TABLE OF CONTENTS

Symposia 1
National Symposium Registration of Geologists
Chairperson
C. C. Mathewson, Texas A & M University
Manager, AEG Committee on Professional Registration for Geologists

Registration Efforts Since CoPGO*
C. C. Mathewson, Texas A & M University

State Geologists and Registration*
J. H. Williams, Association of American State Geologists

ASBOG Activities: Building Unity in Registration*

AGWSE Experiences & Thoughts on Registration/ Certification of Groundwater Geologist
J. Gibbs, Association of Groundwater Scientists and Engineers

ASCE Thoughts on Geologist Registration*

ASFE Thoughts on Geologist Registration*
J. Neyer, Association of Engineering Firms Practicing in Geoscience

The Wyoming Experience
G. B. Glass, Geological Survey of Wyoming

The Washington State Experience*
W. R. Cleverger, GeoEngineers, Inc., AEG Washington Section Chairperson

The Illinois Experience
W. Lang, Strata Power Company; P. DuMontello, Illinois State Geological Survey, AEG North Central Section

Session 1
Tunneling
Chairpersons:
S.B. Fradkin, STS Consultants, Ltd.
R. Ilsley, STS Consultants, Ltd.

Tunnel Explorations Aided by "OLD SAN JACK TUNNEL" Records............................................................... 15
G. D. Johnson, S. E. Wilkinson, Ebasco Services, Inc.

TARP - Twenty Years of Tunneling......................................................... 25

Remedial Work in Bored Chicago Rock Tunnels........................................... 34
P. H. M. Braam, Consulting Geologist

Impacts of Solution Features on Mining of the North Shore Tunnel in Milwaukee, Wisconsin............................. 38
E. S. Pennock, CH2M Hill; S. B. Fradkin, R. C. Ilsley, STS Consultants, Ltd.

Tunnel Boring at Juam Water Diversion Project, Korea......................... 48
G. G. Yoon, Korea Water Resources Corporation

* Paper not available at the time of printing.
Construction and Performance of a High Head Tunnel for the Bradley Lake Hydroelectric Project, Homer, Alaska
D. M. Jurich, J. K. Meisenheimer, Stone and Webster Engineering Corporation
Instrumentation Program to Determine Stresses in Steel Rib Supports in a Large-Diameter Rock Tunnel
S. B. Fradkin, V. E. Komurka, STS Consultants, Ltd.; J. Dunnicliff, Geotechnical Instrumentation Consultant
Concept of Flexible Liners in Small Diameter Tunnels
J. F. Zarawski, Down Engineering, Inc.

Session 2
(IDF/NDCA)
Equipment and Instrumentation Standards
Chairperson:
T.C. Ruda, Exploration Technology, Inc.

The Establishment of Standards for Drilling Tools
W. Svendsen, Longyear Company Inc.

How Contractors Use Equipment Standards in the Performance of Work
T. C. Ruda, Exploration Technology, Inc.

Hollow Stem Augers - Design Criteria Construction Methods and Size Selection
C. Riggs, Sverdrup, Inc.

Hollow Stem Auger Selection and Use by the Drilling Contractor (see page 1043 for complete paper)
C. Harris, Burlington Environmental, Inc.

Safety Practices for Drilling Equipment
R.C. Sutton, Mobile Drilling Company, Inc.

Session 3
Geotechnical Investigation Completeness/ M.S.E. Wall Foundation Considerations
Chairpersons:
E. A. Lamberson, The Reinforced Earth Company
A. Shakoor, Kent State University

Subsurface Investigation and Improvements for MSE Structures Constructed on Poor Foundation Soils
P. L. Anderson, The Reinforced Earth Company

Elements of Foundation Investigation Report and Design for Mechanically Stabilized Earth and Conventional Retaining Walls
C. H. Hurley, Claude H. Hurley Company

Reinforced Earth Wall Distress Caused by Embankment Failure - A Case Study
J. C. Schuh, Patrick Engineering, Inc.

THE ELECTRIC CONE PENETROMETER: Experience in Varied Geotechnical Conditions in Southern Illinois
V. A. Modeer, M. C. Lamie, L.D. Flowers, Illinois Department of Transportation

Foundation Corrections for MSE Walls
C. N. Laughter, B. J. Pfister, Wisconsin Department of Transportation

Stone Column and Wick Drain Foundation Improvement for M.S.E. Wall Construction

Costly Environmental & Geotechnical DSC Claims Resulting from Exploration Program and Reporting Inadequacies
S.W. Hunt, S. B. Fradkin, STS Consultants, Ltd.

