Health in the
New Communications Age
Health Care Telematics for the 21st Century

Edited by

M.F. Laires
CENTIS, Ministério da Saúde, Lisbon

M.J. Ladeira
IGIF, Ministério da Saúde, Lisbon

and

J.P. Christensen
European Commission, DG XII/C-4, Brussels

## Contents

### Part I. Introduction and Opening Session

**Introduction**

From Advanced Informatics in Medicine (AIM) to Health Telematics Applications in the Information Society, *A. Vasconcelos da Cunha and J. Lacombe*  

A Word from the Editors, *M.F. Laires, M.J. Ladeira and J.P. Christensen*  

AIM Office Staff, *J.P. Christensen*  

**Opening Session**

Opening and Welcome Address, *P. Mendo, Minister of Health, Portugal*  

The Health Telematics Challenge, The Social Challenge, *E.R. Lopes*  

The Industrial Challenge, *C. De Benedetti*  

Towards the Information Society, *J. Kubosch*  

Importance of Informatics for Public Health and the Work of the World Health Organization in Europe, *D. Macfadyen*  

The Canadian Perspective, *R. Alvarez*  

Information Society Challenges in the U.S.A., *J.M. Fitzmaurice*  

Advanced Technology for Battlefield Medicine, *R.M. Satava*  

### Part II. Project Lines

**Project Line 1**

Introduction to Project Line 1. Medical Data and Coding, *M.J. Wilson*  

TANIT: Telematics for Anaesthesia and Intensive Therapy, *C.L. Bowes and J. Holland*  

The OpenLabs Project, *R. O'Moore and G. Boran*  

GEHR: The Good European Health Record, *D. Ingram*  

MARGOT: Medical Archive Generation with Object-Oriented Techniques, *F. Prigione*  

MENELAS: Coding and Information Retrieval from Natural Language Patient Discharge Summaries, *P. Zweigenbaum*  

GALEN: Terminology Services for Clinical Information Systems, *A.L. Rector, P. Zanstra, D. Solomon and the GALEN Consortium*  

EDIFORHEALTH: Analysis and Recommendations for EDI in Healthcare, *E. Berrocal*

TELENURSING, R.A. Mortensen and G.H. Nielsen

Project Line 2

Introduction to Project Line 2. Medical Multimedia Workstations and Images, L. Beolchi

CAMI: Computer Assisted Medical Interventions, P. Cinquin, F. Gerritsen, and D. Graf von Keyserlinck

COVIRA: Multimodality Medical Image Analysis for Diagnosis and Treatment Planning: Computer VIsion in RAdiology, M.H. Kuhn

EurlPACS: European Integrated Picture Archiving and Communication Systems, M. Osteaux, R. Mattheus and M.J. Wilson

MIWORD: Multimedia Interaction with Large Object-Oriented Radiological and Clinical Databases, A. D’Atri, G. Di Stefano, G. Fabrizi, A. Montesanti, L. Tarrantino, B. Zobel and the MIWORD team

ATIM: Assessment of information Technology In Medicine, E.M.S.J. van Gennip, J.L. Talmon and A. Bakker

MARIA: Multimedia Applications for Regional and International Access, R. Turner and P. Marshall

EDUCTRA: Education and Training in Health Informatics, A. Hasman

Project Line 3

Introduction to Project Line 3. Decision Support, Primary Care and Resource Management, P. Barahona

DILEMMA: Decision Support in Primary Care, Oncology and Shared Care, R. Thomson

KAVAS: Knowledge Acquisition, Visualization and Assessment System, J.L. Talmon and P. McNair

MUM: Managing Uncertainty in Medicine, B. Richards, P. Hajek, J. Zvarova, J. Jirousek, J. Esteva and M. Lubicz

CAMIREMA: Case Mix and Resource Management, J. Hofdijk

PRIMACARE: Telematics in Primary Health Care, J. De Maeseneer
Contents

Health Telematics for Clinical Guidelines and Protocols, C. Gordon 274
The CARE Telematics Project, H.K. Zöllner 279

Project Lines 4 and 5

Introduction to Project Lines 4 and 5. Rehabilitation and Biosignal Handling, S. Maglavera and G. Anogianakis 291
ESPIS: EEG Signal Processing and Interpretation during Sleep, M. Toussaint, N. Schaltenbrand, T. Paiva, T. Pollmacher, C. Pflieger and J.P. Macher 297
IMPACT: Integrating Microscopy for Pathology Activities and Computer Technology, G. Brugal 304
OEDIPE: Open European Data Interchange and Processing for Electrocardiography, P. Rubel, J.L. Willems, C. Zywietz, J. Fayn, D. Assanelli, C. Malossi and S. Todd 313
CAMARC-II: Computer Aided Movement Analysis in a Rehabilitation Context-II, T. Leo 329
IREP: Integrated Rehabilitation Programmes, S. Copelli 341
ESTEEM: European Standardised Telematic Tool to Evaluate EMG Knowledge-Based Systems and Methods, M. Veloso et al. (The Esteem Consortium) 348
BRI TER: Biosignal Representation, Integration and Telecommunication Services in Rehabilitation, A. Talbot 357
PRIM AS. EC: Precision Real-time Image-based Motion Analysis System at Economical Cost, A. Jobbágy 363

