The Proceedings of

The 5th International Conference on

Signal Processing Applications & Technology

Dallas, Texas, USA
October 18-21, 1994

Volume II

©DSP Associates
Flexible Image Compression: A Transformative-Interpolative Approach
Krishna C. Ratakonda, Univ. of IL-Champaign, USA

Fractal Compression of Data Structures
Andre Szykier, Cross/Z International Inc., USA
New Corrective Binarization Method for Fingerprints, Flávio A.P. Soares, José C.M. Bermúdez, Orlando José Tobias, and Rui Seara, Univ. Federal de Santa Catarina, BRAZIL

Image Coding Using an Adaptive Neural VQ Model and Its DSP Implementation, Fisseha Mekuria, University of Linköping, SWEDEN

An Adaptive Image Compression Scheme Based on Wavelet Transform and Hybrid DCT/VQ/SQ, Chih-Chwen Chuang, Ind.Tech. Research Inst., TAIWAN

Analysis of a Complexity Reduction Algorithm in Fractal Image Coding, Geir E. Øien and Skjalg Lepsoy, Rogaland Univ. Ctr., NORWAY

Spatio-Temporal Small Object Detection, D.J. Ridge, Short Brothers PLC, UK; J.V. McCanny, Queen's Univ. of Belfast, UK

Design and Evaluation of Programmable Video Codec Board (VC64), Isamu Goto, Hisashi Ibaraki, Shizuo Nakano, and Tsuyoshi Fujimoto, NTT, JAPAN

A Multiprocessor-Based Adaptive Image Vector Quantizer in the DCT Domain, P.J. Kulkarni and P.P. Kulkarni, KIT's College of Engineering, INDIA

3-D Sub-Band Coding of Videoconference Sequences, Tirso Alonso, Minsky Luo, Homayoun Shahri, and Donald J. Youtkus, AT&T Bell Labs, USA

Differential Model-Based Moving Object Segmentation in Dynamic Monocular Sequences, José Manuel Menendez, E. Rendon, L. Salgado, and N. Garcia, Univ. Politecnica de Madrid, SPAIN

● IMAGE CODING (POSTER SESSION)

Segmented Image Coding for Progressive Image Transmission, Krit Panusopone, Kuntima Sarika, and Fusak Cheevasuvit, King Mongkut's Inst. of Technology, THAILAND

Perceptual Block Truncation Coding, Z.Q. Cai and V.N. Tran, Deakin University, AUSTRALIA

Categorized Vector Quantization Using a New Distortion Measurement, Ou Zhao, AlliedSignal Aerospace Company, USA

Sushil DasGupta, Temple University, USA

Wavelet Construction Using Beta Functions for Image Data Compression, Seyed M. Hamidi, Reza R. Adhami, and Lori M. Bruce, Univ. of Alabama, USA

Combination of the Error Estimators in Image Data Reduction, Masahiro Fujimoto, Fukuyama University, JAPAN

Masayo Fujimoto, Doshisha University, JAPAN

Image Compression Using Compactly Supported Wavelets, Seyed M. Hamidi and Reza R. Adhami, Univ. of Alabama - Huntsville, USA

Pruned Discrete Cosine Transform Algorithms for Image Compression, Mohamed El-Sharkawy and Waleed Eshmawy, Purdue University, USA
• IMAGE PROCESSING TECHNOLOGY

High-Performance Image Capture and Display System
Clyde DeLuca, Daniel McCarthy, Michael E. Younger, and Michael S. Patterson, Army Research Laboratory, USA

High-Performance 1-D CCD Imager Module
Cary L. Bright, Mark M. Giza, Bill Lawler, and Michael S. Patterson, Army Research Lab., USA

• IMAGE UNDERSTANDING/RESTORATION

Recognition of Handwritten Farsi Numerals by Zernike Moments Features
and a Set of Class-Specific Neural Network Classifiers, M.H. Shirali-Shahreza
and Karim Faez, Amirkabir Univ. of Tech., IRAN; Alireza Khotanzad, SMU, USA

Application of a Constrained Deconvolution Approach to 3-D Optical
Microscopy Using Magnitude and Complex OTFs, Richard A. Lee and
Moe Razaz, University of East Anglia, UK; Peter J. Shaw, John Innes Institute, UK

