Electromagnetic Environments
and
Consequences

Proceedings of the European Electromagnetics International Symposium
on
Electromagnetic Environments and Consequences

EUROEM 94
Bordeaux - France, May 30 31, June 1 2 3, 1994

PART 2

Edited by

Dominique, Joseph SERAFIN   Centre d'Etudes de Gramat - Gramat - France
Didier, Pierre DUPOUY        Centre d'Etudes de Gramat - Gramat - France
Jean-Charles BOLOMEY         Université de Paris XI - SUPELEC - Gif/Yvette - France

11.3 Fiber-Optic Data Links for Electromagnetic Pulse and High Power Microwave Testing:
B.T. BENWELL .......................................................... 1081
11.4 Realization of a Measurement System for the Simultaneous Determination of the Six Components of an Electromagnetic Near Field for the Frequencies from 9 KHz to 70 MHz:
A. GILLE, K.-H. GONSECHREK, S. HELMERS, J.L. TER HASEBORG .............. 1089
11.5 Broadband and Ultrasensitive Electromagnetic Sensors for NEMP, EMC and Lightning: Theory and Experimental Results:
F. PAMPALONE, G. EUMURIAN ........................................ 1097
11.6 Infrared Images of Scattered Electromagnetic Fields from Scale-Model Aircraft:
J.D. NORGARD, J. SADLER, R. SEGA, W. PRATHER .......................... 1105
11.7 Time Domain Shielding Effect Measuring Techniques:
G. STRICKER, Ch. PFEILER, L. JENDERNALIK .................................. 1113
11.8 A Fully Automated Shielding Effectiveness Monitoring System for Continuous Operation Implementing a Digital Synchronous Detector Receiver:
F. BROYDE, E. CLAVELIER ............................................. 1121
11.9 Microwave Characterization of Materials Having High Dielectric Constant by Use of Time Domain Analysis:
T-T NGUYEN, G. MAZE-MERCEUR, J. GARAT ................................ 1129
11.10 A Model with Resonators Applied to the Characterization of Heterogenous Materials:
S. LEFRANCOIS, D. PASQUET, G. MAZE-MERCEUR .......................... 1137
11.11 High Microwave Pulsed Power Measurement Using Hot Electron Phenomenon in Semiconductors:
Z. KANCLERIS, M. DAGYS, V. ORSEVSKI, R. SIMNISKIS ...................... 1145

Chapter 12: Simulation Techniques

12.1 Methods and Means of EMP Effects Investigations:
Y.V. PARFENOV ............................................................. 1153
12.2 Horizontally Polarized Dipole II Electromagnetic Pulse Simulator:
R.R. BLUNDELL ............................................................. 1159
12.3 Modifications to the 1-MV EMP Simulator at WWD BW:
H. SCHILLING, J. SCHLÜTER, K. NIELSEN, T. NAFF, J. HAMMON ................. 1166
12.4 Behaviour and Optimization of Transmission Line NEMP Simulators:
O. DAFIF, A. REINEIX, B. JECKO, J-J. RODARO .................................. 1173
12.5 On the Use of GTEM Cells in EMP-Threat Testing:
J.M. JANISZEWSKI, T.W. WIECKOWSKI ...................................... 1181
12.6 Using Low Level CW Testing in the Development of an Integrated Approach to Aircraft Testing:
N.J. CARTER .............................................................. 1188
12.7 Using Low Level CW Illumination to Predict High Power Microwave Effects:
  C.D. TAYLOR, S.L. LANGDON, S.J. GUTIERREZ ........................................... 1199

12.8 Exploratory Investigation of EMP Environment and Metrological Support:
  L.N. IVANOV .................................................................................. 1210

12.9 Electromagnetic Diagnosis Technique Using Spherical Near-Field Probing:
  F. THEROND, J-Ch. BOLOMEY, N. JOACHMOWICZ, F. LUCAS ....................... 1218

12.10 Flat Broadband Absorbers: Reflectivity Vs Site Attenuation:
  F. MAYER .................................................................................. 1227

12.11 Optimizing Ferrite Tile Installations for Shielded Enclosure Anechoic Upgrades:
  E.F. DYER .................................................................................. 1237

12.12 High Frequency Direct Drive Generation Using White Noise Sources:
  S. FRAZIER, K. SEBACHER, D. LAWRY, W.D. PRATHER, G.I. HOFFER, ............ 1243
  S. KOKOROWSKI, D.P. McLEMORE ...................................................... 1243

12.13 Double bulk Current Injection: a Possible Substitute to Field-to-Wire Coupling:
  M. KLINGLER, M. SZELAG, M. HEDDEBAUT ........................................... 1249

