TABLE OF CONTENTS

Volume 1

951235  A Technique to Identify the Structure Borne Sound Sources
        Induced by Powertrain Vibration Behavior ........................................ 1
        Jae-Kab Lee, Seung-Dong Yeo, and Jung-Hwan Bang
        Hyundai Motor Co.

951236  Engine Impact Noise Measurement and Quantification .................... 9
        Ming-Hui Chien
        Ford Motor Co.

951237  Engine Knock Control Via Optimization of Sensor Location .............. 13
        James W. Forbes, Kevin R. Carlstrom, and William J. Graessley
        Ford Motor Co.

951238  New Methods of Evaluating and Improving Piston Related Noise
        in Internal Combustion Engines ....................................................... 19
        Hartmut Kamp and Johannes Spermann
        Kolbenschmidt AG

951239  Experimental Evaluation of Automotive Timing Chain Drive
        Impact Noise ...................................................................................... 33
        S. P. Liu, Alan M. Dent, James W. Thornton, Martin W. Trethewey,
        K. W. Wang, and Sabih I. Hayek
        Penn State Univ.
        F. H. K. Chen
        General Motors Research & Development Center

951240  Reduction of Noise from the Timing-Transmission Cover on a
        Diesel Truck Engine ........................................................................... 43
        A. Agren and O. Johansson
        Luleå University of Technology
        M. Klopotek
        SCANDIA AB

951241  Low Frequency Noise Reduction by Improving Sound Insulation
        Materials ................................................................................................ 57
        Yuichi Kiyota, Makoto Asai, Hiroshi Sugita, and Akira Akiyama
        Toyota Motor Corp.

951242  Reduced Vibration Design ............................................................... 63
        Lezza A. Mignery
        Material Sciences Corp.

951243  Evaluation of Damping Material at Higher Frequencies with
        Application to Automotive Systems Including Brakes .......................... 73
        Rajendra Singh and Shih-Wei Kung
        The Ohio State Univ.
        Ayaz Sheikh, Michael Mitchell, Uma Nandi, and Michael Ransdell
        Eagle-Picher Automotive

951244  Sound Absorption Composites and Their Use in Automotive
        Interior Sound Control ........................................................................... 85
        Yang Qian and Jeff A. Vanbuskirk
        Globe Automotive Industries, Inc.
From Art to Science: A New Acoustic Baffle Material .......................................................... 95
David J. Otto and John L. Hanley
Sika Corp.

Application of a FRF Based Model Updating Technique for the Validation of Finite Element Models of Components of the Automotive Industry .......................................................... 103
Stefan Lammens, Marc Brughmans, and Jan Leuridan
LMS International
Paul Sas
Katholieke Universiteit Leuven

Updating of Dynamic Finite Element Models Based on Experimental Receptances and the Reduced Analytical Dynamic Stiffness Matrix .......................................................... 117
Stefan Lammens, Marc Brughmans, and Jan Leuridan
LMS International
Paul Sas
Katholieke Universiteit Leuven

An Analytical Method for Determining Engine Torque Harmonics for Use With Up Front CAE .......................................................... 127
M. Scott Bergeon and C. E. Newman
Ford Motor Co.

Assessing Design Concepts for NVH Using HYFEX (Hybrid Finite Element/Experimental) Modeling .......................................................... 133
Mark Voutyras, Kevin Thomson, Jamal Aghanem, and Greg Goetchius
Chrysler Corp.
Walter Wolf
Automotive Analytics Inc.

Operational Analysis, Transfer Path Analysis, Modal Analysis: Tools to Understand Road Noise Problems in Cars .......................................................... 139
Katrien Wyckaert and Herman Van der Auweraer
LMS International

Advancements in Computer Simulation Methods for Vehicle Noise and Vibration .......................................................... 145
John Bretl
Structural Dynamics Research Corp.

An Analytical Control Systems Approach to Steering Shudder .......................................................... 151
Jarett M. Smith
Delphi Saginaw Steering Systems
Gary R. Ferries and R. Larry Arbanas
General Motors

Joris Van Haver
Monroe Europe

Air- and Structure-Borne Noise Reduction of Automotive Dampers .......................................................... 165
John G. Cherng
University of Michigan-Dearborn
Tim Akin
Monroe Auto Equipment Co.
951257 Effects of Noise Limits for Powered Vehicles on Their Emissions in Real Operation ................................................................. 173
   Heinrich Steven
   Forschungsinstitut Geräusche und Erschütterungen GmbH

951258 Noise Induced Hearing Loss in Truck Drivers ...................... 183
   Paul E. Waters
   P. E. Waters & Associates

951259 Vehicle Exhaust Sound Specification Development .............. 191
   Chad M. Johnson
   Hughes Information Technology Corp.

