951327  Road Noise Modelling Using Statistical Energy Analysis Method ................................................................. 761
   Bangyi Dong, Martin Green, and Mark Voutyras
   Chrysler Corp.
   Paul Bremner and Peter Kasper
   Vibro-Acoustic Sciences Inc.

951328  A Novel Approach to Statistical Energy Analysis Model Validation ................................................................. 767
   Mark J. Moeller and Jian Pan
   Ford Motor Co.
   Richard G. DeJong
   Calvin College

951329  A Comparison of Test-Based and Analytic SEA Models for Vibro-Acoustics of a Light Truck ................................................................. 777
   Heng-yee Chen
   Ford Motor Co.
   Melissa O'Keefe and Paul Bremner
   Vibro-Acoustic Sciences Inc.

951330  Structure Borne Sound Transmission Through a Motor Vehicle ...... 785
   John A. Steel
   Heriot-Watt Univ.

951331  Measurement of Aeroacoustically Induced Door Glass Vibrations Using a Laser Vibrometer ................................................................. 791
   Mitchell M. Marchi, Alexander Petniunas, and Douglas E. Everstine
   Ford Motor Co.

951332  High Resolution Order Tracking Using Kalman Tracking Filters - Theory and Applications ................................................................. 803
   Jan Leuridan
   LMS International
   Gary E. Kopp and Nasser Moshrefi
   Ford Motor Co.
   Havard Void
   Void Solutions

951333  Complex Modulus and Damping Measurements Using Resonant and Non-Resonant Methods ................................................................. 811
   S. Gade, K. Zaveri, H. Konstantin-Hansen, and H. Herlufsen
   Bruel & Kjær

951334  Sound Intensity Measurement Errors in the Presence of Large Pressure to Intensity Ratios ................................................................. 817
   Paul R. Donavan
   General Motors Corp.

951335  Comparison of Seat System Resonant Frequency Testing Methods ................................................................. 825
   Robert J. Doolan and Vito F. Mannino
   Lear Seating Corp.
The AAMA Traffic Noise Model - A Better Approach ........................................ 829
Roger L. Wayson, Marti A. Martin, and Andrew M. Edwards
University of Central Florida
Ron Wasko
American Automobile Manufacturers Association

Applying the Fuzzy-Logic on the Noise Test Rigs to Guarantee the Quality of Volume-Produced Transmissions ........................................ 839
Karl Leiter
Steyr-Daimler-Puch Fahrzeugtechnik GmbH
Jang Wang
Kenan Karaca
Steyr-Daimler-Puch Fahrzeugtechnik GmbH

Vehicle Noise and Weight Reduction Using Panel Acoustic Contribution Analysis ........................................ 847
Y. Kevin Zhang, Ming-Ran Lee, Paul J. Stanecki, Gordon M. Brown,
Tom E. Allen, James W. Forbes, and Z. Howard Jia
Ford Motor Co.

Comparison and Verification of Experimental and Numerical Models for the Prediction of the Efficiency of Engine Noise Shields ........................................ 859
Fülöp Augustinovicz, Paul Sas, and Filip Penne
Katholieke Universiteit Leuven

Accurate Acoustic Diagnostic Analysis Using the Boundary Element Method ........................................ 867
J. Trevelyan
Computational Mechanics, Inc.
R. A. Adey, S. M. Niku, J. M. W. Baynham, and P. Burns
C. M. BEASY, Ltd.

Finite Element and Boundary Element Models for Predicting the Vibro-Acoustic Behaviour of Multi-Layered Structures ........................................ 871
J. P. Coyette
Numerical Integration Technologies N.V.

Engine Noise Radiation - Prediction and Test Comparison ........................................ 879
Ulrich Viersbach and Ramon Maurell
Ford Motor Co.
Pierre Guisset and Jean-Pol Rossion
Numerical Integration Technologies

Coupled Boundary and Finite Element Method for Analysis of Composite Structure-Acoustic Interaction Problems ........................................ 885
Carl S. Pates, III
Roush Anatrol, Inc.
Chuh Mei and Uday Shirahatti
Old Dominion Univ.

A Study on the Noise Generating Mechanism of a Fuel Injection Pump ........................................ 891
Chiharu Togashi and Teruo Nakada
Isuzu Advanced Engineering Center, Ltd.
The Effect of Dual Sine Signals on Dynamic Properties of Rubber ................................................................. 901
A. Carrano, V. Polleri, and L. Vitalini-Sacconi
EniChem Elastomeri

Performance Analysis of Hydraulic Engine Mount by Using Bond Graph Method ................................. 917
Kyu H. Lee and Young T. Choi
Korea Automotive Technology Institute
Sang P. Hong
Pyung Hwa Industrials, Co. Ltd.

Experimental Study and Modeling of Hydraulic Mount and Engine System ............................................ 927
Steve J. Gau and Jeffry D. Cotton
GenCorp Corporate Technology Center

Blower Motor Whining Noise - A Case Study .......................................................... 941
Prakash T. Thawani and Richard C. Sohaney
Ford Motor Co.

The Study of DC Motor Noise and Vibration ................................................................. 947
Hongling Kang
United Technologies Automotive

Tire Tread Pattern Noise Reduction Through the Application of Pitch Sequencing .............................. 955
Thomas A. Williams
Hankook Tire

Confirmation Tests for SAE J57 Test Procedure Revision ........................................... 961
James K. Thompson
The Goodyear Tire & Rubber Co.

