Water Resources At Risk

A selection of the papers presented at the conference held in Denver, Colorado, May 14-18, 1995

Editors:
W.R. Hotchkiss
J.S. Downey
E.D. Gutentag
J.E. Moore
CONTENTS

Conference Organizing Committee ........................................... Front Cover

Preface ......................................................................................... xiv

AIH AWARDS

1995 C.V. Theis Award
  Citation: John E. Moore and William R. Hotchkiss ........................................ xv
  Acceptance Speech: A. Ivan Johnson ................................................................ xvi

1995 Ray K. Linsley Award
  Citation: David R. Dawdy ........................................................................ xix
  Acceptance Speech: Vit Klemes ................................................................ xxi

1994 Founders Award
  Citation: C. Thomas Haan ........................................................................ xxiv
  Acceptance Speech: L. Douglas James ......................................................... xxvi

1995 Founders Award
  Citation: John M. Sharp, Jr ........................................................................ xxx
  Acceptance Speech: John E. Moore ............................................................... xxxi

LUNA B. LEOPOLD SYMPOSIUM

Ground Water Pollution in Oil Field Regions .................................. LL- 1
Belousova, A.P., and Shmakov, A.I., Water Problems Institute,
Russian Academy of Sciences, Moscow, Russia

Interpreting Spatial Profiles of Concentration in Acid Mine Drainage Streams . LL-10
Broshears, R.E., USGS, Denver, CO, Kimball, B.A., USGS, Salt Lake City, UT,
and Runkel, R.L., USGS, Denver, CO

Hydrochemical and Biological Responses to Water Quality Variability
within a Wetland ............................................................................ LL-23
Dai, Beiwen and Smith, A.J., Kent State University, Kent, OH

Nitrogen Transport and Fate at a Farm and Yard Waste Composting Facility . LL-31
Douglas, E.M., GEI Consultants, Inc., Concord, NH and Ballesteru, T.P.,
Univ. of New Hampshire, Durham, NH

Evaluation of Ground Water Resources in Wadi El-Assiuti Area,
east of Assiut City, Eastern Desert, Egypt ..................................... LL-42
Abu Ella, E.M., Ebraheem, A.M., and Youssef, Moustafa, Assiut University, Egypt
Site Hydrogeological Investigations Using Multiple Methods for Characterization

Gottler, P.F., O'Brien and Gere Engineers, Inc., Lakewood, CO,
Gabriel, W.J., and Mickam, J.T., O’Brien and Gere Engineers, Inc., Syracuse, NY

Impacts of Golding Mining on Water Resources of the Sierra Nevada

Kattelmann, Richard, Sierra Nevada Aquatic Research Lab, Mammoth Lakes, CA

Use of the Gehan Test to Statistically Analyze Soil-water Quality Data,
Rocky Flats Plant near Golden, Colorado

Kunkel, J.R., HydroSearch, Inc., Golden, CO, Thompson, J.S., EG&G Rocky Flats, Inc.,
Golden, CO, and Host, L.A., Advanced Sciences, Inc., Lakewood, CO

Identification of Areas at Risk for Selenium Contamination
in the Western United States

Seiler, R.L., USGS, Carson City, NV and Skorupa, J.P.,
US Fish & Wildlife Service, Sacramento, CA

Pesticide Concentration Frequencies in Surface Water and Sediments of Florida

Shahane, A.N., Bureau of Pesticides, Division of Agricultural Environmental Services,
Tallahassee, FL

The Ways for Improvement of Ground Water Assessment

Voronov, A.N., and Shvarts, A.A., St. Petersburg Univ., St. Petersburg, Russia

Determination of Soil Hydraulic Properties with Decoupled Approaches

Zhang, Renduo, Univ. of Wyoming, Laramie, WY

Stochastic Modeling of Rivers Runoff Nonstationary Sequences

Bolgov, M.V., Water Problems Institute, Russian Academy of Sciences, Moscow, Russia

Spatial Variability in Base Flow as related to Channel Geomorphology,
Straight River, north-central Minnesota

Petersen, T.A., Minnesota Department of Natural Resources St. Paul, MN, Armstrong,
D.S., USGS, Marlborough, MA, Stark, J.R. and Hansen, D.S., USGS, Mounds View, MN

Aquifer Storage and Recovery at the Centennial Water and Sanitation District,
Highlands Ranch, Colorado

