SEVENTH INTERNATIONAL SYMPOSIUM ON WOOD AND PULPING CHEMISTRY

PROCEEDINGS

In collaboration With
1993 Symposium on Cellulose and Lignocellulosics Chemistry

VOLUME ONE
ORAL PRESENTATIONS

Beijing, P.R.China
May 25–28, 1993
CONTENTS

PLENARY LECTURES

Redox processes in alkaline pulping in the presence of anthraquinone compounds: An Overview
Josef S. Gratzl and Chen-Loeng Chen

Bleaching and environmental: Two compatible concepts
Goram Gellerstedt

Graft polymerization of lignosulfonate: An investigation of reaction mechanism and its relation to property modification
Stephen Y. Lin

Formation and ultra-structure of lignified plant cell walls
Noritsugu Terashima

Peroxymonosulfuric acid and a mixed peracid solution as bleaching agent
Sun-Fu Song, Ding-Ru Pan, Hou-Min Chang and Hasan Jameel

The mechanism of photo-reduced yellowing of lignin containing pulp—Model systems to reality
Rlays Fischer and M. Bever

Research and development of pulping technology in the People's Republic of China
Ning-Xi Hua
Selective cleavage of ether bonds in lignin
Gyosuke Meshitsuka, Nobutaka Fukagawa, Kenichi Fujino and Atsushi Ishizu

Stereo-electronic structure and chemical reactivity of structural units of lignin
Sergey M. Shexchenko and Michael Ya Zarubin

Effects of pH, temperature and pulping additives on the reactions of a phenolic β ether lignin model
Kevin M.J. Barrow, Richard M. Edc and Ian D. Suckling

Determination of ester bonds between lignin and glucuro-xylan in Fugus crenata wood
T. Watanabe, T. Imamura, Y. Kochima and M. Kuwahara

The mechanism of formation of arylglycerol β aryl ether structure serving as a guide to lignin biosynthesis
Jussi Sipila, Gusta Brunow, Ilkka Kilpelainen, Olov Karlsson and Kunt Lundquist

Cleavage of guaiacylglycerol β guaiacyl ether in heating with dioxane buffer (1:1) and buffer solution
Ulla Westermark, Britta Samuelsson and Knut Lundquist

Studies on chemical structure of lignin by oxidation: Erythro and threo ratio of arylglycerol-β-aryl ether structure correlates to low lignin polymerizes
Yuji Matsumoto, Kazumori Mirumi and Atsushi Ishizu
Study on the formation and structure of lignin in the primary xylem of angiospermous trees (Magnolia kokus) by microauto radiography and ultra-violet spectroscopy

K. Fukushima, H. Yamade, S. Yasuda, K. Takaba and N. Terashima

Computer modelling of gymnosperm lignin

H. Lange, B. Wagner, J. F. Yan, E. W. Kaler and Joseph L McCarthy

The structural feature of chloro-organics formed by chlorination of hardwood kraft pulp

Hiroyoki Shintani, Yuji Matsumoto and Atsushi Ishizu

Kinetics and mechanism of electrochemical oxidation of lignin and its model compounds

I. V. Shchukin and V. A. Babkin

CHEMISTRY OF HIGH YIELD PULPING

Ultra-high yield pulping—Yellow coloration of sulphite pulp from jack pine

Seika C. H. Tay

Improvement of brightness of douglas fir thermomechanical pulp by addition of an anti-oxidizing agent and EDTA

Mariana E. Van der Zee, A. Th. F. Helmink and J. J. Velthuizen

Effects of liquor composition on the properties of ultra-high yield pulps

Kwei-Nam Law andJacques L. Valade
Chemical penetration of black spruce in ultra-high yield sulphite pulping
X.Liu, D.N.Roy and C.H.Tay

CHEMISTRY OF PULPING AND BLEACHING

Rationalization of chlorine-free bleaching
D.Lachenal and Nguyen Hu

Factors influencing the amounts of chlorinated phenols formed during bleaching of eucalypt kraft pulp
Terrance J. Smith, Ross H-Vearne and Adrian F.a.Wallis

The reactivity of lignin model compounds and the influence of metal ions during bleaching with oxygen and hydrogen peroxide
Eva Johansson and Sten Ljunggren

Activated oxygen: A selective bleaching agent for chemical pulps
C.L.Lee, K.Hunt and R.W.Murray

A model study on the degradation mechanism of carbohydrate during oxygen delignification
Mitsuo Yasumoto, Yuji Matsumoto and Atsushi Ishizu

Kinetics of Mg(OH)$_2$–oxygen delignification in sulphite pulp: Part 1, Common kinetic dependencies
Ivo Valchev and Per Koch Christensen

