SECOND INTERNATIONAL SYMPOSIUM ON ROCK FRAGMENTATION BY BLASTING

Keystone, Colorado, August 23 - 26, 1987
CONTENTS

SESSION I  FRAGMENTATION MECHANISMS I

Researches on Mechanism of Crack Generation and Propagation in Pre-Splitted Blasts...  1
Chen Baoji, University of Science and Technology of China; Zhu Ruigeng, Institute of Rock and Soil Mechanics; Jin Jianguo, University of Science and Technology of China; and Hu Yuanyu, Institute of Rock and Soil Mechanics

Separating Shock Wave and Gas Expansion Breakage Mechanisms......................................  6
J.R. Brinkmann, Chamber of Mines of South Africa Research Organization

Brittle Fracture Phenomena - An Hypothesis................................................................. 14
K. Britton, Consultant; and O.R. Walton, Lawrence Livermore National Laboratory

Studies of Interactions Between Stress Waves and Hole-Line-Shaped Cracks......................... 30
Zhu Ruigeng, Hu Yuanyu, Hong Minxuan and Li Tingjie, Institute of Rock and Soil Mechanics

SESSION II  STRAIN RATE EFFECTS/ROCK PROPERTIES I

New Method to Test the Rock Breaking Properties of Explosives in Full Scale.................... 36
Agne Rustan and Nie Shu Lin, Lulea University of Technology

On the Acoustic Classification of Rocks.................................................................................. 48
Wang Rangjia, Geological Museum of China; and Kou Shaoquan, Beijing University of Iron and Steel Technology

The Effect of High Strain Rate on Mechanical Behaviour of Soft Rock................................ 55
Wang Wuling and Yang Chunhe, Institute of Rock and Soil Mechanics

An Experimental Study of Explosively Induced Stresses Close to the Blasthole...................... 61
P.J. Tidman, ICI PLC. Group Technical Centre; and J.R.T. Grant, ICI Australia

SESSION III  FIELD APPLICATIONS I

Blast Initiation Delay and Vibration Frequency: A Surface Coal Mine Case History.............. 80
D.E. Siskind, U.S. Bureau of Mines, Twin Cities Research Center

The Measurement, Modelling and Control of Ground Vibrations Due to Blasting................ 88
D.P. Blair, CSIRO Division of Geomechanics

Techniques and Procedures in Analysing Fragmentation After Blasting by Photographic Method..................................................................................................................... 102
Shu-Lin Nie and Agne Rustan, Lulea University of Technology

A Frequency Domain Approach for Predicting and Minimizing Blast Induced Ground Vibrations....................................................................................................................... 114
O.E. Crenwelge, Jr., Shell Development Company

SESSION IV  FRAGMENTATION MECHANISM II

Unsymmetrical Effect in Borehole Blasting............................................................................. 123
Wei You-Zhi, China Institute of Mining and Technology

Role of Weakness Planes in Bench Blasting - A Critical Study............................................ 135
D.P. Singh, and V.R. Sastry, Banaras Hindu University
SESSION VIII  FIELD APPLICATIONS IV AND MODELING I

Increasing Cast Blasting Benefit With the Use of High Speed Motion Picture Photography and Analysis.......................................................... J.L. Floyd, Blast Dynamics, Inc. 364

The Study on the Influence of Both Burden and Holespacing Upon Fragmentation by Blasting.................................................. Ruichun Zheng, Bailing Ma and Shicai Gao, Maan Shan Research Institute of Mining 393

The Application of Geological and Downhole Geophysical Data to Blast Pattern Design.......................................................... P. Bellairs, Mt Newman Mining Company Pty Ltd 398

A New Constitutive Model for Fragmentation of Rock under Dynamic Loading........ J.S. Kuszmaul, Sandia National Laboratories 412

