8th International Conference & Exhibition for the Power Generating Industries

December 5-7, 1995
Anaheim Convention Center - Anaheim, California

BOOK II

B. ENVIRONMENTAL ISSUES

VOLUME 1 - REGULATIONS & ENVIRONMENTAL
VOLUME 2 - COMPLIANCE & OPERATIONAL STRATEGIES
VOLUME 3 - ENVIRONMENTAL TECHNOLOGIES

For additional information and missing papers, contact the POWER-GEN Management office:

# TABLE OF CONTENTS

## BOOK II

### VOLUME 1 - REGULATION & MANAGEMENT

#### State & Federal Permitting Requirements

- **The Future of Emission Trading in Light of the Acid Rain Experience**
  Brian McLean, Acid Rain Division, U.S. Environmental Protection Agency
  1
- **Local Government Role in Power Plant Permitting**
  R. Zwolak, Principal Environmental Planner, KBN Engineering & Applied Sciences, Inc.
  13
- **90's for the 90's- High Efficiency Dry Flue Gas Desulphurization**
  Thomas E. Pearson, DFGD Technical Manager, ABB Environmental Systems
  John Buschmann, DFGD Product Manager, ABB Environmental Systems
  29
- **Obtaining an Air Permit for a Biomass-Fired Power Plant**
  Joel I. Reisman, Principal, Joel I. Reisman, REA
  51

#### Power Plant Siting & Reuse of Oldsites

- **Siting Issues - Florida Specific**
  Mr. Hamilton (Buck) Oven, Administrator, Siting Coordination Office, Florida Department of Environmental Protection
  63
- **Environmental Strategies for Gaining Approval of International Power Projects**
  Dr. James R. Newman, Vice President, Director of International Programs, KBN Engineering and Applied Sciences, Inc.
  NA
- **Investigation and Remediation of Oil & Hazardous Substance Contamination**
  - An Approach for Electric Power Companies
  Rodd D. Staker P.E., Manager, Electric Power Services, Burns & McDonnell Waste Consultants
  69
- **Reengineering the Regulatory Process with Mediation & Consensus Building**
  Christopher Kane, P.E., Principal, ER3 Inc.
  Tim Flaherty, The Keystone Center
  NA

#### Air & Waste Management

- **High Hurdles Achieved in SO₂ and NOₓ Emissions Monitoring**
  Elliott Leiberman, Acid Rain Division, U.S. Environmental Protection Agency
  NA
- **Conversion of Existing Oil Storage Tank to a Dry Fly Ash Storage and Sale Facility**
  William Beidleman, Technical Manager, Fuller Kovaco Corporation
  Louis J. Mankowski, Supervising Engineer, Public Service Electric & Gas Company
  75
S. Gauntlett, President, The Gauntlett Group, Inc.
Jeffrey L. Pierce, P.E., Project Manager, SCS Engineers

Pollution Prevention and Waste Minimization: An Approach for Electric Power Companies .................................................................................................................. 99
Rodd D. Staker P.E., Manager, Electric Power Services, Burns & McDonnell Waste Consultants
W. David Jenkins, Senior Environmental Scientist, Cinergy

Developing Compliance Management Issues

Regulatory Compliance - An Integrated Approach to Meeting Regulatory Challenges ................................................................. 115
Robert Klusman, Process Industry Specialist, EDU-TECH Industries

Logan Generating Plant: State-of-the-Art Environmentally Friendly ..................................................................................... 128.1
Ted W. Vanvick, Project Manager, Bechtel Power Corporation

Title V Case Studies for Two Combined Cycle Cogeneration Facilities ......................................................................................... NA
Kent Kading, Director of Air Quality Services, EMCON
Anita Lindell, EMCON
Erin Miller, EMCON
Greg Kunkel, Tenaska, Inc.

