Eleventh Annual
INDUSTRIAL ENERGY
TECHNOLOGY CONFERENCE

September 12-14, 1989
Adam's Mark Hotel
Houston, Texas

Energy and Environmental Strategies for the '90s

W. D. Turner
Conference Director
Technical Program Director

Michelle A. Reasoner
Proceedings Editor

TEES Information Services
Graphics & Layout

Host
Energy Systems Laboratory,
Department of Mechanical Engineering
Texas A&M University

Sponsors
Texas Governor’s Energy Management Center
Electric Power Research Institute
Central Power and Light
Houston Lighting and Power
Center for Energy and Mineral Resources,
Texas A&M University

Corporate Sponsors
Union Carbide
Dow Chemical
3M
SOLTEX Polymer
## TABLE OF CONTENTS

### TUTORIALS

#### ELECTROTECHNOLOGIES

Electrotechnologies in Process Industries  
K. R. Amarnath, EPRI ........................................... 3

Emerging Opportunities in Industrial Electrification Technologies  
Phillip S. Schmidt, The University of Texas - Austin .................. 4

Industrial Heat Pumps: Where and When  
Saidas Ranade, Arco Chemical Company and Y.T. Chao, TENSA Services .................. 10

Adjustable Speed Drive Industrial Applications  
James N. Poole, C.R.S. Sirrine ........................................... 15

#### EXPERT SYSTEMS IN THE ENERGY FIELD

Fossil Power Plant Applications of Expert Systems: An EPRI Perspective  
S.M. Divakaruni, EPRI ........................................... 32

Intelligent User Interfaces for Expert System Applications in Power Plants  
Bjorn Frogner, Expert-EASE Systems, Inc. ........................................... 33

Dale Sopocy, Sargent & Lundy ........................................... 39

A Portable Expert System For Gas Turbine Maintenance  
George H. Quentin, EPRI ........................................... 46

#### ENERGY STRATEGIES FOR THE 90'S

The New Approach to Strategic Energy Planning  
N. Richard Friedman, Resource Dynamics Corporation .......................... 51

Dow and Independent Power - Yesterday, Today, and Tomorrow  
Joe E. Brunt, Destec Energy, Inc. ........................................... 54

The New Rules for Purchasing Electric Power  
Kenneth M. Stern, Chem Systems, Inc. ........................................... 58

Gas Purchasing Strategies for the '90s  
Steven H. Schuler, Houston Lighting and Power ........................................... 59

#### ENVIRONMENTAL CONDITIONING IN MANUFACTURING FACILITIES

Impact of CFC Regulations on Environmental System Design and Operation  
Joseph B. Lechtanski, Carrier Corporation ........................................... 63

A Quick Overview of the Art of Humidity Measurement  
Mark Brownawell, General Eastern Instruments ........................................... 66

Cost Effective Cooling Strategies for Manufacturing Facilities  
Raj Kumar, Ralston Purina ........................................... 73

A Unique Ductless H and V System for Manufacturing Plants  
Colum J. McReynolds, Ford Motor Company ........................................... 74
THE ROLE OF THE INDUSTRIAL ENERGY MANAGER IN TODAY'S ERA OF EXCESS

Do You Have Adequate Staffing to Keep Your Costs Under Control?
E. H. Mergens, Shell Oil Company .................................................. 78

There's More to Managing Energy than Saving Btu's
Kenneth E. Nelson, Dow Chemical Company .................................. 81

Strategies for Facilities Renewal
Richard L. Good, Union Carbide Corporation .................................. 88

Energy Management at Steelcase - Energy Integrated with Facilities
David L. Dornbos, Sr., Steelcase, Inc. ................................................. 91

ENVIRONMENTAL IMPACT ON APPLIED TECHNOLOGY IN THE 90'S

Air Pollution Issues of the 1990's
James C. Myers, Texas Air Control Board ....................................... 102

Waste Prevention - What Can We Learn from the Success of Energy Conservation
Dan Steinmeyer, Monsanto Company .............................................. 107

Global Warming CFCs & VOCs
Joel S. Gilbert, Dames and Moore .................................................. 112

UTILITY MARKETING STRATEGIES AND PRICING TRENDS

Utility Marketing Strategies and Pricing Trends (An Overview)
Sidney D. Reynolds, Tennessee Valley Authority ............................ 118

How One Utility is Building Industrial Consumer Relationships
Donald E. Hamilton, Gulf States Utilities ....................................... 119

Utility Marketing Strategies and Pricing Trends
Joel S. Gilbert, Dames and Moore .................................................. 122

What Does Industry Expect from an Electrical Utility
C. V. Jensen, Union Carbide Corporation ....................................... 127

What Marketing Strategies Make Sense for Utilities
Todd D. Davis, Synergic Resources Corporation ............................. 130

STEAM CONDENSATE AND WATER QUALITY ISSUES

Ozone Treatment of Industrial Cooling Water Systems
Roy L. Sellers and Louis Green, Union Carbide Corporation ............... 134

Steam in Distribution and Use: Steam Quality Redefined
Walter T. Deacon, Armstrong Machine Works, Inc. .......................... 135

Steam Quality
Walter E. Johnston, North Carolina State University ....................... 142

Improve Boiler System Operations: Application of Statistical Process Control
David Scarr and Dennis Shea, Monsanto Company ........................... 143
TECHNICAL SESSIONS

COGENERATION

Evaluating Benefits with Independent and Cogenerated Power Production
David J. Ahner, Power Technologies, Inc .................................................. 150

