Ute Gappa, Hans Voss (Eds.)

Proceedings
Knowledge Engineering Forum 95
Concepts and Architectures for Reuse
March 30-31, Sankt Augustin, Germany

March 1995
# Table of Contents

Functional representation for reusable components ........................................... 1  
*Dean T. Allemang, Beat Liver, Swiss Telecom PTT, Berne, Switzerland*

Suite in Dm – A suite of problem types in diagnostic methods .......................... 7  
*Richard Benjamins, University of Paris-Sud, France*

Redesign and reuse in compositional knowledge-based systems ........................ 19  
*Frances Brazier, Pieter van Langen, Jan Treur, Niek Wijngaards, Vrije Universiteit Amsterdam, The Netherlands*

Internal and external relations and their relevance for the construction of domain ontologies .......................................................... 36  
*Simone Buersner, Cord Spreckelsen, University of Heidelberg, Germany*

Towards a practice of re-use ........................................................................... 40  
*Luc Goossens, Vrije Universiteit Brussel, Belgium*

Knowledge acquisition and the re-use of security risk knowledge ...................... 44  
*Elizabeth Gurrie, Joachim Diederich, Alan Tickle, Alison Anderson, Queensland University of Technology, Australia*

Reuse of safety knowledge ............................................................................ 51  
*Peter Hammond, Brunel University, United Kingdom*

A reuse-oriented, repository-based knowledge engineering process model for MoMo 57  
*Thomas Hemmann, German National Research Center for Computer Science (GMD) Sankt Augustin, Germany*

An application of terminological logics to case-based reasoning .......................... 71  
*Jana Koehler, German Research Center for Artificial Intelligence (DFKI) Saarbrücken, Germany*

Case-study in Knowledge Modelling with Benjamins' Library of Diagnosis Methods 83  
*Klas Orsvärn, Swedish Institute of Computer Science, Kista, Sweden*

Guidelines for adapting an interpretation model in an application ...................... 95  
*Klas Orsvärn, Olle Olsson, Hesham A. Hassan, Swedish Institute of Computer Science, Kista, Sweden*

Reusing commonsense ontologies in MIKE ...................................................... 107  
*Thomas Pirlein, Rudi Studer, University of Karlsruhe, Germany*
An architecture for reusing role-limiting mechanisms and knowledge acquisition components ................................................................. 113
Karsten Poeck, University of Würzburg, Ute Gappa, University of Karlsruhe, Germany

Hierarchical multilanguage technology in knowledge engineering ......................... 122
Vladimir V. Prokhorov, Mechanics of Russian Academy of Sciences, Ekaterinburg, Russia

Using knowledge roles to organize a library of planning problem-solving methods ..... 127
André Valente, University of Amsterdam, The Netherlands

Modelling problem-solving knowledge for explanation ........................................ 142
Gerhard Wickler, Myles Chippendale, Rutherford Appleton Laboratory, Oxon, United Kingdom

Software Demonstrations .................................................................................. 147
