Assistant Editors: J. W. Ramster, S. J. Smith

## Zooplankton Production

Guest Editor: R. Harris

## Contents

### Introduction

261

In memory of Dr John Gamble  
263

### I. Biomass and Production Measurements

- **Zooplankton: pivotal role in the control of ocean production**  
  265
- **Bioacoustical oceanography at high frequencies**  
  279
- **Egg production and the nutritional environment of *Acartia tonsa*: the role of food quality in copepod nutrition**  
  297
- **Aspartate transcarbamylase activity for the assessment of mesozooplankton production: new aspects from oceanic areas**  
  305
- **Egg production and secondary production of common North Sea copepods: field estimates with regional and seasonal comparisons**  
  315
- **Polar herbivorous copepods — different pathways in lipid biosynthesis**  
  329
- **Zooplankton grazing, phytoplankton growth, and export flux: inferences from chlorophyll tracer methods**  
  337
- **Algal constraints on copepod grazing. Growth state, toxicity, cell size, and season as regulating factors**  
  347
- **Towards the measurement of secondary production and recruitment in copepods**  
  359
- **Can we use laboratory reared copepods for experiments? A comparison of feeding behaviour and reproduction between a field and a laboratory population of *Acartia tonsa***  
  369
- **The use of aspartate transcarbamylase activity to estimate growth rates in zooplankton**  
  377
- **Omnivory and feeding selectivity in five copepod species during spring in the Bellingshausen Sea, Antarctica**  
  385
- **Assessing the equivalence of growth and egg production of copepods**  
  397
- **The Ichthyoplankton Recorder: a video recording system for *in situ* studies of small-scale distribution patterns**  
  409
- **Measuring selectivity of feeding by estuarine copepods using image analysis combined with microscopic and Coulter counting**  
  419
II. Regional Interactions of Physics and Population Dynamics

S. L. Smith
The Arabian Sea: mesozooplankton response to seasonal climate in a tropical ocean 427

Copepod production in the Southern Benguela system 439

M. E. Huntley and P. P. Niiler
Physical control of population dynamics in the Southern Ocean 457

H. P. Batchelder and R. Williams
Individual-based modelling of the population dynamics of Metridia lucens in the North Atlantic 469

Ø. Fiksen and J. Giske
Vertical distribution and population dynamics of copepods by dynamic optimization 483

W. Greve
Mutual predation causes bifurcations in pelagic ecosystems: the simulation model PLITCH (PLanktonic swITCH), experimental tests, and theory 505

J. Mauchline
Bathymetric adaptations of life history patterns of congeneric species (Euchaeta: Calanoida) in a 2000 m water column 511

M. D. Ohman and S. N. Wood
The inevitability of mortality 517

G. Pederson, K. Tande, and G. O. Ottesen
Why does a component Calanus finmarchicus stay in the surface waters during the overwintering period in high latitudes? 523

C. Richter
Seasonal changes in the vertical distribution of mesozooplankton in the Greenland Sea Gyre (75°N): distribution strategies of calanoid copepods 533

S. B. Schnack-Schiell and W. Hagen
Life-cycle strategies of Calanoides acutus, Calanus propinquus, and Metridia gerlachei (Copepoda: Calanoida) in the eastern Weddell Sea, Antarctica 541

H. G. Fransz and S. R. Gonzalez
The production of Oithona similis (Copepoda: Cyclopoida) in the Southern Ocean 549

J. D. Stockwell and W. G. Sprules
Spatial and temporal patterns of zooplankton biomass in Lake Erie 557

III. Food Chain Control

J. H. Steele and E. W. Henderson
Predation control of plankton demography 565

C. E. Mills
Medusae, siphonophores, and ctenophores as planktivorous predators in changing global ecosystems 575

L. P. Madin and P. Kremer
Determination of the filter-feeding rates of salps (Tunicata, Thaliacea) 583

M. Omori, H. Ishii, and A. Fujinaga
Life history strategy of Aurelia aurita (Cnidaria, Scyphomedusae) and their impact on the zooplankton community of Tokyo Bay 597

I. R. Jenkinson
A review of two recent predation-rate models: the dome-shaped relationship between feeding rate and shear rate appears universal 605

IV. Spatial/Temporal Variability and Prediction

D. H. Cushing
The long-term relationship between zooplankton and fish 611

M. Heath
Size spectrum dynamics and the planktonic ecosystem of Loch Linhe 627

S. A. Piontkovski and R. Williams
Multiscale variability of tropical ocean zooplankton biomass 643

O. S. Astthorsson and A. Gislason
Long-term changes in zooplankton biomass in Icelandic waters in spring 657
Eleven years of time-series analysis on the net-zooplankton community in the Gulf of Trieste
669

Recurrent patterns in zooplankton structure and succession in a variable coastal environment
679

A modelling investigation of copepod egg production in the Irish Sea
693

Size-based biomass and production models in the St Lawrence Great Lakes
705

North–south shifts of the Gulf Stream and their climatic connection with the abundance of zooplankton in the UK and its surrounding seas
711

Modelling oligotrophic zooplankton production: seasonal oligotrophy off the Azores
723

Modelling of the Mnemiopsis sp. population in the Azov Sea
735

Seasonal variations of mesoplankton biomass in the upper layer of the Bering Sea: understanding biomass oscillations in the ocean
747