Overseeing Stack Test Programs at Power Production Facility .......................................................................................... 129
Edward J. Filadelphia, Program Manager, Carnot

VOLUME 2 - COMPLIANCE AND OPERATIONAL STRATEGIES

SO\textsubscript{2} Compliance: Emission Allowances & Fuel Switching Issues

A Coal Sulfur Premium Models for SO\textsubscript{2} Allowance Valuation ................................................................................................. 135
John B. Henry II, Managing Partner, Clean Air Capital Markets
David R. Radulski, Vice President, Clean Air Capital Markets

Real-World Strategies for Powder River Basin Coal Conservation - Cost & Compliance ......................................................... 141
Donald Pacer, Principal Design Engineer, Duke / Fluor Daniel
Malla Reddy, Senior Project Director, Duke/Fluor Daniel, Inc.

The Use of Hedging Techniques in a Prudent SO\textsubscript{2} Compliance Strategy .................................................................. NA
Kendal Johnson, Tradition Financial Services Inc.

Allowance Market Development Update and Outlook ......................................................................................... NA
William H. Babcock, Director, Putnam, Hayes, and Bartlett
NO\textsubscript{x} Compliance

Low NO\textsubscript{x} Retrofit of a NSPS Boiler Burning Sub-Bituminous Western Fuel........................................................................ 159
Michael Coxtanzo, Project Manager, Babcock & Wilcox Company
D.M. Perry, Babcock & Wilcox
J. Shalman, Public Service Company of Colorado

Title IV - Phase II NO\textsubscript{x} Compliance Strategy for Minnesota Power.............................................................................. 169
Eric Mazzi P.E., Project Engineer, Camnela Rossi-Lane and
Richard Hines, Carnot
Mark Schamott, Minnesota Power

Helping The Utility Compete and Comply: Lessons Learned Lead to Informed Decision Making for NO\textsubscript{x} Emissions Reductions............................................................ 193
John R. Cochran, Vice President, Black & Veatch
Michael G. Gregory, Black & Veatch
Volker Rummenhohl, Manager, STEAG, A.G.

Evaluation of Hybrid SNCR/SCR for Use on Utility Boilers:
Implications for Title I.......................................................................................................................... NA
J. Boyle, Nalco Fuel Tech

Air & Water Compliance Strategies

Avoiding The Midnight Phone Calls
Establishing Reasonable Noise Criteria & Designing for Acceptable Community Response........................................................................ 217
John Erdreich Ph.D., Principal, Ostergaard Acoustical Associates
Edward M. Clark, P.E. Principal, Ostergaard Acoustical Associates

“Model” Risk Management Plans........................................................................................................ NA
Larry R. Alfred, Black & Veatch

Physical Model Studies of Cooling Panel Water Quality.................................................................................. 225
Harold A. Frediani Jr., Supervising Engineer,
Raytheon Environmental Services Company
Wayne C. Ondler, Manager, Florida Power & Light
Patricia Palmer, Environmental Engineer, Foster Wheeler Environmental Corp.

Integrated Environmental Strategies

Air Quality Permitting Strategies; Providing Flexibility for Considering Multiple Vendor Combined-Cycle Advanced Gas Turbines.................................................................. NA
Walter J. Russell, Vice President, EMCON

Mitigation of the Impacts of Electric Power Generation.................................................................................. 243
Alistair C.D. Leslie, Senior Scientist, Energetics, Inc.
Yvonne Weber, Ph.D., Senior Environmental Scientist,
U.S. Department of Energy

Making the Energy Facility Permitting Process Work: Strategies for Developers and Agencies................ 254
David Maul, Policy Advisor, California Energy Commission
Bob Therkelsen, Deputy Director, California Energy Commission
GIS Applications To Power Plant Development And Management
Randy Schulze, Associate, Dames & Moore

Design Of An Alternative Emissions Monitoring System For Clear Air Compliance
William Eberhandt, Project Engineer, ENERTEC Inc.

