# TABLE OF CONTENTS

## SESSION 1

**ASH FORMATION AND BEHAVIOR IN POWER SYSTEMS**

Chairs:
S. Benson, University of N. Dakota
R. Conn, Foster Wheeler Development Corp.

<table>
<thead>
<tr>
<th>Title</th>
<th>Speaker, Institution</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Review of Ash in Conventional and Advanced Coal-Based Power Systems</td>
<td>N. Holcombe, U.S. DOE/METC</td>
<td>1</td>
</tr>
<tr>
<td>Advanced Coal-Fired and Biomass Ash and Char Formations</td>
<td>M.A. Alvin, Westinghouse Science and Technology Center</td>
<td>7</td>
</tr>
<tr>
<td>A Study on the Slagging Behavior of Coal Ash in Gasifier Using DTF</td>
<td>H.T. Kim, S-W Chung, S-H Lee, Ajou University, KOREA</td>
<td>13</td>
</tr>
<tr>
<td>Development of a Stack-Plume Opacity Index for Subbituminous Coal-Fired Utility Boilers</td>
<td>K. Galbreath, C. Zygarlicke, D. Toman, D. McCollor, University of North Dakota</td>
<td>19</td>
</tr>
<tr>
<td>Prediction of Ash Deposition Propensities at Two Coal-Fired Power Stations in Denmark</td>
<td>F. Frandsen, K. Dam-Johansen, Technical University of Denmark, K. Laursen, O. H. Larsen, Geological Survey of Denmark, DENMARK</td>
<td>27</td>
</tr>
<tr>
<td>Advances in the Dynamic Prediction of Ash Deposition</td>
<td>T.A. Erickson, S.E. Allan, D.P. McCollor, University of North Dakota, D. Ferguson, Black &amp; Veatch</td>
<td>33</td>
</tr>
<tr>
<td>Coal Ash Deposits: Effects on Tube Wastage</td>
<td>D. Kalmanovitch, Riley Stoker Corporation</td>
<td>40</td>
</tr>
</tbody>
</table>

## SESSION 2

**SMALL SYSTEMS FOR RURAL AREAS**

Chairs:
S. Smouse, U.S. DOE/PETC
S. Harding, Reaction Engineering

<table>
<thead>
<tr>
<th>Title</th>
<th>Speaker, Institution</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Small-Scale Circulating Fluidized Bed Combustor (CFBC) Systems for Heat and Power in Remote Areas</td>
<td>J. Stuart, J. Korenberg, DONLEE Technologies, Inc.</td>
<td>41</td>
</tr>
<tr>
<td>Small-Scale Coal-Diesel/Renewable Systems for Rural Heat and Power</td>
<td>R.P. Wilson, S.J. Hynek, A.D. Little Corp.</td>
<td>42</td>
</tr>
<tr>
<td>Micronized Coal Firing: Boiler Facility &amp; Potential Utility Applications</td>
<td>P.J. Damiani, R.J. Teachout, SE Technologies, Inc., D.P. Finn, Babcock &amp; Wilcox Co.</td>
<td>44</td>
</tr>
</tbody>
</table>
SESSION 3
IGCC - I
Chairs:
D. Brdar, U.S. DOE/METC
M. Epstein, EPRI

Two Years' Successful Operation of a Hot Gas Filter in the Rheinbraun High Temperature Winkler Coal Gasification Demonstration Plant
R. Wischnewski, J. Engelhard, Rheinbraun AG, GERMANY ........................................... 52

PRENFLO for the European IGCC at Puertollano
W. Schellberg, Kurpp Kappers GmbH, GERMANY ............................................................. 58

Integrated Coal Gasification and Methanol Synthesis Power Plants:
Part II. Parametric Analysis and Performance Evaluation
G. Cau, R. Carapellucci, D. Cocco, University of Cagliari, ITALY ........................................ 64

The Construction, Start-Up and Operation of the Repowered Wabash River Coal Gasification Project
M. Roll, Destec Energy, Inc. ..................................................................................................... 72

Demkolec IGCC Project Update
R.W. Regenbogen, Shell Internationale Petroleum Mij.B.V.,NETHERLANDS ........................................ 78