Improving the Recovery of the Micro-Geometry of Object Surfaces by Fourier
Scaling, N. Sotoudeh and G.F. Goldspink, Middlesex University, UK
G.R. Greatrix, University of Teesside, UK

Comparisons of Parallel Iterative Noise Filters for Real-Time Image Processing
Hong Tang, Bingbing Zhou, Ian Macleod, Richard Brent, and Wei Sun,
Australian National University, AUSTRALIA

Textures in Objects and Images
J.C. Aparcio Fernandes, Universidade do Minho, PORTUGAL
J.A. Campos Neves, INESC Porto, PORTUGAL

Inference of Physical Texture from Visual Texture for Autonomous Vehicle
Scene Interpretation, Ian R. Whitworth and Bayazid K. Khondhar, Cranfield Univ., UK

Inverse Problems in Acoustical Imaging
Nassim Seghouani and Claude Nouals, ENSICA, FRANCE

• IMAGE UNDERSTANDING/RESTORATION (POSTER SESSION)

Contoured Guided 3-D Sementation for Medical Images
Xiaohan Yu and Juha Yla-Jaaski, Technical Research Center, FINLAND

Using 2-D FFTs for Object Recognition, Matt Perry, Motorola Inc., USA

• INDUSTRIAL APPLICATIONS

The Implementation of Digital Signal Processing-Based Imaging in a
Closed-Loop Video Feedback Manufacturing Environment, Bruce R. Mackie,
DI/MAC Technologies Inc., USA
An Iterative Learning Control for the Precision Improvement of a CNC Machining Center, K.-Y. Yu, ETRI-Media Applications, KOREA; Chong-Ho Choi and T.-J. Jang, Seoul Nat'l. Univ., KOREA

An Automatic Inspection Algorithm for Use in the Ceramic Industry Orlando J. Tobias, Rui Seara, José C.M. Bermudez, and Flávio A.P. Soares, Univ. Federal de Santa Catária, BRAZIL

The Simulation and Application of Adaptive Filtering on an Industrial Checkweigher, M. Tariq, W. Balachandran, M. Halimic, F. Cecelja, and Y.M. Enab, University of Surrey, UK

A General Purpose Flexible DSP56001 Development System for Motion Control Applications, Wei Cheng, C.J. Bonanno, and Longya Xu, Ohio State Univ., USA

Acoustic-Based Real-Time Partial Discharge Location in Model Transformer Atsushi Noro and Kouichi Nakamura, Nagoya Institute of Technology, JAPAN Toshihide Watanabe and Tadashi Morita, Fuji Electric Company, JAPAN

Simulation of Industrial Production Systems on a Multi-DSP Architecture Christian Steger and Reinhold Weiß, Graz Univ. of Technology, AUSTRIA

A Brushless DC Motor Controller Using DSP with Fuzzy Rules C.K. Lee and W.H. Pang, Hong Kong Polytechnic, HONG KONG

A Digital Signal Processor-Based LQG Controller for a Servo System M.J. Er, Nanyang Technological University, SINGAPORE

Induction Motor Control Using TMS320 DSP Chips F. Pourboghrat, Southern Illinois Univ., USA I. Panahi, Texas Instruments, USA

Control Expert Advisor P. Klín and J. Marsfk, Czech Acad. of Sciences, CZECH REPUBLIC

Application of DSP 32C to Advanced AC Motor Control Isabel del Valle, Ignacio Lobo, and Santiago Lorenzo, Univ.de Valladolid-ETSII, SPAIN

Optimizing DSP for Use in Digital Brushless Motor Control Matthew Finnie, Analog Devices Inc., USA

**INSTRUMENTATION & TESTING**

Digital Simulation of Analog Systems Application Daniel S. Iancu and Antonio R. Pinho, Medical Lab. Automation, USA

A DSP-Based Technique for RC Measurements under High-Voltage Interferences, Jacob Fainguelernt, Ishai Schwarzband, and George Agizim, TELRAD, ISRAEL

Smart Load Cells Based on Switched-Capacitors C. Couto and José Higino, Universidade do Minho, PORTUGAL

Digital Filtering for Data Compression in Telemetry Systems R. Michael Bell, Sandia National Laboratories, USA
DSP Control of Superconducting Quantum Interference Devices
Roger Bracht, Pangjen Kung, Paul Lewis, and Edward Flynn,
Los Alamos Nat'l Lab., USA

A Mass-Producible, Low-Cost Fourier Transform Spectrophotometer
Mark J. Ross and Oscar Stafsudd, UCLA, USA

The Design of a Multi-Function Frequency Counter System
Kok-Wan Tay and J.R. Horng, Nan-Tai Coll. of Tech. & Commerce, TAIWAN,
Y.N. Chung, Da-Yeh Institute of Technology, TAIWAN, R.O.C.

