HYDRAULIC ENGINEERING '93
VOLUME 2

Proceedings of the 1993 Conference

Sponsored by the
Hydraulics Division of the
American Society of Civil Engineers

in cooperation with the
Environmental Engineering Division
Irrigation and Drainage Division
Water Resources Planning and Management Division
Waterway Port Coastal and Ocean Division
of ASCE

Organization Committee
S.T. Su, Conference/Symposium General Chairman
Hsieh Wen Chen, Conference Technical Program Chairman
Chin Y. Kuo, Symposium Technical Program Chairman

Hydraulics Division Program Committee
S.T. Su, Chairman
George V. Cotroneo, Vice Chairman
William Espey, Secretary
Marshall Jennings, Past Chairman

Hydraulics Division Executive Committee
Steven R. Abt, Chairman
Edward R. Holly, Vice Chairman
David S. Biedenharn, Secretary
Catalino B. Cecilio, MGD Representative
Arlen D. Feldman
Linda S. Weiss, New Correspondent

San Francisco, California
July 25-30, 1993

Edited by Hsieh Wen Shen, S.T. Su, and Feng Wen

Published by the
American Society of Civil Engineers
345 East 47th Street
New York, New York 10017-2398
Mass Transport in Mud Layer Induced By Wave Action
ISMAEL PIEDRA CUEVA, Institute of Fluid Mechanics and Env. Engineering, Uruguay .......................... 1189

Sediment Disposal and Transport in Central SF Bay
THOMAS H. WAKEMAN, A.E. MATHIESEN and
G.W. CHATFIELD, US Army Corps of Engineers ................. 1194

Shape Effect on Bedload Transport in Pipes
C. NALLURI and A. A. GHANI, Department of Civil Engineering,
University of Newcastle upon Tyne .......................... 1200

FIELD TRIP TO SAUSALITO US ARMY CORPS OF ENGINEERS’ BAY MODEL
Organized by S.T. SU, Harza Kaldveer

SESSION BS-6
COASTAL AND TIDAL BRIDGE SCOUR
Moderator: J. MORRIS, Federal Highway Administration, and B. EDGE, Edge and Associates

Scour at Highway Structures in Tidal Waters
E. V. RICHARDSON, J. R. RICHARDSON, Resource Consultants & Engineers, Inc., and B. EDGE, Edge & Associates ................. 1206

Model Technology for Estimating Storm-Inducing Currents
MARY A. CIALONE and H. LEE BUTLER, Coastal Engineering Research Center, US Army Engineer Waterway Experiment Station .... 1212

Indian River Inlet: Is There A Solution?
H. LEE BUTLER and JEFF LILLYCROP, Coastal Engineering Research Center, US Army Engineers Waterway Experiment Station ............ 1218

Bridge Hydraulic Design in Tidal Situations
C. R. NEILL and E. K. YAREMKO, Northwest Hydraulic Consultants, Ltd. .................................................. 1224

McCormick Bridge Scour Evaluation—A Case Study of A Tidal Bridge
MICHAEL P. MARONEY, Browwell & Carrier, Inc. ...................... 1230
A Tidal Inlet Bridge Scour Assessment Model
M.S. VINCENT and MARK A. ROSS, Center for Modeling Hydrologic and Aquatic Systems, Dept. of Civil Engineering, University of South Florida ................................................................. 1236

SESSION CA-3
COMPUTER APPLICATION III
Moderator: D. FREAD, National Weather Service, and J.Y. LU, National Chung-Hsing University

A Mathematical Model of Flow in Mildly Sinuous, Deep Channels
AMARTYA KUMAR BHATTACHARYA, and SRIJIB K. KAR, Department of Civil Engineering, Indian Institute of Technology .......... 1242

Two-Dimensional Hydrodynamic Modeling with a Computer Graphics System
DANIEL H. HOGGAN and D.E. TWISS, Hydraulic Design Section, U.S. Army Engineer District, Sacramento .................................. 1248

Numerical Modeling of Unsteady Compound Channel Flow
R.S.M.M. RASHID and M. HANIF CHAUDHRY, Dept. of Civil and Environmental Engineering, Washington State University ............ 1254

"Halloween" Wave Transformation at Virginia Coast
JEROME P.-Y. MAA, Virginia Institute of Marine Science, School of Marine Science, College of William and Mary ......................... 1260

Use of Floodplain PCB Concentrations to Calibrate a River Hydraulics Model
JAMES M. HASSETT and LEONARD T. WRIGHT, Division of Environmental and Resource Engineering, SUNY-CESF ..................... 1266

SESSION DF-1
OVERVIEW, RESEARCH NEEDS, AND PROCESSES

* Assessment and Prediction of Debris-Flow Hazards
GERALD F. WIECZOREK, U.S. Geological Survey, Geologic Division .......................................................... 1272

Research Needs for Debris Flow Disaster Prevention
TIMOTHY R.H. DAVIES, Dept. of Natural Resources Engr., Lincoln University .......................................................... 1284

Debris Flows in Grand Canyon National Park, Arizona: Magnitude, Frequency and Effects on the Colorado River

Debris Flows and Mass Wasting in Volcanic Torrents
HIROSHI SUWA, Disaster Prevention Research Institute, Kyoto University ....................................................... 1296

Interpreting Debris-Flow Hazard from Study of Fan Morphology
KELIN X. WHIPPLE, Dept. of Geological Sciences, University of Washington .................................................. 1302
SESSION EH-5
FISH SCREEN
Moderator: S. TU, PG&E, and WHITMAN, National Marine Fishery