Courtney Hemenway, P.E., CH2M HILL, Inc., Denver, CO,
and Paul Grundemann, Centennial Water and Sanitation District, Highlands Ranch, CO

Water Resources At Risk, Death Valley National Park

G. M. Essington and W.L. Werrell, National Park Service,
Death Valley National Park, Death Valley, CA
STAN LOHMAN MEMORIAL SYMPOSIUM

In-situ Sparging: Chemical Transport and Mass Transfer 

Use of Stable and Unstable Isotopes to Determine Sources and Flow Characteristics of Water in Black Mesa, Arizona
Coffan, Robert, and Johnson, Carla, Brogan-Johnson Consultants, Inc., Boulder, CO

Isotope Hydrology of the Eagle Mountains Area, Hudspeth County, Texas: Implications for Development of Ground-water Resources
Darling, Bruce, Law Environmental, Inc., Kennesaw, GA, Hibbs, B.J., Texas Water Development Board, Austin, TX, Dutton, A.R., and Sharp, J.M., University of Texas, Austin, TX

The Meaning of Hydraulic Properties Acquired by Ground-water Model Calibration
Gorokhovski, Vincent, Visiting Scholar, Artificial Intelligence Center, University of Georgia, Athens, GA

Evaluating the Performance of Hydraulic Containment Systems

The Skin Effect in a Finite Damaged Zone
Kersch, K.M., Science Applications International Corp., Las Vegas, NV

Conceptualization and Characterization of Ground-water Systems for Modeling
Kolm, K.E, Colorado School of Mines, Golden, CO, Downey, J.S. and Gutentag, E.D., Downey and Gutentag, Arvada, CO

Eastbank Aquifer Test and Analysis of Hydraulic Properties
Kraeger-Rovey, Catherine and deRubertis, Kim, W&EST, Denver, CO

Eastbank Aquifer Hydraulic and Thermal Model Analyses
Kraeger-Rovey, Catherine and Scott, Phyllis, W&EST, Denver, CO

Comparison of Unsaturated Zone Hydraulic Properties Using a New Laboratory Testing Procedure
Modeling Ground-water Flow with the Boundary-fitted Coordinate System
Method (BFCSM) ................................................................. SL-89
Heap, D.I. and Koo, Min-Ho, Purdue Univ., West Lafayette, IN and Lee, Kang-Kun,
Seoul National University, Seoul, Korea

Particularities of Ground-water Resources Assessments in the Regions at Risk .... SL-100
Molski, E.F. and Kotchineva, M.N, Department of Hydrogeology, Mining Institute,
St. Petersburg, Russia

Scale Effects in the Field Determination of Aquifer Parameters .................. SL-101
Paillet, F.L., USGS, Denver, CO

Remediating Low Permeability Sites with 2-phase Extraction: Case Studies ..... SL-111
Schultz, Thomas and Tornatore, P.M., Haley & Aldrich, Inc., Denver, CO

Rotasonic: an Alternative to Conventional Drilling Technology
in Environmental Characterization Studies ......................................... SL-112
Stephan, R.J., IT Corporation, Monroeville, PA

Impact of Ground-water Overexploitation on Triassic Aquifer
in the Zawiercie Region of Southern Poland ...................................... SL-124
Witkowski, Andrzej and Kowalczyk, Andrzej, University of Silesia, Sosnowiec, Poland

Predicting Microdispersivity of Porous Media Using Grain Size Characteristics . SL-133
Xu, Moujin and Eckstein Yoram, Kent State University, Kent OH

Modeling One-dimensional Unsaturated Flow at the Rocky Flats Plant,
Golden, CO ........................................................................ SL-141
Zeiler, R.M., Advanced Sciences, Inc., Lakewood, CO, and S29, J.S.,
EG&G Rocky Flats Inc., Golden, CO

A Hydrogeologic Decision Support System for Risk Analysis
and Ground-water Modeling .......................................................... SL-149
Fort Collins, CO

Subsurface Mapping of Conductive Fractures Using Seismic Tomography ...... SL-158
Ellefsen, K.J., USGS, Denver, CO

Groundwater Remediation at the Rocky Mountain Arsenal:
A Difficult and Complex Task .......................................................... SL-159
Warner, J.W., Abdel-Rahman, A., Tamayo-Lara, C., and Sakr, Sameh,
Colorado State University, Fort Collins, CO
Ground-water Flow Model Development for Salar Basins SL-170

