Proceedings of the Third Thematic Conference on Remote Sensing for Marine and Coastal Environments

Technology and Applications

Volume II

18-20 September 1995
Seattle, Washington, USA

Sponsored by the Marine Spill Response Corporation, the National Oceanic and Atmospheric Administration/ National Environmental Satellite, Data, and Information Service (NOAA/NESDIS), and the Environmental Research Institute of Michigan.
Intertidal Habitat Mapping in British Columbia Using an Airborne Imaging Spectrometer

W. MacLeod, J.A. Aitken, and G.A. Borstad .................................................. I-687

Eelgrass Mapping in San Diego Bay Using Side Scan Sonar, Submerged Video and a Global Positioning System

M. Perdue ............................................................................................................ I-692

Subtidal Eelgrass Surveys in Puget Sound Basin: A Videographic Approach

Remote Sensing Technology for Studying and Mapping of Coastline Ecosystems in the North and North-East of Caspian Sea

Y. Plotnikov ......................................................................................................... I-695

GIS Analysis of Kelp Canopy Remote Sensing Data

L. Deysher, R. Ayers, R. Grove, and A. Jahn ...................................................... I-700

Author Index ........................................................................................................ I-709

VOLUME II

Interactive Poster Session E: Optical Sensing of Water Properties

Assessment of Water Quality and Siltation Studies in Pulicat Lagoon, Southeast India Using Remote Sensing

R. Krishnamoorthy, S. Sundaramoorthy, and S. Ramachandran ...................... II-1

Remote Sensing of Algal Blooms Using Multispectral Video: The Importance of Space and Time Scales to Ground Truthing the Interpretation of Images

P. Jemakoff, P. Hick, C. Ong, W. Hosja, and S. Grigo .................................. II-13

Development of Library Spectra of Optical Water Quality Parameters in Nearshore Waters

S. Bagheri, C. Zetlin, and H. Opyrchal ........................................................... II-25

Airborne Spectral Filtered Images Used in the Water Environment

J.M. Anderson, J. Monk, and X. Sun ................................................................. II-31

Remote Sensing Reflectance Model of Optically Active Constituents of Turbid Coastal Waters

T. Kutser, H. Arst, and S. Mäekivi .................................................................. II-36

Revealing of Spatial-Temporal Ecological Structure of the Bay of Biscay Epipelagial Using Remote Satellite Sensing Data

G.E. Mikhailovsky .............................................................................................. II-45

Interpretation Potential of Marine Environments Multispectral Imagery

H. Krawczyk, A. Neumann, and T. Walzel ...................................................... II-57

Phytoplankton Pigment Distribution in Indian Waters and Its Role in Modulating the Internal Wave Signatures in the Andaman Sea: A Study Using IRS LISS I

N. Chaturvedi, A. Narayana, and A. Narain .................................................... II-188

Estimating Suspended Matter Concentrations From SPOT Data and From Field Measurements in the Rhone River Plume

S. Ouillon, P. Forget, J.M. Froidefond, and J.J. Naudin ..................................... II-200

J.G. Acker and C.W. Brown .................................................................................. II-223

Modeling and Mapping Water Quality in Barnegat Bay, NJ Using Landsat-TM

J. Schooley ........................................................................................................... II-235

Interactive Poster Session F: Coastal Modeling and Fisheries Management

A Geographic Information Systems Approach for Assessing the Impacts of Fluctuating Great Lakes Water Levels

L.M. Jipping, W.J. Kempisty, G.W. Thompson, and C.L. Thompson ............... II-247

Investigations of Marine Environment in the Interests of Fisheries by Means of Air Surveys

V.B. Zabavnikov and V.I. Chernook .................................................................. II-259

Creation of a 4-D GIS Working Platform for Coastal Environmental Monitoring and Management

T. Cheng, M.A. Eleveld, and R.A. van Zuidam .............................................. II-260

Remotely Sensed Data as Applied in the Coastal Water Predictive Visibility Model

J.C. Talcott ....................................................................................................... II-273

Fish Habitat Change Detection Using High Resolution Airborne Optical Imagery, Peace River, Alberta, Canada

G.A. Farrington and R.F. Courtney .................................................................. II-287

Integration of Satellite Image-Derived Data Fields Into a Three-Dimensional Circulation Model Within the SEACAST System

