PROCEEDINGS
of the Ninth Annual International Conference

"Technology and Persons with Disabilities"

Los Angeles Airport Marriott Hotel
March 16-19, 1994

Sponsored by the CENTER ON DISABILITIES
California State University, Northridge

Harry J. Murphy
Editor

This conference is supported in part by a grant from Pacific Telesis Foundation
PROCEEDINGS
of the Ninth Annual International Conference
"Technology and Persons with Disabilities"

TABLE OF CONTENTS

Keynote Address: Roadblocks On The Electronic Information Highway .................. 1
Lawrence A. Scadden

Computer-Based Study Strategies For Academic Success:
Empowering Students With Electronic Study Tools ............................................. 6
Lynne Anderson-Inman

The AAC Team, A Collaborative Project of Contra Costa SELPA,
Mt.Diablo SELPA, California Children's Services, and
Contra Costa County Office of Education ....................................................... 9
Alice Anthony, Christine Coe, Judy Dawson, Joyce Teekell, and Karen Porcella

Getting Off To A Great Start - Assistive Technology And Young Children ............. 12
Janet Sloand Armstrong, Kelly Jones

"Independence House": A Children's Museum Exhibit To Increase
Community Awareness Of Assistive Technology .................................................. 15
Kay Ashida, Jay Wood, Leedy Day, Lorelle Wilson

The Technological Impact Of ADA On Criminal Justice Facility
Design And Construction ...................................................................................... 18
Randall I. Atlas

Defining The Links--Assistive Technology Awareness And University Curricula .......... 22
Beatrice Babbitt, Lynne Ruegamer

Switch Routers: Integration Of Voca, Computer, And ECU Technologies
With Mobility .......................................................................................................... 24
Peter Baelde

Disability Information Available on the Internet .................................................... 27
Richard Banks

Comparing Auditory Scanning Systems:
Live Voice, Communication Devices and Computers ............................................. 30
Peggy Barker, Judy Henderson

ADA, Making It Work: How Information Age Technology Can Be Geared
To Accommodate The Different I/O Requirements Of Users ............................. 31
James Barry

Protecting Intellectual Property - Advice to Inventors ......................................... 32
Robert Barry, Bruce R. Baker, David Hershberger
Accessibility to Scientific Information by the Blind: Dotsplus and ASTER could make it easy
William A. Barry, John A. Gardner, T. V. Raman

Using Technology to Enhance the Brain Power of Individuals with Mental Disabilities
Clyde Beck, June E. Beck

ACCESSIBLE ONRAMPS: Pacific Bell and Universal Service
Dmitri Belser

Teaching Switch Access On The Computer
Jana Birch, M.A.

yashti ashle'e'h (make it talk) Implementation of Augmentative Communication and Assistive Technology Services in Eastern Navajo Agency Schools
Julie K. Bisbee

Assisting Schools In Selecting Technology For Individual Students: Washington's Collaboration Model (Special Education Technology Center)
Ann Black, Barbaralyn Harden, Shirley Inveen

Multimedia Software Authoring For Persons With Multiple Disabilities
Mark Blandford, Hai Tang, Carolyn Blandford, A.W. Perry

A System for Reading and Producing Talking Tactile Maps and Diagrams
P. Blenkhorn, D. G. Evans

Implementation of Educational Technology in the Polish Special Education: Prospects and Barriers
Krystyna Bleszynska Ph.D.

Design Of Telephones For Everybody
Ase Brandt

Access To Science: Adapted Computers + Electronic Text = New Opportunities
Rod J. Brawley, Annemarie Cooke

Videotelephony for Persons with Mental Retardation Using Pictogram Symbols
Jane Brodin

Disabilities, Opportunities, Internetworking and Technology (DO-IT) on the Electronic Highway
Sheryl Burgstahler, Dan Comden

Inclusion Through The Use Of Hypermedia
Doyle E. Burnett

Building Local Capacity in Pennsylvania ................................................................. 12
  Lynn A. Dell, Kristen E. Swengel, Janet Sloand Armstrong

Developing Partnerships for Assistive Technology Training .................................... 127
  M. J. Demetras, Dan Davidson, Larry Gallagher

Breaking The GUI Accessibility Barrier ................................................................. 130
  Frank DiPalermo, Marc Stiehr

Integrating Technology For Communication And Learning
  - A Scottish Perspective ......................................................................................... 133
    Mrs. Marie Dougan, Mrs. Deborah Jans