Tangent Extraction Method Based on the Mathematical Morphology
Operators: Application to Optical Metrology, N. Giraud, R. Grisel,
and C. Ducarouge, ICPI - Lyon, FRANCE

• MULTIMEDIA

High-Speed Motion Picture Coding Using the Hierarchical Heterogeneous
Multi-Processor System, Sang Hoon Choi, Jong Sook Park, and Yong Gil Kim,
GOLDSTAR, KOREA; Chae Wook Lim and Kyu Tae Park, Yonsei Univ., KOREA

A Multi-Standard Video Codec Architecture for the ISA/VL Bus
David J. Fairfield, Array Microsystems Inc., USA

Co-Development of User Interface, Control, and Digital Signal Processing
with the HTM Environment, Adrian Freed, University of California, USA

A PC-Based Multimedia DSP Development Environment
Michael F. Tighe, Intermetrics, USA

Application of a Multi-Purpose Analog Front-End Chip for Multimedia and
Communications, Maury Wood, Analog Devices, USA

Voice Applications in a Multimedia Financial Information Terminal
Michael Gaudette, DSP Software Engineering Inc., USA

The Evolution of the Audio PC: What the Next Few Years Will Bring
Eileen Carlson, Integrated Circuit Systems Inc., USA

Visual Basic and the Windows DSP RMI Simplify Access to PC-Based
DSP Resources, Robert Frankel, Spectron Microsystems, USA

• NEURAL NETWORKS

Lossless Compression of Multi-Spectra Satellite Images Using Neural Networks
Soon Ing Yann and Yeo Chai Kiat, Nanyang Tech. Univ., SINGAPORE

Spoken Word Recognition by Neural Networks Using Adaptive Inverse Filters
Tetsuya Hoya, Hitoshi Ihara, and Yoshihisa Ishida, Meiji University, JAPAN

Application of Neural Networks to Adaptive Filtering and Control
G. Horvath and R. Dunay, Technical Univ. of Budapest, HUNGARY
Self-Organized Recurrent Neural Network for Classifying Spatio-Temporal Data, Kyong Hi Moon, Kwang Baek Kim, Eui Young Cha, and Tae-Soo Chon Pusan National University, KOREA

Character Recognition Neural Network Implementation on a DSP Victor Demjanenko, Vocal Technologies Ltd., USA Niaqian Lu, SUNY-Buffalo, USA

Neural Networks for a Simpler Control of Synthesis Algorithm of Musical Tones and for Their Compression, Roberto Bresin and Alessandro Vendovetti, Università di Padova, ITALY

• NEURAL NETWORKS (POSTER SESSION)

A New Energy Function of Mean Field Hopfield Network for Measurement Data Association, Fengzhen Wang, Titus Lo, and John Litva, McMaster Univ., CANADA; Éloi Bosse, Defence Research Establishment, CANADA

Functional Link Artificial Neural Network Model for Channel Equalization Jagdish C. Patra and Ranendra N. Pal, Indian Inst. of Technology, INDIA

A New Complex Neural Network-Based Decision-Feedback Equalizer: Application to Band-Limited Non-Linear Satellite Links, Manouchehr Rafie and William Newman, Alta Group of Cadence Design Systems, USA

• NOISE CONTROL APPLICATIONS

Fixed-Point DSP Implementation of Active Noise Control Systems Sen M. Kuo, Northern Illinois University, USA; Issa Panahi, Mark Nadeski, Jason Chyan, and Tom Horner, Texas Instruments, USA

Hybrid Active Noise Control Systems Sen M. Kuo, Northern Illinois University, USA Dipa Vijayan, Texas Instruments, USA

Enhancement of Speech Using a Microphone Array Aristos Nkansa-Kissi and R. Root, Lafayette College, USA

• PARALLEL PROCESSING

Advanced Parallel Architectures for Real-Time Control, M.O. Tokhi, M.A. Hossain, M.J. Baxter, and P.J. Fleming, Univ. of Sheffield, U.K.

