ADVANCES IN METAL FORMING MACHINES

Edited by Yu, Xinlu
Guo, Hede

Tsinghua University Press
Beijing 1989
# TABLE OF CONTENTS

**Key Papers:**

- New Developments in German Metal-Forming Machines  
  D. Schmoeckel  
  3

- New Shearing and Forming Presses Based on Newly Developed Processes  
  T. Nakagawa  
  5

- Flexible Swiss Precision Machines for Metal Forming  
  J. Reissner  
  20

- Today's Situation and Development of Metal Forming Machine in China  
  Yu, Xinlu  
  31

**FMS & CIMS**

- Flexible Automated Discrete Production of Metal Components by Forging and Machining: A Simulation Model  
  A.G. Mamalis M.G. Bilalis A.C. Bikos V.S. Ganovsky  
  39

- Design and Development of a Forming CIM System  
  C. Lee  
  47

- Simulation and Evaluation of Material Handling System in Sheet Metal Forging  
  Yang, Zhicheng Zhang, Xiaoping Yu, Xinlu  
  54

**NC and CNC Automation**

- An Approach to Automation in Forging  
  Xia, Tianjiu  
  63
Modern Technology in Sheetmetal Cutting
D. Pickardt 69

The Fault-Tolerant Design and Its Realization in Computer Control System of High Reliability for Forging & Stamping Equipments
Wang, Yao Huang, Shuhuai Wang, Yungan 78

The Microcomputer Control System for Fast Forging Hydraulic Presses
Zhong, Yuexian Lin, Heng Zong, Sheng 85

Application of Adaptive Process Control in a Precision Bending Machine
M. Müller-Duysing J. Reissner 89

A Playback Spinning Machine Controlled by Two MCS-51 Single Chip Computers
D.C. Kang Q.M. Cheng J.R. Shen Z.C. Quan Z.R. Wang 96

On-Line Computer Aided Diagnosis of Petro-Forge High Energy Rate Forming Machines
C. Lee 101

CAD of Machine Tool

CAD of Heavy Hydraulic Cylinder
Yu, Xinlu Guo, Hede Zheng, Chuhong 109

CAD of Hydraulic Schemes and Expert System
Li, Congxin Huang, Shuhuai Wang, Yungan 118

A CAD System for the Friction Clutch and Brake of "C" Type Press
Xiao, Wenbin Chen, Guoying Fan, Hong 126

Optimization
Automatic Compensation for Sequentially Linearized Constraint Functions and Two-Dimensional Shape Optimization of Hydraulic Cylinder of Hydraulic Press
Tang, Da    Han, Wanmin    Yu, Jifeng 133

Optimum Design of the Mechanism of the Drawing Press for Aluminium Can
Xia, Erhui    Gu, Maoshi 138

A Research on Optimization Design of Transmission System, Clutch, and Brake Assemblies of Crank Presses
Wu, Danzhong    Li, Zhaorong 143

The Research on Low Tensile Stresses Semi-Cylindrical Yoke
Yan, Yongnian    Yu, Xinlu    Guo, Hede
Wei, Xin    Wang, Zhaoxiang    Chen, Ruqiang 149

The Application of Theory of Value Engineering to Power System Design for Mechanical Presses
Liu, Chunpu 157

A Study of Fuzzy Structural Optimization for Press Frame
Qi, Tian    Liu, Chunpu 164

Fuzzy Optimization Design of Metal Forming Machines
Hao, Gang    Jiang, Xixian 170

Calculation of Temperature Rise in the Friction Brake and Its Optimum Design
Yang, Jianguang    He, Deyu    Bi, Shuxin 175

Structure Optimization of the 3D-Frame of Hydraulic Press
Nie, Shaomin    Zhao, Xilu 183

The Optimum Design for the Roller Rest System of Spinning Machine
Y.C. Han    Q.J. Guo    X. Wang 190

The ITAE Optimization Design of a Hydraulic Press Brake
Yang, Qizheng    Wang, Yungan 198
The Solution of Elasticity Theory for Semi-Cylindrical Yoke of Hydraulic Press

Wei, Xin Yang, Yongnian Guo, Hede 204

Machine Tool Design

Geometrical Parameters and Creep Influence in a S.R.M. Design
C. Giardini G. Maccarini G. Pellegrini A. Bugini 213

Operation Principles of the DM Planetary Tube Cold Rolling Mill and the Results of Experimental Production of Tubes and Cylinders
W. Dobrucki J. Mischke A. Pietrzykowski 221

An Analysis of the Hydraulic System of the Hydraulic Hammer
Li, Yungtang Zhu, Yuanqian 226

A New Method for Evaluating the Operation Capability of Friction Clutch and Brake
Xie, Guanxuan Feng, Xiangjun Zhao, Shengdun 234