Tampa Electric Company's Polk Power Station IGCC Project
S. Jenkins, Tampa Electric Company, Power Services Corporation ........................................ 79

SESSION 4
RETROFIT AIR QUALITY CONTROL TECHNOLOGIES
Chairs:
C. Drummond, U.S. DOE/PETC
W. Chow, EPRI

Wastefree In-Duct FGD
S.G. Nelson, Sorbent Technologies Corp. ........................................................................ 80

Using High Temperature Baghouses to Enhance Desulfurization Following Economizer Sorbent Injection
G. Li, T. Keener, University of Cincinnati ........................................................................ 86

Demonstration of COHPAC II for Control of Fine Particulate Emissions and Air Toxics from Coal-Fired Power Plants
K. Cushing, W. Harrison, Southern Research, R. Chang, EPRI .......................................... 92

Investigation of High Gas Velocity on FGD Performance in an Open Spray Tower
OW. Hargrove, Jr., Ron Skarupa, T.R. Carey, Radian Corp., R.E. Moiser, EPRI ..................... 98

Alternative Technologies to Optical Monitoring Systems Relating to Regulatory Compliance (Title V)
M. Santschi, BHA Group, Inc. ............................................................................................. 104

SESSION 5
FUNDAMENTAL CHARACTERISTICS OF COAL COMBUSTION BY-PRODUCTS & IMPACTS ON UTILIZATION
Chairs:
S. Bossart, U.S. DOE/METC
D. Hassett, University of N. Dakota

Clean Wastes from Advanced Coal Combustors
C. Kilgour, C. Chiswell, M. R. Dawson, Iowa State University ........................................... 115

Influence of Conversion to Low NOx Combustion on Fly Ash Petrology and Mineralogy: A Case Study
T. Robl, J. C Hower, U. Graham, R. Rathbone, University of Kentucky ................................ 121

Column Leaching Tests of Coal Combustion By-Products
A. Kim, F. Sharp, U.S. Bureau of Mines ............................................................................ 126

Composition Effects on Durability of Aggregates Made from Coal Combustion By-Products
M. Wu, R. A. Wischel, G. E. Wasson, CONSOL Inc. ........................................................... 132

Heat of Hydration for Fly Ash as a Predictive Test
D. Hassett, University of North Dakota .................................................................................. 138

Chemistry, Mineralogy and Artificial Weathering of PFBC By-Products
R. K. Fowler, U. I. Soto, J. M. Bigham, Ohio State University .................................................. 139

SESSION 6
LOW RANK COAL UPGRADING
Chairs:
K. Rhee, U.S. DOE/PETC
H. Lebowitz, Fossil Fuel Services

Lignite in North Dakota
C. Porter, Lignite Energy Council ....................................................................................... 145

Encoal Mild Coal Gasification Project
L. White, J. P. Frederick, Encoal Corp. ............................................................................. 151

Application of a Boiler Performance Model to Evaluate Low-Rank Coal Fired Subcritical and Supercritical Boilers
Y.K. Ahn, T.L. Buchanan, R. Zaharchuk, Gilbert/Commonwealth, Inc. ................................. 157

Oxidation Properties of Processed Low-Rank Coals
K. Schroeder, D. Fauth, U.S. DOE/PETC ........................................................................ 165

Production of a High Energy, Low Sulfur Fuel with the Carbondry Process
Jay Simmons, John Simmons, Carbonlne Energy Corporation .............................................. 171

SESSION 7
IGCC - II
Chair:
R. A. Olliver, Foster Wheeler Corp.

High Performance Two-Stage Entrained-Flow Coal Gasifier for Integrated Gasification-Combined Cycle
A. Morihara, S. Koyama, Hitachi, Ltd., JAPAN .................................................................. 172
Integrated Coal Gasification and Methanol Synthesis Power Plants: Part I. Assessment of the Coal-to-Methanol Conversion Process
G. Cau, R. Carapellucci, D. Cocco, University of Cagliari, ITALY .................................................. 173

Development of 3 T/D Coal Gasification System in Korea
Y. Yun, J. Lee, C. Lee, Y. Yoo, Electric Power System Lab., H.T. Kim, S. Oh, K. Chung, Ajou University, KOREA .......................................................... 181

A Study on the Impacts of Changes in Coal Quality on the Performances of Gasification Processes and IGCC