Interactive Parallel Volume Rendering Ted Bapty, Brian Ball, and Ben Abbott, Vanderbilt Univ., USA

A SIMD/MIMD-Organized General-Purpose Systolic Array Anil Mahanta and S. Baishya, Indian Inst. of Tech. - Kanpur, INDIA
Wavelets and Wavelants: Their Parallel Implementation
M. Devlin, Nat'l Engineering Laboratory, UK

Parallel Processing of Transient Stability Analysis Using a Multi-DSP System
Hideaki Matsumoto, Jun Onuki, Hisashi Azegami, and Mototaka Sone, Musashi Inst. of Tech., JAPAN; Hisayuki Kurabayashi and Hideki Fujita, Chubu Electric Power Co., JAPAN; Kouichi Nakamura, Nagoya Inst. of Tech., JAPAN

High-Speed Calculation of Simultaneous Equations on a Multi-DSP System
Hisashi Azegami, Jun Onuki, Nobuyuki Iijima, and Mototaka Sone, Musashi Institute of Technology, JAPAN

A Parallel Architecture Based on the Shared Memory Pram, Michael Lindig, CINTEC-IPN, MÉXICO; Francisco García Ugalde, DEPFI-UNAM, MÉXICO

An Investigation into Using C40 Networks for Real-Time Image Processing
Edward Young and John Edwards, Loughborough Sound Images, UK

PARALLEL PROCESSING ALGORITHMS (POSTER SESSION)

Parallel Implementation of Eigendecomposition, L.S. DeBrunner, V.E. DeBrunner, & W.D. Ballew, Univ. of Oklahoma, USA; S.A. Ahmed, BNR Inc., USA

The Parallel Computational Structures for Multichannel Digital Signal Processing Using Large Arrays, Alexander L. Andreyev, St. Petersburg Acad. of Aerospace, RUSSIA

RADAR

Digital Signal Processing in a Spaceborne Radar Altimeter
R.D. Crowley and D.M. Walker, E-Systems Inc., USA

Analysis of a Velocity Processor for Ultrawideband Radars with Zero DC Pulses, S. Hussain and H. Al-Ahmad, University of Bradford, UK

Digital Signal Processing in Active Acoustical Phased-Array Radar
Jamie Blatt, Data Translation Inc., USA

A TMS320C40-Based Radar Video Generator for Training and Simulation
Stephen J. Obermaier, SYSCON Corp., USA

A Parallel Signal Processing System for HF Ground Wave Radar
Qing-Xiang Zhang and Ning Zhang, Harbin Inst. of Tech., PR CHINA

Using the Inverse Chirp-Z Transform for Time-Domain Analysis of Simulated Radar Signals, Dean A. Frickey, Idaho National Eng. Lab., USA

RADAR (POSTER SESSION)

An Approximation to the Optimal M of N Detection Criteria for Non-Fluctuating Targets and Exponentially Fluctuating Radar Targets, Thomas L. Frey and Scott P. Bergen, Lockheed Fort Worth, USA
Parallel Processing of an Adaptive Antenna Array, Kamel Bouchefra, ESIEIGT, FRANCE; Timothy Hanson, Gaullaudet Univ., USA; Bryan Riley, General Motors, USA

Fast Polarization Filtering for Radio Disturbance Suppression
Xiaolin Qiao and Yongtan Liu, Harbin Inst. of Tech., PR CHINA

Semi-Infinite Quadratic Optimization Method for the Design of Array Patterns with Prescribed Nulls, Zhong Liu and Zhiwen Zhu, Nanjing Univ. of Science & Tech., PR CHINA

Wavelet Transformation in the Direction of a Transient Signal
André Quinquis and Christian Dugal, ENSIETA, FRANCE

Fault Diagnosis of Array Antennas Using Walsh Functions
V. Prithviraj and A.K. Mallick, Indian Inst. of Technology, INDIA

•RADIO, SATCOM & NAV

DSP-Based Secure Systems for Digital Speech Communication over the PSTN and via Radio, Fernando M.G. Sousa, Inst. Sup. de Eng. de Lisboa, PORTUGAL