Precision Metal Components Produced on Schuler High Efficiency Partformers and Presses Part 1
G. Schmelzle 241

Precision Metal Components Produced on Schuler High Efficiency Partformers and Presses Part 2
G. Schmelzle 248

Experimental Investigation of the Law Relating the Extruding Load of Cold Extrusion Press to Buffering Parameters
Huang, Luquan Li, Fuguo 254

The Relation between Load Energy Analysis and Series Parameters on Forging Rolls
Wu, Zhensheng 262
Hydraulic High-Speed Punching Presses SP
M. Wanzke 269

High-Speed Punch Press Automatic STA
M. Wanzke 271

Fineblank Quality Grip-Flow Presses
M. Wanzke 274

New Conception of Screw Press
P. Popovic D. Temeljkovski 278

Analysis of Blow Stages and Calculation of Force-Energy Parameters for Clutch-Screw Presses
Li, Peiwu 285

Comparison of Force-Energy Characteristics among Clutch-Screw Presses, Conventional Screw Presses and Eccentric Forging Presses
Li, Peiwu 295

Discussion on Precise Expression of Driving Efficiency of Screw Press
He, Chenghong Yang, Chunpu Yang, Guotai 301

Three-Rollers Cross Rolling Mill for Light Vehicle Rear Axle Drive Shaft Sleeves
Chen, Yubao Han, Yingchun 308

The Development of C43 Series of Air Die-Forging Hammers. -A Small-Sized Die-Forging Equipment
Liu, Rongfeng 313

Dynamics, Vibration and Noise Reduction

The Essential Problem in the Analysis of Dynamic Phenomena of Rolling Mills
W. Dobrucki A. Swiatoniowski 321
The Factors Affecting the Vibration Response of Forging Hammers and the Optimized Design of the Elastic Cushion Stiffness of Vibration-isolating Foundation
Gao, Naiguang Chen, Weimin Ding, Xianglin Chao, Xibin 328

An Effective Way to Reduce the Dynamic Air Noises of Air Hammers
Chen, Weimin Gao, Naiguang Chao, Xibin Yuan, Shuxin 335

The Study of Overload Energy Absorbing Device of High Velocity Hammer
Zhao, Chenglin 342

Dynamic Analysis and Identification for Hydraulic Presses
Wang, Yungan Huang, Nan Lu, Yan Liang, Shuyun 346

Analysis on the Vibration of Hydraulic Press during Blanking Operation
Wang, Jing Wang, Weiwei 353

Probing of Pressure Stabilization & Vibration Elimination of a Hydraulic Cushion
Wang, Yuchen 361

FE Simulation, Modelling and Testing

The Use of FE Process Simulation in Tool and Machine Optimization for Fine Blanking
W. Kubli M. Maurer J. Reissner 369

Modal and Acoustic Analysis for the Frame of Punch Press
He, Deyu Wang, Yu 378

The Method of Determining on the Load and Stress Spectra of a Hammer
Huang, Luquan Xia, Qinxiang 383

The Method of Upsetting Short Steel Ring in Hot State for Measuring the Blow Energy of Hammer
Y.R. Lee  L.Q. Huang  C.W. Huo
M.Z. Huang  S.X. Du  J.H. Lee  391

Experiment and Research on Stroke Detector for Rapid-Forging Press
Li, Zhigang  398

Model Test and Finite Element Analysis of Hydro-pneumatic Hammer Frames
Zhang, Tianpeng  Feng, Zhaohua  Lin, Gang  403

Others

Effect of Hydrostatic Pressure on Superplastic Forming of Aluminium
Alloy Sheets
H.S. Yang  H.K. Ahmed  W.T. Roberts  411

Hydraulic Presses and Press Lines for Cold and Semi-hot Flow Pressing
Sack & Kiesselbach  419

The Heating Method and the Temperature Control for Hot Presses
Yu, Xiuzhen  425

A Study of the Deformation in the High-pressure Flange
Chen, Henghong  432

The Radial Extruder without Core Stick for Making Finned Pipe
Zhang, Xiaolin  440

The Major Metal Forming Machines Used by Cameron Forge Company
J. Conroy  447

Clearance Leakage and Energy Spare for Forging Hammer
Chen, Hanxin  Sun, Jianguo  Tao, Dayao  453

CAP in Closed Die Forging
J. Cermak  461

The Imaginary Datum Level of Heavy Deformed Frame and the Method of

- IX -
Compensating Reparation
Zhang, Yingxuan

Papers Received after 15, Feb. 1989

CAD/CAM-System of Forging Axisymmetric Parts
W. Voelkner, I. Hamann, F. Jesche 479

On Designing of HTHP-800 Triaxial Test Machine
Yin, Weiguang 487