Ammonia and Its Control in Coal Clean Technology Systems
J. Norman, M. Pourkashanian, A. Williams, University of Leeds, UK .................................................. 193

The IGCC European Scene
G. L. Farina, Foster Wheeler International Corp., ITALY ................................................................. 199

SESSION 8
FLUIDIZED BED COMBUSTION
Chairs:
W. Buttermore, Iowa State University
W. Lan, U.S. DOE/METC

Evaluation of Sulfation Rates Using Transient Emission Profiles from a Fluidized Combustor
T. Thiede, R.C. Brown, Iowa State University ................................................................. 206

Coal Devolatilization and Char Combustion Study Using FTIR Spectroscopy
T. Raines, R. Brown, Iowa State University ......................................................... 212

SO\textsubscript{2} and NO\textsubscript{2} Control in PYROFLOW Circulating Fluidized-Bed Boilers
A. Ganesh, C. Johnk, Ahlstrom Pyropower, Inc. .................................................. 218

The Role of Thermally Induced Fractures in the Calcination and Sulfation Behavior of Sorbents In Fluidized Bed Combustion
Ye Liu, A. Scaroni, J. Morrison, The Pennsylvania State University .................................................. 219

Design and Operation of a PFBB Ash Cooler
D. Rong, X. Chen, X. Shen, Thermoeenergy Engineering Research Institute, Southeast University, CHINA .................................................. 225

The Characteristics of Coal Devolatilization in PFBS
K. Xu, D. Rong, X. Shen, Southeast University, CHINA .................................................. 230

SESSION 9
CLEAN-UP TECHNOLOGIES FOR ADVANCED POWER SYSTEMS
Chairs:
L. Strickland, U.S. DOE/METC
A. Furman, General Electric Co.

Comparison of Calcium-Based Sorbents for Coal Gas Desulfurization
L. Fenoul, S. Lynn, University of California ................................................................. 231

Moving Granular Bed Filter for Multi-Contaminant Control

Shell/METC High Temperature High Pressure Filtration Program
J. Salters, Shell Synthetic Fuels, Inc., J. Rockey, US DOE/METC .................................................. 243

Integrated Carbonizer/CPFBC Pilot Plant
A. Robertson, J. Van Hook, Foster Wheeler Development Corp. .................................................. 254

Particulate Control Device (PCD) Testing at the Power Systems Development Facility, Wilsonville, Alabama
J.R. Longobach, METC/DOE .................................................. 260

Dust Filtration in Hot Coal Gas
H. Schreurs, THE NETHERLANDS .................................................. 266

Development of Hot Gas Filtration for Air Blown Gasification Plant
P. Cahill, M. Dutton, P. Sage, G. Rasmussen, M. Tustin, British Coal, UK ........................................ 271

Gas-solid Reactors for High Temperature Removal of Acid Gases from Fuel Gas and Flue Gas
W. Prins, A.G. J. van der Ham, W.P.M. van Swaaija, A.B. M. Heesink, University of Twente, THE NETHERLANDS .................................................. 278

SESSION 10
ISSUES & STRATEGIES FOR COAL COMBUSTION BY-PRODUCTS
Chairs:
T. Blackstock, American Coal Ash Association
J. Roewer, Edison Electric Institute

Fluid Placement of Fixed Scrubber Sludge to Reduce Surface Subsidence and to Abate Acid Mine Drainage in Abandoned Underground Coal Mines

FGD Gypsum and FBC Byproducts to Overcome Subsurface Acidity Effects on Wheat Grown in an Acid Soil
K.D. Ritchey, M. Zafiriad, R.B. Clark, V.C. Baligar, D.C. Martens, USDA-ARS ........................................ 292

Economics of Coal Combustion Residue Transportation
H. Sevim, S. Gwamaka, Southern Illinois University .................................................. 298

Development of Minnesota Coal Ash Utilization Regulations
C. Latham, Minnesota Pollution Control Agency .................................................. 305

SESSION 11
ADVANCES IN COAL PREPARATION
Chairs:
J. Stencel, University of Kentucky
D. Finseth, U.S. DOE/PETC

