Proceedings of the
ASME Materials Division
Volume 2

- Intelligent Manufacturing and Material Processing
- Clever Optimal Design and Control of Materials and Structures

Presented at
The 1995 ASME International Mechanical Engineering Congress and Exposition
November 12–17, 1995
San Francisco, California

Sponsored by
The Materials Division, ASME

Edited by
John Coulter
Lehigh University

M. Cengiz Altan
University of Oklahoma

J. Zarka
Ecole Polytechnique

A. Jovanovic
Universität Stuttgart

The American Society of Mechanical Engineers
United Engineering Center / 345 East 47th Street / New York, N.Y. 10017
## CONTENTS

### VOLUME 1

#### DESIGN AND MANUFACTURE OF COMPOSITES

**Introduction**  
Nancy R. Sottos ................................................................. 1

**Modeling of Liquid Molding for Polymer Composite Components**  
Albert W. Chan and Roger J. Morgan ........................................ 3

**Thermoset Filament Winding Process Model and Parametric Study**  
L. Sun, S. C. Mantell, A. Banerjee, and D. Cohen ........................... 11

**Impregnation/Resin Transfer Molding (I/RTM) of Particle-Filled Preceramic Polymers Into Fiber Preforms**  
Merve Erdal, Selçuk Güçeri, and Stephen C. Danforth ..................... 25

**Stress Relaxation During Cure of 3501-6 Epoxy Resin**  
Yeong K. Kim and Scott R. White ............................................. 43

**Evaluation of Residual Stresses Produced During In-Situ Consolidation of Thermoplastic Composites**  
Richard S. Feltman and Michael H. Santare .................................. 57

**Curing Process Induced Viscoelastic Residual Stresses in Polymer Matrix Laminates**  
Sung Yi, Harry H. Hilton, and M. Fouad Ahmad ............................. 65

**Controlling Thermal Deformation by Using Functionally Graded Materials**  
Robert C. Wetherhold, Steven Seelman, and Jianzhong Wang .............. 77

**Gradient Material Design of Particulate Reinforced Composite Structures**  
Patrick Kwon and C. K. H. Dharan ........................................... 89

**Micromechanical Analysis of Functionally Gradient Materials**  
Seiichi Nomura ........................................................................ 105

**Improving Damage Tolerance of Fiber Composite Laminates Through Interleaving**  
Albert F. Yee, Michael R. Groleau, and Yibing Shi .......................... 111

**Cost Versus Performance Evaluation of Hybrid Composites for Commercial Applications**  
Srinivas K. Panchangam and Mannur J. Sundaresan .......................... 123

**Properties of Polyimide Composites Made From Powder-Coated Uniweave and Solution-Coated Prepreg Tape**  
Roberto J. Cano, Maylene K. Hugh, Joseph M. Marchello,  
and Ray W. Grenoble ............................................................... 135

**High Speed/Low-Cost Powder Processing of Thermoplastic Composites**  
Qing Zheng, Roger J. Morgan, and Ronald Allred ........................... 145

**A Novel Fabrication Technique for Composite Shells**  
Brett S. Okhuysen and Y. Jack Weitsman ..................................... 155

**Fabrication and Characterization of Composite Materials with Corn Based Reinforcements**  
Scott R. White, Nancy R. Sottos, and T. J. Mackin ........................ 167

**Mechanical Characterization of Glass Fiber Reinforced/UV Cured Resins From Epoxidized Linseed Oil**  
J. V. Crivello, S. S. Sternstein, and R. Narayan ............................ 175

### DURABILITY AND DAMAGE TOLERANCE OF COMPOSITES

**Introduction**  
Paul F. Joseph, Gregory P. Carman, and Steven L. Donaldson ............ 181

**Durability and Critical Fundamental Aging Mechanisms of High Temperature Polymer Matrix Carbon Fiber Composites: Part I**  
E. Eugene Shin, Robert Jurek, Lawrence T. Drzal, Roger J. Morgan,  
Jin-Kyu Choi, and Andre Lee .................................................. 183
Durability and Critical Fundamental Aging Mechanisms of High Temperature Polymer Matrix Carbon Fiber Composites: Part II
E. Eugene Shin, Colin Dunn, Eric Fouch, Roger J. Morgan, Mark Wilenski, and Lawrence T. Drzal