951260 The Effect of Vehicle Exhaust System Components on Flow Losses and Noise in Firing Spark-Ignition Engines .................. 197
   A. Selamet and S. H. Yonak
   The University of Michigan
   J. M. Novak and M. Khan
   Ford Motor Co.

951261 Acoustic Modeling and Optimization of Induction System Components ................................................................. 207
   Walter Eversman
   University of Missouri-Rolla
   John A. White, Jr.
   AC Delco Systems

951262 Relation Between the Predominance of Acoustic Resonance Noise and Air Flow in Muffler ................................................ 217
   Naoya Kojima, Benzhu Liu, and Hai Zhou
   Yamaguchi Univ.

951263 Helmholtz Resonator: A Multidimensional Analytical, Computational, and Experimental Study ................................. 227
   A. Selamet and P. M. Radavich
   The University of Michigan

951264 Optimized Air Intake Systems ............................................. 241
   Francesco Gamba
   Comaglia Research Center
   Luigi Pilo
   Fiat Auto
   Giovanni Turino
   Fiat Research Center

951265 Optimization of Damping Treatment in the Car Design Process Using Advanced Simulation Techniques .................. 249
   Hinne Bloemhof
   Unikeller

951266 Experimental Analysis of Interior Noise Due to Powerplant Radiated Noise ................................................................. 257
   Faramarz Farahanchi, David Griffiths, Anthony S. Mason,
   and Thomas A. Mayer
   Ford Motor Co.
951267 Investigation of Different Techniques for Quantifying Automotive Panel Noise Radiation .................................................. 263
Steven R. Sorenson
Globe Industries, Inc.

951268 Empirically Predicting the Sound Transmission Loss of Double-Wall Sound Barrier Assemblies ...................................... 271
Richard E. Wentzel
Ford Motor Co.
Pranab Saha
Kolano and Saha Engineers, Inc.

951269 Experimental Investigation of a Friction-Induced Squeak Between Head Restraint Fabric and Glass .................................. 281
Barry X. Yang and Benny E. Rediers
Defiance - SMC

951270 Studying Low Frequency Vehicle Phenomena Using Advanced Modelling Techniques - Part 1: Construction of a Driveline Model .................................................................................................................. 287
Steven A. Amphlett and Jason P. March
Ricardo Consulting Engineers Ltd.

951271 Indirect Measurement of Rotation/Moment Impedance Functions .......................................................... 295
Shumin Li, William Fladung, and David Brown
University of Cincinnati
Richard Bono
The Modal Shop

951272 Examination of Some Assumptions Practised in Vehicle Vibration Isolation Prediction and Design ............................. 305
Michael A. Sanderson and Juha Plunt
Chalmers University of Technology

951273 Methods for Analyzing Order Spectra ......................................................................................................................... 313
D. K. Bandhopadhyay and David Griffiths
Ford Motor Co.

951274 The Analysis of Frequency Domain Data from Designed Experiments ................................................................................. 319
Thomas J. Dyer
Ford Motor Co.
Thomas W. Nolan
Associates in Process Improvement, Inc.
William R. Shapton
Michigan Technological Univ.
Robert S. Thomas
Ford Motor Co.

951275 The Use of Random Vibration Methods for Dynamic Loading of a Structural Link ................................................................. 331
Harry L. Schwab
Ford Motor Co.
Richard S. Gilfoy, Jr.
National Technical Systems
Wen C. Ting
Ford Motor Co.
An Analytical Investigation of the Crankshaft-Flywheel Bending Vibrations for a V6 Engine
Zissimos P. Mourelatos
General Motors Research & Development Center

Optimisation of Drive Comfort of a Car by Means of a Road Simulation Approach
Mr. Liefooghe
LMS International
Dr. Gerber and Mr. Heltmann
BMW AG

The Evaluation of Structural Modifications for Ride Pleasability
Louis D. Balogh
General Motors Corp.
Murty S. Kompella
EG&G Structural Kinematics

Simulation of Low Torque Bushings in Automobile Suspensions
Neel K. Mani and Kailasam Satyamurthy
GenCorp Corporate Technology Center

Some Drum Brake Squeal Mechanisms
Johan Hultén
Chalmers University of Technology

Structural Instability Test/Analysis of Brake Squeal
Mohamed Khalid Abdelhamid
AlliedSignal Automotive

Creep Groan of Disc Brakes
Mohamed Khalid Abdelhamid
AlliedSignal Automotive

Development of Vehicle Sound Quality - Targets and Methods
Matthias Schneider, Michael Wilhelm, and Norbert Alt
FEV Motorentechnik GmbH & Co. KG

Development of a Practical Method for the Subjective Appraisal of Total Vehicle NVH Refinement
D. R. Elliott, P. J. Crowther, and C. J. Benett
Ricardo Consulting Engineers Ltd.

