# Table of Contents

**Foreword**

XIII

1 *Large and complex projects: Invited papers*

- Strait crossings in and around Denmark  
  *K. Lykstoft Larsen*  
  3
- The Normandie bridge  
  *B. Deroubaix, A. Demare & R. Lavoué*  
  11
- Chanakkale Ataturk Bridge  
  *S.S. Tezcan & E. Arioglu*  
  21
- The Northumberland Strait Crossing Project  
  *J.A. Feltham*  
  37
- The Trans-Tokyo Bay Highway: Socioeconomic benefits and environmental measures  
  *M. Takahashi*  
  53

2 *Bridges*

- Lantau Fixed Crossing: Development and progress  
  *M.A. Champion & R. P. Stanley*  
  69
- Design and construction of the Askøy suspension bridge  
  *L. Blom-Bakke, J. Hellesland & A. Vangsnes*  
  75
- East Bridge: Status report of design and construction  
  *L. Sjøgren & A. S. Jacobsen*  
  83
- Environmental harmony of strait bridges  
  *Z. Cywiński & E. Kido*  
  91
- Design of Kurushima Bridge: Aesthetics and aerodynamics  
  *J. Hirayama, Y. Fujii, K. Mori & H. Ohashi*  
  99
- The ship impact protection of the Great Belt suspension bridge  
  *N.-E. Ottesen Hansen, B. C. Simonsen & M. J. Sterndorff*  
  107
The application of wind-tunnel testing of long-span bridges to their construction
F.M. Livesey & G.L. Larose

The open steel deck cable-stayed bridge
H.S.G. Knox & F. Walther

Bridge designs
K. Selberg

Aesthetics and construction in long-span bridge design
A. Burden & M. Lenczner

Modern corrosion protection for stay cables, tendons and ground anchors for strait crossings
structures
D. Jungwirth & N. Kjellberg

Construction and maintenance of two cable stayed bridges in adverse environment
K. Melby, S. Hovland & H. Østlid

Newly developed corrosion protective materials for maritime structure

Durability of concrete bridges in marine environment in Norway
T. Østmoen & B. Sand

Reduced chloride penetration into concrete by means of formwork
C. K. Larsen & E. O. Strøm

Structural monitoring of the Great Belt East Bridge
E. Y. Andersen & L. Pedersen

Instrumentation, documentation and verification, the IDV-System:
A system for planning and using data from instrumentation to ensure factual experience
to be understood and used for future projects
H. Østlid

Selected results from full scale measurements on the Skarnsundet cable-stayed bridge
C. Hansvold, Å. Belsby & S. Hovland

Instrumentation for monitoring the Skarnsundet cable-stayed bridge
F. Myrvoll, E. DiBiagio & C. Hansvold

The Salhus high level bridge
E. Jordet, J. Kjeken & T. A. Thorsen

Deep foundation for offshore pier of Hakucho Oohashi Bridge
T. Kikuchi, K. Kuwajima, M. Hirai & S. Hirocho

Construction of the East Bridge across the Great Belt in Denmark
K. Rönberg

The cable-stayed bridge over the Mississippi at Burlington, USA
H. S. Svensson & E. H. Petzold

The Saint Nazaire bridge
J.-C. Foucriat & J. Roche
3 Tunnels

Storebælt Eastern Railway Tunnel: Designers review of construction works
S.D.Eskesen & S.C.Richards

Great Belt Tunnel: Cross passage construction
D.Hartwell, P.Kofoed & W.Unterberger

Messina Strait crossing: Geotechnical and hydrogeological problems in the land-sea tunnel junction
P.Grasso, G.Rabajoli & S.Pelizza

FATIMA: The longest subsea road tunnel in the world in 1997
B.Nermoen, A.Beitnes & K.Furstrand

An undersea-tunnel solution for linking Brier Island to mainland Nova Scotia
P.Grasso, A.Mahtab, A.Eusebio & T.Kelly

The Norwegian experience on strait crossings: A pattern and a source of knowledge
J.A.Juncà-ubierna

Hvalfjörður: A ‘Norwegian’ subsea road tunnel in young, basaltic rocks of Iceland
H.Haraldsson & A.Beitnes