Hydraulic Modelling of Fish Screens
A. JACOB ODGAARD, Y. WANG, and R.A. ELDER, Institute of
Hydraulic Research, University of Iowa ........................................... 1308

Fish Screen Developments Columbia River Dams
D.E. WEITKAMP and REX A. ELDER, Parametrix, Inc. ................. 1314

Hydraulic Aspects of a Low-Velocity, Inclined Fish Screen
FREDERICK A. LOCHER, VICTOR C. BIRD and
A. JACOB ODGAARD, Bechtel Corp. .............................................. 1320

Survival of Atlantic Salmon Smolts Bypassed Through Ice-Log Sluices
Determined by the HI-Z Turb’N Tag
PAUL G. HEISEY, DILIP MATHUR, G. A. NARDACCI and
MILTON ANDERSON, RMC Environmental Services, Inc. .............. 1326

Ask Young Clupeids if Kaplan Turbines Are Revolving Doors
or Blenders
DILIP MATHUR and PAUL HEISEY, RMC Environmental
Services, Inc. ..................................................................................... 1332

SESSION HS-9
CHANNEL WORKS AND DRAINAGE
Moderator: R.H. FRENCH, Desert Research Institute, and K.C. YIH, National
Chiao Tung University

Regulation of Flow Downstream of Weirs
BOUALEM HADJERIOUA, TONY RIZK, EMMETT M. LAURSEN
and GARY HAUSER, Dept. of Civil Eng. & Eng. Mech., University
of Arizona ......................................................................................... 1338

Flow Resistance Properties of Flexible Linings
GEORGE K. COTTON, CRSS Civil Engineers, Inc. .......................... 1344

Calculon Weir Structure—Effective Use of Gabions
JOHN G. HARMAN, Progressive Engineering Consultants, Inc. ........ 1350

Storm Drainage Channel Rehabilitation
MARK S. HOLSTAD and KENNETH W. WYLIE, Greiner, Inc. ......... 1355

Determination of Hydraulic Roughness for Concrete-Lined,
Supercritical Channels
SCOTT E. STONESTREET, M.E. MULVIHILL and
RONALD R. COPELAND, U.S. Army Corps of Engineers .............. 1361

SESSION BS-7
COUNTERMEASURES FOR STREAM INSTABILITY AND SCOUR I
Moderator: L. HARRISON, Resource Consultants & Engineers, Inc., and
J.R. RICHARDSON, Resource Consultants & Engineers, Inc.

Cable-Tied Concrete Block Erosion Protection
J.A. MCCORQUODALE, A MOAWAD and A.C. MCCORQUODALE,
Dept. of Civil Environmental Engineering, University of Windsor .... 1367
A Method of Managing Floating Debris
SELDEN SAUNDERS and M. LEONARD OPPENHEIMER, Saunders
Product Development .................................................. 1373

The Influence of Protective Material on Local Scour Dimensions
LISA M. FOTHERBY, Colorado State University .................. 1379

Tetrapods as a Scour Countermeasure
DAVID BERTOLDI and ROGER KILGORE, GKY & Associates, Inc. 1385

Variations Encountered in Design Analysis of Local Scour at
Drop Structures
NOEL E. BORMANN and MICHAEL ZELLER, Dept. of Civil
Engineering, Gonzaga University ................................. 1391

Threats to Bridge Stability from Scour Related Failures of
Drop Structures
NOEL E. BORMANN, Gonzaga University, and MICHAEL ZELLER,
Simons, Li and Associates ........................................ 1397

SESSION DF-2
MECHANICS, RHEOLOGY, AND RHEOMETRY
Moderator: C.C. MEI, M.I.T., and J.S. O'BRIEN, FLO Engineering, Inc.

Mechanics of Debris Flows
STUART B. SAVAGE, Dept. of Civil Engineering & Applied
Mechanics, McGill University .................................... 1402

Kinetic-Theory Approach to the Nevado del Ruis 1985 Debris Flow
JUAN A. GARCIA and STUART B. SAVAGE, Dept. of Civil
Engineering & Applied Mechanics, McGill University .......... 1408

Continuum-Mechanics-Based Rheological Formulation for Debris Flow
Resources Division .................................................. 1414

Rheometry of Natural Sediment Slurries
JON J. MAJOR, U.S. Geological Survey ............................ 1415

SESSION EH-6
TRANSPORT AND DISPERSION I
Moderator: R. KELLER, Monash University, and P. RYAN, Bechtel

Salt Transport in a Tidal Canal, West Neck Creek, Virginia
JERAD D. BALES and S.C. SKROBIALOWSKI, U.S.
Geological Survey .................................................. 1422

Hydrodynamic and Toxic Contaminant Dispersion in the Lower St.
Marys River
E.M. YUEN, and J.A. MCCORQUODALE, Civil Engineering
Department, Lawrence Technological University ................. 1428

Modeling Low Flow Transport of Nonconservative Pollutants
in Streams
IL WON SEO and DAE YOUNG YU, Department of Civil Engineering,
Seoul National University ......................................... 1434
Wind Induced Circulation in Shallow Lakes
IAN P. KING, PARMESHWAR L. SHRESTHA and
GERALD T. ORLOB, Department of Civil Engineering, University of
California, Davis ................................................................. 1440

Prediction of Filtrate Turbidity by Parameter Estimation
SADATAKA SHIBA, Department of Chemical Engineering,
Osaka University ................................................................. 1446

SESSION HM-1
HYDRAULIC MEASUREMENT I
Moderator: A.C. MILLER, Pennsylvania State University, and P.D. SCARLATOS,
Florida Atlantic University