Coal Cleaning in a Mag-Mill

Size Segregation of Component Coals During Pulverization of High Volatile/Low Volatile Blends
A. Davis, Penn State University, P. C. Orban, Pennsylvania Electric Co. .................................................. 312

Effects of the Entrained Flow Splitter on a Tribo-Electrostatic Fine Coal Separator
D. Finseth, U.S. DOE/PETC, W. Gerstler, Oak Ridge Associated Universities .................................................. 318
Triboelectric Separation of Coal from Mineral Impurities
M.K. Mazumder, K.B. Tennal, M. McKendree, D. Lindquist, University of Arkansas 319

Quantifying Pulverizer Induced Charge in a Utility Boiler
J. Schaefer, H. Ban, K. Saito, J.M. Stencel, CAER 320

Axial Flow Reversal and Its Significance in Air - Sparged Hydrocyclone (ASH) Flotation
J.D. Miller, D. Yin, A. Das, University of Utah 326

Dewatering of Fine Coal Using Hyperbaric Filter
B.K. Parekh, J. Yang, X. H. Wang, CAER-University of Kentucky 333

Reduction of Phosphorous and Alkali Levels in Coking Coals
I. Hoare, A.B. Waugh, CSIRO Division of Coal & Energy Technology, AUSTRALIA 339

SESSION 12
NONFUEL USE OF COAL
Chairs:
F. Derbyshire, University of Kentucky
C. Irwin, West Virginia University

Evaluating Some Key Properties of Cokes for Iron Foundries
B. Young, M.A. Musich, ERC, University of North Dakota 345

A Comparative Study on the Synthesis of Carbon Fibers and Activated Carbon Fibers from Various Coal Liquids
Y. Q. Fei, G. M. Kimber, F. J. Derbyshire, CAER, University of Kentucky 352

Treatment of Heavy Metal-Bearing Wastewaters Using Activated Carbon
B. Reed, West Virginia University, B. Thomas, Northams Inc. 358

C. Kruse, Illinois State Geological Survey 364

Pyrocarbon from Polymers to Use in the Carbon Products Industry
F. Barca, University “Politehnica” Bucharest, N. Brandas, G. Paraschivescu, C. Panaitescu, ROMANIA 370

Experiment for Preparing Coal-Based Low-Ash Activated Carbon
Z. Wang, China University of Mining & Technology, CHINA 371

SESSION 13
HOT GAS CLEANUP FOR PARTICULATE REMOVAL
Chairs:
T. Dorchak, U.S. DOE/METC
S.K. Gangwal, Research Triangle Institute

Development and Commercialization of Hot Gas Filters for Power Generation Applications
T. Lippert, M. A. Alvin, G. Bruck, D. Bachovchin, R. Newby, Westinghouse STC 372

Design Criteria for High Temperature Filters
W. Peukert, Hosokawa MikroPul, GERMANY 373

Dust Properties and Cleaning Systems as Factors in Pressure loss of Hot Coal Gas Filtration
S. Ito, T. Tanaka, CRIEPI, S. Kawamura, Mitsubishi Heavy Industries, Ltd., JAPAN 379

SESSION 14
INSTRUMENTATION AND CONTROLS
Chair:

Rapid Analysis of Mineral Coal by an Optical Technique
S. M. Mahajan, S. Munukutla, R. D. Sexton, Tennessee Technological University 410

In-Process Particle Size Distribution Measurements and Control
D.J. Holve, M.P. Bonin, T.L. Harvill, INSITEC 416

The Measurement of Unburned Carbon in Fly Ash Using Infrared Photoacoustics
D. Waller, R.C. Brown, Iowa State University 417

Special Measurements in Combustion Equipment Furnaces
T. Ochodek, R. Janalik, T. Vytisk, VSB-Technical Univ. of Ostrava, CZECH REPUBLIC 423

In Situ FT-IR Diagnostics for Monitoring and Control of Fossil Fuel Combustion
A.S. Bonanno, M. A. Wojtowicz, M. A. Serio, C.M. Nelson, P. R. Solomon, Advanced Fuel Research, Inc. 429

Progress Report on the Development and Demonstration of the Generic Nox Control Intelligent System (GNOCIS)
J. Sorge, Southern Co. Services, B. Menzies, Radian Corp., T. Brown, U.S. DOE 435