S.E. Tinis and J.A. Stronach ............................................................................. II-297
Affordable Solutions for Analyzing Coastal Processes Using Remotely Sensed Data
R.L. Miller, J. DeCampo, T. Leming, and K. Hughes ......................................... II-308

Seasonal Trends in the Fishery Resources Off Gujarat: Salient Observation Using NOAA AVHRR
H.U. Solanki, M. Raman, B. Kumari, R.M. Dwivedi, and A. Narain .................... II-315

Remote Sensing Applied in the Ecological Zonification of the Tourist Corridor Cancun-Tulum, Mexican Caribbean
D. Zárate Lomelín, C. Santisbon Montes de Oca, M. Roberts, A. Yáñez-Arancibia, and J.L. Rojas Galavíz .......................................................... II-324

Remote Sensing/Geographic Information System Integration for Coastal Zone Management: Coastal Andhra Pradesh, India
G. Sridevi and P.V. Rajendra Prasad ................................................................. II-332

Shellfish Habitat Classification From Bottom Classification Trials
B. Prager and K. Halcro .......................................................... II-339

Interactive Poster Session G: Coastal Monitoring and Processes
Sedimentational Dynamics and Aquatic Environment of Backwaters of Tamil Nadu Coast, India—An Appraisal Through Remote Sensing
Sm. Ramasamy .......................................................... II-340

Coastal Erosion and Landslide Mapping of Lincoln County, Oregon
G.R. Priest .......................................................... II-341

Numerical Simulation of Matter Transport in Meso-Scale Oceanic Fronts of River Discharge Type
K.A. Korotenko .......................................................... II-352

Remote Sensing for Coast Line Erosion Impact Assessment Along Visakhapatnam, India
K.V.V.S. Ramesh, J. Syam Kumar, and K.K.V.S. Raju .................................. II-364

Identification of the Cause of Coastal Erosion at Digha, India by Remote Sensing
S. Chatterjee and B.N. Ghosh .......................................................... II-370

Sea Surface Thermal Plumes and Gradients From a Coastal Power Plant
U. Poli, M. Ippoliti, S. Massari, A. Marino, G. Forti, and A. Sticchi ................. II-382

Impacts of Coastal Protection Measures Along Part of the North Kent Coast
A.R.P. Cosgrove and R.J. Pole .......................................................... II-386

Shoreline Changes in the Turks and Caicos Islands, British West Indies
R.J. Pole and A.R.P. Cosgrove .......................................................... II-394

xxi
Surface Water Runoff, Sediment and Nutrient Loading in Coastal South Carolina: A Comparison of an Undeveloped and Urbanized Watershed
C.W. Corbett, D.E. Porter, and D.A. Karinshak ........................................ II-400

A Coastal Information System for the Atlantic Provinces of Canada
A.G. Sherin and K.A. Edwardson ............................................................. II-401

Development of Monitoring Coastal Environment in Situbondo Coast, East Java Island
A. Karsidi, N. Hendiarti, and H. Sadmono ............................................ II-414

Operational Uses of Remote Sensing Data to Support Coastal and Offshore Activities
G.H.F.M. Hesselmans and G.J. Wensink ............................................... II-423

Integrating Remote Sensing and Geochemical Techniques to Analyze Sediment Dynamics in Shallow Estuaries and Bays
J.G. Booth, B.A. McKee, and R.L. Miller ............................................... II-430

Interpretation of Complex IR, SAR and In-Situ Measurements for Coastal Processes in Russian Large Lakes
M.A. Naumenko and S.G. Karetnikov .................................................... II-431

Transport Processes in the Kara Sea
B. Anselme and J. Kegeler ................................................................. II-441

Morphodynamic History of the Mad River Delta & a 21-Year Estuarine Sediment Budget, Mad River, Northwest California
M.J. Scalici ......................................................................................... II-453

Sediment and Carbon Movement in Tidal Marshes, Barataria Bay, Louisiana
R.J. Rovansek, J.F. Cruise, L.J. Rouse, and D.L. Muirhead ..................... II-455

Interactive Poster Session H: Land Cover and Wetlands Inventory

Preliminary Results and Analysis of C-CAP Mapping Protocols on Eastern Long Island, New York, Wetlands
T. Buckley, F.M. Henderson, and T.F. Hart, Jr. ...................................... II-460

