CONTENTS

SPE 26121 Settling Velocity of Irregularly Shaped Particles ........................................ 9
Sze-Foo Chien, Texaco Inc.

SPE 28293 Critical Technologies for Success in Extended Reach Drilling .................... 23
M.L. Payne, ARCO British Ltd.; D.A. Cocking, BP Exploration; and A.J. Hatch,
Anadra/Schulmberger

SPE 28294 Extending Barriers To Develop a Marginal Satellite Field From an Existing
Platform ....................................................................................................................... 39
Trond Justad, B.G. Jacobsen, and Harald Bliakra, Statoil A/S, and G.J. Gaskin,
Clifford Clarke, and Alexander Ritchie, Halliburton Energy Services

SPE 28297 The Application of Petrophysical Data To Improve Pore and Fracture Pressure
Determination in North Sea Central Graben HPHT Wells ....................................... 53
C.D. Ward, Sperry-Sun Drilling Services; Keith Coghill, BP Norge U.A.; and M.D. Broussard,
Amoco Production Co.

SPE 28298 Quantifying Stuck Pipe Risks in Gulf of Mexico Oil and Gas Drilling .......... 69
A.P. Wisnie, Conoco Inc., and Zhiwei Zhu, U. of Southwestern Louisiana

SPE 28299 A Major Step in Ultra Slim-Hole Drilling .................................................. 81
A.M. Sagot, Elf Aquitaine Production, and D.C. Dupuis, Forasol S.A.

SPE 28300 Hydrid Coiled Tubing/Snubbing Drilling and Completion System ............... 91
K.R. Newman, Drexel Oilfield Services Inc., and D.M. Doremus, Schlumberger Dowell

SPE 28303 Implementing Residual Bend in a Tubing Forces Model ............................. 97
Kenneth Bhalia, Schlumberger Dowell

SPE 28304 Practical Pressure Loss Predictions in Realistic Annular Geometries .......... 113
Mustafa Haciislamoglu and Ulysse Cartalos, Inst. Français du Pétrole

SPE 28305 Chrome-Free Lignosulfonate Muds: Zirconium Additives Provide Extended
High Temperature Performance ..................................................................................... 127
Fausto Miano, Stefano Carmwati, and T.P. Lockhart, Eniricerche SpA, and
Giovanni Burrafato, AGIP SpA

SPE 28306 A Mechanistic Model for Cuttings Transport ............................................. 139

SPE 28308 Unique Hole Cleaning Capabilities of Ester-Based Drilling Fluid System .... 155
Patrick Kenny, Statoil A/S; Terry Hemphill, Baroid Drilling Fluids Inc.; and Graham Bell,
Baroid Drilling Fluids Ltd.

SPE 29309 Critical Parameters in Modelling the Chemical Aspects of Borehole Stability in
Shales and in Designing Improved Water-Based Shale Drilling Fluids ...................... 171
Eric van Oort, Koninklijke/Shell E&P Laboratorium; A.H. Hale, Shell Development Co.;
F.K. Mody, Baroid Drilling Fluids Inc.; and Sanjit Roy, U. of Notre Dame

SPE 28310 Real-Time Job Monitoring and Performance Control of Primary Cementing
Operations as a Way to Total Quality Management (TQM) ....................................... 187
H.F. Spoerker, Nabors Drilling INTL Ltd.

SPE 28312 The Development of a Fracture-Resistant PDC Cutting Element ................. 197
C.H. Cooley and Nigel Meany, Hughes Christensen

SPE 28313 Bit Wobble: A Kinetic Interpretation of PDC Bit Failure .......................... 213
Boyun Guo and Geir Hareland, New Mexico Inst. of Mining & Technology

SPE 28314 Dynamic Analysis Reveals Stability of Roller Cone Rock Bits ................. 227
J.V. Kenner and M.R. Isbell, Hughes Christensen

SPE 28315 A Methodology Using Laboratory Experiments and Numerical Modeling To
Optimize Roller Cone Bits Hydraulics ......................................................................... 237
Isabelle King, Inst. Français du Pétrole; M.R. Wells, Amoco Production Research;
R.C. Pessier, Hughes Christensen; and Alain Besson, TOTAL

SPE 28317 Acoustic Gas Kick Detection With Wellhead Sonar ................................... 249
Jon Bang, Svein Mjaaland, and Arne Solstad, IKU Petroleum Research; Peter Hendriks,
Shell Research; and L.K. Jensen, Statoil A/S
SPE 28318 Near-Bit Propagation Resistivity for Reservoir Navigation ............... 263
W.H. Meyer, Jian-Qun Wu, D.T. Macune, and P.R. Harvey, Baker Hughes INTEQ

SPE 28319 A Magnetostatic Well Tracking Technique for Drilling of Horizontal Parallel Wells .................................................. 277
C.K. Pratt, Shell Canada Ltd., and R.A. Hartmann, Koninklijke/Shell E&P Laboratorium

SPE 28320 Nitrogen Drilling System for Gas Drilling Applications .................. 291
P.D. Allan, Meridian Oil Inc.