Repeatability and Oblique Flow Response Characteristics of
Current Meters
JANICE M. FULFORD, K.G. THIBODEAUX and W.R. KAERHLE,
U.S. Geological Survey ............................................................ 1452

Bed Shear Stress in Unsteady Open-Channel Flows
IEHISA NEZU, H. NAKAGAWA, Y. ISHIDA and A. KADOTA,
Department of Civil Engineering, Kyoto University ................................ 1458

Limitations of Reduced Scale Testing of Parshall Flumes
STEVEN J. WRIGHT, Department of Civil and Environmental
Engineering, University of Michigan ........................................... 1464

Urban Storm Water Instrumentation: a Field Observation
R. BRAD JENNINGS, USEPA Water Management Div. ......................... 1470

Water-Level, Velocity and Dye Measurements in the Chicago Tunnels
Resources Division .................................................................. 1476

SESSION HS-10
HYDRAULIC STRUCTURES I
Moderator: B.K. LEE, Harza Engineering Company

A Simple and Reliable Method for Analysis of Water
Supply Distribution
TSUN-HOU KUAN, Public Works City of Los Angeles ......................... 1482

Friction Loss Equations for Hydropower Facilities
ED A. TOMS, E. JUNE BUSSE and C.A. THOMPSON, ATC
Engineering Consultants, Inc. (ECI) ............................................. 1488

Development of Enhanced Tools for the Integrated Analysis of
Reservoir and Power System Operations
BARBARA MILLER, P. OSTROWSKI, JR. and VAHID ALAVIAN,
TVA Engineering Laboratory ....................................................... 1494

Hydraulic Modeling of High Unit Discharge Energy Dissipators
DAVID R. MOORE, DONALD H. BURN, PHILIP D. WANG and
DENNIS E. LEMKE, Department of Civil Engineering, University
of Manitoba ........................................................................ 1500
Model Study of Center Hill Fuse Plug Spillway
BOBBY P. FLETCHER and PAUL A. GILBERT, Hydraulics Laboratory, US Army Engineers Waterways Experiment Station 1505

SESSION ST-8
SEDIMENT TRANSPORT MECHANISM III

An Application of Nonhomogeneous Poisson Process in Sediment Infiltration into Gravel Bed
FU-CHUN WU, H.W. SHEN, Dept. of Civil Engineering, University of California, Berkeley 1511

Variation of Froude Number with Discharge for Large-Gradient Streams
KENNETH L. WAHL, U.S. Geological Survey, Water Resources Division 1517

Prediction of Gravel Transport Using Parker’s Algorithm
DAVID R. DAWDY and WEN C. WANG, Consultant 1523

Sacramento River Environmental Requirements
W. CRAIG GAINES, US Army Corps of Engineers, Sacramento District 2383

SESSION BS-8
COUNTERMEASURES FOR STREAM INSTABILITY AND SCOUR II
Moderator: W. LINDSEY, CALTRANS, and J.R. RICHARDSON, Resources Consultants & Engineers, Inc.

Emergent Techniques in Scour Monitoring Devices
J. R. RICHARDSON, Resource Consultants & Engineers, Inc., and J. Price, ETI, Inc. 1529

Riprap Design at Bridges-Factor of Safety Approach
GEORGE K. COTTON, Cess Civil Engineers, Inc. 1534

Riprap Coverage Around Bridge Piers
JAMES F. RUFF and JAMES R. NICKELSON, Colorado State University 1540

Predicting Critical Scour Stage At Bridges
JOHN N. PAINE, DARRELL KIM BEATLEY, Espey, Huston & Assoc. Inc., and JAMES N. WIGFIELD, Virginia DOT 1546

Riprap Incipient Motion and Shield’s Parameter
ROGER T. KILGORE and G.K. YOUNG, GKY and Associates 1552

Scour Retrofit Case Studies for Arizona
GEORGE K. COTTON and JIRI VITEK, CRSS Civil Engineers, Inc. 1558

SESSION CA-4
EDUCATION IN COMPUTATIONAL HYDRAULICS
Moderator: N.D. KATOPODES, Dept. of Civil and Environmental Engineering, University of Michigan

Applicability of Two Simplified Flood Routing Methods: Level-Pool and Muskingum-Cunge

xxvi
Selection of $\Delta x$ and $\Delta t$ Computational Steps for Four-Point Implicit Nonlinear Dynamic Routing Models
D.L. FREAD and J.M. LEWIS, National Weather Service .......... 1569

Advanced HEC-2 Modeling on Forester Creek
L.T.M. VOMERO, WEST Consultants, Inc. ......................... 1574

Modeling Critical Depth in Open Channels
ROBERT G. TRAVER, Dept. of Civil Engineering,
Villanova University ............................................. 1580

A Numerical Model for Learning Concepts of Streamflow Simulation
L.L. DELONG, U.S. Geological Survey ......................... 1586

SESSION DF-3
ANALYSIS, SIMULATION AND EXPERIMENTS
Moderator: S.B. SAVAGE, McGill University, and T. TAKAHASHI, Disaster Prevention Research Institute

A Comparison Between Two Kinematic Wave Solutions for Movement of Debris Flows
M. ARATTANO and WILLIAM Z. SAVAGE, U.S. Geological Survey,
Geologic Division .................................................. 1592

Roll Waves in Mud Flow
C.O. NG and CHIANG C. MEI, Dept. of Civil and Environmental Engineering, Massachusetts Institute of Technology ........ 1598