Effects of Oxidation and Damage on the Mechanical Response of Metal Matrix Composites
Shozue Xu, Dimitris C. Lagoudas, and David H. Allen

Evaluating the Accumulated Interfacial Damage in Carbon Fiber/Epoxy Composite Laminates
J. Jenny Yuan, John M. Kennedy, and Y. Michael Lu

Mechanics of Temperature-Driven Long-Term Environmental Degradation of Polymer-Based Composite Systems
Kenneth L. Reifsnider and Scott Case

On Modeling Local Damage in Composite Laminates Using Plate Finite Elements with Zig-Zag Sublaminate Approximations
Yuen C. Yip and Ronald C. Averill

Effect of Microcrack Formation in Transversely Loaded Unidirectional Composites
Mikael S. Axelsen and Ryszard Pyrz

Damage Initiation and Propagation in an Elastic-Brittle Material with Randomly Distributed Holes
Ahmed Al-Ostaz and Iwona Jasiuk

Enriched Finite Elements for a Crack Tip Touching an Interface
Kesavaram S. Gadi, Paul F. Joseph, and Ahmet C. Kaya

Micromechanical Analyses of Unidirectional Brittle Matrix Composites with Frictional Interfaces
G. P. Tandon and N. J. Pagano

Toughening of Engineering Thermosets via New Toughening Mechanisms
H. J. Sue, P. M. Puckett, and J. L. Bertram

Characterization of Damage Progression and Its Correlation to Residual Strength in a Sigma/Ti-6242 Composite Using Nondestructive Methods
Dianne M. Benson, Prasanna Karpur, David A. Stubbs, and Theodore E. Matikas

Progressive Microcracking in a Unidirectional SiC/CAS Composite at Elevated Temperature
Ran Y. Kim and N. J. Pagano

Fracture Toughness of Stitched Graphite/Epoxy Uniweave Laminates
Suresh K. Sharma and Bhavani V. Sankar

In Situ Damage Observation and Failure in Model Laminates Containing One-Directional Yarn Crimping of Woven Composites
Ajit K. Roy

Damage Initiation and Failure Modes in a Unidirectional MMC with a Hole Under Tension and Compression
G. M. Newaz, M. Krishnappa, and N. Bonora

Out-Of-Plane Strength of RTM-Laminates with Sharp Corners
J. Anders Holmberg

Three Dimensional Stress Analysis of Fastener Hole Composites
Endel larve

Abrasive Wear Model for Continuous Fiber-Reinforced Materials
B. K. Yen and C. K. H. Dhawan

Strength Prediction of Hybrid Composites with Internal Damage
Mannur J. Sundaresan and Srinivas K. Panchangam

Influence of Damage on the Vibration Response of Composite Laminates
Milan Mitrovic, Greg P. Carman, Gail A. Hickman, and Yoseph Bar-Cohen

Observations of the Drop-Weight Impact Response of Composites with Surface Bonded Nitinol Layers
Jeffrey S. N. Paine and Craig A. Rogers
Damage Initiation and Growth in Composite Materials Subjected to Low Velocity Impact
Bryan C. Foos and William E. Wolfe .......................................................... 391
High-Cycle Tension Fatigue Response of Hybrid Carbon/Glass-Epoxy Laminates
R. P. Yee and C. K. H. Dharan ................................................................. 401