SPE 28321 Quality Management Alliance Eliminates Plug Failures ................. 297
J.F. Heathman, Halliburton Energy Services; R.B. Carpenter, ARCO E&P Technology; Ken Marcel, Halliburton Energy Services; C.J. Rimer, Vastar Resources Inc.; and A.M. Badalamenti, Halliburton Energy Services

SPE 28322 Different Shales Dictate Fundamentally Different Strategies in Hydraulics, Bit Selection, and Operating Practices .......................... 307
R.C. Pessier, Hughes Christensen; M.J. Fear, BP Exploration Co. (Colombia) Ltd.; and M.R. Wells, Amoco Production Research

SPE 28323 Experimental Evaluations of Drill Bit and Drillstring Dynamics ........ 319
M.W. Dykstra, Amoco Production Co.; D.C-K. Chen, Sperry-Sun Drilling Services; T.M. Warren, Amoco Production Co.; and S.A. Zannoni, Sperry-Sun Drilling Services

SPE 28324 Application of High Sampling Rate Downhole Measurements for Analysis and Cure of Stick-Slip in Drilling ............................. 335
D.R. Pavone, Inst. Francais du Pétrole, and J.P. Desplains, Adersa

SPE 28325 Slim-Hole Vibration Case Study ........................................... 347
P.J. Murray, BP Exploration Venezuela Ltd.; J.E.E. Kingman, Consultant to Baker Hughes INTEQ; R.L. Huddy, Drilling Applications CC; and J.G. Leon, Maraven S.A.

SPE 28326 Field Measurements of Casing Tension Forces ............................. 357
M.S. Quigley and D.B. Lewis, Mobil E&P Technical Center, and R.S. Boswell, Stress Engineering Services

SPE 28327 A New Formula for Elasto-Plastic Collapse Strength of Thick-Walled Casing ................................. 365
Yukihisa Kuriyama and Toshitaro Mimaki, Nippon Steel Corp.

SPE 28328 An Integrated Deterministic/Probabilistic Approach to Reserve Estimations .... 373
J.A. Patricelli, Mobil, New Business Development Group, and C.L. McMichael, Mobil E&P Technical Center

SPE 28330 Quantification of Production Prediction Uncertainty and It’s Impact on the Management of Oil and Gas Price Risk ............................. 383
R.A. Edwards and T.A. Hewett, Stanford U.

SPE 28333 Probability Ranges for Reserve Estimates From Decline Curve Analysis .... 399
C.H. Huffman and R.S. Thompson, Colorado School of Mines

SPE 28334 Innovative Approach to CO2 Project Development Holds Promise for Improving CO2 Flood Economics in Smaller Fields Nearing Abandonment ............ 409

SPE 28337 Designing Efficient Well Abandonment Procedures in the OCS-Gulf of Mexico To Include the Permanent Disposal of NORM Waste .......................... 419

SPE 28338 New Approaches to Safety on Alaska’s North Slope Successfully Reduce Accident Rates ......................................................... 429
A.E. Copoulos, Meyer Herndon, and P.D. Manchester, Atlas Wireline Services; Al Schmoyer and J.L. Welch, B.P. Exploration (Alaska) Inc.; and Phil Stoehr, Atlas Wireline Services

SPE 28340 Systematic Steps to Operational Control: The Multi-Functional Potentials of Safe Job Analysis in Internal Control Regimes Reconsidered ......................... 435
Gunnar Sunde and L.B. Andersen, Rogaland Research

SPE 28341 Management of a Declining Field ............................................ 441
Behrooz Fattahi and P.J. Okita, Shell Western E&P Inc.

SPE 28342 A CPI Process Review of the AFE Decision Making Process ................ 455
D.A. Pieters, Shell Western E&P Inc.
SPE 28343 Reservoir Optimization in the Nineties: Is Your Company Doing an Effective Job? .............................................................. 467
T.A. Beatty, G.R. Karlen, K.R. Brown, A.L. Van’t Bosch, Neal Grant, Dan Burkett, and Tim Kissinger, PanCanadian Petroleum Ltd.

