEM DEVELOPMENT PROGRAM: UPDATE 
1Lt Richard Druckenmiller and Paul Sierak, Griffiss AFB, New York .......................... 249

A 50 mb/s FIBER OPTIC PACKETIZED VOICE AND DATA BUS USING 
RANDOM MULTIPLE ACCESS 
P. Steensma and R. Smid, ITT, Nutley, New Jersey .................................................. 250

FIBER-OPTIC DATA BUS FOR THE AN/GYO-21(V) 
Harris Government Communications Systems Division, Melbourne, Florida .............. 251

POTENTIAL APPLICATIONS OF FIBER OPTICS TO ARMY TACTICAL 
COMMUNICATIONS 
Joseph Corvino, Bernard DeMarinis, Booz, Allen & Hamilton Inc., Tinton Falls, New Jersey .... 252

ARMY FIBER OPTIC INITIATIVES IN TACTICAL 
COMMUNICATIONS FOR THE 1980's 
E. Howe, A. Mondrick, J. Wright, U.S. Army CORADCOM, Fort Monmouth, New Jersey ........ 253

A 25MB/S INTERSHELTER FIBER OPTIC COMMUNICATIONS SYSTEM 
V. Mordowitcz, R. Taylor, D. Rice, J. Hamilton, GTE, Sylvania Systems Group 
Needham Heights, Massachusetts 
L. Coryell, U.S. Army Communications Research & Development Command, 
Fort Monmouth, New Jersey .......................................................... 254

SESSION 16

A MILITARY SIX FIBER HERMAPHRODITIC CONNECTOR 
TRW Philadelphia Research Laboratories .......................................................... 257-261

FIBER OPTIC TACTICAL FIELD CABLES 
Robert Thompson and Robert Kopstein, ITT Electro-Optical Products Division 
Roanoke, Virginia .......................................................... 262-266

CHARACTERISTICS OF MULTIPORT BICONICAL DUPLEX AND STAR 
COUPLERS FOR MILITARY AND COMMERCIAL APPLICATIONS 
Dr. Alexander W. Lightstone, Canstar Communications, Montreal, Quebec ...................... 267-270

RADIATION EFFECTS ON FIBER OPTICS 
Stewart Share and John Wasilik, U.S. Army Electronics Research and Development Command 
Harry Diamond Laboratories, Adelphi, Maryland ................................................ 271-275

OPTICAL FIBER SENSORS 
J.A. Bucaro, J.H. Cole, W.K. Burns, and T.G. Giallorenzi, Naval Research Laboratory 
Washington, D.C. .......................................................... 276