Friction in Debris Flows: Inferences from Large-Scale Flume Experiments

Analysis of Pulsing Phenomenon in Viscous Debris Flow
WAN ZHAOHUI and HUA JINGSHEN, Dept. of Sedimentation Engineering, Institute of Water Conservancy and Hydroelectric Power Research ............................................ 1610

A Study on Debris Flow Surges
ZHAOYIN WANG, Institute of Water Conservancy and Hydroelectric Power Research, China ........................................ 1616

SESSION EH-7
TRANSPORT AND DISPERSION II
Moderator: G. ORLOB, University of California, Davis, and K. NG Bechtel

Comparisons Between Experimental and Numerical Studies on Laminar Flow with Tracer Transport
CHRISTIAN FORKEL, HELMUT DANIELS, JENS BIRKHÖLZER and GERHARD ROUVÉ, Institute for Hydraulic Engineering and Water Resources Management, Aachen University of Technology .......... 1622

Comparison of Advective Transport Algorithms with an Application in Suisun Bay
JON BURAU, STEPHEN MONISMITH and JEFFREY KOSEFF, Environmental Fluid Mechanics Laboratory, Stanford University .......... 1628

An Optimization Approach to River Adjustments
ROBERT MILLAR and MICHAEL QUICK, Department of Civil Engineering, University of British Columbia ............ 1635
Gully Intrusion on Reclaimed Disposal Sites
SCOTT A. HOGAN, C.J. PANLEY, S.R. ABT and T.L. JOHNSON,
Engineering Research Center, Colorado State University .......................... 1641

Sediment Deposition in Jennings Randolph Reservoir, Maryland and
West Virginia
MARGARET M. BURNS and ROBERT MACARTHUR, US Army
Corps of Engineers ......................................................... 1647

SESSION HM-2
HYDRAULIC MEASUREMENT II
Moderator: Y.K. TUNG, Wyoming Water Resources Center,
and G. CONTRONOC, Acres International

Laboratory Study of the Characteristics of Shallow Open Channel Flow
Using Fiber-Optic Laser Doppler Velocimetry
JAU-YAU LU and LI-CHUAN CHEN, Department of Civil Engineering,
National Chung-Hsing University ........................................ 1653

Distorted Physical Models for Mixing Studies
JIANLU XU and H.W. SHEN, Department of Civil Engineering,
University of California, Berkeley .................................... 1659

Investigation of Saltating Particle Motions Using Flow
Visualization Technique
HONG-YUAN LEE and IN-SONG HSU, Dept. of Civil Engineering and
Hydraulic Research Laboratory, National Taiwan University .......... 1665

Acoustic Doppler Current Profiler for Inlet Current Measurements
YEN-HSI CHU, M. METCALF, J.B. SMITH, T. PUCKETTE and
G.K. NERSESIAN, Waterways Experiment, U.S. Army Corps
of Engineers ............................................................... 1671

Turbulent Velocity Fluctuations in Natural Rivers
NANI G. BHOWMIK and RENJIE XIA, Hydrology Division, Illinois
State Water Survey ..................................................... 1677

SESSION HS-11
HYDRAULIC STRUCTURES I
Moderator: M.H. CHAUDHRY, Washington State University, and H.Y. LEE,
National Taiwan University

Determination of Pulsating Pressures for Baldhill Dam, N.D. Spillway
BOBBY P. FLETCHER and GREG EGGERS, Hydraulics Laboratory,
Waterways Experiment Station ........................................ 1683

Hydraulic Model Studies of Y-Branch
B. K. LEE, H. W. COLEMAN, J. H. KIM and H. I. KWON, Harza
Engineering Company .................................................... 1689

Model Study of Rio Hondo Flood Control Channel Los
Angeles, California
JOHN E. HITE, JR., SCOTT E. STONESTREET, and M.E.
MULVIHILL, Locks and Conduits Branch, Hydraulic Structures Div.,
US Army Engr. Waterways Experiment Station ........................ 1695

Confirmation of Seismic Safety at Stafford Dam
CHRIS D. DEGABRIELE and GLEN A. ROYCROFT, North Marin
Water District .......................................................... 1701
An Improved Method for Measuring System Performance of Hydraulic Infrastructure Systems
SUE-JEN WU and RU-LIN HSU, Dept. of Hydraulic Engineering, Sinotech Engineering Consultants, Inc. ........................................ 1708

SESSION BS-9
COMPUTER AND PHYSICAL MODELLING PROCESS ON BRIDGE SCAUR
Moderator: D. FROELICH, University of Kentucky, and R.T. KILGORE, GKY & Associates

Bridge-Scour Analysis Using the Water-Surface Profile (WSPRO) Model
DAVID S. MUELLER, U.S. Geological Survey, Water Resources Division ........................................ 1714

Innovations and Practical Procedures for Hydraulic Model Applications in Bridge Scour Evaluations
JEFFREY S. GLENN, Whitman & Howard Inc. ......................... 1720

Bri-Stars Model for Alluvial River Simulation
A. MOLINAS, Hydrau-Tech. Inc. ........................................ 1726

Practical Comparison of One-Dimensional and Two-Dimensional Hydraulic Analyses for Bridge Scour
M.A. PORTS, T.G. TURNER, Parsons Brinckerhoff Inc., and D.C. FROEHLICH, University of Kentucky ........................... 1732

Model Study of Local Scour Downstream Bridge Piers
LAILA ABED and M.M. GASSER, Hydraulics & Sediment Research Institute ........................................ 1738

Selecting Sediment Transport Equation for Scour Simulation at Bridge Crossing
HOWARD H. CHANG, CARROLL HARRIS, B. LINDSAY, STEVE S. NAKAO and RAY KIA, San Diego State University .......... 1744

