American Helicopter Society
Northeast Region

2ND INTERNATIONAL AEROMECHANICS SPECIALISTS' CONFERENCE
AEROMECHANICS TECHNOLOGY & PRODUCT DESIGN FOR THE 21ST CENTURY

October 11 - 13, 1995
Bridgeport, Connecticut

PROCEEDINGS Volume II
Integrated Rotor-Flight Control System Optimization with Aeroelastic and Handling Qualities Constraints, by V. Sahasrabudhe, R. Celi and A.L. Tits, University of Maryland. page 4-1

Methodology for Assessment of Helicopter Maneuverability and Agility Using Ground Based Simulation, by T.H. Lawrence, S. Corning and F.W. Wharburton, Sikorsky Aircraft Corporation. page 4-29

A Blade Element Tail Rotor Model with Main Rotor / Ground Interference for Yaw Control, by C.S. Lee, C.J. He and Y. Xue, Advanced Rotorcraft Technology, Inc. page 4-48

Carefree Handling for Super-Agility, by J. Howitt, Defence Research Agency, UK. page 4-58

Frequency Response Sensitivity Functions for Helicopter System Identification, by C.T. Jones and R. Celi, University of Maryland. page 4-70

VOLUME II

Session V: Acoustics
Session Chairman: Ken Brentner, NASA Langley

Measurements of Rotor Tip Vortices Using Three-Component Laser Doppler Velocimetry, by J.G. Leishman, A. Baker and A. Coyne, University of Maryland. page 5-37

Helicopter Noise Measurements at High Advancing Blade Mach Number - A Novel Approach to Full Scale Flight Testing, by A.C. Pike and R.J. Harrison, Westland Helicopters. page 5-84

Use of Damping Treatments in Boundary Element Analysis for Helicopter Interior Noise Reduction, by E.B. Bianchini, AFGA Division of Bayer, and C.S. Pates III, Roush Anatrol Inc. (not available at time of printing)

Parallel Blade-Vortex Interactions: An Experimental Study and Comparison with Computations, by C. Kitaplioglu, NASA Ames Research Center, F.X. Caradonna, U.S. Army, AFDD, and C.L. Burley, NASA Langley Research Center. page 5-95
Session VI: Aerodynamics II

Session Chairman: Frank Caradonna, U.S. Army, AFDD

Status of Euler and Navier-Stokes CFD Methods for Helicopter Applications, by G.R. Srinivassan, JAI Associates, and L.N. Sankar, Georgia Institute of Technology. page 6-1

Navier-Stokes Computation of Unsteady Internal Airloads, by J.C. Narramore, Bell Helicopter Textron, Inc. page 6-38

A Comparison of Computed and Experimental Flowfields of the RAH-66 Helicopter, by E.P. Duque, J.D. Berry, U.S. Army, AFDD, A.C. Diamanlig and A.M. Budge, University of California, Davis. (not available at time of printing)

Application of Multigrid CFD Methods to Rotor Analysis, by H. Hu, Hampton University. page 6-59

Session VII: Active Controls

Session Chairman: Don Merkley, U.S. Army, AATD

Helicopter Individual-Blade-Control: Promising Technology for the Future Helicopter, by N.D. Ham, Massachusetts Institute of Technology. page 7-1

Helicopter Vibration Reduction with Trailing Edge Flaps, by J. Milgram and I. Chopra, University of Maryland. page 7-27

On Performance Functions and Control Mechanisms for Interior Noise Control, by A. Sampath and B. Balachandran, University of Maryland. page 7-61
Design and Control Strategies Using Smart Structures Technology for Rotorcraft Performance Enhancement, by T.R. Quackenbush and R.M. McKillip, Jr., *Continuum Dynamics, Inc.* page 7-71

Reconfigurable Controls for Rotorcraft - A Feasibility Study, by M.W. Heiges, *Georgia Tech Research Institute.* page 7-86

Session VIII: Dynamics II

Session Chairman: Sam Crews, U.S. Army, ATCOM

Correlation Studies for Hingeless Rotors in Forward Flight using 2GCHAS, T.A. Millott, P.P. Friedmann and K-A Yuan, *University of California, Los Angeles.* page 8-1

On the Blade Deformation Measured on a Scaled Helicopter Rotor, by E. Mercker, K. Pengel, DNW, Netherlands, R. Kube, B.v.d. Wall, DLR, Germany, A. Boutier, J. Lefevre, ONERA, France. (not available at time of printing)