DSP-Aided Fast Acquisition Modem
Mark Webber and Daniel Chinen, Fairchild Data Corp., USA

Skyphone Data Communications Service
M.A. Davies and K.G. Evans, University of Liverpool, UK

A DSP-Implementation of a Method for Classification of Analogue Modulated Radio Signals, Peter Nagy, National Def. Research Est., SWEDEN

Single Sideband Modulator Implementation Using the ADSP-2101 EZ-Lab Board, Hyung W. Paik and Tim W. Grablander, SD Sch. of Mines & Tech., USA

The Application of Adaptive FIR Filters to Precise Navigation, Joe Toth, UNISYS Canada; R. Mason and K. Runtz, Univ. of Regina, CANADA

Techniques for Low Power GPS Receivers
Menahem Lowy, Univ. of Texas - Arlington, USA

Innovative Use of DSP Technology in Space: FORTE Event Classifier
Scott Briles, Kurt R. Moore, Rollin Jones, Philippe Blain, Phillip Klingner, Daniel Neagley, Michael Caffrey, Karen Henneke, and William Spurgeon, Los Alamos National Lab., USA

Exploring the Design Space of a DSP-Based Mobile Satellite Receiver
Heinrich Meyr and Sebastian Ritz, Aachen Univ. of Tech., GERMANY

Application of FPGA Device in the Design of a Systolic Array Viterbi Decoder
Norlaili Mohd. Noh and Rezaul Hasan, Universiti Sains Malaysia, MALAYSIA

•RADIO, SATCOM & NAV (POSTER SESSION)

The Modeling of FM/TV Signal Spectrum and Comparison with INTELSAT Measurement Model, Ill-Keun Rhee and Se-Hoon Kim, Han-Nam Univ., KOREA; In-Kyeong Choi, KAIST, KOREA; Jae-Hong Park, and Se-Kyeong Park, ETRI, KOREA
Adaptive Decision Feedback Equalization for Asynchronous DS-CDMA
Communication Systems, Zhenyu Tang and Shixin Cheng,
Southeast University, PR CHINA

-ROBOTICS

A Dynamic Robot Measurement System Based on a Floating Point Digital
Signal Processor, H. Gander, M. Vincze, K. Filz, J. Prenninger, and G. Zeichen,
Technische Universität Wien, AUSTRIA

High-Speed Optical Serial Link for WEDSP 32C-Based Real-Time Control
System, Roberto Oboe, University of Padova, ITALY

Real-Time Simulation and Control of Flexible Robot Manipulators
M.O. Tokhi and A.K.M. Azad, University of Sheffield, U.K.

Sonar Data Processing for the Navigation of a Mobile Robot,
Francisco Pedrosa and M. Isabel Ribeiro, Istituto Superior Técnico, PORTUGAL

Hidden Control Neural Network Identification-Based Tracking Control
of a Flexible-Joint Robot, Hunmo Kim, Samsung Data Systems Co. Ltd., KOREA
Joey K. Parker, University of Alabama, USA

-SPECIALIZED APPLICATIONS

A DSP96000 Automatic Inspection System for Printed Circuit Boards
Mohamed El-Sharkawy and Waleed Eshmawy, Purdue University, USA;
Ken Reid, Electronics Manuf. Productivity Fac., USA

Automatic Bubble Size-Detection Using the Zoom FFT
John Edwards, Loughborough Sound Images, UK

Digital Signal Processing for a Microprocessor-Based Ultrasonic Ranging
System, Robert X. Gao and Chuan Li, Louisiana Tech. University, USA

Quality Determination of Seed by X-Ray Testing and Computerized Image
Analysis, G. Polder, G.W.A.M. van der Heijden, W.J. van der Burg, and
J.W. Aartse, CPRO-DLO, NETHERLANDS

Beef Quality Grading Using Ultrasound Signal Processing, Alpesh Patel,
Viren Amin, Ronald Roberts, Doyle Wilson, & Gene Rouse, Iowa State Univ., USA

A New Decoding Algorithm for Binary Bar Codes
Joe (Zuguang) Cai, Symbol Technologies Inc., USA

-SPEECH CODING

Encoded Speech Intelligibility Improvements in the F/A-18 Noise
Environment Using Spectral Subtraction Pre-Processing, David Heide,
Naval Res. Lab., USA

A Real-Time Implementation of Formant Vocoder
Amir Aalam Ghazanfarian, Mohammad Reza Nakhai, and Mahmoud Tabiani,
Sharif University of Technology, IRAN
SPEECH CODING (continued...)

