Silicones in Coatings

Brussels, Belgium
29-31 January 1996
CONTENTS

Paper 1: Silicones in Coatings: An Overview
   William Finzel
   Dow Corning, USA

Paper 2: Silanes in Coatings
   Dr William Herdle
   OSI Specialties, Switzerland

Paper 3: The Characterisation of Silicones in Coatings Applications
   Andrew Goodwin
   Dow Corning, UK

Paper 4: Silicone Additives for Aqueous Coating Systems
   Karl-Heinz Käsler
   Bayer, Germany

Paper 5: Organosilicone Surfactants: Properties, Chemistry, Applications
   Wernfried Heilen
   Tego Chemie Service, Germany

Paper 6: Foam Control in Waterborne Coatings
   Dr Thomas Easton
   Dow Corning, UK

Paper 7: Silicone Modified Binders
   Dr Ekkehard Patrick
   Wacker Chemie, Germany

Paper 8: Effect of Modified Silicone Copolymer Structures on Surface Tension
   András Szabó
   Technical University of Budapest, Hungary

Paper 9: Silane Emulsions as Masonry Water Repellents
   Dr Michael Wilson
   Harris Specialty Chemicals USA

Paper 10: Film-Forming Semi IPN as Anti-Graffiti Coatings for Various Building Materials
   Maria Zielecka
   Industrial Chemistry Research Institute, Poland

Paper 11: Anti-Graffiti Coatings: A New High Performance Coating System
   Dr Walter Schubert
   Herberts, Germany

Paper 12: Silicone Resin Emulsion Paint and Silicone Microemulsion Primer: Long-Life Facade Coating System
   Dr Hans Mayer
   Wacker Chemie, Germany

   Dr Eric Garin
   Rhône-Poulenc, France

Paper 14: Silicones as Sealers for Masonry Coatings
   Hermann Kober
   Bayer, Germany
| Paper 15: | Adhesive Polysiloxanes with Hydrogen Bond Donors or Acceptors | Prof Dominique Teyssie  
Université of Cergy Pontois  
France |
| Paper 16: | New Surface Coatings from Siloxane Polymers | Dr Janis Matisons  
Ian Wark Research Institute  
Australia |
| Paper 17: | New Siloxane Polymers for Stable, Flexible Film Coatings with Polyfunctional Properties and Perspectives of Their Applications | Prof S Dolgoplosk  
Research Institute of Synthet Rubber, Russia |
| Paper 18: | Siloxane Oligomer Diols as Potential Intermediates for Novel Durable Coatings | Dr Janusz Kozakiewicz  
Industrial Chemistry Research Institute, Poland |
| Paper 19: | Evaluation of Different Behaviour Between Conventional and Reactive Organically Modified Polysiloxane in Solvent-Based Industrial Coatings | Claudio Castiglione  
Efka Chemicals  
Italy |
| Paper 20: | Silicate Sources of Polyorganosiloxane Materials | Dr Dafydd Kendrick  
University of Greenwich, UK |
| Paper 21: | Release Liners for Self-Adhesive Products | Peter Greenway  
Phazer Technologies, UK |
| Paper 22: | Surface Properties of Silicone Release Coatings | Dr Michael Owen  
Dow Corning, USA |
| Paper 23: | New Low Surface Energy Materials Based on Fluorinated Polysiloxanes | Dr Sylvie Boileau  
CNRS, France |
| Paper 24: | Hybrid Fluorinated Silicones: Influence of the Spacer Between the Silicon Atom and the Fluorinated Chain onto the Preparation and the Thermal Properties | Dr Francine Guida-Pietrasan  
University of Montpellier  
France |
| Paper 25: | Release Coatings in the Printing Industry by Means of UV Curing | Hardi Döhler  
Th Goldschmidt, Germany |
| Paper 26: | Waterborne Silicones as Water Repellents | Dr Dymphna Ormonde  
Dow Corning, UK |
| Paper 27: | New Developments in Silicone-Based High Temperature Resistant Coatings | Dr Colin Hull  
Ameron, USA |
| Paper 28: | Polysiloxanes for Powder Coatings | Thomas Laubender  
Wacker Chemie, Germany |
Paper 29: Organosilanes in High Performance, High-Solids and Powder Coatings

Paper 31: Environmental Fate and Effects of Silicones from Coatings

Paper 32: Recent Developments in Radiation Cured Silicone Coatings

Paper 33: Silanes, Silicones and Silica in UV Curing Organic Hard Coats

Paper 34: Surface Control Additives for Radiation-Curing Systems