Project Line 6

Introduction to Project Line 6. Telemedicine Applications Framework, A.C.M. Kilsdonk 365
EMDIS: European Marrow Donor Information System, C. Raffoux 367
EPIC: European Prototype for Integrated Care, L. Boydell 373
ISAAC: Integrated System Architecture for Advanced primary Care, S. Bertelli 378
TELEPRIM: Telematic Services for Primary Care, F. Piera 385
ISAR: Integration System Architecture, R. Beuscart, B. Modjeddi and M. DeMeester 392
MOBICARE: Strategy Definition for Promoting Mobile Health Care Telematic Services in Europe, J.M. Martín Espinosa and M.A. del Río Vega 404
NUCLEUS: Customisation Environment for Multimedia Integrated Patient Dossiers, A.C.M. Kilsdonk and A. van der Werff 411
FEST: Framework for European Services in Telemedicine, M. Gerneth 417
SHINE: Strategic Health Informatics Networks for Europe, P. Cooper and J. van Wijnbergen 426
TRILOGY, A. Weser 439
## Project Line 7

- PROCAS: Profiles of Care System, L. Cammelli and P. Di Loreto
- SEISMED: A Secure Environment for Information Systems in Medicine, B. Barber
- TELECASTRO: Telematics Technology for Harmonising and Promoting Quality in Gastroenterology, O. Winding, C. Ohmann and F.T. de Dombal
- BEAM: Biomedical Equipment Assessment and Management, N. Pallikarakis
- EUROMEDIES: EUROpean MEdical Device Information Exchange System, N. Pallikarakis
- OBSQID: Continuous Quality Development in Perinatal Care through use of Quality Indicators, K. Stæhr Johansen and J. Langhoff Roos

## Part III. Plenary Sessions

### Plenary I. Health Priorities and Telematics

- Plenary I: Health Priorities and Telematics, J. Caldeira da Silva
- Development of a Regional Health Telematics Network, I. Moreno Cayetano
- PrimSIFT: An Investigation into the Future of Telematics in Primary and Community Care, T. Randall, R. Frassine and L. Boydell
- Chip Cards in Public Managed Health Care - Experiences with the New German Insurance Card, G.-G. Hofmann
- Health Priorities and Telematics. The Cancer Community Point of View, J.L. Renaud-Salis
- Can Europe and Developing Countries Work Together? The EpiAim Response, J. Levett and M. Sosa-Iudicissa
- Health Priorities and Telematics: Telematics for Health, M. Gott

### Plenary II. The European Answers for Health Care Telematics

- The European Answers for Health Care Telematics, M. de Almeida and J.P. Christensen
- Health in the Fourth Framework Programme for Research and Technological Development and in the Information Society, J. Lacombe
- Transnational Project Management of R&D Innovative European Pilot Projects, M. Ringsted
- How can SMEs Get Involved in EU Programmes and What Kind of Benefits They Can Get Out of This. A Case Study: The EPSILON SOFTWARE Experience, N. Damianakis
- Relationships between R&D, Standardisation and Exploitation in Health Informatics and Telematics, G.J.E. De Moor
Plenary III. North-South Interactions

North-South Interactions, A. Sousa Pereira, I. Iakovidis, S. Pedersen, L. Moniz
Pereira, A. Pratas Peres, V. Pires, F. Ramos and N. Pacheco da Rocha 579
The North-South Interactive Health Demonstration, S. Pedersen and G. Hartviksen 586

Plenary IV. Roundtable

User and Industry Round Table Implementation of the Information Society in Health Care, N. Rossing 589
Lisbon Round Table Discussion: The Industry’s Point of View, U. Hübner 592
"Where do we come from?", "Where are we going to?", "What do we get?" and "What do we need?", W.J. de Gooijer 596
User/Industry Round Table, The Mutuality’s Point of View, T. Nater 600
The Point of View of E.A.R., R. Passariello 603
Cancer and Telematics in Europe, J.G. McVie 605
Implementation of the Information Society in Healthcare Potential for Health Authorities, K.J. Hickey 606
Implementation of the Information Society in Healthcare, General Practice/Family Medicine, P. Wallace 609
Telemedicine: A Telecommunications Operator’s Perspective, D.C. Smith 612
Health Telematics, European Public Health Alliance, Round Table, W. Th. Kort 615
The Health Care Professionals’ View, R. Biggin 621
Potential of Telematics for Medical Equipment, A. Ashby 624
SMEs in the Information Society, B. Ennis 629

Plenary V. Advanced Issues in Communications

Healthcare Infrastructural Service, R. Mattheus 632

Part IV. Closing Session

The Way Forward, A.C. Trakatellis 639
Closing of the Conference. Summary of Highlights, N. Rossing 641
Getting to People with Telemedicine, W.S. Haston 643
The American Perspective for the Future, J.M. Fitzmaurice 646
The Information Society: Deployment of Healthcare Telematics, M. Carpentier 651

Part V. Satellite Workshops

Introduction to Social Workshop, J. Costa, M. Gott and T. Sommer 657
Workshop on EUROMEDIES: EUROpean MEdical Devices Information Exchange System, N. Pallikarakis and A. Pernice 664
Workshop on MEDIREC: European Electronic Health Care Records Towards the Future, J. Reig Redondo, W. Ceusters, J. Moreno González and I. Iakovidis 671