Real-Time Implementation of a Variable Rate CELP Speech Coder
Robert Zopf, Miron Cuperman, and Vladimir Cuperman,
Simon Fraser University, CANADA

Detection of Transient Signal by Optimal Choice of a Wavelet
Zheng Liu, Nagoya University, JAPAN

Two Band Excited Linear Predictive Speech Coding for Mobile Satellite
Communication Systems, S. Yeldener, and A.M. Kondo, and B.G. Evans,
University of Surrey, UK

A Low-Complexity High Quality Speech Coder for Multimedia Applications
Albert Hsuen, Eyal Shlomot, Qiang Ye, Mike Simpson, D. Braun, and Jim Johnston,
Rockwell Int'l. Corp., USA

Development of a Diphone-Based Korean Text-to-Speech Conversion
System, Minsoo Hahn, Siong Hun Yi, and Dong-Gyu Kang, ETRI, KOREA

Improving Time-Scale Modification of Audio Signals Using Wavelets
Miguel Angel Rodriguez-Hernandez and Francisco Javier Casajus-Quiros,
ETSI Telecomunicacion, SPAIN

A Complexity Reduction Method for VSELP Coding Using Overlapped Sparse
Basis Vectors, Ho Seung Shin, Samsung Electronics, KOREA; Seong Jong Park,
Sung Joo Kim, and Yung Hwan Oh, KAIST, KOREA

Speech Coders: G.711 and G.721 Implementation on the Motorola
DSP56100 Family, N.K. Sancheti, R. Subramaniyan, N. Srinivasa, and A. Hiregange,
Motorola India Electronics, INDIA

Real-Time Implementation of an 8-kbps Low-Delay CELP Coder
S.P. Chui and C.F. Chan, City Polytechnic of Hong Kong, HONG KONG

Investigations on the Full Duplex Implementation of the CCITT G.728
16-Kbit/sec LD-CELP Speech Codec, Zhao Chen, Kishan Jainandunsing, Kay Das,
and Victor Huang, Institute of Microelectronics, SINGAPORE

Real-Time Implementation of a Full-Duplex Wavelet-Based Monophonic
Audio Coder Using Two TMS320C31 Chips, Murtaza Ali and Ahmed H. Tewfik,
University of Minnesota, USA; Vishu R. Viswanathan, Wally Anderson, and
Jon Rowlands, Texas Instruments, USA

Non-Uniform Sampling Delta Modulation for Digital Audio
Y.S. Zhu and S.W. Leung, City Polytechnic of Hong Kong, HONG KONG

Implementation of Fixed-Point Low-Delay CELP on a Single ADSP-2171
Cole Erskine and Steve Ammon, Analogical Systems, USA

An Audio Codec Design for a Video Conferencing System Using the Motorola
DSP56156, Peter Cordell, British Telecom Labs, UK; Charles Cox, Signals &
Software Ltd., UK; and Mary Murphy, Motorola Inc., USA

Quality of Speech Codecs In Indoor Wireless Environment
Tony C.F. Ng, Hong Kong Polytechnic, HONG KONG
•SPEECH CODING (POSTER SESSION)

On Obtaining Parameters for a Model of Arabic Speech Production
Iman A. Maaly and Abdel R. Elobeid, University of Khartoum, SUDAN; Assim Sagahyroon, Northern Arizona University, USA

Sub-Adaptive Piecewise Linear Quantization for Speech Signal Compression
Isao Umoto, Akira Sasou, Shogo Nakamura, Yoshihiko Horio, and Tadahiro Kubota, Tokyo Denki University, JAPAN

•SPEECH RECOGNITION IMPLEMENTATION

Language Identification Methods Based on HMMs
Allan Reyes, Takashi Seino, and Seiichi Nakagawa, Toyohashi Univ. of Technology, JAPAN

Speech Recognition in Applications for Handicapped People
L. Lippmann jr., A.P. Pecoits, H.H.M. de Lima and P. Nohama, COPEL, BRAZIL