Where is the Cogeneration Business Going?
Joel S. Gilbert, Dames and Moore ........................................................... 156

The Cogeneration Plant: Meeting Long-Term Objectives
Ralph W. Greenwood, Ebasco Services Incorporated .................................. 160

Computer Techniques for Cogeneration Plant Design and Testing
J.C. Stewart, Power Systems Engineering, Inc ........................................... 165

Firing Excess Refinery Butane in Peaking Gas Turbines
Tony Pavone, SRI International, Henry Schreiber, EPRI, and Mel Zwillenberg, PSE&G ...... 172

OPPORTUNITIES FOR ELECTRICAL ENERGY SAVINGS

Using Electronic Adjustable Speed Drives for Efficiency Improvement and Cost Reduction
N. Richard Friedman, Resource Dynamics Corporation .................................. 177

High Efficiency Fans and High Efficiency Electrical Motors
Chris Wayne Breedlove, Sebastian Cotton and Grain ..................................... 181

Evaluating Transformer Losses
Robert L. Grun, Jr., CP&L ........................................................................ 183

REAL TIME PRICING AND INTERCONNECTION AGREEMENTS

Real-Time Pricing of Electricity: An Assessment
Martin L. Baughman, University of Texas at Austin and Jay Zarnikau, PUCT .............. 187

Qualifying Facility Wheeling Task Force - Status Report
Sarat Panjavan, PUCT .............................................................................. 194

An Assessment of the Technical Feasibility of Cogenerator Participation in the ERCOT Broker and Economy Programs
L.G. Brackeen, HL&P .............................................................................. 196

Optimal State Electric Supply in Texas - Overview and Progress
Bill Moore, PUCT .................................................................................. 198

Production Cost Modeling of Cogenerators in an Interconnected Electric Supply System
Kenneth Ragsdale, PUCT ........................................................................ 203

ENERGY AND THE ENVIRONMENT - A NEW PARTNERSHIP

'Rest' Creates Momentum
Dennis Cox, Boise Cascade Paper ................................................................ 208

Waste Minimization - The Challenge of the '90s
Richard Durham, Dow Chemical Company ................................................ 213

Waste Minimization - A Hidden Energy Savings?
R. L. Good and K. E. Hunt, Union Carbide Corporation ................................. 217

Establishing and Implementing a Waste Minimization Program in the Chemical & Oil Industries
G. J. Hollool and R. J. Marton, Conoco ................................................................ 220

Don't Worry Be Happy - The Music Man's Approach to Selling Energy Management
Susan M. Gilbert, A&C Consultants, Inc ...................................................... 225
INDUSTRY/UTILITY INTERFACE - PANEL DISCUSSION

Industry/Utility Interface Panel Introduction
Robert L. Wright, Wright Consulting ........................................... 229

The Evolution of an Industrial Marketing Program
Kenneth R. Breeden, Arkansas Power and Light .............................. 231

No Company Is an Island
Ancel D. Maddox, Houston Lighting and Power ............................. 232

Innovative Ratemaking - A Competitive Necessity
Douglas A. Harger, Union Carbide ............................................. 233

Utility and Industrial Partnerships
Thomas F. Sashihara, E.I. DuPont .............................................. 237

Building a Positive Base for Industry/Utility Interaction
John J. Stauffacher, Dow Chemical ............................................. 240

PINCH TECHNOLOGY

The 'Pinch Analysis:' Special Cases
Bruce Bitofft and Paul Tripathi, TENSA Services ........................... 244

Optimizing the Utility System of a Tissue Paper Mill Using Pinch Technology
J.D. Kumana, Linnoff March, Inc., and R.D. Sung, Southern California Edison Company .. 253

Impact of Utility Costs on the Economics of Energy Cost Reduction & Conservation Technologies
S.M. Ranade, Arco Chemical Company, and Y.T. Chao, TENSA Services .......................... 261

Pinch Retrofits Provide Cost Effective Plant Uprating Potential
A.P. Rossiter, H.D. Spriggs, and A.S. McMullan, Linnoff March, Inc. ................. 268

Making Use of Pinch: A Contractors Experience
S. W. Morgan and S. J. Parker, The M.W. Kellogg Company .................. 274

VOLTAGE DIPS, OUTAGES, AND POWER QUALITY

O.G. & E’s Power Quality Program
Mike Davis, O.G.& E. .............................................................. 280

Electric Power Reliability in Chemical Plants
M. Brian Cross, GSU .............................................................. 282

Power Quality Implications
D. Wayne Hilson, Power Electronics Application Center ..................... 287

An Overview of Computer Power Conditioning for JSC Facilities
William C. Gieck, Johnson Space Center .................................... 288

Power Quality from the Manufacturer’s Standpoint
Alex McEachern, BMI .............................................................. 293

ENERGY CONSERVATION OPPORTUNITIES

State-of-the-Art Thermal Energy Storage Retrofit at a Large Manufacturing Facility
Donald P. Fiorino, Texas Instruments .......................................... 296

Improving Deaerator Performance
David F. Dyer and Glennon Maples, Auburn University ..................... 297

Heat Exchanger Fouling—Prediction, Measurement, and Mitigation
G.R. Peterson, DOE .............................................................. 301

Innovative and Progressive Electric Utility Demand-Side Management Strategies
Gary J. Epstein, and Winslow H. Fuller, XENERGY, Inc. ..................... 310