12.14 Compact Travelling-Wave ESD Simulator:
  L.M. MACLEOD, K.G. BALMAIN ......................................................... 1257

12.15 On the Conditions of Evaluating the Shielding Effectiveness in the Planewaves Region by Means of Coaxial Measuring Cells with TEM Mode:
  M.Th. BADIC, M-J. MARINESCU, C. PAUN ............................................. 1265

12.16 Practical Applications of EMC Simulations in Product Design:
  A.D. SLEEPER ............................................................................. 1275

Chapter 13: Statistical Techniques

13.1 Statistical Electromagnetic Field in Reverberating Chambers:
  P. CORONA, G. FERRARA, M. MIGLIACCI ........................................... 1285

13.2 A Rationale for Developing and Using STEM (Statistical Electromagnetics):
  E.K. MILLER ............................................................................. 1293

13.3 Indoor Propagation: a Statistical Approach:
  M.L. TOBIN, J.E. RICHIE ................................................................. 1301
Chapter 14: Signal Processing

14.1 On a Certain Filtering Approach to Target Discrimination:
S.L. PRIMAK, S.S. BRISKIN ................................. 1311

14.2 Investigations on the Equivalence of EMC Evaluations in Time and Frequency Domain Using Rule-Based Modelling:
L. JENDERNALIK, G. STRICKER, Ch. PFEILER .................. 1317

14.3 Waveform Bounding and Combination Techniques for Direct Drive Testing:
E. PARIMUHA, S. FRAZIER, M. TUMMALA, Th. F. WINNENBERG ............ 1325

14.4 EMP Signal Modal Analysis:
S. YVETOT, J-P. PERCAILLE, C. MAILHES ......................... 1333

14.5 Detection of Random Pulsed Processes in Locally Stationary Noise Under a Parametric a priori Uncertainty:
O.M. ISAEVA ............................................. 1341

14.6 A Least Absolute Values Method for Adaptive Spatial Suppression of Interference in a Low Frequency Receiver:
P.V. GOREV ............................................. 1347

14.7 On the Use of Minimum Phase Algorithm for Determining Response to UWB Sources:
S.H. GURBAXANI, V.E. MARTINEZ, C-S. D. LIN, T.S. BOWEN ............ 1358

Chapter 15: Aircrafts and Spacecrafts

15.1 Assessing Aircraft Survivability to High Frequency Transient Threats:
E.M. PARIMUHA, S.J. FRAZIER, W. PRATHER, M. ANTLEY, D. McLEMORE .... 1361

15.2 Conception and Modelling of Aircraft Electromagnetic Simulators:
Y. RAINGEAUD, J. PAILLOL, J. ANDRIEU, A. REINEIX, B. JECKO ............ 1367

15.3 Development of an Embedded Terminal Protection Device (TPD) Tester:
L.O. HOEFT, T.M. SALAS, W.D. PRATHER ............................ 1376

15.4 Automatic Test Bench for Terminal Protection Devices on Hardened Structures:
Y. GALLETY, J.C. REMAUD, J.L. LAIR ............................. 1384

15.5 HIRF-Testing of the SAAB 2000 & the JAS 39 Gripen Aircraft:
H. FRENNBERG, T. MARTIN, M. ERIKSSON, M. BÄCKSTRÖM, B. WAHLGREN .... 1392

15.6 E-6A Hardness Assurance, Maintenance and Surveillance Program:
W. DEPASQUALE, B. LUBOSCH, J. HAINES, M. MALLORY .................. 1401

15.7 A Simulation Tool for ESD System Level Analysis on Board Space Platforms:
L. INZOLI, F. SVELTO, M. BANDINELLI, F. BESSI, S. CHITI, L. GIORGI ........ 1405

15.8 Electrostatic Discharge Plasma Propagation and Interaction Modelling:
A. SOUBEYRAN, L. TALAALOUT, J.P. ESTIENNE ......................... 1412
Chapter 16: Antennas and R.C.S.