Model Study of the Confluence and Wake Vortex Effect on Local Scour Downstream Bridge Pier
LAILA ABED, Water Research Center, Egypt ............................ *

Effect of Fenders on Local Pier Scour
LAILA ABED and E.V. RICHARDSON, Ministry of Public Works and Water Resources, Egypt ........................................ 1750

SESSION DF-4
ROUTING AND MAPPING FROM INITIATION TO TERMINATION
Moderator: R.D. JARRETT, U.S. Geological Survey, and Z. WAN, Institute of Water Conservancy and Hydroelectric Power Research, China

Debris Flow Initiation and Termination in a Gully
TAMOTSU TAKAHASHI, Disaster Prevention Research Institute, Kyoto University ........................................ 1756

Hydraulic Modeling and Mapping of Mud and Debris Flows
JIM S. O'BRIEN, FLO Engineering, Inc. ................................. 1762

*Manuscript not available at time of printing
SUSAN H. CANNON, U.S. Geological Survey, Geologic Division  ...  1768

Mapping Debris-Flow Hazard in Honolulu Using a DEM
STEPHEN D. ELLEN and R.K. MARK, U.S. Geological Survey, Geologic Division ... 1774

Prediction of Occurrence and Runoff Analysis of Debris Flow
MUNEO HIRANO and T. MORIYAMA, Department of Civil Engineering, Hydraulics and Soil Mechanics, Kyushu University ... 1780

Sediment Deposition from Debris Flow on a Gentle and Wide Slope
H. HASHIMOTO and M. HIRANO, Dept. of Civil Engineering, Hydraulics and Soil Mechanics, Kyushu University ... 1786

SESSION EH-8
ENVIRONMENTAL MANAGEMENT
Moderator: S. HUI, Bechtel, and J. LINDLEY

Integration of Environmental Management with Reservoir and Power System Operations
VAHID ALAVIAN, TVA Engineering Laboratory ... 1792

Decision Support for Predicting the Hydraulics and Water Quality Characteristics of Natural Rivers
CHRISTIAN JOKIEL, P. RULAND and G. ROUVÉ, Institute for Hydraulic Engineering and Water Resources Management, Aachen University of Technology ... 1799

Quantity and Quality of Dry Weather Flow in the Las Vegas Valley, Nevada
STEVE A. MIZELL and RICHARD H. FRENCH, Desert Research Institute, Water Resources Center ... 1806

Protected Streamflow and Water Uses
KRISHAN P. SINGH, Office of Surface Water Resources & Systems Analysis, Illinois State Water Survey ... 1812

SESSION HS-12
HYDRAULIC STRUCTURES III

Application of Environmental Regulations on Design of Hydraulic Structures for Open Cooling Water System
JAGDISH K. VIRMANI, MAHMOOD NAGHASH and ADNAN M. ALSAFFAR, Bechtel Corporation ... 1818

The Concept of 'Local Euler Number' as an Aid for Sizing Pitot Tubes
JOSÉ ROBERTO BONILHA, Escola Politécnica da USP, UNICAMP Universidade de Campinas ... 1824

Methods for Prediction of Maximum Scour at Coastal Structures
JIMMY E. FOWLER, Coastal Engineering Research Center, U.S. Army Engineer Waterways Experiment Station ... 1830

Design of a Curved Baffle Energy Dissipation Structure
R. J. BERGQUIST and CHARLES C. HUTTON, ECI ... 1836
Simulation of Rapid Reservoir Drawdown for Flood Control, Cowlitz Falls Project
R.H.A. JANSSEN, F.A. LOCHER, Bechtel Corp. .......................... 1842

SESSION BS-10
FIELD MEASUREMENTS OF BRIDGE SCOUR PROCESSES I
Moderator: M.N. LANDERS, U.S. Geological Survey, and
C. MENDOZA-CABRALES, Columbia University

Pier Scour on the South Saskatchewan River
F. AHMED, M.A. SABUR and D.D. ANDRES, Dept. of Civil
Engineering, University of Alberta ........................................ 1848

Scour At a Bridge over the Weldon River, Iowa
E. E. FICHER, U.S. Geological Survey ................................. 1854

Measurement of Bridge Scour At the SR-32 Crossing of the Sacramento River at Hamilton City, California, 1987–92
J.C. BLODGETT and CARROLL HARRIS, U.S. Geological Survey ... 1860

G.K. BUTCH, U.S. Geological Survey ................................. 1866

Relation of Local Scour to Hydraulic Properties at Selected Bridges in New York
G.K. BUTCH, U.S. Geological Survey ................................. 1872

Overmining Causes Undermining (It's a Mad Mad River)
CATHERINE CROSSETT, CALTRANS ..................................... 1876

Bridge Scour Prediction Methods Applicable to Streams in Pennsylvania
DENNIS JOHNSON and ARTHUR C. MILLER, Department of Civil
Engineering, Pennsylvania State University ............................ 1882

Scour Inspection Using Ground Penetrating Radar
W.A. HORNE, Clough, Harbour & Associates .......................... 1888

SESSION DF-5
DEBRIS FLOW

Debris Flow and Hyperconcentrated Flows—A UK perspective
PAUL A. CARLING, Institute of Freshwater Ecology,
Windermere Laboratory .................................................. 1894

Differentiation of Debris-Flow and Flash-Flood Deposits: Implications for Paleoflood Investigations
CHRISTOPHER F. WAYTHOMAS, and ROBERT D. JARRETT, U.S.
Geological Survey, Water Resources Division .......................... 1900

