Proceedings of the Third International Congress on Industrial and Applied Mathematics held in Hamburg, Germany, July 3–7, 1995

edited by
Klaus Kirchgässner
Oskar Mahrenholtz
Reinhard Mennicken
Contents

Some thoughts about education in mathematics for industry - the ECMI experience
V. Capasso 15

Mathematical problems in rarefied gas dynamics
C. Cercignani 19

Macroscopic models of charged-particle transport derived from kinetic theory
P. Degond 39

Modeling and simulation of fluid flow in complex porous media
G. Fotia, A. Quarteroni 55

On some modifications of the Lanczos algorithm and the relation with Padé approximations
K. Gallivan, E. Grimme, D. Sorensen, P. Van Dooren 87

Converging flows of elastic liquids
E.J. Hinch 117

Hysteresis in phase transformations
R.D. James 135