Proposed tunnel Hareid – Sula: Is a sub-sea tunnel down to 630 m bsl. feasible?
A.Beitnes
Detection of leakage sensitive joint systems using resistivity measurements in connection with sub-sea tunnels

P. Hagelia

Geomechanical express-monitoring during tunnelling

A. A. Kozyrev, V. I. Panin & V. V. Timofeyev

Linings for sub-sea tunnels in rock

A. Grønhaug

Structural behaviour of reinforced concrete tunnel lining under earth pressure

S. S. Imbaby & A. G. Abdel-Shafy

Primary tunnel lining with PP FRS and rigid bolts

V. Ukrainczyk & I. Jašarević

Longitudinal ventilation of road tunnels combined with air cleaning technology

J. E. Henning

Catalytic exhaust air cleaning in road tunnels

K. Pucher, G. Soellmann & R. Pischinger

Norwegian road tunnels: Ventilation, pollution and pollution distribution

T. Hedalen & T. Myran

Integrated tunnel management and automatic response

E. C. P. Chang

Norwegian subsea road tunnels: Experience from 10 years of construction, operation and maintenance

E. Øvstedal & K. Melby

Experiences from construction and maintenance of world’s longest and deepest subsea road tunnel in Norway

G. Nærum

4 Economy

Strait of Messina crossing by submerged floating tunnels: Socio-economic effects

F. Latella, D. Marino, P. Montagna & M. Naglia

Strait of Messina crossing by submerged floating tunnels: Cost/benefit analysis

P. Montagna, M. Naglia & S. Dellagiovanna

Critical assumptions in Cost-Benefit Analyses (CBA): Norwegian experiences

S. Braathen, A. Hervik & E. Nesset

Are planning procedures able to explain the financial difficulties of toll roads in Norway?

J. Odeck & T. Skjeseth

Immersed tunnel cost reduction

M. E. Iorns
5 Social and environmental effects

The Øresund Link: Interaction between environmental protection requirements and design
J.S. Møller & N.-E. Ottesen Hansen

Strait of Messina crossing by submerged floating tunnels: Environmental issue of the Eni floating tunnels
G.Vietti, L.Conti, A.Crotti & G.Truglio

Driver opinions of subsea tunnels
F.H.Amundsen & G.Østenstad

Occurrence of tunnel phobia in Norway
K.G. Götestam

Analysis of the environmental impact of the construction of a submerged floating tunnel across the semi-closed bay
S. Kagaya, E.Yamamura, K.Yano, S.Akeda, R.Minato & S.Kanno

Major fixed links in and around Denmark: Their role and implications for accessibility and traffic
K.E. Andersen & W.D. Wätjen

Crossing the Bering Strait to open up the northern treasure chest
G.Koumal & H.H. Einstein

6 Submerged floating tunnels, immersed tunnels, floating bridges

The unique techniques employed for the Sydney Harbour Tunnel
N.Saito & A. Yamazaki

The Salhus Bridge: Construction and installation
T.Stabenfeldt

Design of bridges with submerged floating foundations
E.Watanabe, T.Utsunomiya, K.Ito, S.Ishihara, Y.Maeda & K.Matsuura

Messina Strait crossing: Safety analysis for submerged floating tunnels
L.Colombo, M.Beranger & R.Carpaneto

Elastoplastic capacity control of a submerged tubular steel bridge subjected to ship collision impact
J.F. Rambech, T.Dahl & S.N. Remseth

The marine operations for the installation of the submerged tunnels for the Messina Strait crossing
R.Faldini, F.Casola & F.Nicolussi

Study on structural characteristics of support systems for submerged floating tunnel
N.Maeda, M.Morikawa, K.Ishikawa & Y.Kakuta

Earthquake-induced permanent deformations in the landfalls of submerged-floating tunnels in sand
F.Pelli, G.P.Vassallo & F.Casola
Creation of the Northern Japan exchange axis by floating tunnels
K.Sato, S.Takano & H.Horiguchi

The configuration and the characteristics of the submerged tunnels for the Messina Strait crossing
F.Nicolussi & F.Casola

Parameter sensitivity of predicted extreme response for a submerged tubular bridge
R.M.Larssen, S.Remseth & R.J.Leira