SPE 28344 Reform and Privatization in the Hydrocarbon Sector ......................... 477
Chakib Khelil, World Bank

SPE 28345 A Comparative Analysis of Production-Sharing Contracts and Economic Risk Using a Weighted Criteria Decision Analysis Method .................................. 483
D.R. Hallermann, Colorado School of Mines

SPE 28347 Fate of Waste Petroleum Refinery Sludge After Deep Well Injection ........ 491
R.J. Charbeneau and Joanna Ogintz, U. of Texas, and W.G. Aubert, ARCO E&P Technology

SPE 28348 An Area of Review Variance Methodology ........................................ 499

SPE 28349 Issues and Techniques Plugging and Abandonment of Oil and Gas Wells ...... 507
D.G. Calvert, Mobil E&P Technical Center, and D.K. Smith, Halliburton Energy Services (retired)

SPE 28350 Field Validation of the Offshore Operators Committee (OOC) Produced Water Discharge Model .......................................................... 519

SPE 28351 In-Situ Bioventing for Environmental Remediation of a Natural Gas Dehydrator Site: A Field Demonstration ................................................... 531

SPE 28364 Engineering Salary Trends in the United States Petroleum Industry ........ 547
K.C. Seanard, Fina Oil & Chemical Co.; T.A. Leach, Parker & Parsley Petroleum Co.; and S.M. Frailey, Texas Tech U.

SPE 28464 An Integrated Technology Approach Yields 101 MMCFPD in the Eugene Island 295 “B” Horizontal Well Project ...................................................... 557
Tom Schroeder and D.E. Mathis, Baker Hughes INTEQ, and Ron Howard, G.N. Williams, and J.A. Sun, Pogo Producing Co.

SPE Paper Evaluation Form .......................................................................................... 559
No manuscript was received for the following:

SPE 28328  BHA Design and Steerability Optimization for Extended Reach Drilling
    M.M. Agawani, U. of New South Wales; E.E. Maidla, Unicamp/U. of New South Wales; and
    S.S. Rahman, U. of New South Wales

SPE 28331  Approaches to Oil Price Forecasts

SPE 28332  Guidelines for Estimation of Oil and Gas Reserves

SPE 28336  Non-Oilfield Technology Applied to Oilfield NORM Clean Ups
    A.J. Gross, Consultant

SPE 28353  Rediscovery, Renovation, and Reconciliation: The Use and Abuse of
    Professionalism
    J.E. Warren, Director, Frontier Resources Intl. Inc.

SPE 28354  Integrated Services and Strategic Alliances: Are They For Me?
    Mike Vinson, Vice President, Integrated Services, North America, Schlumberger Oilfield Services

SPE 28355  Industry Alliances: Perspectives of an Operating Company
    Barry K. Irani, Vice President of Production & Engineering, Enserch Exploration Inc.

SPE 28356  Looking for the Good: Perspectives of a Consultant
    Richard Strickland, President, Cawley, Gillespie & Assocs.

SPE 28357  Outsourcing: Perspectives of an Operating Company
    John Mihm, Senior Vice President, Phillips Petroleum Co.

SPE 28358  Why Teams?
    Peter Hagist, Pennzoil Exploration & Production Co.

SPE 28359  New Professional in Tomorrow’s Organization
    Bruce Bernard, Vice President, Exploration & Production Technology, Shell Oil Co.

SPE 28360  Enhance Your Career Value: What To Do Now
    Rex Olsen, President, Executive Horizons Inc., Corp. Secretary, The Lincolnshire Co. Inc.

SPE 28361  A Comprehensive Technology Paradigm for the Oil and Gas Industry, the
    University, and the Engineer and Scientist
    Keith Millheim, Research Consultant, Amoco Production Co.

SPE 28362  Career Management: An International Perspective
    Pierre Bismuth, Schlumberger Ltd., and J.M. Kent, Schlumberger-Doll Research

SPE 28363  U.S. Petroleum Engineering Manpower Supply and Demand
    Steven Moriss, Assistant Professor, U. of Texas

SPE 28463  A Case Study of Horizontal Drilling Utilizing Near-Bit Measurements
    E. Stockhausen, Chevron USA Inc.; D. Hill, Schlumberger; and D. Frazier,
    Anadrill/Schlumberger