Intelligent Emission Controls
J. Dunphy, F.O. Heims, Lockheed-Martin, R. Mancini, D. Saunders, NYSEG 436

Analysis of Nitrous Oxide Emissions from Conventional Combustion Processes
D. Juchelkova, P. Danihelka, P. Kula, VSB-Technical University, CZECH REPUBLIC 437

SESSION 15
COAL CLEANING TECHNOLOGY
Chairs:
T. Feeley, US DOE/PETC
B. Morsi, University of Pittsburgh

The Flotation of an Ultrafine Bituminous South African Seam 4 Coal Using Novel Flotation Cell Technologies
J.R. Bunt, P. van Nierop, V. Schneider, Sastech R & D, SOUTH AFRICA 443
SESSION 18
ADVANCED \text{SO}_x/\text{NO}_x \text{ CONTROL TECHNOLOGIES}

Chairs:
A. Chang/R. Bolli, NOXSO Corporation

Demonstration of SNAP, Combined \text{SO}_x/\text{NO}_x \text{ Removal Process} in Denmark
S. B. Lading, V. Boscak, FLS miljo, DENMARK ........................................... 616

High Efficiency Pollutant Removal with the Moving-Bed Copper Oxide Process
H. Pennline, J. S. Hoffman, J. T. Yeh, U.S. DOE - PETC, K. P. Resnik, P. A. Vore,
Gilbert Commonwealth, Inc. ................................................................. 622

A Simultaneous \text{SO}_x and \text{NO}_x Removal System for Burning all Grades of Coal
N. W. Frank, A. Maezawa, EBARA Environmental Corp. ..................... 628

Elemental Sulfur from Regenerable FGD Processes
R. C. Little, S. G. Nelson, Sorbent Technologies Corporation .............. 639

Low Temperature Carbon-based Process for Flue Gas Cleanup
S. K. Gangwal, J. J. Spivey, Research Triangle Institute, P. L. Silverston,
University of Waterloo, CANADA ...................................................... 645

Combined \text{SO}_x/\text{NO}_x Removal in the Thio\text{NO}_x Process-Regeneration of Chelates
T. Seng, M. Babu, Dravo Lime Company ............................................. 651

Production and Use of Activated Char for Combined \text{SO}_x/\text{NO}_x Removal

Removal of \text{NO}_x and \text{SO}_x from Coal Combustion Flue Gases Utilizing Activated Char and Microwave Energy
S. B. Cha, C. T. Carlisle, Cha Corporation ......................................... 658

The Tri-\text{NO}_x*-\text{NOXSORB}™ Process - Simultaneous Removal of NOx/SOx From Waste Gas Streams
J. Kaczur, Olin Corporation, M. Sprague, J. Pardell, Tri-Mer Corp. ........... 659

\text{SNOX: From Clean Coal Demonstration to Mature Technology}
D. Borio, J. Wesnor, ABB Environmental Systems ........................... 666

Biological Flue Gas Desulfurization
C. Buism, W. Dijkstra, PAQUES, THE NETHERLANDS .......................... 674
### SESSION 21
**COAL PRODUCTS, BY-PRODUCTS AND WASTES: ENVIRONMENTALLY FRIENDLY UTILIZATION AND DISPOSAL**

Chairs:
- S. Lee, University of Akron
- H. Lebowitz, Fossil Fuel Services

**Sulfur Cement Production Using By-Products of the Perchloroethylene Coal Cleaning Process and the FC4-I Cleaned Soil**
B. Masri, K.L. Fullerton, S. Lee, University of Akron

**Enhanced Bioremediation of PAH Contaminated Soils from Coal Processing Sites**
M. Joshi, S. Lee, University of Akron

**Control of Organosulfur Removal by Solvent-to-Coal Ratio in the PCE Coal Cleaning Process**
T. Lee, K. Fullerton, S. Lee, University of Akron

**Determination of Equilibrium Constant in the Organodesulfurization Reaction of PCE Coal Cleaning**
T. Lee, K. Fullerton, S. Lee, University of Akron