Trailer Test Method of Tire-Road Noise ........................................................................ 969
Naotaka Tomita, Satoshi Konishi, and Masahiko Sakamoto
Bridgestone Corp.

Correlation of Tire Intensity Levels and Passby Sound Pressure Levels ......................................... 981
J. Stuart Bolton and Henry R. Hall
Purdue Univ.
Richard F. Schumacher and Jeffrey Stott
General Motors Proving Ground

The Ford Motor Company Advanced Engineering Center ........................................ 991
Paul E. Brey and Donald A. Williams
Ford Motor Co.

J366 Driveby Variability ......................................................................................... 999
Cummins Engine Co.

Vehicle Pass-By Exterior Noise In-Cell Simulation Test Method ........................................ 1009
Tim Boland, Jeff Huang, and Walker Flint
Caterpillar Inc
951359  Development of a Robotic Sound Intensity Data Acquisition System for Powerplant Testing .................................................. 1015
    A. S. Mason
    Ford Motor Co.
    T. A. Bartoshesky
    CRS Robotics Corp.

951360  Source Identification Using Acoustic Array Techniques ............... 1023
    Susan Dumbacher and Jason Blough
    University of Cincinnati
    Darren Hallman and Percy Wang
    Purdue Univ.

951361  SAE and ISO Noise Test Site Variability ........................................ 1037
    Richard F. Schumacher
    General Motors
    Kenneth G. Phaneuf
    Walker Manufacturing
    William J. Haley
    Ford Motor Co.

951362  System Identification by Characteristic Matrices Using the Modal Parameters (An Application to Automotive's Subframe) .............. 1045
    Masanobu Nakamura and Takeshi Sawanobori
    Yamanashi Univ.
    Akio Nagamatsu
    Tokyo Institute of Technology
    Yoshinobu Kamada
    Mitsubishi Motors Corp.
    Hideyuki Hata
    MMC Computer Research

951363  Application of Operating Deflection Shape Analysis of a Powerplant Over the Entire Operating Speed Sweep to Provide an Insight to the Structural Behavior of the System ..................... 1052
    Alison L. McBroom and D. K. Banhopadhyay
    Ford Motor Co.

951364  The Use of Wavelet Transform and Frames in NVH Applications ................................................................. 1057
    Taner Önsay
    Michigan State Univ.

951365  An Approach for Multi-Reference Identification of Modal Parameters in Frequency Domain ............................................. 1069
    Mitsuo Iwahara
    Isuzu Advanced Engineering Center, Ltd.
    Akio Nagamatsu
    Tokyo Institute of Technology

951366  Automotive Applications for Test/Analysis Correlation .................... 1079
    Mark Donley and Teik Chin Lim
    SDRC
Gas Dynamics Simulation for the Design of Intake and Exhaust Systems - Latest Techniques .............................................. 1087
   C. S. Wren
      Ricardo Consulting Engineers Ltd.
   O. Johnson
      Ricardo North America

Development of a Vibration Identification Method Based on the Use of a Neural Network .............................................. 1093
   Chinmoy Pal and Ichiro Hagiwara
      Nissan Research Center
   Shin Morishita and Soichiro Une
      Yokohama National Univ.

Wind Noise Sound Quality .................................................. 1103
   Norman Otto and Ben John Feng
      Ford Motor Co.

Vehicle Closure Sound Quality ............................................ 1109
   Anthony J. Champagne and Scott A. Amman
      Ford Motor Co.

A Perceptual Model for Power Adjustable Steering Column Sounds ................................................................. 1115
   Scott A. Amman and Chris S. Young
      Ford Motor Co.

Sound Quality in Cars: New Ideas, New Tools ........................................ 1123
   Giacomo Ruspa and Giancarlo Schellino
      Centro Ricerche Fiat

Objective Measurement of Automatic Transmission Shift Feel Using Vibration Dose Value ........................................... 1131
   Ken Horste
      Ford Motor Co.

Objective Harshness Evaluation ............................................. 1139
   Takao Ushijima and Shoichi Kumakawa
      Bridgestone Corp.

Application of Noise Control and Heat Insulation Materials and Devices in the Automotive Industry .............................. 1147
   Timothy Hirabayashi
      General Motors Corp.
   David McCaa
      CertainTeed Corp.
   Robert Rebandt
      Ford Motor Co.
   Phillip Rusch
      Harley-Davidson Motor Co.
   Pranab Saha
      Kolano and Saha Engineers, Inc.
   SAE Acoustical Materials Committee
   SAE Thermal Materials Committee
951376  Conditioned Source Analysis, A Technique for Multiple Input System Identification with Application to Combustion Energy Separation in Piston Engines .............................................. 1165
  Michael F. Albright
  Roush Anatrol

951253  Optimization of Power Steering Systems Vibration Reduction in Passenger Cars ......................................................... 1179
  Jean Botti
  Delphi-Saginaw
  G. Venizelos
  CNAM
  N. Benkaza
  Delphi-Chassis

951284  Emotional Effect of Car Interior Sounds: Pleasantness and Power and Their Relation to Acoustic Key Features ...................... 1203
  Rudolf Bisping
  S.A.S. Systems
