

Proceedings of the Conference on Hazardous Waste Research

Volume I

May 21 and 22, 1990

**Kansas State University
Manhattan, Kansas**

**Edited by
Larry E. Erickson, Director
Center for Hazardous Substance Research
Kansas State University
Manhattan, KS 66506**

**Published by
Engineering Extension
Kansas State University
Manhattan, Kansas 66506**

**UB/TIB Hannover 89
113 553 196**

Contents

	Page
Volume I	
Preface	i
The Effect of Influent Acetate Concentration on the Transformation of Chlorinated Aliphatic Compounds in Fixed Film Anaerobic Filters	1
Modeling, Analysis, and Simulation of Bioremediation of Soil and Water	17
Biodegradation of PCP by <u>Pseudomonas cepacia</u>	47
Biofilm Accumulation in Porous Media	63
Effect of Co-Pollutants on the Movement of Polychlorinated Dibenzo-P-Dioxins and Polychlorinated Dibenzofurans in Saturated Soils	77
Modeling of Alachlor and Atrazine at Small Plot in Amana, Iowa	89
Application of Support Bonded Siloxanes and Supercritical Carbon Dioxide for Trace Analysis of Organochlorine Compounds	113
Application of Supercritical Fluid Extraction to the Analysis and Control of Hazardous Waste	123
Supercritical Fluid Extraction and Cleanup Procedures for Determination of Xenobiotics in Biological Samples	138
Evaluation of Supercritical Fluid Extraction for Removal of Organic Contaminants from Soil	152
Nano-Scale Metal Oxide Particles/Clusters as Chemical Reagents. Synthesis and Properties of Ultra-High Surface Area Magnesium Oxide	170
Testing of a Mobile Fourier Transform Infrared Spectrometer System for the Analysis of Volatile Organic Compounds (VOCs)	204
Nano-Scale Metal Oxide Particles as Chemical Reagents. Heats of Adsorption of Heteroatom Containing Organics on Heat Treated Magnesium Oxides Samples of Varying Surface Areas	230

Some Engineering Considerations in the Application of Soil Venting257
Adsorption of Benzene, Phenol and a Mixture on XAD-4 and Coal Char298
Use of Soil Column Test Apparatus for Evaluation of <u>In Situ</u> Bioremediation Potential310
Pentachlorophenol Interactions with Soil322
APEG-PLUS™: Dechlorination of Dioxins, PCBs, and Pentachlorophenol in Soils and Sludges347
U.S. DOE Applied Environmental R&D Initiatives for Private Sector Involvement in Dealing with Environmental Restoration and Waste Management356
Demonstration, Testing, and Evaluation Program: Division of Demonstration, Testing, and Evaluation, U.S. DOE, Office of Technology Development366
Solidification of K061 Waste385
Effect of Cover Material on Leachability of Lead Mine Tailings395
Metal Recovery and Reuse Using an Integrated Vermiculite Ion Exchange-Acid Recovery System417
Hydrometallurgical Treatment of Flame Reactor Processed Missouri Lead Blast Furnace Slag438
Removal of Heavy Metals by Biopolymer449

Volume II

Biosorption of Metals from Aqueous Solutions477
Min-Cyanide: An Expert System for Cyanide Waste Minimization in Electroplating Plants500
Effect of Heterogeneity on Transport and Entrapment of Nonaqueous Phase Waste Products in Aquifers523

Effects of NAPL Weathering on Contaminant Transport541
Fate and Transport of Alachlor and Atrazine in an Unsaturated Riparian Zone561
A Statistically Averaged Approach to Simulating Groundwater Contaminaton from a Non-Point Source of Pollution592
The Simulation of Air Flow in Soil Vacuum Extraction Systems by a 3-D Groundwater Flow Model621
Dispersion Parameters from the Impulse Response Using a Spreadsheet636
Material Recovery and Treatment Methods Used in the Chromium Electroplating Process652
Effect of Aeration Rate, and Hydraulic Retention Time on Partitioning of Biologically Reduced Mercury673
The Perceived Environmental Issues for the 90s: Challenge and Confrontation680
A Waste Minimization Strategy for Larger Companies in Iowa685
Training and Technology Transfer: Yesterday, Today and Tomorrow691
Hazardous Waste Management in Rural Areas694
Hazardous Waste Information at Farrell Library703
Introduction to Hazardous Waste Management--On the Road in Regions 7 and 8707
X-Ray Computed Tomography as a Tool in Contaminant Transport Research715
Effect of Dissolved Calcium Chloride on the Liquid-Liquid Equilibria of the Ternary System Benzene-Water-Acetic Acid733
Evaluation of Counterflow Oxidation for Regeneration of Granular Carbon Adsorbents739
Management and Solid Waste Recycling in U.S. Counties751
Practical Waste Minimization773
Microbial Carbon Dioxide Generation and Oxygen Utilization in the Unsaturated Subsurface at a Gasoline Spill Site789

Degradation of Pentachlorophenol by Lignases Produced by <u>Phanerochaete chrysosporium</u>	797
Photodegradation of Pentachlorophenol	806
An Economic Analysis of Microbial Reduction of Sulfur Dioxide as a Means of By-Product Recovery from Regenerable Processes for Flue Gas Desulfurization	817
Simultaneous Combined Microbial Removal of Sulfur Dioxide and Nitric Oxide From a Gas Stream	834
Hydrogeologic Investigations at the Kansas State University Inactive Chemical Waste Landfill	856
Influence of the Type and Amount of Binding Agent on the Characteristics of Solidified Arsenic Waste	866
Graph-Theoretic Approach to Process Synthesis: Application to Waste Minimization	877
Microcosm Treatability of Soil Contaminated with Petroleum Hydrocarbons	893
