Proceedings of the Workshop on the Parallel Implementation of Functional Languages

Hugh Glaser and Pieter Hartel (editors)

CSTR 91-07

Proceedings of the Third International Workshop on the Implementation of Functional Languages on Parallel Architectures
Southampton, United Kingdom, June 1991.

# Table of contents

List of participants

G. Akerholt, K. Hammond, S. Peyton Jones, Ph. Trinder
A parallel functional database for GRIP 7

J. Darlington, A. Field, P. Harrison, D. Harper, G. Jouret, P. Kelly
K. Sephton, D. Sharp
Structured parallel functional programming 31

D. Sharp, P. Harrison, J. Darlington
A synthesis of a dynamic message-passing algorithm for quicksort 53

K. Waugh
Parallel imperative programs from functional prototypes 75

J. Schepers
Using functional languages for process specifications 89

J. Sargeant, I. Watson
Some experiments in controlling the dynamic behaviour of parallel functional programs 103

P. Hartel, H. Glaser, J. Wild
On the benefits of different analyses in the compilation of a lazy functional language 123

S. Peyton Jones
The spineless tagless g-machine: a second attempt 147

E. Nöcker
The parallel ABC machine (abstract)
[Paper appended to original proceedings, see below] 193

S. Smetsers
Compiling ABC code (abstract)
[Paper appended to original proceedings, see below] 195

S-Y. Huang, P. Kelly, J. Liu
Pilot implementation of abstract, declarative process placement 197

G. Ostheimer
Parallel functional computation on STARDUST (abstract)
[Paper appended to original proceedings, see below] 215

M. Kesseler
Implementing Concurrent Clean on Transputers (abstract)
[Paper appended to original proceedings, see below] 217

K. Langendoen
WYBERT: parallel reduction on shared memory 219

H. Kuchen
Shared memory implementation of a functional language (abstract) 225

G. Aharoni, Y. Farber, A. Barak
A strategy for the run-time management of fine-grained parallelism 227

P. Achten
Annotations for load distribution 247