16.1 A Numerical Study of the PxM Radiator:
N.H. YOUNAN, B.L. COX, C.D. TAYLOR, W.D. PRATHER ............... 1455

16.2 Induced Currents on Loaded and Shielded Antennas:
M. COURTOT ........................................... 1463

16.3 Susceptibility of Log Periodic Dipole Arrays:
R. MOINI, R. AGHAJAFARI, A. TAVAKOLI ................................. 1470

16.4 A New Integral Equation Method for Thin-Wire Curvilinear Antennas Designing:
D.M. VELICKOVIC, D.M. PETKOVIC .................................. 1478

16.5 Optimizing the Radiated Pulse of Transient Antennas:
S.M. BOOKER, A.P. LAMBERT, P.D. SMITH ............................ 1484

16.6 Time Domain Near Field Antenna Measurements:
S.P. SKULKIN .............................................. 1492

16.7 Radiation of Nonsinusoidal Waves by Aperture Antennas:
S.P. SKULKIN, V.I. TURCHIN ........................................... 1498

16.8 Mutual Coupling in a Finite Planar Array of Circular Microstrip Antenna:
P.S. BHATTACHARJEE .............................................. 1505

16.9 On Board Antennas Modelled by Using Simple Radiating Elements:
M.F. CATEDRA, M. DOMINGO, R.P. TORRES ............................ 1508

16.10 2D and 3D Finite Element Formulation for High Power Microwave Antennas:

16.11 A MM-GTD Analysis of Coupling & Radiation of Antennas on Resonant Size Bodies Modeled by Parametric Surfaces:
M.F. CATEDRA, L. VALLE, F. RIVAS ...................................... 1521

16.12 Indoor Multipath Fading Reduction with an Adaptive Phased Array:
G.Y. DELISLE, T.A. DENIDNI ........................................... 1529

16.13 The Receiver Antenna Pattern Effect in Multipath Propagation Environment:
M.G. SANCHEZ, L. DE HARO, A.G. PINO, M. CALVO .................. 1537
Chapter 17: Transient Radar

17.1 Design of the "Mother Wavelet" - A Zero Mean Pulse of Finite Support in Time-Frequency Plane:
   T.K. SARKAR, S.M. NARAYANA, H. WANG, M. WICKS, M. SLAZAR-PALMA

17.2 Solution of Maxwell's Equations by Using Wavelet Concepts:
   T.K. SARKAR, L.E. GARCIA-CASTILLO, M. SALAZAR-PALMA, T. ROY, R. ADVE

17.3 K-Space Imaging Algorithms Applied to UWB SAR:
   S.R. CLOUDE, A. MILNE, P.D. SMITH, P. BELLAMY, C. THORNHILL

17.4 Ultra Wideband Radar: Current and Future Techniques:
   P.R. BELLAMY

17.5 Optimal Polarization States of Simple and Compound Targets:
   V. SAMPATH, G.Y. DELISLE, P. LUNEAU

17.6 Simple Analysis of Ultrashort Pulse Interaction with Matter:
   H. WILHELMSSON, J-H. TROMBERT, J-F. ELOY

17.7 Transient Scattering of EM-Pulses by Simple and Complex Targets in the Combined Time-Frequency Domain Using Impulse Radar:
   H.C. STRIFORS, S. ABRASHAMSON, B. BRUSMARK, G.C. GAUNAUD

Chapter 18: Electromagnetic Methods in Environmental Remediation

18.1 Magnetometric Detection of Buried Objects:
   K.F. CASEY, B.A. BAERTLEIN

18.2 Electromagnetic Methods for In-Situ Site Remediation:
   P.F. CARPENTER, R.S. KASEVICH

18.3 A Microwave Tomographic Equipment for Detecting Buried Objects:
   Ph. GARREAU, G. COTTARD, P. BERTHAUD, J.Ch. BOLOMEY
Chapter 19: Numerical Applications

19.1 A Method of Moments Strategy for Calculating the Radiated Electromagnetic Field from Complex Multilayer Boards:
   **U. KELLER, S. ÖING, M. KÜNNE** ........................................ 1673

19.2 Fields Distribution Inside a Closed Guide Using the Finite Difference Method:
   **H. ABDALLA Jr, R.N. ALMEIDA Jr., A.J.M. SOARES** ................. 1681

19.3 EMC in SMPS: a CAD Tool:
   **J.E. FERNANDEZ, S. PIEDRA, J. BASTERRECHEA, M.F. CATEDRA** .... 1689

19.4 Electromagnetic Modeling of a Power Module Case:
   **E. CLAVEL, J-L. SCHANEN, J. ROUDET** .......................... 1697

19.5 A Reliable Method to Study Cylindrical Waveguide TTC Antennas with Apertures:
   **M.F. CATEDRA, J. BASTERRECHEA, J. DE FRUTOS, S. PIEDRA** ...... 1705

19.6 A GTD Approach to Obtain Radiation Patterns of Antennas on Bodies Modelled with NURBS Surfaces:
   **M.F. CATEDRA, J. SAIZ, J. PEREZ, M.T. LOPEZ, O. CONDE, R. TORRES** 1712

19.7 A Numerical Code to Analyze Wire Antennas on Complex Structures-Modelled with NURBS Surfaces Using the Method of Moments:
   **M.F. CATEDRA, F. RIVAS, L. VALLE** ................................ 1719