Application of Multitemporal Thematic Mapper Data to Change Detection Analysis of Texas Coastal Land Cover
W. Pulich, Jr. and J. Hinson ................................................................. II-469

Monitoring Tidal Marshes of Florida’s Big Bend
E.A. Raabe and R.P. Stumpf ................................................................. II-483

Comparison of Remote Sensing Platforms for Mapping Wetland Vegetation Within a Localized Coastal Estuary
D.A. Karinshak, D.E. Porter, and C.W. Corbett ..................................... II-495

xxii
Use of the Tools of Geographic Information Processing to Compare the Rate of Wetlands Alterations in an Undeveloped and a Managed Coastal Estuary  
*D.E. Porter, D.J. Cowen, D.A. Karinshak, and C.W. Corbett* ......................... II-496

Digital Aerial Photography Applied to Wetlands Restoration  
*H.M. Monday and A. Brewster* ............................................................... II-508

Monitoring Land Cover/Habitat Changes Along the Georgia Coast Using Remote Sensing and GIS  
*R. Welch, M. Remillard, J. Alberts, and A. Chalmers* ............................. II-512

Applied Remote Sensing/Geographic Information System Techniques for Land/Sea Interface Data Management and Exploration  
*A.S. Massasati* .......................................................... II-513

Study on Soil Classification and Humid State of Soil in Fukang Region (Xinjiang, China) Using Landsat TM Data  
*X. Jiang, M. Han, and T. Vogt* ........................................ II-518

Use of GIS Tools With Laser Level Surveys to Validate a Vegetation/Elevation Model  
*R.H. Day, J.M. Biagas, and T.W. Doyle* ................................ II-525

Developing a Model for Determining Coastal Marsh "Health"  
*M.S. Kearney, A.S. Rogers, J.T. Townshend, W.L. Lawrence, K. Dorn, K. Eldred, D. Stutzer, F. Lindsay, and E. Rizzo* ................. II-527

**Interactive Poster Session I: Mapping and Charting**

The Chinook Trough: A Trans-Pacific Fracture Zone  
*N.C. Smoot* .......................................................... II-539

Mapping and Charting Marine and Coastal Environments With Color-Infrared Photography  
*D.L. Light* ............................................................. II-551

Spectral Mixture Analysis of Coral Reef Abundance From Satellite Imagery and *In Situ* Ocean Spectra, Savusavu Bay, Fiji  
*D.R. Peddle, E.F. LeDrew, and H.M. Holden* ................................ II-563

Acoustic Geomorphology of the Makran Margin: Northern Gulf of Oman Basin  
*J.E. Cotten, Jr., B.A. Leybourne, A.L. Lowrie, and E. Villalobos* ............. II-576

Geomorphology and Surface Acoustic Characteristics of the South Adriatic Basin: Evidence for Rotation and Subsidence  
*B.A. Leybourne, E.L. Villalobos, A. Lowrie, and J.E. Cotten, Jr.* ............. II-588
Locating Abandoned Vessels in the Louisiana Coastal Zone
   D.E. Ahl and B.A. Davis ................................................................. II-599

The Influence of Turbidity on Surface-Wave-Induced Modulations of Lidar Images
   M.J. DeWeert .................................................................................. II-605

Fathom: Shallow Water Monitoring System
   M.W. Brennan and M.E. Lewis .......................................................... II-606

Use of Landsat TM Data for Revision of Marine Charts in the Canadian Arctic
   J.F.R. Gower, M.V. Woods, and G.F. Tomlins .................................... II-617

Development of Northeastern Brazil Via Remote Sensing
   K.A. Ulbricht, H.S. Teotia, D.L. Civco, and W.D. Heckendorff ............. II-628

Filter Selection and Digital Processing Methods for Synthetic Aperture Radar (SAR) for Use in General Coastal Land Cover Mapping
   M.C.D. Garcia ................................................................................. II-629

A Complex Approach to Quantitative Interpretation of Spectral High Resolution Imagery
   A. Neumann, H. Krawczyk, and T. Walzel ......................................... II-641

An Enhancement Technique to Remove the Effects of Path Radiance and Sunglint in Low Energy Scenes
   K.O. Niemann and R.J. Sykes ........................................................... II-653

   G.D. Kelly, G.J.E. Hill, S.R. Phinn, and B. Kent .................................. II-663