Time-Dependent Landslide Probability Mapping
RUSSELL H. CAMPBELL, and RICHARD L. BERNKNOPF, U.S.
Geological Survey, Geologic Division .................................. 1902

Operation of a Real-Time Warning System for Debris Flows in the San Francisco Bay Area, California
RAYMOND C. WILSON, ROBERT K. MARK, and
GARY BARBATO, U.S. Geological Survey, Geologic Division .... 1908

xxxi
SESSION PH-1
APPLICATION IN HYDROLOGY
Moderator: F.C. WANG, Louisiana State University, and G. TABIOS, University of California, Berkeley

Evaluation of Hydraulic Structure Reliability Considering Uncertainties in Hydrologic Models
Y.K. TUNG, BING ZHAO and J.C. YANG, Wyoming Water Resources Center, University of Wyoming ........................................ 1920

Analysis Uncertainty of IUH of NASH
J.C. YANG, SHYH-YANN TARNG and Y.K. TUNG, Dept. of Civil Engineering, National Chiao-Tung University ..................... 1927

Hydrologic Design: Extending Traditional Methods
DELBERT D. FRANZ, Linsley, Kraeger Associates, Ltd. .................... 1933

Importance of Hydraulic-Model Uncertainty in Flood-Stage Estimation
SATVINDER SINGH, CHARLES S. MELCHING, New Jersey Dept. of Envir. Protection and Energy ................................. 1939

Rainfall Depth-Duration-Frequency Analysis For Major Cities In Taiwan
BAOLIN WU, MING-HSI HSU, V. YIH, S. KING and C.M. WU, Contra Costa County Flood Control District .......................... 1945

SESSION HS-13
HYDRAULIC STRUCTURES V
Moderator: M.E. JENNINGS, U.S. Geological Survey, and W. ESPEY, Espey Houston

Large-Scale Embankment Overtopping Protection Tests
KATHLEEN H. FRIZELL and JAMES F. RUFF, U.S. Bureau of Reclamation ................................................................. 1951

Progressive Failure of an Overtopped Embankment
GHASSAN ALQASER and JAMES F. RUFF, Engineering Research Center, Colorado State University .................................. 1957

A New Type of Concrete Trapezoid Dam
YUI TSANG CHAN, Civil Engineering Dept., China Light & Power Co. Ltd. ................................................................. 1963

Assessing the True Value of Flood Control Reservoirs: The Experience of Folsom Dam in the February, 1986 Flood

Chatuge Hydroproject Aerating Infuser Physical Model Study
TONY A. RIZK and GARY E. HAUSER, Tennessee Valley Authority ................................................................. 1975
SESSION 3D-1
3D MODELLING I
Moderator: S.Y. WANG, University of Mississippi

Recent Developments in Three-Dimensional Numerical Estuarine Models
RALPH T. CHENG, PETER E. SMITH and VINCENZO CASULLI,
U.S. Geological Survey ..................................................... 1982

TRIM-3D: A Three-Dimensional Model for Accurate Simulation of Shallow Water Flow
VINCENZO CASULLI, ENRICO BERTOLAZZI and
RALPH T. CHENG, Dipartimento di Matematica, Universita' di Trento 1988

Parameterization of Turbulence for Three-Dimensional Circulation Modeling
Y. PETER SHENG, Dept. of Coastal & Oceanographic Engr., University of Florida .................................................... 1994

Three-Dimensional Free Surface Modeling (Is there a Best Approach?)
BILLY H. JOHNSON, H. LEE BUTLER and CHARLIE BERGER,
U.S. Army Engineers Waterways Experiment Station .................. 1997

Galveston Bay 3-D Model Study Channel Deepening Lessons Learned in Management of a Large Modeling Study
J.H. SCHMIDT, R.T. MCADORY, W.D. MARTIN and
R.C. BERGER, U.S. Army Engr. Waterways Experiment Station .... 2003

SESSION EH-9
ENVIRONMENTAL HYDRAULICS I
Moderator: J. ODGAARD, University of Iowa, and J.S. WANG, Bechtel

Oxygenation Experiments in the Wave Breaking Zone
E.I. DANIL, and C. MOUTZOURIS, Department of Civil Engineering,
Laboratory of Harbour Works, National and Technical University of Athens ................................................................. 2008

Integrated Planning Analysis for an Aggregate Mine
EDWARD E. WALLACE and ROBERT C. MACARTHUR, Meridian Consulting Engineers Inc. ................................. 2014

Bank Stabilization with Environmental Features on the Middle Rio Grande
DREW C. BAIRD, J.P. WILBER and R.W. SLATER, U.S. Bureau of Reclamation ......................................................... 2020

Two Options for Disposal of Desalination Reject Water
LOUIS J. ARMSTRONG, P.R. MINEART and R.H. CROSS III,
Woodward-Clyde Consultants ................................................. 2026

Ballast Water Treatment Effluent Dispersion Studies
PETER A. MANGARELLA, JOSEPH M. COLONELL, Water Resources Group, Woodward-Clyde Consultants ......................... 2032
SESSION BS-11
FIELD MEASUREMENTS OF BRIDGE SCOUR PROCESSES II
Moderator: PETE HAENI, U.S. Geological Survey, and ROLLINS HOTCHKISS, University of Nebraska

Evaluation of an Existing Scour Hole at the Castleton Bridge, a Tidal Crossing
S.A. KHONDKER, EBASCO and M.A. HIXSON, EBASCO Infrastructure ........................................ 2038

Development of Bridge-Scour Instrumentation for Inspection and Maintenance Personnel

Using Graphysical Data to Assess Scour Development

Local Scour Measurements at Bridge Piers in Alberta
D. WILLIAMSON, Bridge Engineering Branch, Alberta Transportation and Utilities ....................... 2057

Instrumentation for Detailed Bridge-Scour Measurements

Local Scour at Bridge Piers in Alberta-Case History
A. HUMPHRIES, Bridge Engineering Branch, Alberta Transportation and Utilities ................. 2069

Reference Surfaces for Bridge Scour Depths
M. LANDERS and DAVID S. MUELLER, U.S. Geological Survey ........................................ 2075

SESSION PH-2
APPLICATION IN HYDRAULICS
Moderator: W.C. WANG, Multech Engineering Consultants, Inc.