Method of Multiple Working Hypotheses: A Chimera or a Necessity for Ethical Practice in Engineering Geosciences?
V. S. Cronin, University of Wisconsin at Milwaukee; J. E. Slosson, T. L. Slosson, Slosson and Associates

Session 4
(AUA)
Innovative Use and Construction In Underground Space
Chairperson:
J. D. Guertin Jr., GZA GeoEnvironmental, Inc.

Overview - Use of Underground Space
S.R. Nelson, American Underground-Space Association

Post Office Square Garage in Boston, Massachusetts
S. Barlow, J. F. White Contracting Company

Underpinning a Transit Station for the Central Artery Project
D. L. Druss, B. P. Kassap, Bechtel/Parsons Brinckerhoff

Underground Energy Storage - An Overview
P. A. Dickson, Harza Engineering Company

Energy Storage Utilizing an Existing Limestone Mine Cavity
D. C. Willett, Acres International Corporation

Commercial Use of Underground Space in Kansas City, Missouri
D. Woodward, Underground Developers Association

The Superconducting/Super Collider - A '90s Mega Project
J. H. Albino, Parsons, Brinckerhoff, Quade & Douglas

Session 5
Soil and Rock Behavior
Chairpersons:
T. Bushell, STS Consultants, Ltd.
J. R. Keaton, Sargent Hauskins & Beckwith

Flexural Behavior of Clay Admixtures
N. Lozana, N. B. Aughenbaugh, University of Mississippi

* Paper not available at the time of printing.
Factors Affecting the Drying Time Required for Determining Water Content of Soils by Microwave Method ................................................. 187
A. Shakoor, R. J. Onderko, Kent State University

An Empirical Relationship Between Los Angeles Abrasion Loss and Unconfined Compressive Strength for Carbonate Rocks ........................................... 188
C. Brown, A. Shakoor, Kent State University

A Mudrock Durability Classification Based on Lithologic Characteristics ........................................ 189
J. C. Dick, A. Shakoor, Kent State University

Responses of Soils to Coupled Mode of Motion ........................................ 197
K. S. Tawfiq, Florida State University

Modeling In-Situ Density Changes in Sand on Pile Driving ........................................ 205
T. J. Cheema, Kent State University

Mechanical Erosion by Offroad Motorcycles of Soils Derived from Sedimentary and Igneous Rock Units, Hollister Hills State Vehicular Recreation Area, Hollister, California ........................................ 216
J. E. McIvor, J. W. Williams, San Jose State University

Session 6
Geologic Investigation Case Histories
Chairpersons:
R. Sherman, Metcalf and Eddy
M. S. Coates, Patrick Engineering, Inc.

Monroe Street Hydroelectric Project in Spokane, Washington: Effect of Development on Foundation Conditions ........................................ 227
S. E. Wilkinson, G. D. Johnson, Ebasco Services, Inc.

Investigation of Geological Conditions for the Melamchi to Bagmati Tunnel, Greater Kathmandu Water Supply Project in Nepal *
J. A. Gough, G. Dongol, Snowy Mountains Engineering Corporation, Ltd.

Tarp Tunnel Explorations in the Des Plaines Disturbance, Illinois; Evidence Supporting an Impact Origin ........................................ 236
G. L. Peterson, Squier Associates, Inc.

Geotechnical and Hydrogeological Considerations for Use of Elmhurst Stone Quarry as a Flood Control Reservoir ........................................ 246
C. Zanbak, F. Okauz, W. Blied, Woodward-Clyde Consultants; D. P. Gupta, Black & Veatch

Statistical Evaluation of Common Geotechnical Parameters of Glacial Drift Units at Fermi National Accelerator Laboratory, Batavia, Illinois ........................................ 258
B. B. Curry, Illinois State Geological Survey

Geotechnical Investigations and Instrument Installation During Construction of a Highway Embankment on Weak Materials *
E. Rabbi, A. Morino, Geodata

Collapse Potential Evaluation of the Defined Study Area at the Weldon Spring Chemical Plant Site, Weldon Spring, Missouri ........................................ 259
M. R. Gunther, Missouri Department of Natural Resources

An Electromagnetic Terrain Conductivity Survey to Delineate Shallow Fractures in Karst Terrain ........................................ 271
M. D. Antonetti, D. A. Krysinski, SE Technologies, Inc.