VOLUME 3 - ENVIRONMENTAL TECHNOLOGIES

Air Toxics - Particulate Control

Control of Air Toxics In an Electrostatic Precipitator for Coal, Fuel Oil and Orimulsion Fired Boilers
Gary J. Grieo, Consultant, Stone & Webster Engineering Corporation
Chris Wedig, FGC Consultant, Stone & Webster Engineering Corporation

Coal Ash Characterization And Precipitator Performance
Sivats Srinivasachor, ABB Power Plant Research
Keith Bradburn, Director Pre-Contract, ABB Environmental Systems

Assessing Technologies And Costs Of Trace Element Control
K.S. Kumar, Director of Project, AAOR, Environmental Elements Corporation

Update on Enhanced ESP Fine Particle Control
Dr. H. V. Krigmont, QEP President, Allied Environmental Technologies Company

SOx Control

Next Generation Low Cost Wet FGD
James S. Klingspore, Director of Technology & Development, ABB Environmental Systems
B.E. Bresowar, Manager, Business Development, ABB Environmental Systems
D.E. Gray, Ohio Edison Company

Phase II - The Age Of High Velocity Scrubbing
Bruce Lani, Project Manager, Dravo Lime Company

Startup of the First Circulating Dry Scrubber System in North America
John Toher, Director of Business Development, Environmental Elements Corporation

Ammonia Scrubbing - The Most Economical Solution for SO2 Control
Gregory N. Brown, Lead Process Engineer, GE Environmental Systems

Penelec Conemaugh Station Wet FGD Retrofit: On Time, On Budget, On Target
Phil Rader, Project Engineer, ABB Environmental Systems
Tom Wilson, Pennsylvania Electric Company
Tim Thomas, Raytheon Engineers & Constructors
Boiler NOx Control

Operational Results of a Low NOx Burner Retrofit on a 780mw PC-Fired Utility Boiler........................................ 317
Terry Tucker, Project Manager, Babcock & Wilcox Company
S. A. Bryk and F.L. Cioffi, Manager Combustion Systems,
Babcock & Wilcox
J.G. Mellody, Senior Plant Reliability Engineer, Ohio Edison Company
M.E. Hooks, Pennsylvania Power Company

Engineering Assessment of a Lower Cost Combined Low NOx Burner-SCR System................................. 324
Don Teixeira, Technical Manager R & D, Pacific Gas & Electric

NOx Control by Flame Management................................................................................................. 349
J.W. Allen, Special Combustion Project Manager, Rolls-Royce Industrial Power Group
P.R. Beal, Business Development Manager, Rolls-Royce Industrial Power Group

Recent Experience With Advanced Low NOx Burners for Electric Utility Boiler Applications................... NA
M.N. Mansour, President, AUS Combustion Company

Successful Multi-Technology NOx Reduction Project Experience
at New England Power Company Salem Harbor Station.............................................................. 365
William Boyle, Project Manager, DB - Riley Intl. Inc.

Liquid / Solid Effluent Management

Utilization of Fluidized Bed Combustion Ash.................................................................................. 379
Robert L. Syendsen, Project Engineer, Foster Wheeler Power Systems, Inc.

The Staged Cooling Process: A Practical Approach to Zero Wastewater Discharge............................. 387
Dick Lancaster, Partner, Eau Tech Partners
W. G. Sanderson, Partner, Eau Tech Partners

Results of Magnesium Hydroxide Recovery Testing at the Wm H Zimmer Station............................... 401
Kevin Smith, Product Manager, Dravo Lime Company
W. Inkenhaus, Dravo Lime Company
M. Baber, Dravo Lime Company
K. Davis, The Cincinnati Gas & Electric Company

Application of Full-Scale Soil/Sediment Washing & Fly/Bottom Ash Dredge
Spoil Dewatering Systems.......................................................................................................... NA
Scott C. O'Brien, Bergmann, USA Title Company

Pressurized Fluidized Bed Combustion Ash Management Options.................................................. 415
Alen E. Bland, Program Manager, Western Research Institute
T.H. Brown, Western Research Institute
L.J. Young, Foster Wheeler Corp.
J.M. Wheeldon, Electric Power Research Institute