Probability of Bridge Failure due to Scouring
WOLFGANG KRON, and ERICH PLATE, Institute for Hydrology and Water Resources Planning, University of Karlsruhe .................. 2081

Uncertainty of Bridge Scour Estimates
PEGGY A. JOHNSON and BILAL M. AYYUB, Dept. of Civil Engineering, University of Maryland ............... 2087

Reliability Analysis of Levee System of a River
K. MIZUMURA, Dept. of Civil Engineering, KANAZAWA Institute of Technology .................................. 2092

Uncertainty Analysis of the FEMA Method for Alluvial Fans
BING ZHAO and LARRY W. MAYS, Dept. of Civil Engineering, Arizona State University .................. 2098

Risk and Uncertainty in Flood Damage Reduction Project Design
MING T. TSENG, EARL EIKER and D. W. DAVIS, Hydraulics and Hydrology Branch, Engineering Division, US Army Corps of Engineers ........................................ 2104
SESSION 3D-2
3D MODELLING II
Moderator: A.F. BLUMBERG, HydroQual, Inc.

Three-Dimensional Variable Resolution Hydrodynamic and Transport Modeling of the Chesapeake Bay System
JOHN M. HAMRICK, Virginia Institute of Marine Sciences 2110

A Finite-Difference Model for 3-D Flow in Bays and Estuaries
PETER E. SMITH and BRUCE E. LAROCK, Water Resources Division, U.S. Geological Survey 2116

Horizontal Gradients in Sigma Transformed Bathymetries with Steep Bottom Slopes
G.S. STELLING, and JAN A.T.M. VAN KESTER, Delft Hydraulics 2123

2-D Vertical and 3-D Modelling of Mud Transport in Tidal Flows
B.A. DEVANTIER and L.C. VAN RIJN, Dept. of Civil Engineering and Mechanics, Southern Illinois University at Carbondale 2135

Three-Dimensional Numerical Modeling for Transport Studies
W.H. MCANNALLY, R.C. BERGER, and A.M. TEETER, U.S. Army Corps of Engineers 2141

SESSION EH-10
ENVIRONMENTAL HYDRAULICS II
Moderator: J. HOOPES, University of Wisconsin, and F. CHUNG, California Dept. of Water Resources

Mixing Character and Meandering Mechanism of a Plane Jet Bounded in a Shallow Water Layer
DAOYI CHEN and G.H. JIRKA, DeFrees Hydraulics Laboratory, School of Civil and Environmental Engineering, Cornell University 2147

Selective Withdrawal for Reducing Turbid Water in a Reservoir
YUKIHIDE TASHIRO, MASAHIKO YATSUGI, J. TANO, and N. MATSUO, Civil Engineering Department, Kyushu Electric Power Co., Inc. 2153

Shifts in Solute Transport Direction Induced by Transient Flow
F.X. MARKERT, RAFAEL G. QUIMPO, IT Corp 2159

A New In-Stream Aerator
J. GULLIVER, Dept. of Civil and Mineral Engineering, University of Minnesota 2165

Modeled Hydraulic and Salt Transport Patterns in the Sacramento-San Joaquin Delta
R.T. BROWN, P. WISHEROPP, D. SMITH, and R. RACHIELE, Jones & Stokes Associates 2171

SESSION CA-6
COMPUTER APPLICATION IV
Moderator: J.Y. LU, National Chung-Hsing University and H.W. Coleman, Harza

A Diffusion Hydrodynamic Model of a Shallow Estuary: Verification
T.V. HROMADKA II, G.L. GUYMON, M.H. KHAN, and M. COLLINS, Boylr Engineering Corp. 2178

Structure of Coastal Upwelling on a Sloping Bottom
YAN ZANG, ROBERT L. STREET and JEFFREY R. KOSEFF, Environmental Fluid Mech. Lab., Department of Civil Eng., Stanford University 2184
Field Examination of a Distribution System Water Quality Model
S.G. ELMAALOUF and Y.C. KIM, Public Works Dept., City of
Los Angeles .......................................................... 2190

The Courant Number and Unsteady Flow Computation
CHINTU LAI, U.S. Geological Survey .......................... 2196

River Engineering Flows and Some Related Structures
RAWYA M. KANSOH, Civil Engineering Department,
Alexandria University ............................................. 2202

SESSION HS-14
HYDRAULIC STRUCTURES IV
Moderator: L.W. MAYS, Arizona State University, and A. ALSAFFAR, Bechtel

The EUR Water Station in Rome—Italy
F. CIACCHELLA, G. MARTINO and P. MASSARINI, Water
Production Plants Sector, ACEA .................................. 2207

A Culvert Analysis Program for Indirect Measurement of Discharge
JANICE M. FULFORD, U.S. Geological Survey ................. 2213