* Paper not available at the time of printing.

Symposia 3
(AEG/ASTM)
Interpretation of Historical Maps & Aerial Photography for Environmental Property Assessments
Chairpersons:
C. Stohr, Illinois State Geological Survey
C. D. Elifrits, University of Missouri - Rolla

Introduction ........................................ 283
C. Stohr, Illinois State Geological Survey

Interpretation of Historical Maps and Aerial Photography ........................................ 285
D. Buisseret, The Newberry Library

The Illinois Sanborn Geographic Information System ........................................ 287
C. E. Cohen, Illinois State Museum

Use of Historical Aerial Photographs for Environmental Site Assessments ........................................ 296
K. Harrop-Williams, T. A. Krug, KCI Technologies

Environmental Property Assessments Utilizing Aerial Photography ........................................ 301
L. Mata, D. Fanelli, The Bionetics Corporation

Use of Aerial Photographs for Site Assessments
S. R. Shubat, C. Zanbak, Woodward-Clyde Consultants

Evaluation of the Pittsburgh Regional Industrial Park (Kansas) for Presence of Abandoned Coal Mines ........................................ 311
L. L. Brady, J. R. McCauley, Kansas Geological Survey, The University of Kansas

The Use of Aerial Photos and Maps to Assess the Impact of Abandoned Mining on an Urban Recreational Area ........................................ 319
J. Ovanic, Michigan Technological University

Application of Digital Satellite Data for Trafficability Site Assessments ........................................ 334
J. D. Lashlee, U.S. Army Engineer Waterways Experiment Station; J. D. Overton, Mid-America Remote Sensing Center, Murray State University

Identification, Selection, and Utilization of Historic Remote Sensor Data for Site Studies ........................................ 344
C. D. Elifrits, D. J. Burr, University of Missouri - Rolla

Session 7
Nuclear Waste Repository Siting
Chairpersons:
D. F. Fenster, Woodward-Clyde Federal Services
F. S. Kendorski, Dunn Geosciences Corporation.

Hydrogeology of a Proposed Low-Level Radioactive Waste Disposal Site Near Butte, Nebraska ........................................ 351
P. H. Rahn, A. D. Davis, South Dakota School of Mines & Technology

Low-Level Radioactive Waste Siting Methodology ........................................ 361
P. M. Hansen, P. G. Snider, Ebasco Services, Inc.

* Paper not available at the time of printing.

Groundwater Issues in Evaluating the Site for a Potential Nuclear Waste Repository at Yucca Mountain, Nevada .............................................. 377

Soil Cover Recommendations for UMTRA and LLW Disposal Sites ........................................... 384
R. D. Bennett, U.S. Army Engineer Waterways Experiment Station

Regional Screening and Selection of Candidate Sites for California's Low-Level Radioactive-Waste Disposal Facility ........................................... 395
W. G. Hamer, Radian Corporation

An Interpretation of Geologic Conditions at Richton Salt Dome for Possible Selection as a Nuclear Waste Repository Site ........................................... 403
S. M. George, Woodward-Clyde Consultants

The Role of Geological Site Characterization in Reducing Uncertainty for Siting a High-Level Radioactive Waste Repository ........................................... 409

Session 8
(AEG/NDCA)

Environmental Investigative Techniques
Chairpersons:
T. C. Ruda, Exploration Technology, Inc.
R. G. Berggreen, STS Consultants, Ltd.

Comparison of Different Geophysical Methods in the Detection of Bedrock Depths and Aquifer Thickness ........................................... 419
D. F. Palmer, Kent State University

Installation and Operation of a Temporary Groundwater Pump and Treatment System ........................................... 420
D. S. Green, Griffin Remediation Services, Inc.

Deep Pilot Borehole in Long Island, New York ........................................... 422
J. A. Singer, YEC, Inc.

Hollow Stem Augers Drilling: Problems to Solve ........................................... 428
M. Prucher, WTD Environmental Drilling, Inc.

Geophysical Identification of Leachate Levels and Refuse Characterization in a Landfill at Argonne National Laboratory, Illinois ........................................... 431
P. J. Carpenter, Y. Xi, I. W. El-Hussain, Northern Illinois University; L. Moos, Argonne National Laboratory

Drill and Install Large Diameter Leachate Head Wells Through Refuse ........................................... 441
T. C. Ruda, Exploration Technology, Inc.

Environmental Drilling: The Critical Phase for Geoenvironmental Consultants ........................................... 445
R. C. Wells, Trigon Engineering Consultants, Inc.

