P M Ashley, R A Dunan and C A Tebbre

M J Barr and J J Northery

I C Bell

M Bethwaite

R A Bunns, J M Parr, N D Scott, J B Gemmell and P M Herring

P M Black

J Bogie

J C Bokisch

G Borstal et al

R I Brathwaite and P Blattner

G C Broadbent

G A Brown

S W Caddey, A W McOuse and P G Rutherford

G H Cameron, V J Wall, J I Walsh and CA Heinrich

H J Cargill, A B Christie, R I Brathwaite and A Swan

J Cassidy and C A Locke

J J J Chen, Z C Ye, B J Winters, H Rogers, O Gregory and C Garlick

The Mount Kain gold mine, Fiji

Application of alluvial gold mineralogy to exploration of the Central Ranges, Irian Java, Indonesia

Debt finance: The technical factors

Gas chemistry and isotopic signature of fumaroles at Galeras Volcano, Colombia

The Ebor Volcano: A Miocene-age central-type intraplate volcano-intrusive complex, northeastern NSW, Australia

Gold, silver and base metal deposits of the Chillagoe district, Australia: Hypothermal to epithermal overprinting

Strategic research support for the mining industry - the role of the Australian Centre for Minesite Rehabilitation Research

Distant fields - are they really greener?

PACMANUS: An active seafloor hydrothermal field on siliceous volcanic rocks in the eastern MANUS Basin, Papua New Guinea

High-Si rhyolites and shoshonitic volcanics: a late Cretaceous bimodal association, Noumea Basin, New Caledonia

Geological controls on the formation of gold rich porphyry-type deposits

Golden Cross Mine - gold mining in a sensitive New Zealand environment

The CCCS SWIR full spectrum imager: Mission to Nevada, June 1995

The Wahi epithermal gold-silver-quartz vein system, New Zealand: a high-throughput geothermal system of Late Miocene age

The Century discovery, Queensland, Australia - is exploration ever complete?

Development of environmental management systems in the mining industry

Volcanic stratigraphy, structure and controls on mineralization, Golden Cross Mine, New Zealand

Gold mineralization at the Pogera gold mine, Papua New Guinea, in response to fluid mixing

Comparison of vein styles and distributions between rhyolite- and andesite-hosted epithermal gold-silver deposits of the Hauraki Goldfield, New Zealand

Geophysical signatures of andesite volcanoes in New Zealand - contrasts and structural implications

A model study of the BHP New Zealand Steel iron-making smelter
B W Christensen and D O Hayba

Hydrothermal eruptions in ore forming reservoirs: Analogues and models 119

D S Clarke

Human resources and exploration economics in a developing Pacific Rim 125

D Cluzel, G Clarke and J Aitchison

Northern New Caledonia high-pressure metamorphic core complex. From continental subduction to extensional exhumation 129

B L Coira and M K de Brodtkorb

Polymetallic mineralization associated with Cenozoic volcanism in Northern Puna, Argentina 135

E Cole and W P Player

The New Zealand mining regime with particular reference to the development of minerals programmes 141

P J Coney

Plate tectonics and the Precambrian-Phanerozoic evolution of Australia 145

G Corbett, T M Leach, R Stewart and B Fulton

The Porgera gold deposit: Structure, alteration and mineralisation 151

S C Cox and D Craw

Structural permeability in the Southern Alps hydrothermal system, New Zealand 157

M E Crump

A new source of gallium - geothermal muds 163

M L Cummings

Intragraben fault zones, volcanism, and geothermal evolution in the Oregon-Idaho graben, USA 169

P R Degeling, G J Corbett and T M Leach

The Peak Hill high sulphidation gold deposit NSW 175

K P Denwer, T M Leach B A and Mowat

Mineralisation of the Morobe Goldfield, Morobe Province, Papua New Guinea 181

Y Du

Pyroclastic flow deposits, East Zhejiang, Southeast China: their characteristics and a petrogenetic model 187

R C Duckworth

Australian participation in the Ocean Drilling Program: An economic geology perspective 193

E Egert and S Kasaneva

The San Cristobal Gold District, Antofagasta, Chile 197

T Farrell

Environmental management systems for mining companies 203

R A Fisher and A P Brown

W S Fyfe,

Needed new technologies for the development of Earth Resources: Energy, Wastes, Mining 213