Late Cenozoic Geologic History of the Al Jaww Plain Aquifer System, Eastern Abu Dhabi Emirate, United Arab Emirates SL-178
Elisabeth M. Brouwers and Thomas M. Bown, U.S. Geological Survey, Denver, CO

Salt Water Intrusion in Aquifers: Development and Application of a Vertically Integrated Two-Dimensional Finite-Element Model SL-180
Sameh A. Sakr and James Warner, Civil Engineering Department, GroundWater Environmental Hydrogeology Program, Colorado State University, Fort Collins, CO, and William R. Hotchkiss, U.S. Geological Survey, DFC, Lakewood, CO

Deformation-Induced Changes in Hydraulic Head during Ground-water Withdrawal SL-194

Scaling and Evolution of Fracture Networks in Rock SL-195
C. C. Barton, U.S. Geological Survey, DFC, Lakewood, CO

INTERNATIONAL MINE WATER ASSOCIATION SYMPOSIUM

Using Ion Mass Balances to Estimate Flow Rates from Mine Drainage Sources IMWA-1
Aljoe, W.W., U.S. Bureau of Mines, Pittsburgh Research Center, Pittsburgh, PA

Wastewater Minimisation and Reuse in Mining Industry in Illawarra Region IMWA-11
Dharmappa, H.B., Sivakumar, M., and Singh, R.N., University of Wollongong, Wollongong, Australia

Mining drainage and water supply under sustainable constraints IMWA-23
Fernandez-Rubio, Rafael and Gutierrez Del Olmo, Arturo, Frasa Consulting Engineers, Madrid, Spain

Impacts on Ground-water Hydrology from Surface Coal Mining in Northern Appalachia IMWA-32
Depressurization Systems: design, Construction, and Cost Considerations to Prevent Floor Heave .................................................. IMWA-44
*Kaiser, R.M., R.W. Harden and Associates, Austin, TX*

New Approaches and Results on Risk Assessment for Water Resources due to Undermining .................................................. IMWA-53
*Kesseru, Zsolt, Consultant on Rock-Water Engineering, Budapest, Hungary*

An Experimental Investigation into the Deformation Characteristics of Sandstone Under Mine Dewatering .................................................. IMWA73
*Nikraz, H.R., Press, M., and Evans, A.W., Curtin Univ. of Technology, Perth, Australia*

The Impact of Mine Closures on Ground-water and the Environment: A UK Lesson for All Countries .................................................. IMWA-85
*Norton, P.J., Peter J. Norton Associates, North Yorkshire, UK*

New Approach to Mapping of Ground-water Vulnerability to Surface Contamination .................................................. IMWA-92
*Potapov, A.A., Abramov, V.J., and Kotchneva, M.N., Dept. of Hydrogeology, Mining Institute, St. Petersburg, Russia*

Storage of Water in the Voids of Abandoned Mines and Fractured Rocks .................................................. IMWA-102
*Sammarco, Onofrio, Bureau of Mines, Ministry of Industry, Italy*

Pollutograph Modelling of an Impervious Catchment .................................................. IMWA-115
*Sivakumar, M., Boroumand-Nasab, S., and Singh, R.N., University of Wollongong, Wollongong, Australia*

Developing Priorities for Verifying and Inventorying Suspected Abandoned Mine Sites on Public Lands .................................................. IMWA-125

Methodologies Developed to Estimate and Remediate the Impact of Longwall Mining on Springs in the Bull Mountains of East-Central Montana .................................................. IMWA-141
*Phillip E. Brown and Dorothy E. Baldwin*

Pressure Grouting of Fractured Bedrock to Control Acid Mine Drainage .................................................. IMWA-142
*S.A. Effner, G.D. Vandersluis, and V. Straskraba, Hydro-Geo Consultants, Inc., Lakewood, CO*
Clay-based Grouting Demonstration Project at the Mike Horse Mine, Lincoln, Montana .................................................. IMWA-148
Ernest J. Kipko, PhD, DS and Yuri N. Spichak, PhD, D.Sc, Spetstamponazhgeologia, Antrasit, Lugansk Region, Ukraine
Alexander N. Grinenko, ME, Novocherkassk State Technical University, Shakhty, Rostov Region, Russia
Robert M. Hartley, PE, Richard R. Raymondi, PG, CGWP, and Kathryn A. Levihn, PE, Morrison Knudsen Corporation (MK), Boise, ID