**Test Combustor for Holed Coal Briquette**
H.B. Kwon, Kyungnam University, H.T. Kim, Ajou University, KOREA

**"Decision Making" Software for Site Remediation**
C. Kulik, Ancon, H. Aroeste, Accord Services

**Catalytic Reduction of NO to N₂**
S.C. Chuang, R. Krishnamurthy, C.D. Tan, University of Akron

**Changes of Nitrogen Forms During Pyrolysis of Coal and an Effect of Iron Loaded on Coal**
Z.P. Zhu, Y. D. Gu, S.Y. Chen, Chinese Academy of Sciences, CHINA

**Preparation of Ultrafine and Ultraclean Coal**
Hua Zhu, X.W. Zhang, Z. Qin, S. Chen, Chinese Academy of Sciences, CHINA

**Integrated Gasification and Brick-Making Process for Treatment of MSW**
W. Wen, S. Li, D. Wei, J. Wu, D. Wu, S. Zheng, Tongji University, CHINA

### SESSION 22
**COMBUSTION SYSTEMS**

Chairs:
- G. Wen, U.S. DOE/PETC
- B. Morsi, University of Pittsburgh

**Chloride Enhancement of SO₂ Removal Efficiency in a Spray Dryer Absorber/Fabric Filter Pilot Plant**
I. Jefcoat, The University of Alabama, C. Stewart, Sverdrup Technology, T.E. Pearson, ABB Environmental Systems

**The Study of the Burning Possibilities of Solid Combustibles in the Determined Conditions for Complete Usage of Caloric and Ashes Resulted**
F. Barca, N.I. Volina, D. Mogos, M. Solea, University Politehnica Bucharest, ROMANIA

**The Reparation of the Burning Regime for Boiler K4 in the Kolín Power Station**
B. Cech, J. Matoušek, VSB-Technical University, J. Svoboda, Kolín Power Station, CZECH REPUBLIC

### SESSION 23
**ENVIRONMENTAL TECHNOLOGIES**

Chairs:
- G. Wen, U.S. DOE/PETC
- B. Morsi, University of Pittsburgh

**Possibilities for Dry Adsorption of Hydrocarbons in the Coal Industry**
W. Peukert, Hosokawa MikroPul, GERMANY

**Cooperative Research & Development Efforts at the Pittsburgh Energy Technology Center**
H. Pennline, K. Downey, US/DOE/PETC

### SESSION 24
**FINE COAL FLOTATION**

Chairs:
- B. Morsi, University of Pittsburgh
- G. Wen, U.S. DOE/PETC

**Initial Testing of a Dynamic Column for Fine Coal Flotation**

**Investigation on the Virinite Enrichment by Flotation**
S. Ren, J. Wang, Q. Yang, Q. Zhu, Z. Wang, China University of Mining & Technology, CHINA

**An Investigation of Pyrite Depression in Coal Flotation by Electrochemical Pyrite Surface Control**
Hong Zhu, Z. Ou, X. Shi, Y. Shen, China University of Mining & Technology, CHINA

**Flotation of Hydrophobic Flocculated Coal for Ash Rejection**
R. Li, S. Lu, S. Song, Y. Xu, University of Science and Technology, CHINA
SESSION 25
CONVERSION PROCESSES
Chairs:
G. Wen, U.S. DOE/PETC
B. Morsi, University of Pittsburgh

Study on Making Activated Carbons from Chinese Woody Brown Coals
X. Shu, L. Ge, X. Qu, W. Chen, Xi'an Mining Institute, CHINA .......................... 875

A Study of Solvent-Refined Coal Using Thermogravimetry and Mass Spectroscopy
O. Kopp, Univ. of Tennessee, L. Fuller, Jr., M. R. Rogers, Metals and Ceramics Divison, ORNL .......................... 881

Effects of Preheating and Highly Heat-conductive Brick on Coke Quality
K. Fukuda, T. Arima, Research Laboratories Nippon Steel Corp., JAPAN .......................... 887

Basic Studies on Slagging Phenomena in the Coal Gasifier
M. Kurimura, S. Hara, J. Inumaru, M. Ashizawa, K. Ichikawa, S. Kajitani, CRIEPI, JAPAN .......................... 893

SESSION 26
SPECIAL TOPICS
Chairs:
B. Morsi, University of Pittsburgh
G. Wen, US DOE/PETC

