STRONG MICROWAVES IN PLASMAS

PROCEEDINGS OF THE INTERNATIONAL WORKSHOP
Moscow – Nizhny Novgorod – Moscow,
15 – 22 August 1993

Edited by
A.G. Litvak

In two volumes
Volume 1

Nizhny Novgorod – 1994
CONTENTS OF VOLUME 1

Editor's Preface 3

Creation and heating of plasma by microwaves in fusion devices

High power lower hybrid current drive on JET: results and prospects 7

G. Tonon

RF heating and current drive on Tore Supra: status, results and approach to stationary discharges 28

8 GHz experiment on FTU 47

Development of ECH system for large helical device at NIFS 60

Transport study and MHD control by local electron cyclotron heating in the WT-3 tokamak 75

J.A. Hoekzema, A.E. Costley, T.P. Hughes, P.E. Stott

Alpha particle diagnostics using 140 GHz microwave scattering on JET 85

D.G. Buliginsky, M.M. Larionov, V.V. Rozhdestvensky

Peculiarities of the strong microwave-plasma interaction at the first electron cyclotron harmonic in the FT-1 tokamak 105

</table>
Gas-discharge cleaning of atmosphere from chlorofluorocarbons (CFC's) contaminations 227

N.L. Aleksandrov, S.V. Dobkin, A.M. Konchakov, D.A. Novitskii
Halocarbon decomposition in microwave post-discharge 258

V.G. Brovkin, Yu.F. Kolesnichenko, D.V. Khmara
Freon destruction in SHF discharge: mechanisms and efficiency 264

V.G. Brovkin, Yu.F. Kolesnichenko
Structure and dynamics of stimulated discharge in narrow and wide SHF beams 271

A.M. Akhmeteli
Localization of absorption of microwave energy accompanying combined action of microwave and laser radiation in gas 275

A.F. Aleksandrov, A.A. Kuzovnikov, V.M. Shibkov, A.S.Zarin
Kinetic of charged and neutral components in a non-equilibrium plasma of a free localized microwave discharge in air 281

N.A. Popov
The decay of strong microwave discharge plasma in air 287

A.L. Vikharev, A.M. Gorbachev, O.A. Ivanov, A.L. Kolisko
Nitrogen laser excited by a nanosecond microwave discharge in the field of a cylindrical TE mode 293

R. Ahmedzhanov, I. Polushkin, Yu. Rostovtsev
Intracavity laser diagnostics of nanosecond HF-fields 299

C. Boas, G. Himmel, S. Hirsch
Diagnostics on the plasma created in a pulsed microwave resonator 304

V.V. Ivanov, K.C. Klopopovsky, A.M. Popov, O. Popovicheva, T.V. Rakhimova
Optimization of pulses parameters for artificially generated plasmas cloud 309
P. Sortais
Electron cyclotron resonance ion sources for production of multicharged ions

A.A. Scovoroda, A.V. Timofeev
Investigation of ECR discharge within the baseball and cusp geometry with longitudinal input of gyrotron power

S.V. Golubev, V.E. Semenov, E.V. Suvorov, M.D. Tokman
Production and application of ECR plasma discharge with relativistic electron component

V.V. Andreev and A.M. Umnov
Plasma synchrotrons gyrac: relativistic plasma generators, plasma accumulators and sources of radiation

ECR-source of metallic plasma

S.V. Golubev, I.V. Plotnikov, S.V. Razin, E.V. Suvorov, M.D. Tokman and V.G. Zorin
Experimental investigation of initial stage of ECR discharge sustained by millimeter wavelength radiation in a mirror trap

S.V. Razin, V.G. Zorin, T.N. Zorina, M.V. Yulpatova
The calculation of the efficiency of the production of multiply charged ions in an ECR source at high plasma density

T.A. Antaya, S. Gammino
The SCER 6.4 GHz high B mode and frequency scaling in ECR ion sources

Yu.V. Bykov, A.G. Eremeev, V.E. Semenov
Ceramics sintering using millimeter wave radiation
