Seventeenth Annual Computer Science Conference

ACSC-17

19-21 January, 1994

Christchurch, New Zealand

Australian Computer Science Communications
Volume 16, Number 1

Part C

Gopal Gupta (Ed.)

University of Canterbury
# Table of Contents

## Part C

### Friday

**Session-9: 09:00 - 10:30**

*Cumulative Arrays and Generalised Shamir Secret Sharing Schemes*
  Chris Charnes and Josef Pieprzyk
  
  519

*Simulated Annealing for Cryptanalysis of Transposition Ciphers*
  J. Giddy and R. Safavi-Naini
  
  529

*Cooling Schedules for Simulated Annealing Based Scheduling Algorithms*
  Henry Dang and David Abramson
  
  541

*Optimising Compilation for CLP (R)*
  Kim Marriott, Harald Sondergaard,
  Peter J. Stuckey and Roland H.C. Yap
  
  551

*Separating Synchronisation and Functionality in Concurrent Logical Objects*
  Andrew Davison
  
  561

*CLP(R) as a Finite Element Modeling Language*
  P.A. Strooper
  
  571

*The Octopus Model and its Implementation*
  Alex Farkas and Alan Dearle
  
  581

*The Hypernode Meta-Model as a Basis for Software Process Modelling*
  Ray Offen
  
  591

*Methodology Modelling: Combining Software Processes with Software Products*
  Jun Han and Jim Welsh
  
  601
Session-10: 11:00 - 12:30

A Cost Analysis Model for Efficient Dynamic Parallel Execution of Functional Programs
Piyush Maheshwari 611

Derivation of Efficient Data Parallel Programs
Paul Roe 621

Dynamically Configurable Persistent Object Caches
A.L. Brown 629

Management of Complex Types
Robert M. Colomb 639

A Note on the Implementation and Applications of Linear Logic Programming Languages
J.A. Harland and D.J. Pym 647

An Information Measure for the String to String Correction Problem with Applications
L. Allison and C.S. Wallace 659

Rapid Replication Scheme Design with General Structured Voting
Oliver Theel 669

A generic tool for document review by distributed team work
Jim Welsh, David Spanevello and Yun Yang 679

Integrating Video and Large-Area Displays for Remote Collaboration
J.C. Mudge and N.W. Bergmann 689

Session-11: 13:30 - 15:00

Persistent Extension and Temporal Projection
Yan Zhang and Norman Y. Foo 701

Delivering the Benefits of Persistence to System Construction and Execution
A Network Formalism for Representing Hierarchical Beliefs
Boon Toh Low and Norman Y. Foo 721

Parallel Implementation of QRD Algorithms on the Fujitsu AP1000
B.B. Zhou and R.P. Brent 733

Heuristic Task Allocation and Scheduling for the Decoupled Parallel Processor DPP-OZ
Andreas Bieniek and A.B. Ruighaver 745

A Parallel Algorithm for the Most Vital Edge Problem on the CRCW-SIMID Computational Model
Francis Suraweera and Piyush Maheshwari 757

An Object-Oriented Approach to the Semantics of Programming Languages
Jin Song Dong, Roger Duke and Gordon Rose 767

An Approach to Constructing Verified Software
Keith Harwood, Peter Lindsay and Rex Matthews 777

An Object-Based Model for Persistent Programming Languages
Michael Hitchens and John Rosenberg 787