Development of novel technologies for strait crossings based on submerged tunnels:
An application to Høgsfjord
A.Cannavacciuolo, R.Faldini & F.Casola

Design and construction of terminal joint in the Tama River and Kawasaki Fairway tunnels

Design and construction of flexible joints in the Tama River and Kawasaki Fairway tunnels
H.Inokuchi, S.-i.Egawa, H.Ohsaki, Y.Ichihashi, S.Sakurai & T.Tanaka

Numerical analysis of wave force and dynamic response to the submerged floating tunnels
H.Kunisu, S.Mizuno, Y.Mizuno, T.Yamashita & H.Saeki

Design of a submerged floating tunnel with a free span of 1750 m
P.Tveit

Årdalsfjord crossing
E.Ødegård

Analytical study on dynamic response of submerged floating tunnels due to wave force
S.Kanie, H.Kokubun, Y.Mizutani, T.Mikami & Y.Kakuta

Experimental study on characteristics of submerged floating tunnels under regular waves
S.Mizuno, A.Tada, H.Kunisu, Y.Mizuno, T.Yamashita & H.Saeki

Response of submerged floating tunnels to vertically impinging seismic waves

Strait of Messina crossing by submerged floating tunnels: Underwater sound analysis in marine environment
P.Rescia, R.Pisani & P.Milone

Offshore soil investigation: Straits of Messina: Solutions to unique problems
E.J.Parker, C.Golightly & L.Iovenitti

Submerged structures supported on sand pumped underneath structure
C.J.Rømhild & N.S.Rasmussen

Innovative methods of constructing concrete immersed tubes in the urban environment
A.R.Lancellotti & A.A.Brudno

Skills and experience in immersed and floating tunnels
V.L.Molenaar

Service and failure of the first concrete floating bridge
A.Grant & M.M.Lwin
The new floating bridge for Lake Washington, USA
M.M. Lwin & A. Grant

Design of the Salhus Floating Bridge (Nordhordland bridge)
P. Meaas, E. Landet & V. Vindøy

Use of high strength steel in Norwegian floating bridges
G. Solland, E. Landet & J. P. Tronskar

Instrumentation for verification of design criteria for the Bergsøysund and Salhus floating bridges
A. Solheim & M. Skille

Experimental research related to the behavior of an ocean-floor foundation pile which receives a cyclic pull-out force due to waves

Stability of submarine slope subject to repeated loadings
K. Miyabe, M. Kato & S. Toki

7 Crossings in general

The potential for undersea road tunnels in Scotland
T. J. M. Paterson

Future projects for highway construction across straits in Japan, and technical considerations
I. Yoshida, M. Fujiwara & K. Yokoyama

Conceptual design of Osaka Bay crossings
E. Watanabe, T. Kumatomo, O. Yoshikawa, S. Miura, T. Tanaka & M. Naruoka

Design and construction of Trans-Tokyo Bay Highway
K. Uchida, Y. Shioi, T. Arakawa, I. Kudo & K. Kuraishi

Planning a fixed link for the Fehmarn Belt by private enterprise
P. Breuninger

The Tysfjord crossing: A comparison between different alternatives
V. Engmo, S.-A. Moen & K. Vollan

Sea bed drilling with light equipment
B. Wivestad

Stability of sloping seabed – Seismic damage analysis: Methodology and application
P. Bazzurro, C. A. Cornell, F. Pelli & G. M. Manfredini

8 Ferries

Ferry operation in Møre and Romsdal County, Norway
O. Smørdal & A. Grøvdal

The Oslofjord at Horten-Moss: Ferry crossing, bridge or tunnel
B. Bettum & B. H. Bettum
High speed light craft, an alternative mode of strait crossings?
*H. Nordal*

Conceptual research on ‘Marine Express’: An amphibious train
*T. Ohta, K. Yoshida, N. Fukuchi, W. Koterayama & K. Hiwada*

Ferry connections: Still an alternative?
*S. Braathen, A. Hervik & J. Odeck*

Environment friendly ferries: Electrically driven in particular
*J. E. Wahl*

The Mortavika Breakwater: A harbour exposed to severe weather
*T. G. Espedal & A. E. Lothe*

Author index
