Maximum Stress at Intersecting Bores of Pressurized Blocks
Ajay Garg................................................................................................................................................. 463

APPLICATIONS OF CAD AND CAGD
Anthropometry-Based Surface Modeling of the Human Torso
Peng Li and Peter R. M. Jones ................................................................. 469
CAD Based Inspection Analysis and Error Display
Michael J. Cardew-Hall and Phillip Dench ........................................... 475
Computer Aided Local Modifications for the Transition From Part Design to Die Design
Shao-Chiung Lu, R. Allen Miller, and Gary L. Kinzel................................. 483
An Off-Line Graphical Environment for Programming Robots Using Commercial CAD Systems
Karim A. Abdel-Malek ........................................................................... 491

VOLUME 2

FINITE ELEMENT TECHNOLOGIES FOR SOLUTION OF MILITARY PROBLEMS
Nonlinear Shell Deflections With Thickness Updating
C. W. S. To and M. L. Liu ....................................................................... 501
Effective Properties of 3D Laminated Composites for Finite Element Applications
Amos Alexander, Jerome T. Tzeng, William H. Drysdale, and Bruce P. Burns ........................................... 507
Analysis of a Balanced Breech System for the M1A1 Main Gun System Using Finite Element Techniques
David A. Hopkins and Stephen A. Wilkerson ........................................ 519
Use of Finite-Element Stress Analysis in the Design of a Tank-Cannon-Launched Training Projectile
Michael S. L. Hollis ............................................................................ 533

NEW ADVANCES IN FINITE ELEMENT ANALYSIS
A Comparative Study of Flux Projection Type Error Estimators in Elasto-Plastic Finite Element Analysis
Ravi P. Tetambe and Sunil Saigal ............................................................ 545
Estimation of Error in Acoustic Analysis
Ravi P. Tetambe and C. Rajakumar ....................................................... 555
Adaptivity and Mesh Generation in 2-D Finite Element Analysis
C. A. Almeida ..................................................................................... 561

APPLIED COMPUTATIONAL MECHANICS
An Efficient Numerical Method for Dynamic Interaction Analysis of High-Speed Shinkansen Vehicles, Rail, and Bridge
Makoto Tanabe, Hajime Wakui, and Nobuyuki Matsumoto ......................... 567
A General Finite Element Approach for Porous and Non-Porous Metal-Forming Processes
B. Sudhakar, John E. Jackson, Jr., William K. Rule, and Imtiaz Haque .............. 573
3-D Finite Element Modeling and Analysis of an Armored Vehicle Hull With Multiple Access Openings
Aaron D. Gupta, Joseph M. Santiago, and Christopher Meyer ....................... 581
Examination of a “Map-Based” Approach to Modeling Steady State Heat Pump Performance With Variable Air Flow Rates
  P. Mawasha, S. P. Rooke, and R. Gross

THERMAL SYSTEMS
A New Method and Device for Temperature Measurement Using One-Dimensional Heat Equation
  Nicolae A. Damean

CAD and Optimization of Helical Torsion Springs
  Sayed M. Metwalli, M. Alaa Radwan, and Abdel Aziz M. Elmeligy

Boundary Layers on a Rotating Rough Disk
  Ali Heydari, Ramin Miryan, and Saeid Sharifi

APPLICATIONS AND TESTING OF GRAPHICAL USER INTERFACES
Process Improvement Using Design by Experiments
  Hsien-chen Li and Fuyau Lin

Hybermedia Programs for Mechanical Engineering
  Timothy K. Hight, Lee E. Hornberger, Elizabeth Lawrence, and Matthew W. Gawlowski

MULTIMEDIA AND VISION TECHNOLOGY
Storage of Spatial Data in Semantic Databases
  Naphtali Rishe and Qiang Li

SCI Lamp for Multimedia Applications
  Qiang Li

FUZZY LOGIC SIMULATION AND ROBOTICS
A Self-Organizing Fuzzy Controller Using Neural Networks
  Wei Li and Zuowei Wu

Sensor-Based Robot Navigation in Uncertain Environments Using Fuzzy Logic
  Wei Li and Kezhong He

Computer Simulations for Design and Optimization of a Fuzzy Control System
  Dean B. Edwards, John R. Canning, and Anthony de Sam Lazaro

INTELLIGENT SYSTEMS
Zero Turn Radius Vehicle Incorporating Computer-Controlled “Intelligent Castors”
  J. Spark and B. C. Besselink

The Control of Multi-Bending: A Flexible Method to Fabricate Complex Structural Parts
  Jack X. Luo and Kim A. Stelson

Detailed Transportation Simulation for Improved Logistics Quality
  Harry C. Petersen and Amy Rummel

Orientation and Trajectory Determination for a Robot With a Laser Distance-Meter as End Effector
  Luciano E. Chiang and Eugenio Stamm

MICROCOMPUTERS IN A CLASSROOM
On Development of Engineering Animation Software
  Y. C. Pao

The Use of Spreadsheets in Compressible Flow Courses
  Edward F. Young
Integrating Microcomputer Applications Into Engineering Technology Programs
Kathleen L. Kitto ................................................................. 863

Effective Integration of Computer Programming in Engineering Education
Joseph A. Untener ................................................................. 873

Restructuring Applied Thermodynamics: Exploratory Thermodynamics
John S. Morse ................................................................. 879

CAD IN HIGHER EDUCATION
Using Exponential Cubic Splines to Predict Low Temperature Behavior of Elastomeric Materials
Terry E. Shoup and George R. Fegan ........................................ 891

Engineering Analysis and Simulation Using Visual BASIC
Kelvin Ng, Walter M. Presz, Jr., and M. Khosrowjerdi ..................... 897

Principal Elements of Solid Modeling
Y. C. Pao ................................................................. 913

Design and Analysis of a Mobile Robotic Wheel by Nonlinear Programming
Prabhudutt Jha ................................................................. 919

PARAMETRIC AND OBJECT-ORIENTED SYSTEMS
Linking Expert Group Technology With Parametric Design
Joon Seok Lee, Kang J. Chang, and Larry Lichten ............................ 931

Concept, Development and Implementation of DAMOS-C: The Object Oriented Approach to Multibody Systems
Andreas Daberkow and Werner Schiehlen .................................... 937

Author Index ........................................................................... 953
