</table>
Efficient Double-Disk Accelerator for Continuous-Feed Centrifuges
Wallace Leung, Ascher Shapiro .................................................. 289

FLOTATION
Flotation Models Based on the Unified Proportionality Equation
Ralph W. Lai, Shiao-Hung Chiang, Daxin He ......................................... 298
Hydrodynamic Study of a Novel Multi-Stage Loop-Flow Flotation Column
Scott Guelcher, Shiao-Hung Chiang, Xuqing Gu, Daxin He ..................... 304
Comparison of the Flotation Characteristics of Steel-ground Coal versus Sand-ground Coal
Richard Sanford, Qinsheng Zhu .................................................................. 310
The Use of a Multi-Stage Column for Solid-Solid Separation
Daxin He, Shiao-Hung Chiang, Xuqing Gu, Scott Guelcher ..................... 315

POLYMER FILTRATION
Electron Beam Welding Increases Filter Service Life
Mark Willingham .................................................................................. 320
Filtration of Viscous Polymer Solution Through Composite Filter Media
C. B. Wang .......................................................................................... 329

FILTRATION TECHNOLOGY
Cake Washing in Filtration Operations for Increasing Product Purity and/or Recovery of Soluble Values;
Testing, Design, Troubleshooting and Optimization of Commercial Applications
Vaughn Weston, J. Stephen Slottee ........................................................... 335
The Bird Young Filter Dewater's Gypsum From FGD Process
Orest Romaniuk ...................................................................................... 342

SLS FUNDAMENTALS
Hydromagnetic Suspension Flow in a Channel Due to an Oscillating Pressure Gradient
Ali Chamkha .......................................................................................... 354
Study of Wall Effects in Packed Beds
Padmaja Baru, George G. Chase .............................................................. 363
Unsteady Hydromagnetic Natural Convection in a Fluid-Saturated Porous Medium Channel
Ali Chamkha .......................................................................................... 369
Mathematical Modeling of a Plate-And-Frame-Press
Scott A. Wells .......................................................................................... 376

MEMBRANE/WASTE-TREATMENT
High Purity Water Systems for the Pharmaceutical Industry
Deepak Agarwal ...................................................................................... 382
Bench-Top and Laboratory Test Methodologies for Pressure Nutsche Filter-Dryers for Pharmaceutical Production
Barry A. Perlmutter ................................................................................... 383
Highly Asymmetric Microporous Membranes
Jerome F. Ditter, I-fan Wang .................................................................. 393
Separation of Waste Plastic Particles Via Liquid-Fluidized Bed Classification (LFBC)
J.M. Calo, G. Hradil, W.D. Lilly, P. Mohsen .............................................. 399

USERS/APPLICATIONS

SLS IN FOOD INDUSTRIES
Recovery Of Biological Compounds From A Broiler Processing Wastewater Using Fibrous Materials
and Polyelectrolytes
Li Ang Chen, Ruben G. Carbonell, George A. Serad .................................. 405
Critical Elements of Success in Vertical Basket Centrifuge Process Design & Start-Up
Paul H. Jarosz .......................................................................................... 411

SLS IN CHEMICAL PROCESSING
Technologies for Dewatering Sludges at the Michigan Division Waste Water Treatment Plant of the
Dow Chemical Company
Todd Brown .......................................................................................... 415
# Operations of Perforated Bowel Centrifuges - A Plant Perspective
Wayne Fort ................................................................. 418

# Brine Clarification In Chlor-Alkali Production DRM Fundabac®/Contibac® Filter
Fred Kelley, Hans Muller .................................................. 425

# Use of A Fundamental Flow Model to Design Pressure Filtrations For Chemical Processes,
Raymond Collins .......................................................... 431

## TECHNOLOGY TO MEET ENVIRONMENTAL REGULATIONS
Leaching Of Energetics From Soils Using Acetone
Suresh Tonangi, Rajesh Boggavarapu, George G. Chase, W. Sisk ........................................ 438

# Alum Sludge Dewatering
Ernest Mayer ..................................................................... 443

# Recovery of Acetone From Solvent Extraction of Lagoon Sediment
Rajesh Boggavarapu, George G. Chase, W. Sisk, Suresh Tonangi .......................................... 452

# Wastewater ppb Mercury Removal with the DuPont/Oberlin Site Technology
Roy Rieber, Ernest Mayer .................................................. 457

## TECHNOLOGY TO MEET ENVIRONMENTAL REGULATIONS
Porous Metal Cross Flow Filters For Gaseous and Liquid Process Sampling
Klaus Julkowski .................................................................. 464

# Don't Be Fooled By A Fool-Proof Application - Experiences With A High Abrasive Slurry
Paul Scholtyssek, Ernest Mayer ........................................ 465

# Empty Chamber Membrane Plates Gain Successful Operating Experiences
Robert H. Mathewson ........................................................ 466

## SLS EQUIPMENT
Deep Moving Bed Downflow Strata-Sand™ Filter - An Optimum Granular Media Filter for Wastewater Treatment
Yongming Xia, Dean Berkebile, Tom Morando ................................................................. 473

# A Pilot Scale Study on Dewatering of Fine Clean Coal Using High Pressure Filter
B.K. Parekh, John G. Groppo ................................................ 480

## SLS EQUIPMENT
Tubular Back-Pulse Filters - Operation and Applications
Craig Rinschler ............................................................... 486

# BHS-Fest-Filter - Continuous Rotary Pressure Filter - Its Application and Design
Detlef Steidl, Komline Sanderson ........................................ 492

# Disc Filtration: Something Old, Something New
James Prochaska, Marcus N. Allhanda .................................. 496

# New Development - Horizontal Peeler Centrifuge HZ-Ph for Pharmaceutical Liquid/Solid Separation Applications
James K. McGillicuddy ........................................................ 501

## INDUSTRIAL WASTE TREATMENT APPLICATION
Removal of Arsenic in Drinking Water by Manganese Greensand Filtration, Oxide-Coated Sand Filtration and Ion Exchange Treatment
T. Viraraghavan, K.S. Subramanian, S. Tanjore ................................................................. 502

# Membrane Press Reduces Biosolids Incineration Cost Via Composting
Paul Scholtyssek, Ernest Mayer ........................................ 508

# Self-Flocculating Filter Aid
Roy Rieber, Ernest Mayer .................................................. 509

# Ultrafiltration of Multicomponent Oil-Water Emulsion
Seyi A. Odueyungbo, M. Butkus, D. Grasso ................................................................. 514

## INDUSTRIAL WASTE TREATMENT
Filter Media Selection for Clarification Applications
Ernest Mayer ................................................................. 520

# Oil Water Separation, Industrial Applications
Leslie R. White ............................................................... 521

# Carbon and Ceramic Rigid Microfiltration and Ultrafiltration Membranes for Steady State and Recycling of Dry Film Stripping Solutions
Jim Jablonsky ................................................................. 526