Turbulent Mass Transfer in the Furnace of High Output Boilers
P. Noskievic, P. Kolat, Univ. of Mining & Metallurgy, A. Novacek, MST-Ostrava, CZECH REPUBLIC .......................... 908

The Research on the Fragmentation of Coal Particles in a Fluidized Bed
H. Zhang, J. Heidbrink, Western Kentucky University, K. Cen, M. Ni, J. Yan, Zhejiang Univ., CHINA .......................... 943

Laser Ignition and Combustion of Pulverized Coals
J. Chen, North Carolina A & T State University .......................... 949

Effects of Maceral on Pulverized Coal Combustion
J. Yuan, J. Zhang, Y. Ma, Huazhong University of Science & Technology, CHINA .......................... 955

Effects of Coal Type on the Flame Characteristics
J. Ballester, N. Fueyo, C. Dopazo, LITEC-CPS, SPAIN .......................... 961

SESSION 27
FUNDAMENTALS OF COMBUSTION
Chair:
D. Hardesty, Sandia National Labs

Distributed Activation Energy Model of Heterogeneous Coal Ignition
J. C. Chen, North Carolina A & T State University .......................... 937

SESSION 28
HAZARDOUS AIR POLLUTANTS
Chairs:
T. Erickson, University of North Dakota
C. Schmidt, U.S. DOE/PETC

Ontario Hydro's Air Toxics Emission Testing Program-Regulations and Risk Assessment
K. E. Curtis, D. D. Ager, Ontario Hydro Technologies, CANADA .......................... 967

Quality Control Procedures for the Measurement of Hazardous Air Pollutants
M. White, B. Jackson, Roy F. Weston, Inc. .......................... 973

Selenium Sampling and Analysis in Coal Combustion Systems
M. S. DeVito, R. J. Carlson, CONSOL, Inc. .......................... 979

Vaporization, Condensation, and Emission of Trace Elements From Coal Gasification
J. J. Helble, C. L. Senior, J. R. Morency, PSI Technologies .......................... 985

Prediction and Measurements of Volatile Metal Partitioning in Coal-Fired Combustion Systems

Investigation of Mercury Control in Baghouses with Sorbents

Experimental Plan for the Assessment of Air Toxic Emissions From a Pilot-Scale Combustion Unit
R. Hargis, H. Pennline, U.S. DOE/PETC .......................... 997

Comparison of Hazardous Air Pollutants from Advanced and Conventional Power Systems
D. W. Brekke, T. A. Erickson, EERC, University of North Dakota, P. Botros, METC/DOE, M. J. Mudd, American Electric Power Service Corp. .......................... 1003

SESSION 29
COAL CONVERSION PROCESSES FOR CLEAN FUELS AND CHEMICALS - I
Chairs:
D. Gray, MITRE
E. Olson, University of North Dakota

Coal Liquids, Who Needs Them?
D. Gray, G. Tomlinson, The MITRE Corporation .......................... 1011
The Role of Process Oil Characterization in Direct Coal Liquefaction
F.P. Burke, R.A. Winschel, CONSOL Inc. ........................................1017

Effects of Heating Conditions on Hydrogen Transfer from Solvent to Coal
K. Uesugi, T. Matsumura, A. Komeiji, M. Kanaji, T. Kaneko, Y. Kageyama, Nippon
Brown Coal Liquefaction CO., Ltd., JAPAN ................................1023

Overview of Low-Rank Coal Conversion to Liquid Fuels
M. D. Hetland, E.A. Sondreal, E. Olson, J. R. Rindt, EERC, Univ. of North Dakota ......1029

Brown Coal Liquefaction Using Solvent of Higher Boiling Point Range
T. Okui, N. Okuyama, S. Katsushima, Y. Kageyama, T. Matsumura, Nippon
Brown Coal Liquefaction Ltd. Co., JAPAN ....................................1035

Coal Liquefaction: PDU-Scale Testing at Hydrocarbon Technologies, Inc.
R. Stalizer, A. Comolli, L.K. Lee, V. Pradhan, Hydrocarbon Research, Inc. ..............1041

SESSION 30
HOTGAS CLEANUP FOR IGCC
Chairs:
T. Dorchak, U.S. DOE/METC
S.K. Gangwal, Research Triangle Institute

Control of Gaseous Contaminants in IGCC Processes, An Overview
D. Harrison, Louisiana State University ........................................1047