The Environmental Drilling Project: How a Contractor Prepares ........................................... 452
G. W. Fox, Fox Drilling, Inc.

* Paper not available at the time of printing.

Session 9
(ASFE)

Preliminary Site Assessments and Case Histories
Chairpersons:
R. V. Colangelo, The Green Corporation
W. Simpson, Haley & Aldrich, Inc.

Who Needs an Assessment? ........................................... 457
M. Tumbough, MT Associates; J. R. Barnes, Sergent, Hawkins & Beckwith Geotechnical Engineers, Inc.

An Insurance Company's Perspective on PSAs ........................................... 463
D. Coduto, Terra Insurance Company

Environmental Site Assessments Proposal and Contract Considerations ........................................... 464
D. L. Hamstead, Hamstead Environmental, Inc.

PSAs: The State of the Practice ........................................... 474
W. E. Simpson, Haley & Aldrich, Inc.

PSA Report Preparation ........................................... 483
R. S. Johnston, Gecon Environmental Consultants

PSA Lessons Learned ........................................... 493
D. J. Aucua, ENCOR

Public Records in the Due Diligence Process: What's Available and How to Obtain Them ........................................... 503
J. C. Mauch, Environmental Audit, Inc.

Polynuclear Aromatic Hydrocarbon Contamination in Downtown Chicago Fill Soils ........................................... 519

Session 10
Engineering Geomorphology/Hazards Mapping
Chairperson:
N. P. Schneider, Illinois State Geological Survey

Landslide Hazard Zonation Studies from Upper St. Andrew in Jamaica, West Indies ........................................... 531
R. J. Maharaj, University of the West Indies

Tributary Confluence Dynamics, Bank Loss, and Sedimentology on the Brazos River Below Whitney Dam, Texas ........................................... 531
P. M. Allen, Baylor University; N. D. Maier, Nathan Maier Consulting Engineers, Inc.

Influence of Man Upon Lake Michigan Coastline Geomorphology Near Ludington ........................................... 541
W. J. Weaver, STS Consultants, Ltd.

The Use of Historic Maps and Aerial Imagery in Assessing Fluvial Conditions ........................................... 548
D. M. Patrick, University of Southern Mississippi

The Effects of Short Term Climate Change in Engineering Geology ........................................... 548
A. Coogan, D. F. Palmer, Kent State University

Shallow Groundwater Movement Investigations at the Weldon Spring Site in St. Charles County, Missouri ........................................... 549
P. T. Price, Missouri Department of Natural Resources

* Paper not available at the time of printing.
Engineered Wetlands for Effective Treatment of Acid Drainage-Applications, Results, and Prospects in the Tennessee Valley ................................................................. 558
G. A. Brodie, Tennessee Valley Authority

Gems Mapping Symbols for Coastal Geotechnical Hazard/Remediation Planning Maps in Dana Point, Orange County California *
D. L. Hannan, E. Hendrix, Zeiser Geotechnical, Inc.

Session 11
(AEG/NDCA)
Environmental Investigative Techniques
Outdoor Field Demonstrations

Chairperson:
T.C. Ruda, Exploration Technology, Inc.

Station 1
Hollow Stem Auger Drilling Techniques *
M. Henderson, Midwest Engineering, Inc.

Station 2
Mud Rotary Drilling Techniques *
B. Fox, Fox Drilling, Inc.

Station 3
Air Rotary Drilling Techniques *
D. Stinnett, Comar Drilling, Inc.

Station 4
Wireline Coring of Rock *
M. Crimaldi, Rock and Soil, Inc.

Station 5
Well and Borehole Abandonment Techniques *
R. Prueher, WTD Environmental Drilling, Inc.

Station 6
Monitor Well Installation Practices *
P. Reuteman, Giles Engineering, Inc.

Miscellaneous
Temporary Decontamination Pad *
D. Green, NDCA - Chicago Chapter

Session 12
Earthquake Risk Assessment and Slope Stability Analyses

Chairpersons:
E. L. Krinitsky, U.S. Army Engineer, WES
R. Olshasky, University of Illinois

Horizontal Technology as Applied to Earthquake Assessment ........................................ 573
R. C. Leaf, SlimDrill International, Inc.