Structuring Documents:
The essential step in accessible text production for reading impaired persons .......... 135
  J. Engelen, B. Bauwens, F. Evenepoel, T. Wesley, C. Tobin

A Magic Carpet Ride Through The Elementary Curriculum ...................................... 139
  Suzanne Feit, Cyndy Hoberman, Karin James

VR and Disabilities: Some Ethical Considerations ................................................. 143
  John L. Fodor

What's Happening in Federal Government Procurement of
Computer Access Products? .................................................................................... 144
  Paul Fontaine, Don Dillin

Technology Through The Ages: Telling Their Own Stories ..................................... 153
  Mary R. Frey, Lynn Dell.

The Braille Movie: Displaying Laterally Moving Braille Characters ......................... 156
  Joerg Fricke, Helmut Baehring

Effective Training In Technology Awareness: A State-Wide Program .................... 160
  Nancy Friedman, Mary Brady

Technology and Full Inclusion Classes .................................................................... 162
  Ken Funk

Assistive Technology for Children with Developmental Delays:
Birth to Five Years ................................................................................................. 164
  Catherine Gaines

Interdisciplinary Team Projects:
Cost Effective Solutions for Assistive Technology ................................................. 167
  Larry Gallagher, M. J. Demetras

Leadership and Technology Management (LTM)
The Strategic Management of Technology in a Consumer-Driven Environment ........ 165
  Jan Galvin, Harry J. Murphy
A Sound-Based Hierarchical Menu Navigation System for Visually Handicapped Use of Graphical User Interfaces ................................................. 21
Arthur I. Karshmer, Pres Brawner, George Reiswig

Microcomputer Activities With Young Disabled Children: Data From a Research Project ......................................................... 216
Kit Kehr, Judy Howard, Elysebeth Greyrose

Computer Bulletin Board Systems (BBS’s) on Disability Information .......................................................... 217
George Kessinger, June Isaacson Kailes, Jo Kahn, Dave Whipp, Janina Sajka

Using Stories to Promote Beginning Communication, Language and Creativity in Young Children with Disabilities ...................................... 220
Pati King-DeBaun

GUI Access: A Developers’ Toolkit .............................................................. 225
Peter Korn, Ben Drees

Talking to your computer: Implications of speech recognition systems in adult education & vocational training ........................................ 228
Dr. Colin J. Laine

The Steps to Recovery From Spinal Cord Injury ........................................ 232
Robbie Vierra Lambert, Cy Cy Lambert, Paul Bems

RERC on Technology Evaluation and Transfer: Transforming Inventions into Commercial Products .............................................. 234
Joseph P. Lane

The Internet: The Problems And The Promise ............................................. 237
Joseph J. Lazzaro

Cornucopia of Disability Information .......................................................... 240
Jay A. Leavitt

A Descriptive Analysis of the Current Use and Potential Need of Specific Assistive Technology Devices with Special Education Students .............................................. 244
Janet L. Levine, Ph.D.

Strategies and Advantages Using Technology for Independence for the K-8 Orthopedic Classroom ............................................. 248
Diane W. Llewellyn, Stephen J. Faupel

Opening Doors To Educational And Employment Opportunities ............................................. 249
Gladys Loewen

DARCI TOO: The Keyboard Emulating Interface For The Maximum Connection ............................................. 252
Aimee J. Luebben
ISDN-videotelephony for Speech and Language Impaired Users - A field trial
Magnus Magnusson

Cruising The Electronic Highway: A Road Map For The Novice and The Expert
William McGarry

Enriching the Reading Process With Software
Molly Mead, Frankie Dissinger

"Call And Talk To Me" - Phone Communication For The Communicatively Impaired
Kathleen H. Miller

Developing Courses for Students from Multiple Disciplines:
Assessing and Using Assistive Technology in Educational Settings
Susan Mistrett

Comparing Three CAI Approaches To Teach Vocabulary Words to Students
With Language-Learning Disabilities
Jane Y. Murdock, Bobbie Hebert, Nola O'Connor

Making the X Window System More Accessible: The DACX Project
Elizabeth Mynatt, Earl Johnson, Will Walker, Mark Novak, Gregg Vanderheiden

The Language Behaviors Required for Using Computer Technology
Robert T. Nash, Ed.D.

