3rd Conference

MECHANICAL BEHAVIOR OF SALT

ECOLE POLYTECHNIQUE
PALAISEAU- FRANCE

SEPTEMBER 14-16, 1993

organized by :

ECOLE POLYTECHNIQUE

Laboratoire de Mécanique des Solides
(L.M.S.)

Groupement pour l'étude des Structures Souterraines de Stockage
(G.3S)

with the collaboration of :

PENNNSYLVANIA STATE UNIVERSITY
TABLE OF CONTENTS

TUESDAY, September 14, 1993

Session 1:
VISCOPLASTICITY AND HARDENING
(Laboratory results and Interpretation)
(Co-Chairmen : P. Bérest, R. Rokhar)

On the physical origin and modelling of kinematic and isotropic hardening of salt
M. AUBERTIN

Preliminary determination of constants for an updated version of the suvic model
M. AUBERTIN, D.E. GILL, S. SERVANT

Extension of the M-D model for treating stress drops in salt

A Unified viscoplastic model for rock salt
A. PUDEWILLS, K. HORNBERGER

A Methodology for the identification of rock salt behavior using multi-steps creep tests
M. HAMAMI, S.M. TIJANI, G. VOUILLE

A comparison of the responses of the Munson-Dawson model and the Lemaitre model
A.AIT CHALAL

Comparative study of certain constitutive laws used to describe the rheological deformation of salts
G. DURUP, J. XU

Application of the Kaiser effect for the evaluation of in situ stresses in salt
H.R. HARDY Jr.

Session 2:
TEXTURE & STRUCTURE
(Micro & Macro Aspects)
(Co-Chairmen : M.B. Dusseault, M. Aubertin)

Deformation of NaCl single crystals at 0.27 T_m < T < 0.44 T_m
P.H. WANTEN, C.J. SPIERS, C.J. PEACH

A micro-macro model for polycrystalline halite
A. POUYA, A. ZAOUI, M. NABOULI

The influence of textural parameters and mineralogical composition on the creep behavior of rock salt
U. HUNSCHE, G. MINGERZAHN, O. SCHULZE

Deformation, dilatancy and permeability development in halite/anhydrite composites
C.J. PEACH

Textures investigation on halite and fluorite by neutron diffraction
H. KAMPF, H.J. FRANZKE, M. BETZL, Ch. SCHEFFZUK

WEDNESDAY, September 15, 1993

Session 3: DAMAGE AND HEALING (Measurement & Modelling)
(Chairmen: D.E. Munson, J. Prij)

Rock salt damage - Experimental results and interpretation
L. THOREL, M. GHOREYCHI

A comprehensive constitutive equation for rock salt - determination and application
N. CRISTESCU, U. HUNSCH

Procedures for cyclic creep testing of salt rock, results and discussions
X. ALLEMANDOU, M.B. DUSSEAUT

Session 4: COUPLED PROCESSES & HYDRO-CHEMICAL EFFECTS
(Chairmen: G. Vouille, E. Alonso)

On laboratory measurements of porosity and permeability of salt rocks
(Bressan basin - France)
J. BILLIOTTE, C. LE GUEN, M. DEVEUGHELE, J. BRULHET

Experimental study of the role of humidity on the thermomechanical behaviour of various halitic rocks
J.M. LE CLEAC'H, A. GHAZALI, M. DEVEUGHELE, J. BRULHET

Effect of humidity & confining pressure on creep of rock salt
U. HUNSCH, O. SCHULZE

Hydrodynamic aspects of the imbibition of a salt wall by brine initially contained in a cavity
P.M. ADLER, A. ZAZOVSKY, Ph. BARANGER, G. BONTE, J.F. LAURENS, J.F. SUREAU

Mechanical aspects of the imbibition of a salt wall by brine initially contained in a cavity
G. BONTE

Behaviour of porous salt aggregates, constitutive and field equations for a coupled deformation, brine, gas and heat transport model
S. OLIVELLA, A. GENS, J. CARRERA, E. ALONSO