The Bootheel Lineament and Its Implications for Earthquake Risk in the New Madrid Seismic Zone ................................................................. 583
E. S. Schweig III, Memphis State University

Effects of the October 17, 1989 Loma Prieta Earthquake at Embankment Dams .......... 588
R. B. Mac Donald, Bureau of Reclamation, U.S. Department of Interior

Ground Motions Criteria for the Seismic Safety Assessment of Fort Loudoun Dam .......... 593
R. A. Anderson, P. P. Martin, Harza Engineering Company; J. A. Niznick, Tennessee Valley Authority

A Combined Soil Mass Sliding and Rock Toppling Slope Failure ................................ 603
F. S. Kendzorski, A. C. Pincomb, Dunn Geoscience Corporation

Comprehensive Stability Analysis of Ancient Giant Rockslides, Virginia Valley and Ridge Province ................................................................. 612
R. C. Whisonant, C. F. Watts, Radford University

A Geotechnical Investigation of Selected Landslides in the Cincinnati Area, Hamilton County, Ohio ................................................................. 621
D. W. Behringer, A. Shakoer, Kent State University

The Application of Geogrids as a Potential Solution for Slope Instability Problems *

Session 13
Ground Water Modeling

Chairpersons:
R. L. Jennings, Consulting Hydrogeologist
K. E. Kolm, Colorado School of Mines

Development and Definition of Groundwater Modeling Objectives and Performance Criteria ................................................................. 625
F. G. Baker, Ebasco Environmental

A Three Dimensional Model of Contaminant Transport Within Highly Heterogeneous and Anisotropic Sediments ................................................................. 630
P. Attanayake, H. Feng, R. Stenzel, M. Sholley, Bechtel Corporation

Using a Personal Computer (PC) for 3-D Ground Water Flow and Solute Transport Modeling ................................................................. 631
H. Feng, P. Attanayake, M. Sholley, R. Stenzel, Bechtel Corporation

The Development of Computerized Three-Dimensional Geohydrologic Conceptual Models Using Geoscientific Information Systems ................................................................. 632
K. H. Nasser, Harding Lawson Associates; A. A. Turner, Colorado School of Mines

Development of a Comprehensive Groundwater Modeling System ................................................................. 640

GIS: A New Tool for Geohydrological Characterization ................................................................. 641
C. C. Faunt, K. E. Kolm, Colorado School of Mines

Practical Approaches to Modeling Complex Patterns of Groundwater Recharge and Discharge *

Application of Aquifer Characteristic Testing Methods in Low-Yield Formations *
P. B. Lee, Dames & Moore; C. W. Sprague, Groundwater Technology, Inc.

* Paper not available at the time of printing.
Session 14
Waste Management Issues
Chairpersons:
N. Albergo, HSA Environmental, Inc.
B. L. Turner, EMCON Associates

Utilization of Industrial Solid Wastes
P. P. Hudec, University of Windsor, Canada

Biomedical Waste Management
N. Albergo, W. E. Lee, HSA Environmental, Inc.

Correlation Between Physical and Analytical Properties of Contaminated Sediments

Geotechnical Characteristics or Compacted Municipal Solid Waste Compost
C. H. Benson, M. A. Olhman, University of Wisconsin-Madison

Risk Assessment & Engineered Organisms in Remediation
N. Albergo, W. E. Lee, HSA Environmental, Inc.

A National Standard for Ground-Water Monitoring Wells
M. N. Sara, Waste Management of North America

International Practice in Hazardous Waste Management
S. E. Hasan, University of Missouri

Session 15
Staged, Aerobic Constructed Wetlands for Acid Drainage and Stormwater Control
Chairperson:
G.A. Brodie, Tennessee Valley Authority

Constructed wetlands for wastewater treatment have proven to be cost-effective and environmentally preferable alternatives to conventional biological and chemical treatment methodologies. This session will review the staged, aerobic wetlands systems developed by the TVA to treat acid mine drainage, coal ash seepage, and storm runoff at coal mining and power production facilities. Preliminary and final design considerations, construction techniques, operation and maintenance, performance expectations and results from existing systems, and cost evaluations will be discussed.

G. A. Brodie, Tennessee Valley Authority

Session 16
(AEG/NDCIA)
Geotechnical Investigative Techniques
Chairpersons:
J.W. Cobarrubias, City of Los Angeles
W. Schubert, Waste Management of North America

Modern Developments in Borehole Steering and Surveying
R. W. Braithwaite, Reflex Instrument AB, United Kingdom

Innovative Techniques in Angle Drilling
A. T. Leslie, Raimonde Drilling Corporation

The Field-Developed Cross-Section: A Systematic Method of Portraying Dimensional Subsurface Information and Modeling for Geotechnical Interpretation and Analysis
D. A. Larson, D. A. Williamson, USDA Forest Service; K. G. Neal, GeoEngineers, Inc.