19.8 Study of Scattering and Radiation by Arbitrary Bodies of Revolution with CG-FFT Method:
   **M.F. CATEDRA, S. PIEDRA, J. BASTERRECHEA** .................... 1727

19.9 Analysis of the Diffracting Centers of a Complex 3-Dimensional Structure:
   **I. DE LEENEER, E. SCHWEICHER, A. BAREL** .......................... 1735

19.10 Two-Dimensional Methods for Calculation of Magnetic Field Transmission Lines & Comparison with Measurement Values:
    **LUIS ORTIZ N., R. FIGUEROA B.** .................................... 1740

19.11 Numerical Modeling of Lightning Protection Systems:
    **O. DAGUILLON, A. KARWOWSKI, A. ZEDDAM** ........................ 1746

19.12 Indoor Electromagnetic Wave Propagation Measurements and Modelling:
    **J. WIART** ................................................................. 1754

19.13 Computer Aided Analysis of Infinite Waveguides:
    **D. MULLER, L. NICOLAS, A. NICOLAS** ............................ 1762

19.14 Evaluation of Vane Structures for Application in Miniature Traveling-Wave Tubes:
    **A.H. QURESHI, T.M. WALLETT** ..................................... 1768

19.15 Modeling and Analysis of a Novel Tunnel Ladder Millimeter-Wave Structure:
    **A.H. QURESHI, T.M. WALLETT** ..................................... 1776
Chapter 20: Hardening and Protection

20.1 NEMP Hardening - the Hardness Verification Procedure:
H. GRAUBY, J-C. BIOTTEAU ........................................ 1787

20.2 Dedicated Measurement System for Qualification and Maintenance of Shielding Enclosures:
J.Y. TOUCHAIS .......................................................... 1793

20.3 Correlation Between Spectral Attenuation Data of Shelters Obtained with a New Fast EMP-Simulator and From Continuous Wave Experiments (MIL-STD 285):
G.J.J. REMKES, A. KRANHAND ..................................... 1800

S.A. CLARK, Y.M. LEE, W.J. SCOTT ............................... 1806

20.5 Physical Analysis and Optimisation of Overvoltage Protection Crowbar Semiconductor Devices:
J-Y. DEPEE, R. EHLINGER, J-P. CHANTE ........................ 1814

20.6 Transient Response Analysis of Gas Arresters:
M.S. SARTO, J.L. TER HASEBORG ................................. 1822

20.7 SPICE Model of Excited Transmission Lines with Nonlinear Loads:
M. FELIZIANI, S. CELOZZI, K. BORGEEST ......................... 1830

20.8 Simulating the Frequency Response of Non-Linear Protection Circuits with Space:
K. BORGEEST, J.L. TER HASEBORG, F. WOLF ................. 1838

20.9 Lightning and EMP Protection for Analog and Digital Signals:
G. GIRARD, B. ARZUR .................................................. 1846

20.10 Shielding Effectiveness of Shielded Harnesses Terminated by Various Grounding Schemes:
C. GOLDSTEIN ............................................................ 1854

20.11 Microwave Interference Suppression Through Absorption:
N.K. AGRAWAL, C. KUMAR M.V., S.C. GUPTA .................. 1862

20.12 EMI Control by Software for a RF Communication System:
G.K. SAHA, G.K. DEB .................................................. 1870

Chapter 21: Biological Effects

21.1 Measurements of Electromagnetic Fields at the Workplace:
Aluminium Reduction Plant and Aluminium Casthouse (Electromagnetic Casting):
A.F. STEINEGGER ...................................................... 1879

21.2 Microwave Exposure of Forest Trees and Lichens:
P. SCHMUTZ, J.B. BUCHER, D. TARJAN, J. SIEGENTHALER, C. STAEGGER, M. URECH ............................... 1887
21.3 Effect of Low Level Radio Frequency Fields Modulated at Brain Wave Frequency on ATPase System of Developing Rats:
K.K.KUNJILWAR, J. BEHARI ................................................ 1895

21.4 Ionic Conductivity as a Mechanism of Microwave Absorption by Biological Membranes:
G.I. OVTCHINNIKOVA, J.F. KOROSTELEVA .......................... 1900

21.5 Frequency Dependent Effects of PEMF on Cyanobacteria:
N. PEKARIC-NADJ, Z. OBERHT, V. DOSEN ............................ 1908

21.6 Rotational Electromagnetic Field Around Transmission Lines:
N. PEKARIC-NADJ, M. PRSA, V. KOJIC, V. DRAGIC .............. 1911