Motion Picture Access: "Hidden" Captioning Of First-Run Movies In Theaters
Judith Navoy

Computer Assisted Employment: A Reasonable Accommodation?
Ann T. Neulicht, Saroj Primlani, Maggie Sauer

New Mexico Eligibility Determination System (NMEDS):
A Decision Tool for Assistive Technology Funding
Bill Newroe, Terri Christiansen

Technology Services for Elementary and Secondary Students, Ages 3-21:
the Referral Process
Christine Oddo

Development of Behavior-Based Robot Applications for Persons with Disabilities
Using Virtual Reality: Future Possibilities
Jari Ojala

Opening Windows of Access With JAWS for Windows
Charles Oppermann

Pezonomics, Anthropocybersynchronicity, and People with Disabilities
Joel N. Orr
Teresa 80: A Braille Line With 80 Characters In One Cell .................................................. 294
Antonio Parreño, Pedro J. Magallon

A Talking Color Identifier ....................................................................................................... 296
S. Pettitt, P. Blenkhorn, D. G. Evans

AAC Communication Lab: Let's All Get Involved ................................................................. 300
Sherry L. Purcell, Ronna Joseph

School Days! Independence Days! ......................................................................................... 303
Melody Ram

Designing Future Access for Patrons of the National Library Service for the Blind and Physically Handicapped (NLS), Library of Congress ........ 306
Lloyd Rasmussen, John Cookson

MiniMorse - Morse Code And Mini-keyboard Access To Popular Computers .............. 309
Chris Ridpath, Ed Snell, Larry Silver

What's New at PRC? ............................................................................................................... 313
Barry Romich, Pat Perreault,
David Hershberger, Cliff Kushler, Trevor Sutton

Operational Technology: A Need for Sensitivity Training in the TECH ERA ................. 315
José R. Santana

Consumer-Driven Tech Teams: Creating Customized Adaptations ............................... 318
Caren Sax, Ken Kozole

Creating Literacy Software: Step By Step, Stack By Stack .............................................. 322
Janice M. Schuler, Jane D. Steelman

Extending Telephone Service to Californians With Combined Moderate Speech Production Disabilities and Keyboard Disabilities ................................................... 325
Robert Z. (Bob) Segalman

Print Accessibility For Print Disabled Students In Postsecondary Education .............. 328
Jeffrey C. Senge

A Computer Supported Model of the Writing Process for Learning Disabled Students .... 331
Merrill Sitko, Carolyn Sitko

Functional Applications of Simple Voice Output Communication Aids ......................... 334
Lourie Smith, Autumn Walker

Integrating Adaptive Computer Technology ........................................................................ 338
Donald M. Spaeth

Building User-Friendly Interactive Multimedia Training on a Shoestring Budget .......... 341
Jinny Spann
Rehabilitation Robotics: What's Gripping? .................................................................343
    Carol A. Stanger

Literacy Experiences and Technology Use for Children with Developmental Disabilities .................................................................348
    Amy H. Staples, Karen Erickson, David A. Koppenhaver

Project EXALTT: Exploring the Arts and Literacy Through Technology .................................................................351
    J. D. Steelman, S. Gordon, G.W. Johnson

The Usefulness of Natural Language Hypertext to Access Vocational Rehabilitation Information .................................................................354
    Curtis Stoelting

The Use Of A Microcomputer As a Vocal Communication Aide (VOCA) Trainer .................................................................358
    Steven Swenerton

Native Americans and Assistive Technology .................................................................362
    Timothy C. Thomason

"Invisible" Computers For Blind Clients: An Integrated Campus-Wide Model for Adapting Computer Equipment for Clients Who Are Blind .................................................................365
    Mike Thompson

Shared Accessibility: Experiments in Accommodation Over the Telecommunications Network .................................................................369
    Jim Tobias

The Electronic Campus and Equal Access to Higher Education .................................................................372
    Jutta Treviranus

Accessibility Considerations and Solutions for Hypermedia and Instructional Program Design .................................................................377
    Alan VanBiervliet

Multi-Phasic Teaching Technology Using TDD, Telephone, Modem, And Computer In Concert For Distance Learning .................................................................381
    Thomas K. Walpole

Telecomputing and the Disabled: an Opportunity for Equality .................................................................383
    Joan Winsor

Dynamic Displays: the Changing Face of Augmentative Communication .................................................................386
    Walter S. Wolosz

The National Center To Improve Practice: Enhancing Special Education Through Technology, Media, And Materials .................................................................394
    Judith Zorfass, Barry Cronin