Black Hawk, CO, Construction Dewatering Evaluation .................................................. IMWA-157
Thomas S. Norman, PE, and Phillip E. Brown PE, Stewart Environmental Consultants, Inc., Fort Collins, CO

Naturally Occurring Radioactive Materials in the SW Copper Belt of Arizona IMWA-161
Mark R. Schuknecht, U.S. Environmental Protection Agency, Office of Solid Waste, Waste Management Division, Special Wastes Branch, Mining Waste Section Washington, D.C.

Hydrogeological and Geochemical Aspects of Lakes Forming in Abandoned Open Pit Mines .................................................. IMWA-162
G.D. Vandersluis, V. Straskraba, and S. A Effner, Hydro-Geo Consultants, Inc., Lakewood, CO

ROBERT C. AVERETT MEMORIAL SYMPOSIUM

Development and Use of Environmental Indicators in Water Quality Management . RA-1
Quinn, Larry, Larry Quinn and Assoc., Lyons, CO

Reservoir Problems .................................................. RA-11
Andersen, J.L., USACOE, Omaha, NE

Development of a National Water-quality Monitoring Program for Belize, Central America .................................................. RA-16
Stednick, Jon, Colorado State Univ., Fort Collins, CO and Lee, M.D., Zamorano Univ., Honduras

Water-quality Aspects of Water Development in Northwestern China .................................................. RA-23
Steele, T.D., Balloffet and Associates, Denver, CO, Yang, Xiaoliu and Tang, Kewang, Institute of Water and Hydroelectric Power Research, Beijing, China

Acid Mine Drainage and Political Conflicts in the Third-party EIS .................................................. RA-36
Moran, R.E. and Mernitz, Scott, Woodward-Clyde Consultants, Denver, CO
Conflicts between Water Quality, Private Land Access and Ecosystem Management on U.S. Forest Service land

Piehl, Brad and Wald, Jessica, J.W. Assoc., Breckenridge, CO

An Update of Observed Nutrient-biological Conditions in Selected Reservoirs in the Denver Metropolitan Area, Colorado

Lorenz, W.F., Consultant, Steele, T.D., Balloffet and Assoc., Denver, CO, and Clayshulte, R.N., DRCOG, Denver, CO

Optimal Phosphorus Load Allocation for Portions of the Chatfield Basin, Colorado

Little, K.W., Consultant, Denver, CO

Monitoring by Committee — Water Quality in Clear Creek and Standley Lake

McCarthy, James, City of Arvada, Arvada, CO, Scott, Kipp, City of Northglenn, Northglenn, CO and Steele, T.D., Balloffet and Assoc., Denver, CO

Integrated Watershed Planning Yields Creative Permit Compliance Alternatives at Cheyenne Wyoming

Maxwell, Mark and Buhrmaster, Dan, Black & Veatch, Aurora, CO, Young, Jack, and Mark, Jerry, Cheyenne Board of Public Utilities, Cheyenne, WY

Using Water Resource and Riparian Parameters to Develop a River Management Program

Jordan, J.J., Balloffet and Assoc., San Francisco, CO, Florsheim, Joan, and Goodwin, Peter, Philip Williams & Assoc., San Francisco, CA

Using Modeling to Establish Aggregate Mining Standards for Ground Water Protection

Jordan, J.J., Balloffet and Assoc., San Francisco, CO, Rubin, Yoram, Univ. of California, Berkeley, CA, Goodwin, Peter, Philip Williams & Assoc., San Francisco, CA

Coordination and Biological Activities of the National Biological Service and the National Water Quality Assessment program

Metal Accumulation by Transplanted Aquatic Mosses in Response to Land-use Practices in the Upper Rio Grande Basin, Colorado and New Mexico

Preliminary Evaluation of Streambed Sediment and Aquatic Biota as Media for Characterizing the Occurrence of Trace Elements and Organochlorine Compounds in the Willamette Basin, Oregon ........................................ RA-114

Partitioning of Chemical and Radiological Constituents between Ice-solution Phases in a Saline Pond ................................................................. RA-115
Johnson, S.W., Riverside Technology, Inc., Fort Collins, CO