Sediment and Water Quality Control Devices in Small Watersheds
HASAN NOURI, Rivertech Inc. ...................................... 2219

Flow Diversion in a Steep, Coarse-Bed Stream
EDWARD F. SING, U.S. Army Engineer District, Sacramento .... 2389

Vortex Spillway: Test Study on a Hydraulic Model
G. MARTINO, Azienda Comunale Energia ed Ambiente, ACEA .......... 2225

SESSION BS-12
COMPARISONS OF MEASURED AND COMPUTED BRIDGE SCONUR
Moderator: C. NORDIN, Colorado State University, and P. WOJCIIK, TAMS

Evaluation of Historical Scour at Selected Stream Crossings in Indiana
DAVID S. MUELLER and ROBERT L. MILLER, U.S.
Geological Survey .................................................... 2231

Bridge Scour Evaluations in Washington State
J.P. JOHNSON, C.R. NEILL and R.P. HOVDE, Northwest
Hydraulic Consultants .............................................. 2237

Relation of Channel Stability to Scour at Highway Bridges Over
Waterways in Maryland
E. J. DOHENY, U.S. Geological Survey .......................... 2243

Bridge Scour and Change in Contracted Section, Razor
Creek, Montana
S.R. HOLNBECK, C. PARRETT and T.N. TILLINGER, U.S.
Geological Survey ................................................... 2249

Shale Scour at BNRR Yellowstone River Bridge, MT
GARY LEWIS, HDR Engineering, Inc. ........................... 2255

Analysis of Local Scour at Bridge Piers
HAN-BIN LIANG and JORGE ROMERO-LOZANO, Philip Williams &
Associates, Ltd. .................................................... 2261
SESSION PH-3
SYSTEM OPTIMIZATION

Variability in Solutions of Constrained Optimization Problems: Ocean Outfall Design Case
MAILI WANG and KEVIN LANSEY, Dept. of Civil Engineering and Engineering Mechanics, University of Arizona ................................. 2267

Optimizing Water Transfers in Urban Water Supply Planning
JAY R. LUND, and MORRIS ISRAEL, Dept. of Civil and Environmental Engineering, University of California, Davis ............... 2273

Optimizing a Reservoir Operation Policy from the Properties of Reliability and Resiliency
K.S. TICKLE and I.C. GOULTER, University of Central Queensland ... 2279

Hydraulic and Water Quality Reliability and Resiliency for Water Distribution Systems Under Random Demands
MAO FANG and JAMES G. UBER, Dept. of Civil & Envir. Engineering, University of Cincinnati .......................... 2285

The Seattle Forecast Model: A Tool for Water Resources Management in the Seattle Area
LAURA MARINO, Hydrocomp Inc. ........................................... 2291

SESSION 3D-3
3D MODELLING III
Moderator: P.Y.P. SHENG, University of Florida at Gainesville

Modeling Vertical Stratification in the Pamlico River Estuary Using Modern Hydrodynamics
ALAN F. BLUMBERG, C. KIRK ZIEGLER and BRADLEY NISBET, HydroQual, Inc. .................................................. 2297

Three-Dimensional Modeling of Tides and Wind-Waves
SHIAO-KUNG LIU, System Research Inst. ................................... 2301

Three-Dimensional Modeling of the Coastal Region Offshore from Sydney, Australia
IAN P. KING, WILLIAM L. PEIRSON and BRUCE A. CATHERS, Dept. of Civil and Environmental Engineering, University of California, Davis .......................... 2307

Simulation of 3D Free Surface Flows in Hydraulic Structure with Submerged Flow Passages
SAM S.Y. WANG, JOSEPH LETTER JR., and PHIL COMBS, Center for Computational Hydroscience and Engineering, University of Mississippi ........................................... 2313

Galveston Bay 3-D Model Study Channel Deepening Circulation and Salinity Results
R.C. BERGER, W.D. MARTIN, R.T MCADORY, and J.H. SCHMIDT, U.S. Army Engr. Waterways Experiment Station .......... 2318
Modeling the Tides of Massachusetts and Cape Cod Bays
H.L. JENTER, R.P. SIGNELL, ALAN BLUMBERG, U.S.
Geological Survey ............................................................ 2323

SESSION EH-11
ENVIRONMENTAL HYDRAULICS III
Moderator: J.S. WANG, Bechtel Corp., and G. SULLIVAN,
Contra Costa Water District

Storm Water Regulations—Aircraft Deicer/Anti-icers Operations
W.H. ESPEY and G.I. LEGARRETA, Espey, Houston & Associates ... 2333

GIS and SWMM Applications in Developing the Lake Houston
Watershed Management Program
DUKE G. ALTMAN, R.G. MONTGOMERY, T.L. KING, and
C.W. PATTERSON, Espey, Houston & Associates Inc. ............... 2339

Probability and Impact of an Observed Rare Sequence of Floods
LEO BEARD, W.H. ESPEY, PHIL COMBS, and
BEN M. LITTLEPAGE, Espey, Houston & Associates Inc. .......... 2345

Wastewater Treatment for Better Environment
RAWYA MONIR KANSOH, Civil Engineering Dept.,
Alexandria University ....................................................... 2350

Numerical Modelling of Salinity Transport in a Shallow Well-Mixed
Tidal Reach
G.S. REDDY, and S.N. GHOSH, Civil Engineering Dept., Indian
Institute of Technology .................................................... 2358

New York Bight Three-Dimensional Water Quality Model
R.W. HALL and M.S. DORTCH, USAE Waterways
Experiment Station ......................................................... 2365

Subject Index ................................................................. 2395
Author Index ................................................................. 2401