Coupling between mechanical behavior and transfer phenomena in salt
Ph. COSENZA, M. GHOREYCHI
**Session 5: CRUSHED SALT BEHAVIOR**
(Backfilling & Sealing of Radioactive Waste Repositories)
(Co-Chairmen: C.J. Spiers, D. Nguyen Minh)

Measurement of crushed salt consolidation under hydrostatic and deviatoric stress conditions
*E. KORTHAUS*

Reconsolidation of salt as applied to permanent seals for the Waste Isolation Pilot Plant
*F.D. HANSEN, G.D. CALLAHAN, L.L. VAN SAMBEEK*

Convergence and compaction of backfilled openings in rocksalt
*J. PRIJ, J.J. HEIJDRA, B.A. van den HORN*

Conditions of state in and around borehole seals in underground waste repositories in rock salt
*Th. SPIES, B.A. van den HORN, J. PRIJ, T. ROTHFUCHS*

In situ experiment for density measurement on crushed salt as backfilling
*G. GOMMLICH*

Thermomechanical effects in backfilled drifts
*J. SCHNEEFUß, J. DROSTE*

Measurements on the gas generation and release of backfilled drifts at the direct disposal of spent fuel elements
*N. JOCKWER, H. SPRENGER*

Experimental and modelling results for compaction of crushed salt
*C. ZHANG, M.M. SCHMIDT, G. STAUPENDAHL*

---

**THURSDAY. September 16, 1993**

**Session 6: SOLUTION MINING - STORAGE CAVERNS**
(Co-Chairmen: B. Ladanyi, L. Sousa)

Modelling subsidence of the Tersanne underground gas storage field
*D. NGUYEN MINH, S. BRAHAM, J.G. DURUP*

Rock mechanical studies on the post-operational phase of a disposal cavern
*O. ROLFS, U. SCHMIDT, F. CROTOGINO*

Study of the stability of caverns in rock salt created by solution mining, proposal for a new design criterion
*G. VOUILLE, J. BERGUES, J.G. DURUP, T. YOU*

Optimising underground gas storage operations in salt caverns, with special reference to the rock mechanics and thermodynamics involved
*K.H. LUX, T. SCHMIDT*

In situ tests in brine-filled caverns
*N. ALLA, P. BEREST, P.A. BLUM, G. DURUP*
Session 7: SALT & POTASH MINING
(Co-Chairmen: P. Ramirez, M. Wallner)

Four case studies in saltrock - Determination of material parameters for numerical modeling
*M.A. FRAYNE, L. ROTHENBURG, M.B. DUSSEAUT* 457

Mining experience of Potash Mines in Alsace (MDPA) - Relationship between mining design and rocks behaviour
*G. BONTE* 469

Local instability and system instability of room and pillar fields in potash mining
*W. MINKLEY, W. MENZEL* 483

Session 8: NUMERICAL MODELLING OF UNDERGROUND STRUCTURES
(Co-Chairmen: N. Cristescu, K.H. Lux)

Probabilistic structural analysis of thermomechanical response in rock salt
*Z. DONG, R. EICKEMEIER, M. WALLNER* 499

Incompressible numerical modelling for long term convergence evaluation of underground works in salt
*D. NGUYEN MINH, E. QUINTANILHA DE MENEZES* 509

The assessment of the stability of a cavern field in bedded salt with the help of the new Hannover dimensioning concept
*R. ROKAHR, K. STAUDTMEISTER* 519

Rate type constitutive equations with applications to the calculus of the stress state and of the displacement field around cavities in rock salt
*D. MASSIER* 531

Research work concerning the characterization of the rheological behaviour of salt in the Slanic-Prahova zone
*M. NICOLAE* 545

On the qualitative derivation of the long-term load carrying capacity and/or long-duration static stability of salt rocks from measuring data of their strength; creep behaviour and stress relaxation
*H. BOHNEL, K. SALZER, W. SCHREINER* 557
