Table of Contents

Preface

Symposium Steering Committee

Symposium Session Chairpersons

Author Index

Volume I

Session 1: Research in Mechanical Fragmentation

A New Conception of Clearance Ring Based on the Study of Inclined Pick Behavior
M. Kadiu, H. Sellami, and J. Demoulin

The Development and Testing of the Concave Bit
D. A. Larson, R. J. Morrell, J. F. Mades, and P. L. Ruzzi

Roadheaders and Continuous Miners Behavior Modelling with Regards to Inclined Pick - Evolution Towards Hard Rock Cutting
Ph. Cordelier and M. Kadiu

Prediction of Disc Cutter Performance Using Circular Rock Cutting Rig
K. Sato, F. M. Gong, and K. Itakura

The Use of Predictor Equations to Optimize the Performance of a Mobile Miner
G. L. Dollinger and J. G. Moore

Microwave-Assisted Rotary Dragbit Cutting in Hard Rock
D. P. Lindroth, R. J. Morrell, W. R. Berglund, and J. R. Blair

Session 2: Rock Characterization, Remote Sensing, & Interface Detection

Measurement of Uncut Coal Thickness with a Circular Microstrip Patch Antenna Sensor
L. G. Stolarczyk and D. C. Chang
Geophysical Borehole Logging Applied to Mine Planning in Swedish Mines
S. Wanstedt and N. O. Sundin

Probing Ahead of TBMs by Geophysical Means
G. Nord, P. Olsson and T. L. By

Imaging of Subsurface Geologic Structure with Radio Waves
L. G. Stolarczyk and N. I. Middleton

Directed S-Waves for Remote Sensing in Front of a Mechanical Excavator
J. M. Descour and L. Ozdemir

Session 3: Monitoring, Data Transmission, and Communications

Mine-Wide Information System Development at INCO Limited
G. R. Baiden and M. Scoble

The Monitoring System of Computer Applied to Coal Mining
S. Y. Jin and T. J. Sheng

Development of an Intrinsic Safety Unitized Process Computer with an Optical Fiber Bus
P. Diedrich

Advances in Underground Mine Communications Systems
J. Hackwood

Transmission of Medium Frequency Radio Signals in Machine Automation Projects
L. G. Stolarczyk and K. A. Smoker

Session 4: Tunnel Boring Machines

Compact Underground Borer (CUB)
M. Lewis

Internal Water-Cooling of Cutters: The Future?
S. Hartwig

Rock Characterization for Selection of a TBM for a Railway Tunnel Near Genova, Italy
A. Eusbio, P. Grasso, A. Mahtab, and N. Innuarato

Computerized Monitoring Program for Production Evaluation of TBM Excavation Activities
A. J. Hulshizer
<table>
<thead>
<tr>
<th>Session 5: Minewide Monitoring &amp; Expert Systems for Ground Control</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Critical Evaluation of Coal Mine Ground Control Expert Systems</td>
</tr>
<tr>
<td><strong>H. N. Maleki</strong></td>
</tr>
<tr>
<td>An Intelligent Ground Monitoring System</td>
</tr>
<tr>
<td><strong>E. M. De Souza</strong></td>
</tr>
<tr>
<td>In-Mine Microseismic Monitoring for Improved Coal Mine Bump Control</td>
</tr>
<tr>
<td><strong>P. E. Wilson and M. J. DeMarco</strong></td>
</tr>
<tr>
<td>Ground Control Management System for High Speed Longwall Mining</td>
</tr>
<tr>
<td><strong>D. Conover and J. McDonnell</strong></td>
</tr>
<tr>
<td>Monitoring and Process Simulation of Shaft Construction and Operation</td>
</tr>
<tr>
<td><strong>M. J. Beus, M. M. McDonald, and T. J. Orr</strong></td>
</tr>
<tr>
<td>The Computer Controlled Multi-Parameters of Mining Pressure Monitoring and Data Processing Unit</td>
</tr>
<tr>
<td><strong>S. Y. Jin and X. L. Sheng</strong></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Session 6: Machine Guidance I</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Simple Robust Vision System for Underground Vehicle Guidance</td>
</tr>
<tr>
<td><strong>M. St-Amant, Y. Laperriere, R. Hurteau, and G. Chevrette</strong></td>
</tr>
<tr>
<td>Optically Guided LHD: A Demonstration Prototype</td>
</tr>
<tr>
<td><strong>R. Hurteau, M. St-Amant, Y. Laperriere, G. Chevrette, and A. Piche</strong></td>
</tr>
<tr>
<td>Application of Remote-Controlled/Automatic Load-Haul-Dump System in Zinkgruvan, Sweden</td>
</tr>
<tr>
<td><strong>N. Vagenas, H. Sjoberg, S. Wikstrom</strong></td>
</tr>
<tr>
<td>Ultrasonic Rangers for Underground Mine Equipment Navigation</td>
</tr>
<tr>
<td><strong>R. H. King, P. J. A. Lever, W. Strickland, and J. D. Lane</strong></td>
</tr>
<tr>
<td>Ultrasonic Guidance and Remote Control of a Compact Loader/Trammer</td>
</tr>
<tr>
<td><strong>T. M. Ruff</strong></td>
</tr>
<tr>
<td>Modeling and Sensor-Based Control of an Autonomous Mining Machine</td>
</tr>
<tr>
<td><strong>J. P. H. Steele, R. H. King, and W. Strickland</strong></td>
</tr>
</tbody>
</table>
Session 7: Shaft and Raise Boring

A Methods Study for Large Diameter Mechanical Shaft Construction
*J. E. Friant and L. Ozdemir*

Design Concepts for a Partial-Face Shaft Boring Machine
*L. Snyder*

Shaft Drilling: Applications - State of the Art - Future Directions
*E. P. Worden*

Remote Controlled Mining of a Radioactive Ore Body Using an Up/Down Blindhole Borer
*L. Anderson, R. Foulk, and T. Tower*

A Novel Approach to Raise Development at MolyCorp
*J. P. Hedlund and S. Blattner*

Session 8: Automation of Drilling Equipment

Dynamic Modelling of Impact Energy Generation and Propagation in Percussive Drills
*D. Jiao*

Thrust--A Key Parameter in Automatic Control of Percussive Rock Drilling
*W. Changming and T. Sinkala*

Development of Continuous Directional Surveying Tool for Horizontal Long-Hole Using Three Components Optical Fiber Gyroscopes
*G. Deguchi, S. Matsunaga, K. Takahashi, and H. Nakai*

Automatic Drilling of Long Blastholes for Sublevel Stopping with Simba 269 in the LKAB Kiruna Mine
*H. Hamrin*

Atlas Copco Computer Robot Boomer Concept
*S. Lundbrink*
