Toronto, Ontario, Canada
November 9-12, 1992
# Table of Contents

## Introduction

CORDS: Status and Directions ................................................................. 1  
*Jacob Slonim, Michael Bauer and Per-Åke Larson*

## Session 3.1 Multidatabase Systems

Overview of Multidatabase Transaction Management ............................. 23  
*Yuri Breitbart, Hector Garcia-Molina and Avi Silberschatz*

Multidatabase Services: Issues and Architectural Design .................... 57  
*Neil Coburn and Per-Åke Larson*

A Concurrency Control Protocol for Nested Transactions ..................... 67  
*Ming-Ling Lo and C. V. Ravishankar*

A Transactional API for the EAN X.500 Directory Service .................... 81  
*Gerald Neufeld and Barry Brachman*

Open Nested Serializability in Multidatabase Systems ......................... 93  
*Dexter P. Bradshaw*

Query Optimization in Multidatabase Systems .................................... 111  
*Qiang Zhu*

Issues in Managing Long Transactions and Large Objects in a Multidatabase System ......................................................... 129  
*Gopi Attaluri*

Classifying Approaches to Semantic Heterogeneity in Multidatabase Systems ................................................................. 153  
*Jianchun Zhang*

## Session 3.2 Distributed Systems - Programming and Management

The Role of Directory Services in Network Management ....................... 175  
*James W. Hong, Michael A. Bauer and J. Michael Bennett*

---

1 The first digit of the session number indicates the day of the conference. Refer to the accompanying volume for papers from workshops 3.4, 3.5, 4.2, 4.3, 4.4 and 4.5.
The Optimal Placement of Replicas in a Network Using a READ ANY - WRITE ALL Policy .................................................. 189
Irwin S. Pressman, Stephen A. Cook and Jan Pachl

NESTMOD Simulation of DQDB Metropolitan Networks ...................... 203
Gerald A. Winters, David W. Bachmann and Toby J. Teorey

On Remote Procedure Call .......................................................... 215
Patricia Gomes Soares

Optimistic Replication in HOPE .................................................. 269
Crispin Cowan

Elastic Servers in CORDS ............................................................ 283
Germán S. Goldszmidt

Extending Distributed System Specifications .................................. 293
Ferhat Khendek

Session 3.3 High-Bandwidth Networks

Analytic Methods in Coverage Testing of Communications Software .......... 301
Jadranka Alilovic-Curgus

Session 4.1 CORDS

A Prototype Debugger for Hermes ................................................. 313
David Taylor

Cluster Busting in Anchored Graph Drawing ..................................... 327
Kelly A. Lyons

Directory Requirements for a Multidatabase Service ........................... 339
P. Martin, M. Bauer, N. Coburn, P. Larson, G. Neufeld, J. Pachl and J. Slonim

A Formalization of the CORDS Process Model Using Mondel ................. 351
Ferhat Khendek and Gregor v. Bochmann

Some Definitions, Protocols and Proofs About Secure Authentication .......... 361
Charles Rackoff
From Grapevine to Trader: The Evolution of Distributed Directory Technology .......................................................... 375

Roger Y.M. Cheung