Development of a High Temperature Moving-Bed Coal Gas Desulfurization System
R.E. Ayala, A. Feiteberg, A. Furman, G.E. Corporate R & D .........................1053

Hot Gas Desulfurization Using TransportReactors
W. Campbell, G. B. Henningsen, The M.W. Kellogg Company ..................................1059

Pilot Scale Experience on IGCC Hot Gas Cleanup
A. Lehtovaara, J. Konttinen, ENVIROPOWER, INC., FINLAND .....................1065

Slipstream Testing of Hot-Gas Desulfurization with Sulfur Recovery
J. Portzer, S. Gangwal, Research Triangle Institute, T. Dorchak, U.S. DOE/METC ........1073

Hot Gas Cleaning of Coal Gases by Sequential Absorption
P. E. H. Nielsen, I.D. Sigurdardottir, Haldor Topsøe A/S, DENMARK ....................1074

Regenerable Sorbents for Low Temperature Desulfurization of Coal Gas

SESSION 31
ENERGY & THE ENVIRONMENT: DOMESTIC AND INTERNATIONAL CHALLENGES
Chairs:
J. Pell, U.S. DR.E. Ayala,OE
D. South, Argonne National Laboratory

Status of Shanxi Province’s Power and Coal Reserves
D-C Wu, Shanxi Energy Research Assoc., CHINA, J-Y. Shang, U.S. DOE ................1086

Removal of Mercury from Coal-Combustion Flue Gas
C. D. Livengood, H. S. Huang, M. H. Mendelsohn, J. M. Wu, Argonne National Lab ....1094

Expressions of Interest Received by the Department of Energy in Commercial Clean Coal Technology Projects in Foreign Countries
J. Pell, U.S. DOE ........................................................................1100

Managing the Analysis of Air Quality Impacts Under NEPA
Y. Weber, U.S. DOE, A. Leslie, Energetics Inc. .......................................1100

SESSION 32
COMBUSTION EXPERIMENTS AND MODELLING
Chair:
D. Hardesty
Sandia National Labs

Operation of a Low NOx Swirl Burner: Effect of Burner Parameters on Coal Particle Behavior
G. Xu, A. Scaroni, The Pennsylvania State University .....................................1111

Modelling of Swirling Pulverized-Coal Flames in an Axi-Symmetric Furnace
N. Bech, P. A. Jensen, T. Condra, Risø National Laboratory, DENMARK ..............1111

An Eulerian-Eulerian Model of Coal Combustion, NOx Formation and Reburning
N. Fueyo, J. Ballester, C. Dopazo, LITEC-CPS, SPAIN ................................1113

Experimental/Modeling Studies of the Use of Coal-Based Reburning Fuels for NOx Control
D. K. Moyeda, B. Li, P. Maly, R. Payne, Energy & Environmental Research Corp. ....1119

Char Nitrogen: Effect of Coal Type Pore Structure on NOx/N2O Evolution
A. Kandas, A. Sarofim, S. Goel, MIT ...............................................1125

SESSION 33
TRACE ELEMENT CHARACTERIZATION
Chairs:
B. Pierce/L. Ruppert, U.S. Geological Survey

Characterization of Hazardous Trace Elements in Solid Waste Products from a Coal-burning Powerplant in Kentucky

Iron Distribution Among Phases in High- and Low-Sulfur Coal Fly Ash
J.C. Hower, U.M. Graham, R. F. Rathbone, CAER, University of Kentucky, M. D. Dyar,
M. Taylor, West Chester University ................................................1138

Significance of the Modes of Occurrence of Arsenic in Coal
L. Ruppert, U.S. Geological Survey, J. C. Hower, University of Kentucky, C. F. Eble,
Kentucky Geological Survey ......................................................1144

Distribution of HAPS Trace Elements in U.S. Gulf Coast Coals

Vertical Distribution of Hazardous Trace Elements in the Balinka Lower Eocene
Coal Bed, Hungary
O. Tomcshey, U.S. Geological Survey, HUNGARY ....................................1151

Coal Quality Trends and Distribution of Title III Trace Elements in Eastern Kentucky Coals
C. Eble, J.C. Hower, U.S. Geological Survey .........................................1152