Geochemical Controls on Periphyton in Two Acidic, Metal-enriched Streams in Colorado ............................................................... RA-123

NUCLEAR HYDROLOGY SYMPOSIUM

Dispersivity in Heterogeneous Permeable Media ........................................ NH-1
Chestnut, D.A., Lawrence Livermore National Laboratory, Livermore, CA

Ground Water Flux, Travel Time, and Radionuclide Transport ..................... NH-31
Chestnut, D.A., Lawrence Livermore National Laboratory, Livermore, CA

Long-term Climate Change near Yucca Mountain: A View from the Past ........ NH-41
Forester, R.M., USGS, Denver, CO

Site Characterization for Alternative Conceptual Models ............................. NH-42
Lehman, Linda, L. Lehman & Assoc., Burnsville, MN and
Johnson, Carol, State of Nevada, Carson City, NV

Significance of Apparent Discrepancies in Water Ages derived from Atmospheric Radionuclides at Yucca Mountain, Nevada ...................... NH-52
Liu, Beiling, Fabryka-Martin, June, Wolfsberg, Andy, and Robison, Bruce

Ages of Paleodischarge Deposits and the Importance of Paleohydrology for Yucca Mountain Site Characterization Studies ............................ NH-63

Strontium Isotope Characterization of Ground-water Flow Systems at Yucca Mountain, Nevada, USA .......................................................... NH-64
Peterman, Z.E. and Stuckless, J.B., USGS, Denver, CO
Ground Water Quality Assessment under Condition of Hypothetical Hazardous Accidents at Nuclear power plants

Rumynin, V.G., St. Petersburg Mining Institute, St. Petersburg Russia

NH-65

Ground Water Resources and the Chernobyl Disaster

Shestopalov, V.M., Rudenko, Y.F., and Rudy, M.D.,
Center of Radioenvironmental Studies, Kiev, Ukraine

NH-77

POSTERS

Quaternary Climatic History of Abu Dhabi Emirate, UAE,
and the Formation of the Liwa Crescent Aquifer

Brouwers, E.M., Bown, T.M., USGS, Denver, CO, Hadley, D.G., USGS, Reston, VA,
Imes, J.L., USGS, Rolla, MO, and Wood, W.W., USGS, Reston, VA

P-1

A Gas Sampling System for Withdrawing Humid Gases from Deep Boreholes

Joseph P. Rousseau and William Thordarson, U.S. Geological Survey, Denver, CO,
and Mark A. Kurzmack, Foothill Engineering, Golden, CO

P-3

A Borehole Instrumentation Program for Characterization of Unsaturated-Zone Percolation

Jack Kume and Joseph P. Rousseau, U.S. Geological Survey, Denver, CO

P-4

Evaluation of a 6-wire Thermocouple Psychrometer for Determination of In-situ Water Potentials

Carole L. Loskot and Joseph P. Rousseau, U.S. Geological Survey, Denver, CO,
and Mark A. Kurzmack, Foothill Engineering Consultants, Golden, CO

P-5

Is There Perched Water under Yucca Mountain in Borehole USW G-2?

Czarnecki, J.B., O’Brien, G.M., and Nelson, P.H., USGS, Denver, CO,

P-6

The Use of Vacuum Vaporizer Wells (UVB) to Restore Ground Water at a Perchloroethylene Site in Minnesota

James R. Lundy, Minnesota Pollution Control Agency, Site Response Section, St. Paul, MN

P-8
EDUCATIONAL FORUM FOR TEACHERS

Water Resources Education Initiative: Teaching Students in Grades K-12 about Water ................................................. E-1
Steve Vandas, USGS, Denver, CO

Educational Aspects of the Groundwater Foundation .................................................. E-5
Amy Killham, Groundwater Foundation, Lincoln, NE

National Science Foundation/U.S. Geological Survey Water Workshops
for College Faculty .................................................. E-6
Hubbard, J.E., SUNY Brockport, NY and Hotchkiss, W.R., USGS, Denver, CO

Multimedia In Education: You Can Do It .................................................. E-8
Hotchkiss, R.H., University of Nebraska, Lincoln, NE

Watershed Management: A Computer Simulation .................................................. E-9
Amend, J.R., Montana State University, Bozeman, MT