S L Garwin, D Hendri and P F Lauricella

The geology of the Mesel sediment-hosted gold deposit, North Sulawesi Indonesia 221

J B Gemmell

Comparison of volcanic-hosted massive sulphide deposits in modern and ancient back arc basins: examples from the southwest Pacific and Australia 227

W F Giggenbach

Correlations among CO2, Cl, 3He and heat discharged from geothermal systems of the Taupo Volcanic Zone, New Zealand 233

R Goldfarb, D Skinner, A Christie, P Haeussler and D Bradley

Mesothermal gold deposits of Westland, New Zealand and southern Alaska: Products of similar tectonic processes? 239

I S Gramberg, L E Levin and E N Isaev

Atlas of petroleum and mineral resources maps with monograph of Late Jurassic-Quaternary sediments of the world 245

G E Hancock and A D S Gillies

The influence of resource rent taxation on mining and investment strategies 249

P M Hancock

Mineral resource policy issues for sustainable development: corporate and national imperatives 255
C Hawkesworth, S Turner, E Heath, F McDermott, F and P van Calsteren

A V Haworth, W Mori, G B Boswell and M R Stevens

R W Henley and M A Etheridge

P M Herzig and M D Hannington

R Horn

B F Houghton and C J N Wilson

A R Hughes

B Irianto and G H Clark

R J Korsch and J M Totterdell

J V Lawless, P J White, I Bogie and M J Andrews

M J Lawrence

A T Lawson, P Henaley and R Byrnes

T M Leach and G J Corbett

C H Leiner, K P Hammerschmid and I F Bell

L E Levin

B G Lottermoscr, P M Ashley and M Muller

B W Mackenzie

K A Mason, P E H Gregg and R B Stewart

G K Mathias, S F Simmons and J Fleming

A H G Mitchell and J C Carlile

M J Mitchell

R M Molloy, V Morand and W R H Ramsay

C L Moore and J C Waters

U-Th isotopes and the generation of magmas along destructive plate margins 261

Features of an intact fossil hydrothermal system and implications for gold mineralisation: Onemana, Coromandel Peninsula, New Zealand 267

The structural and hydrodynamic framework for epithermal exploration 269

Hydrothermal activity, vent fauna, and submarine gold mineralisation at alkaline fore-arc seamounts near Lihir Island, Papua New Guinea 279

The South Australian exploration initiative - benefits to government and industry 285

Volcanic and structural evolution of central Taupo Volcanic Zone, New Zealand 291

Use of helicopters in mineral exploration to minimise environmental impact, Mount Painter area, South Australia 297

The Batu Hijau porphyry copper-gold deposit, Sumbawa Island, Indonesia 299

Permian and Mesozoic tectonic and structural events in the Bowen and Sarar Basins and New England Orogen, Southwest Pacific Rim 305

Tectonic features of Sumatra and New Zealand in relation to active and fossil hydrothermal systems: a comparison 311

Personal liability - Chartered Practising Status and best practice defences for Pacrim practitioners 317

Environmental management of a traditional coal mining site 323

Characteristics of low sulphidation gold-copper systems in the South-West Pacific 327

Environmental management plans to reduce mine closure costs 333

Tectonic setting of stratiform ore deposits buried in sedimentary cover of the Pacific Ocean 339

Environmental geochemistry of the Halls Peak massive sulphide Zn-Pb-Cu-Ag deposits, New South Wales, Australia 345

The mineral wealth of nations 351

Land reclamation trials and practices at Martha Hill Gold Mine, Waihi, New Zealand 359

High sulfidation alteration at the Island Copper porphyry copper deposit, Vancouver Island, Canada 365

The epithermal Au and porphyry Cu (Au) relationship in the western Pacific and central Europe 371

Alluvial platinum-group minerals in southern New Zealand 377

Structural controls in the Tarnagulla Goldfield, Central Victoria: Implications for metamorphically derived auriferous fluids 383

The recognition of pseudoclastic textures in hydrothermally altered subaqueous dyke rocks and lavas: Some economic implications 389