Sound Source Decomposition and Modeling for Customer Product Expectation
John C. Gagliardi
NxStep Technology

Objective Analyses of Binaural Recordings
Klaus Genuit
HEAD acoustics GmbH

Sound Quality Assessment of Powered Seat Adjusters
Gabriella Cerrato and Alun Crewe
Structural Dynamics Research Corp.
John Terech
Johnson Controls, Inc.
951289 Improvement of Sound Quality of Exterior Idling Noise of Small Diesel Truck .......................................................... 441
Takeo Hashimoto and Shigeko Hatano
Seikei Univ.
Haruki Saito
Isuzu Advanced Engineering Center, Ltd.

951290 Experimental Study of the Correlation Between Crankshaft Vibrations, Engine-Structure Vibrations, and Engine Noise in High Speed Engines .............................................. 449
Hideo Okamura
Sophia Univ.
Tetsuji Morita
NOK-MEGULASTIK Co., Ltd.
Toshiharu Oka
TAISEI Corp.
Susumu Arai
Hino Motors Ltd.

951291 Experiments and Computation of Crankshaft Three-Dimensional Vibrations and Bending Stresses in a Vee-Type Ten-Cylinder Engine .................................................. 463
Jouji Kimura
Isuzu Motors Ltd.
Hideo Okamura and Kiyoshi Sogabe
Sophia Univ.

951292 Analysis of Crankshaft Three-Dimensional Vibrations in a Rotating Coordinate System ............................................ 473
Tetsuji Morita
NOK-MEGULASTIK Co., Ltd.
Hideo Okamura
Sophia Univ.

951293 Hysteresis Effects on Driveline Torsional Vibrations ............... 481
Andrew Szadkowski and Edward Prange
Dana Corp.
Nagi G. Naganathan
University of Toledo

951294 NVH Optimization of an In-Line 4-Cylinder Powertrain ............. 495
J. Querengässer and J. Meyer
Ford-Werke AG
J. Wolschendorf and J. Nehl
FEV Motorentechnik

951295 Practical and Analytical Studies in Powertrain and Vehicle Refinement ................................................................. 503
Christopher G. Knowland and Bernard J. Challen
Perkins Technology North America
Raymond A. Farnell
Perkins Technology Limited, Europe

951296 A New Generation of Engine Mounts ...................................... 511
André Gennesseaux
Paulstra
951297 Periodic Response of Nonlinear Engine Mounting Systems .......... 519
Thomas J. Royston and Rajendra Singh
Ohio State Univ.

951298 Active Engine Mount for a Large Amplitude of Idling Vibration ....... 531
Toshiyuki Shibayama, Kimio Ito, Toshiyuki Gami, and Takeshi Oku
Toyo Tire & Rubber Co., Ltd.
Zenji Nakajima and Akinori Ichikawa
Toyota Motor Corp.

951299 Active Vibration and Noise Cancellation Control of Four Cylinder Engines - An Application ................................................. 539
Bryan Riley, Mark Bodie, Jack Hoying, Kamal Majeed, and Sanjiv Tewani
Delphi Chassis Systems

951300 Engine Noise Reduction Using Narrowband Feedback Control .... 549
David R. Barth
Michigan Technological Univ.
A. Reza Kashani
The University of Dayton

951301 Technological Development for Active Control of Air Induction Noise ................................................................. 557
Katsuyuki Tanaka and Yoshitaka Nishio
Nippondenso Co., Ltd.
Tokio Kohama and Kouji Ohara
Nippon Soken Inc.

951302 Variation of Vehicle NVH Properties due to Component
Eigenfrequency Shifting - Basic Limits of Predictability ............ 567
Bo Gårdhagen and Juha Plunt
Chalmers University of Technology

951303 SEA, Power Flow, and Energy Accountancy ........................ 577
Richard H. Lyon
RH Lyon Corp.

951304 Applicability of the Experimental Statistical Energy Analysis to an Engine Structure .................................................. 581
Lie Wu and Anders Ågren
Luleå University of Technology

951305 Prediction and Verification of Energy Flow in a Structure Using an Energy Finite Element Approach ................................. 593
Robert J. Unglenieks and Robert J. Bernhard
Purdue Univ.

951306 Indirect Couplings in Energy Flow Models: Can They be Used to Improve Vehicle NVH Predictions? .............................. 601
Claes R. Fredö
Chalmers University of Technology