Voice Command Recognition Using Fuzzy Logic-Based Digital Filters
Christopher Hale and C.Q. Nguyen, Motorola, USA

Speaker Classification Based on Combined Neural Network and Fuzzy Decision, Bin Zhu, Univ. of Science & Technology, PR CHINA; Yisheng Zhu, Shanghai Jiao Tong Univ., PR CHINA

Development of a Speech-Based Menu-Selection Technique for the HiTEL Service in Korea, Hang Seop Lee, Young Joo Seo, Minsoo Hahn, Byeong Nam Yoon, ETRI, KOREA

CSPOT: A Real-World Corpus for Command Spotting
Colin W. Wightman and Gabriel Martinez, New Mexico Tech., USA

Advanced Key Word Spotting Algorithm for Vocal Command Recognition in Telephone Network Applications, Ami Moyal, Zeev M. Rannon, and Ilan D. Shallom, Natural Speech Communication Ltd., ISRAEL

An Acoustic Approach for Isolated Speech Recognition, A. Herrera, V.R. Algazi, and D. Irvine, Univ. Nacional Autónoma de México, MÉXICO

Commercializing Speech Recognition: Providing the Missing Link
Afarin O. Bellisario, Analog Devices, USA; Larry Gillick, Dragon Sys., USA

Wavelet Tranform Speech Recognition Using Vector Quantization, Dynamic Time Warping and Artificial Neural Networks, Murali Krishnan, Chris Neophytou, and Glenn Prescott, University of Kansas, USA

SPEECH RECOGNITION (POSTER SESSION)

Speech Segmentation and Clustering Based on Acoustic Gender Features
M. Sugiyama, University of Aizu, JAPAN

Robust Recognition via the Complex Bicepstrum of the Speech Signal
H. Fairhurst and C.C. Goodyear, University of Liverpool, UK
Development of a Simple VQ-Based Pre-Processor
Young Mok Ahn, Hoi Rin Kim, and Kyu Woong Hwang, ETRI, KOREA

• UNDERWATER & SONAR APPLICATIONS

A Signal Processing System for Underwater Acoustic Data Telemetry
Paulo Osorio, Jacques Szczupak, Alexandre Yamaoka, Paulo Pereira, and Rogerio Alves, PUC-Rio, BRAZIL

Design of an Underwater Acoustic Simulator with Programmable DSPs
Gerald Rolette, Naval Air Warfare Center, USA; Prashant Gandhi, Villanova University, USA

• VLSI ARCHITECTURES

A Systolic Structure for Median Filters
Zhijian Hu, G.A. King, and P. Adamopoulos, Southampton Inst., UK; D. Al-Dabass, Nottingham-Trent University, UK

VLSI Architecture for the Data Encryption Algorithm IDEA with Advanced On-Line Built-in Self-Test
Stefan Wolter, Research & Technology Centre, GERMANY; Holger Matz, Andreas Schubert, and Rainer Laur, University of Bremen, GERMANY

An LSI Implementation of a Heirarchical Structure FIR Filter
Hiroshi Matsumura, Yoshiko Matsumoto, and Shogo Nakamura, Tokyo Denki University, JAPAN

Unnormalized Fixed-Point Cordic Arithmetic for SVD Processors
E. Antelo and J.D. Bruguera, Univ. Santiago de Compostela, SPAIN; E. Zapata, Univ. de Málaga, SPAIN

A Novel Bit Cascadable Systolic 16 x 8 Truncated Signed Multiplier for Signal Processing
Tanay Krishna, Ctr. for Dev. of Telematics (C-DOT), INDIA

A Pipelined Architecture for VLSI Implementation of Quantizer/Inverse Quantizer Processor for Video CODEC
Jae Hyeoung Kim, Yong Moo Kwon, and Hyoun Goo Kim, KIST, KOREA; Nam-Ki Min, Korea University, KOREA

A High Throughput Programmable Decimation and Interpolation Filter
Y. Djadi, T.A. Kwasniewski, and C. Chan, Carleton University, CANADA
V. Szwarc, Communications Research Ctr., CANADA

On Portable Macro-Cell FPU Generators Using the Fully 754-IEEE Standard
Alain Houelle, Habib Mehrez, and Nicolas Vaucher, Université Pierre & Marie Curie, FRANCE