SESSION IX  MODELING II

The Use of Computer Blast Simulations to Improve Blast Quality....................... R.F. Favreau, College Militaire Royal de St. Jean and McGill University; G.W. Kuzyk, P.J. Babulic, Atomic Energy of Canada Ltd; R.A. Morin, Explotech Engineering Ltd; and N.J. Tienkamp, DuPont of Canada Ltd 424

A Three Dimensional Mathematical Model in Calculating the Rock Fragmentation Distribution of Bench Blasting in the Open Pit.................. Zou Dingxiang, Maanshan Institute of Mining Research 436

Describing Explosives in Blast Models.............................................. C.A. Leiper and M.P. du Plessis, Imperial Chemical Industries PLC 462

Fragmentation Estimations and the KUZ-RAM Model - Four Years On............... C.V.B. Cunningham, AECI Explosives and Chemicals Ltd 475

SESSION X  FIELD APPLICATIONS V

Blast Damage Assessment of Rock by Using the High Frequency Cross Hole Seismic Method.......................................................... A.T. Spathis, D.P. Blair, CSIRO Division of Geomechanics; and J.R. Grant, ICI Australia 488

Fundamental Studies of Blasting in Narrow-Stope Gold Mines........................ J.R. Brinkmann, S.G. Giltner and P.A. Gibson, Chamber of Mines of South Africa 498

Predicting Fragmentation Sizing Profiles for Different Blasting Patterns........ A.M. Sheikh, Denison Mines Ltd; and S.H. Chung, C.I.L. Inc. 521

Improvements in Blasting Practices at Mount Charlotte Through Vibration Monitoring and Analysis.................................................. H. Hulmes, Kalgoorlie Mining Associates; C. LeJuge, Julius Kruittschmitt Mineral Research Centre; C. Ellison, Kalgoorlie Mining Associates; and C. McKenzie, Julius Kruittschmitt Mineral Research Centre 530

SESSION XI  EXPLOSIVES ENGINEERING II

Self-Contained Electronic Delay Detonator......................................... W.H. Wilson, University of Maryland; W.B. Wilson III, New Technology Inc.; and D.C. Holloway, University of Maryland 541

Computational and Experimental Studies of the Role of Stemming In Cratering...... P.J. Hommert, J.S. Kuszmaul and R.L. Parrish, Sandia National Laboratories 550
Tailoring Explosive Shock Waves to Improve Fragmentation in Open Cut Mines
A.C. Torrance, S.B. Richardson and N.T. Moxon, The Broken Hill Pty Company Ltd

Stem Performance in Oil Shale Fragmentation Tests
C. Young, Sunburst Recovery, Inc.; W.L. Fourney and R.D. Dick, University of Maryland

An Investigation of the Usefulness of Stemming in Crater Blasting
K.R.Y. Simha, W.L. Fourney and R.D. Dick, University of Maryland

SESSION XII FIELD APPLICATIONS VI

A New Method of Fracture Plane Control and Its Application
Wei You-Zhi and Wang Shu-Ren, China Institute of Mining and Technology

The Use of Surface Vibration Monitoring in Assessing Blast Design Parameters at Z.C. Mines
N.S. Rauert, Z.C. Mines

Achieving Pit Wall Integrity With Large Diameter Blast Holes
J.D. Lilly, Hamersley Iron Pty. Ltd

A Field Study of Fracture Control Techniques for Smooth Wall Blasting: Part 2
D.C. Holloway, University of Maryland; G. Bjarnholt, Swedish Detonic Research Foundation; and W.H. Wilson, University of Maryland

An Engineered Blast Design Philosophy for Open Stopping Operations - A Case Study at Brunswick Mining and Smelting No. 12 Mine, Canada
G.P. Chitombo, Julius Kruttschnitt Mineral Research Centre; and T.H. Kleine, J.K. Tech, Commercial Division of the JKMRC

A Size Distribution Study of the Blasted Ore Fragments in Shui-Chang Open Pit China
Yu Yalun, Beijing University of Iron and Steel Technology