THE whole STORY
J. R. Sedlock, H.C. Nutting Company

Improved Instrumentation for Conducting the Standard Penetration Test
A. Shakoor, T. R. Fisher, Kent State University; J. Smith, R & R International

Field Study of Standard Penetration Tests Results Using Various Drilling Methods
T. C. Ruda, Exploration Technology, Inc.

An Array of Geophysical Methods Resolve Complex Geology and Design Issues for the Boston Effluent Outfall

The Central Artery Project: Boston, Massachusetts A Drilling Contractors Perspective
E. Butler, Guild Drilling, Inc.

Session 17
Poster Board Presentations
Chairperson:
M. McCarrin, Foth & Van Dyke

A Portable Dynamic Penetrometer for Geotechnical Investigations
J. F. Triggs, Triggs Technologies, Inc.; F. D. Simpson, University of Akron

An Example of Sequential Land Use Necessitating Mitigation: Well Abandonment in the Kraemer Oil Field, Yorba Linda, California
M. B. Phipps, E. C. Sprotte, J. E. Slosson, Slosson and Associates

Predicting the Efficiency of a Ground Water Remediation Extraction Program Using Modflow
K. Uhlman, M.E. Portman, Remcor, Inc.

Investigative Techniques to Evaluate the Interrelationship Between the Surface Water and Ground Water
K. Uhlman, Remcor, Inc.

Ground Penetrating Radar for Hazardous Waste Site Investigations
M. A. Vendl, U.S. Environmental Protection Agency; J. J. Daniels, R. L. Roberts, Ohio State University

Penetrometer Methods for Determining Geotechnical Hydrogeological & Geochemical Characteristics During Geo-Environmental Site Investigations
A. I. Strutynsky, C. R. Strutynsky, Strutynsky

Mathematical Cartographic Modeling (MCM) In Environmental Investigation
V. M. Prilepin, Moscow State University, U. S. S. R.

Interpretation of Landslides Along the Ohio and Mississippi Rivers Using Small and Medium-Scale Aerial Photography and SLAR Imagery

* Paper not available at the time of printing.
Remedial Investigation Department of Energy Superfund Site, Vancouver, Washington .................................................. 945
P. L. Stroud, J. M. Anderson, Dames & Moore

In-Field Hydraulic Conductivity Measurements in Clay: Limitations and Improvements ................................................. 952
W. R. Schubert, W. Upman, Waste Management of North America

Stabilization/Solidification Applications for Site Remediation .......................................................... 962
R. H. Kappler, Millgard Environmental Corporation

Environmental Due Diligence in Real Estate Transactions: Industry and Proposed Legislative Guidance .................................................................................. 969
J. C. Mauch, Environmental Audits, Inc.

Session 20
Mine Subsidence

Chairpersons:
C. D. Elifrits, University of Missouri - Rolla
D. VanRoosendaal, Illinois State Geological Survey

Modeling Subsidence and Groundwater Flow Due to Underground Mining .................................................. 981
M. Bai, D. Elsworth, Pennsylvania State University

Surface Structural Damage Associated with Longwall Mining Near Tuscaloosa, Alabama: A Case History .................................................................................. 991
W. C. Isphording, University of South Alabama

Foundation Design in a Subsidence Prone Area in Indiana .................................................................................. 1000
G. G. Marino, Geotechnical Consulting Engineer

Testing of Subsidence Damage Mitigation Measures .................................................................................. 1011
G. Lin, University of Tennessee, W. F. Kane, University of the Pacific

Fan Type Underdrain System Drains Mine, Prevents Landslide and Residential Property Damage * .......................................................... 1021
W. C. Morrison, C. D. Polino, Office of Surface Mining; R. E. Gray, GAI Consultants, Inc.

Error Analysis of Subsidence Monitoring Using Tiltmeter Surveys .................................................. 1021
Q. W. Hao, Y. P. Chugh, Southern Illinois University at Carbondale

Session 21
(AEG/NDCA)
Sampling and Instrumentation Installation Techniques Outdoor Field Demonstration

Chairpersons:
T. C. Ruda, Exploration Technology, Inc.

Station 1

Soil Sampling Practices .................................................. 1033
J. Eberhart, Testing Services Corporation

* Paper not available at the time of printing.