Studies on the pollution-free pulping process with alkali urea
Naw-Seok Cho

Towards the non-polluting pulp mill: Part 1, General aspects
Johan Gullikhsen

The quantitative change of chromophore groups in MWL during the Na$_2$SO$_3$ treatment and H$_2$O$_2$ bleaching
You-Ming Liu, Zong-He Wang and Zhong-Hao Chen

The reactions of lignins with oxygen containing species
Josef Gierer

Structural changes of residual lignins during the oxygen bleaching of kraft pulp
Yuan-Zong Lai, Masamino Funaoko and Hain-Tai Chen

Structures of the residual lignins of modified kraft pulps compared with conventional and oxygen-bleached pulps
B.Hortling, T.Tamminen, D.Tikka and J.Sundquist

Heterogeneity of the residual lignin in oxygen delignified kraft pulp
H.Taneda, Y.Iwase and M.Matsukura

Characterization of residual lignins after Alcell pulping
Jairo H. Lora, Gopal C.Goyal and Mikhail Raskin

Improved kraft pulping by controlled sulfide addition
J.E.Jiang, B.F. Greenwood, J. P. Phillips and C. B. Stromberg
Hydrolytic degradation and properties of bleached and unbleached celluloses of deciduous wood (Aspen and Poplar)
Yong-Fa Hou, N.E.Katelnikova and G.A.Patropovloeky

Improved modified kraft cooking with optimal sulfide and lignin profile
Bo-Feng Mao and Nils Hartler

Dissolution of wood components in black liquor started displacement kraft batch cook
Bruno Lonnberg, Jan Lindstrom, Panu Tikka and Hari Kovasin

Effect of ozone on cellulose and pulp
Christine Chirat, Dominique Lachenal, Christian Costa and Jean-Pierre Zumbrunn

Pulping potentials and pitch problem occurrences of three shorea species
Yun-Chuan Ku, Yu-Chang Su and Ping-Din Lo

Pulping potentials and kinetic of fast-grown gmelina arborea
Yu-Chang Su, Yan-Tong Kuo and Yun-Chuan Ku

A modern fibre line for fully bleached kraft pulp
Stig Andtbacks and Daniel Patsson

Bleaching of dissolving pulp with oxygen containing bleaching agent
Klaus Fischer and Ingeberg Schmidt
CHEMISTRY AND CHEMICAL PROCESSING
OF NONWOOD FIBRES

Steam explosion pulping (SEP) of bagasse, flax and kenaf: 
Comparison with conventional processes
Bohuslav Kokta and Aziz Ahmed

Optimized steam explosion treatment of flax: Design of 
the fibre extraction in relation to the severity of the 
processing

Topochemistry of delignification in kraft pulping of 
kenaf bast and core
Wen-Ying Feng, Shu-Lan Shi and Yan-Quan Long

Mechanism and chemical pretreating with ammonium sulfite 
during whole kenaf chemimechanical pulping
Xiao-Gang Song and Jia-Xiang Chen

Bleaching bagasse CMP with hydrogen peroxide and its 
effect on brightness stability in bleaching
Zheng-Yuan Duo, Ming Xiao and Rou-Ming Yang

Location and distribution of silica bodies in rice straw
T. K. Roy, R. Panda and D. Fengel

Lignin variability among different brown midrib sorghum 
lines
B. Chabbert, M. T. Tollier and B. Monties

Labelling of lignins of maize using IU \textsuperscript{14}Cl 
phenylamine and IU \textsuperscript{14}CH\textsubscript{3}I sinapic acid as precursor
Pascale Moeon, Jean-Michel Basle, Marie Paule Millot and 
Viliane Gorrioohan

High yield pulping of wheat straw with vapor phase 
cooking
Sung-Nien Lo, Rubie Chen and Yu Cui
Structure and reactivities of lignin and associated phenolic acids in bleached and unbleached wheat straw high yield pulps
Evaggeli Billa and Sernard Monties

Liquid transfer to paper made from rice straw pulp
Takayuki Okoyama, Bing Li and Raysabro Oye

Studies on lignin-carbohydrate complexes in bagasse and their influence on black liquor properties

Extended delignification in soda-AQ process by pre-sulfonation of wheat straw
Yi-Qin Yang and Zhong-Zheng Lee

Organosolv pulping of hemp
Boke F. Tjeerdema and Frans H.A.Zomers

Effect of formaldehyde during alkaline sulfite pulping of wheat straw
Wei He, Die-Sheng Tai and Zhong-Zheng Lee

Effect and mechanism of sulfonation and refining on brightness of kenaf woody core SCMP
Jing-Quan Wan, Zong-He Wang and Zhong-Hao Chen