FINITE DEFORMATION VISCOPLASTICITY
Introduction
R. C. Batra and T. W. Wright ................................................................. 415
Dislocation Mechanics Based Viscoplasticity Description of FCC, BCC and HCP Metal Deformation and Fracturing Behaviors
Ronald W. Armstrong and Frank J. Zerilli ........................................... 417
Nonlinear Geometric Field Theory and Viscoplasticity of Large Deformation
Z. D. Chen and X. C. Liu ................................................................. 429
Some Recent Results in Viscoplastic Crack Propagation
T. J. Delph and P. A. Blythe ................................................................. 441
Viscoplasticity Using Dual Variables
E. Diegele, W. Jansohn, and Ch. Tsakmakis ........................................... 449
A Constitutive Model of Adaptive Links in Viscoelastoplasticity
Aleksey D. Drozdov and Alexander L. Kalamkarov .................................. 469
A Constitutive Model and Its Finite Element Formulation for Finite-Deformation Viscoplasticity
Jinghong Fan ................................................................. 485
Dislocation Theories of Viscoplasticity
Peter P. Gillis ................................................................. 493
On the Thermodynamic Representation of Viscoplastic Material Behavior
Peter Haupt ................................................................. 503
Stress State and History Effects in Viscoplasticity at Finite Strain
Mark F. Horstenmeyer and David L. McDowell .................................. 519
Localization, Damage, and Fracture of Dynamically Loaded Tensile Bars
James A. Nemes and John Eftis ............................................................. 545
Viscoplastic Relaxation in Granular Flow
E. Bruce Pitman ................................................................. 557
An Analytical Localization Analysis of Polycrystals with Texture Evolution
Zhengfang Qian and Han C. Wu ............................................................ 563
On Elastic Deformation in Finite Elastic-Viscoplastic Theory
M. B. Rubin ................................................................. 571
The Concept of Material Metric in Finite Viscoplasticity
Kirk C. Valanis ................................................................. 577
The Effect of Hardening Rule on the Simulation of the Hot Working of Metals
Charles S. White and Jeffrey R. Sachs .................................................. 591
Analysis of Viscoplastic Softening Behavior of Concrete Under Displacement Control
Sang-Hwan Kim ................................................................. 609
Numerical Method for Boundary Value Problems of Finite Deformation Viscoplasticity
Igor A. Brigadnov ................................................................. 1273

PROCESSING, DESIGN, AND PERFORMANCE OF COMPOSITE MATERIALS
Introduction
G. S. Bhat and T. S. Srivatsan ............................................................. 621
Mechanics and Mechanisms of Composite Materials

Harmonic Wave Propagation in Composite Laminates Using State Space Approach

Chandra Aithal and Nandu Abhyankar ........................................ 623

Materials Processing by Shock Compaction: Status and Application to Nanocrystalline Ceramics

Vasant S. Joshi ................................................................. 633

Milling Alumina-Reinforced Aluminum 6061 Metal Matrix Composites

Anil Saigal and Gary G. Leisk ............................................... 653

An Investigation of Fatigue and Fracture Behavior in Nb Fiber-Reinforced MoS2 Composites

W. O. Soboyejo, F. Ye, and D. S. Schwartz ................................ 661

The Tensile Fracture Behavior of Particulate-Reinforced Steel-Based Metal Matrix Composites

T. S. Srivatsan, R. Annigeri, and Amit Prakash ............................ 695

Influence of Titanium Carbide Particulate Reinforcement on Cyclic Stress Response, Cyclic Strain Resistance and Fracture of Steel-Based Metal-Matrix Composites

T. S. Srivatsan, R. Annigeri, and A. Prakash ............................... 719

Polymers and Polymer-Matrix Composites

A Study of the Effects of Chemical Environments on the Mechanical Properties of Swirl Glass Mat Reinforced Polyurethane Composite

H. M. Herring, D. C. Worley II, P. K. Liaw, R. S. Benson,
J. M. Corum, M. B. Ruggles, and H. E. McCoy, Jr. ....................... 761

Fiber Motion During Bladder Molding of Thermoplastic Composite Materials

Jonathan S. Colton and Margaret S. Beeson ............................... 773

Ethylene/Ammonia Plasma Polymerization on Graphite Fibers for Controlled Adhesion to Epoxy

A. N. Netravali and Y. K. Kamath ........................................ 785

Textile Composites

Nonwoven Textiles for the Manufacture of Composites

Gajanan S. Bhat ............................................................. 799

In-Plane Movement of Liquids Through Curved Fabric Structures, I: Experimental Approach

H. L. Friedman, R. A. Johnson, B. Miller, D. R. Salem,
and R. S. Parnas ............................................................ 817