Low Pass Filtering of AEM Fields by MIM Impulse Functions
   C.J. Bergeron, Jr., N. Yi, J.W. loup, and G.E. loup ............................ II-675

Oceanographic Visualization Interactive Research Tool (OVIRT)
   J.A. Lever, R.J. Moorhead II, and B. Hamann .................................... II-687

The Texas Wetland Information Network: An Internet-Based Network to Facilitate the Acquisition, Use, and Exchange of Wetlands Information
   S.B. Friedman .................................................................................. II-688

Linear Feature Detection From Aerial Imagery
   A. Forghani ..................................................................................... II-689

Review of Aerial Video Imagery (AVI) Applications and Development of AVI Standards for the Province of British Columbia
   J.R. Harper and P.D. Reimer ............................................................ II-700

Remote Sensing Supported Analysis of Soil Salinity in Langkawi Island, Malaysia
   K. Jusoff, M.K. Yusoff, and W.N.A. Sulaiman .................................... II-710
Interactive Image Processing Using Algorithms
   J. McCarthy ........................................................................................................ II-720

Marine Habitat Mapping Using Data From the Geoscan Airborne Multi-Spectral Scanner
   C. Ong, J. Burt, P. Hick, and A. Wyllie ................................................................. II-728

Airborne Multisensor Pod System (AMPS) Coastal Data Availability
From the Duck '94 and CoOp Experiments
   C.B. Freise ............................................................................................................. II-740

Technological Advances in Mapping the Florida Keys Marine Sanctuary
   D.R. Miller ............................................................................................................. II-742

Interactive Poster Session J: New Sensors and Systems

Selective Resonance Excitation in Remote Laser Spark Spectroscopy
   D.Yu. Tsipenyuk and M.A. Davydov .................................................................... II-743

Remote Sensing of Sediment Quality: The REMOTS® UV Imaging Spectrometer
   D.C. Rhoads and J. Lunz ...................................................................................... II-745

Remote Sensing Researches of Polar Regions Using Aircraft-Laboratory IL-18 D "Pomor"
   V.I. Chernook and V.B. Zabavnikov .................................................................... II-746

Developing Operational Ship Surveillance Using RADARSAT
   G.C. Staples, D. Martenson, and D. Nazarenko ...................................................... II-749

Remote Sensing of Coastal Sea Areas from a Sea-Shore Lidar Station
   V.V. Fadeev, S.M. Glushkov, D.V. Klimov, P.I. Kurilov, and A.V. Smetanin .......... II-761

Littoral Remote Sensing Simulator: A General Model Integration Platform
   K. Schmitt and B. MacRitchie .............................................................................. II-773

Interferometric Synthetic Aperture Radar (IFSAR) for Fast, Accurate Digital Elevation Mapping
   D.J. Chadwick, R.L. Bolus, and H.L. McKim ......................................................... II-783

High Resolution Multi-Spectral Bottom Imaging Using a Semi-Submersible Vessel
   J.H.J. Leach .......................................................................................................... II-791

Using Low-Cost Coastal Information Systems in Management:
A Case Study of Shore Protection Structure Monitoring in Oregon
   H.D. Berry ............................................................................................................ II-800

Enhancement of JERS-1/SAR Imagery
   M. Mori, N. Yamamoto, and T. Yokoyama ........................................................... II-801
Color Imagery Section

Coastal Runoff and Plumes in the Mediterranean Sea From the Historical CZCS Archive
   V. Barale and D. Larkin .......................................................... II-809

Airborne LIDAR Measurements of Phytoplankton Abundance and Productivity in New England Coastal Waters

Imaging Spectrometer Detects and Measures the Surface Area of Pacific Herring Schools in the Bering Sea
   F.C. Funk, G.A. Borstad, and S.A. Akenhead ..................................... II-833

Plume Delineation of an Estuarine Pulp and Paper Mill Outfall Using Airborne Multispectral Imagery and Rhodamine Dye
   G.A. Borstad, M.A. Zacharias, and R. Kerr ........................................ II-845

Operational Detection of WAM Wave-Height Error Using Satellite Altimetry in a GIS Structure
   J.A. Nghiem, P.D. Farrar, D. Hasenkampf, and J.P. Blaha ........................ II-859

Author Index ....................................................................................... II-869