Simplified Micromechanics of Two-Dimensional Plain Woven Fabric Composites

Subodh K. Mital, Pappu L. N. Murthy, and Christos C. Chamis ........... 829

VOLUME 2

INTELLIGENT MANUFACTURING AND MATERIAL PROCESSING

Introduction

John P. Coulter and M. Çengiz Altan ..................................... 841

Intelligent Processing

Process Model Correlations for Force Controlled Chamfering

Gloria J. Wiens, Laxmi P. Musunur, and Thomas W. Engel ............. 843

Thermal Modeling of Deposit Solidification in Uniform Droplet Spray Forming

Paul Acquaviva, Chen-An Chen, Jung-Hoon Chun,
and Teiichi Ando ........................................................... 857

Non-Circular Laser-Assisted Tape Winding

Chistoph M. Pistor and Selçuk I. Güçeri ................................ 875
Dynamic Correlation Between Weld Pool Shape and Weld Penetration
Yu M. Zhang, Lin Li, Radovan Kovacevic .................................................. 883
Intelligent Process Monitoring for Carbon Fiber/Epoxy
Composite Manufacturing
John P. H. Steele, Deepa Mishra, and Chidambar Ganesh ......................... 899
Intelligent In-Process Optimization of Material Characteristics in
Scan Welding
Choralos C. Doumanidis and Nikolaos Fourikias ........................................ 911
Intelligent Processing and Control Methods for Tape Casting of
Powder Materials
John J. Bausch, III and Marina R. Pascucci ............................................. 921
Optimization of Autoclave Curing of Composites: An Expert
System Approach
Elizabeth Watkins, Susan C. Mantell, and Peter R. Cirisciolo ...................... 931
Expert System Control of Inert Gas Atomization
Stephen D. Ridder, Stephen A. Osella, Pedro I. Espina,
and Frank S. Biancianiello ........................................................................ 947
Reliability and Risk Analysis of Process Models
Andrew Kusiak and Armen Zakarian .......................................................... 959

Process Monitoring
Real-Time Embedded Electronic Sensing of Resin Flow During
Injection Molding
Evelitsa E. Higuerey and John P. Coulter ................................................. 981
Advances in Resin Transfer Molding Flow Monitoring Using SMART
Weave Sensors
Bruce K. Fink, Shawn M. Walsh, Daniel C. DeSchepper,
John W. Gillespie, Jr., Roy L. McCullough, Roderic C. Don,
and Brian J. Waibel .................................................................................. 999
FDEMS Sensing for Automated Intelligent Processing of Polyimides
D. E. Kranbuehl, D. K. Hood, J. Rogozinski, R. Barksdale,
Alfred C. Loos, and Doug McRae ............................................................ 1017
Bidirectional Die Shoulder Force Transducer for Application in Sheet
Metal Forming
Stephen K. Kernosky, James R. Michler, Klaus J. Weinmann,
Vandana D. Rao, and Ahmed R. Kashani ............................................... 1031
Monitoring Tool Wear/Fracture With a Catastrophe Model
Zhenbi Luo, Yiming (Kevin) Rong, and Yaoxiang Zhu ............................. 1047

Processing Science
Experimental Determination of an Effective Heat Transfer Coefficient
for Continuously Cast Metal During the Cooling Process
E. Bigzadeh, S. Mergui, F. Mignano, and J. Brief ...................................... 1055
In-Process Evaluation of Surface Profiles in Hard Turning
D. Y. Yang and Alex Hsiao ......................................................................... 1079
Modelling TiN Deposition Dynamics for Control of CVD
M. A. Gevelber, Manuel Toledo-Quinones, Michael Bufano,
and M. Can Deniz .................................................................................... 1093
A Picture-Frame Intraply Shearing Test for Sheet-Forming of
Composite Materials
Garrett B. McGuinness, Rory A. Canavan, Tara A. Nestor,
and Conchur M. O Bradaigh ................................................................. 1107
Numerical Modelling of Single-Curvature Composite Materials
Sheet-Forming
Stephen P. McEntee and Conchur M. O Bradaigh .................................... 1119
Surface Finish Prediction in High-Speed Machining Using Fuzzy
Logic Theory
E. T. Baumgartner, M. K. Kamatala, and K. S. Moon .............................. 1133
